Item 1. Description of Business.

BUSINESS DEVELOPMENT

The InterGroup Corporation ("InterGroup" or the "Company") is a Delaware corporation formed in 1985, as the successor to Mutual Real Estate Investment Trust ("M-REIT"), a New York real estate investment trust created in 1965. The Company has been a publicly-held company since M-REIT's first public offering of shares in 1966 and has been a reporting company pursuant to Section 12(g) of the Securities Exchange Act of 1934 since that time.

The Company was organized to buy, develop, operate, rehabilitate and dispose of real property of various types and descriptions, and to engage in such other business and investment activities as would benefit the Company and its shareholders. The Company was founded upon, and remains committed to, social responsibility. Such social responsibility was originally defined as providing decent and affordable housing to people without regard to race. In 1985, after examining the impact of federal, state and local equal housing laws, the Company determined to broaden its definition of social responsibility. The Company changed its form from a REIT to a corporation so that it could pursue a variety of investments beyond real estate and broaden its social impact to engage in any opportunity which would offer the potential to increase shareholder value within the Company's underlying commitment to social responsibility, which it redefined to encompass investments in any area which can have a socially redeeming value and promote the establishment of a fair, equal and better society.

The Company's principal sources of revenue have been, and continue to be, derived from the operations of its multi-family residential properties, from the sales and disposition of its real property assets, from the operations of its majority owned subsidiary, Santa Fe Financial Corporation ("Santa Fe"), and from the investment of its cash and securities assets. Santa Fe is a public company (OTCBB: SFEF).

BUSINESS OF ISSUER

The Company's principal business is the ownership and management of real estate. Properties include twenty-three apartment complexes, a hotel, two commercial real estate properties, and two single-family houses as a strategic investment. The properties are located throughout the United States, but are concentrated in Texas and Southern California. The Company also has investments in unimproved real property that is held for sale or development. The Company acquires its investments in real estate and other investments utilizing cash, securities or debt, subject to approval or guidelines of the Board of Directors. The Company also invests in income-producing instruments, equity and debt securities and will consider other investments if such investments offer growth or profit potential. See Item 2 for a description of the Company's current investments in real estate and its investment policies concerning real property and marketable securities.

Through its controlling interest in Santa Fe, the Company's business also includes a 565-room hotel located in the Financial District of San Francisco, California. The hotel, commonly known as the Holiday Inn Select Downtown & Spa (the "Hotel") is owned by Justice Investors, a California limited

Edgar Filing: INTERGROUP CORP - Form 10KSB

partnership ("Justice" or the "Partnership"), of which Santa Fe's subsidiary, Portsmouth Square Inc. ("Portsmouth") is a 49.8% limited partner and serves as one of two general partners. Evon Garage Corporation ("Evon") is the other general partner of Justice and serves as the managing general partner.

-3-

Since 1998, the Hotel had been leased by Justice to Felcor Lodging Trust, Inc. ("Felcor", NYSE: FCH). Pursuant to a settlement agreement with Felcor, that lease was terminated, effective June 30, 2004, and the Partnership assumed the role of owner/operator with the assistance of a third party management company. The Hotel is still being operated as a Holiday Inn Select hotel pursuant to a short-term franchise agreement, while the Partnership seeks a new brand affiliation. Santa Fe's operations also include an interest in two apartment complexes and a marketable securities portfolio.

For further information see Item 2 Description of Properties and Item 6 Management's Discussion and Analysis of Financial Condition and Results of Operations and Notes to Consolidated Financial Statements.

COMPETITION

All of the properties owned by the Company are in areas where there is substantial competition. However, management believes that its apartments, hotel, and commercial properties are generally in a competitive position in their respective communities. The Company intends to continue upgrading and improving the physical condition of its existing properties and will consider selling existing properties, which the Company believes have realized their potential, and re-investing in properties that may require renovation but that offer greater appreciation potential.

The Hotel had traditionally enjoyed a favorable year-round occupancy rate, but both occupancy and average daily room rates have suffered since fiscal year ended June 30, 2002. The San Francisco hotel market has not yet recovered from the impact of the terrorist attacks of September 11, 2001 and the downturn in the Bay Area economy due, in part, to the failure of many internet and technology based companies. Increased competition from newer and more upscale properties have also contributed to lower room rates as hotel operators struggle to obtain occupancy.

Management believes that the Hotel is now in a very challenging market, with many competitors better positioned to attract the business traveler and tourists. As part of the efforts to meet this increased competition, a new health and beauty spa was built on the lobby level of the Hotel and new meeting rooms were constructed on the fourth floor during the fiscal year ended June 30, 2003. By terminating the Hotel Lease with Felcor, and taking over the operations of the Hotel, the Partnership now has greater ability to direct the future of that property. The Hotel is now approximately 25 years old, with no major renovation having been made to the property during that time. The Partnership is committed to make substantial improvements to the Hotel within the next two years and to attract a new upscale brand to return the property to a competitive place in the market.

EMPLOYEES

As of June 30, 2004, the Company had a total of 10 full-time employees in its corporate office. Effective July 2002, the Company entered into a client service agreement with Administaff Companies II, L.P. ("Administaff"), a professional employer organization serving as an off-site, full service human

Edgar Filing: INTERGROUP CORP - Form 10KSB

resource department for its corporate office. Administaff personnel management services are delivered by entering into a co-employment relationship with the Company's employees. There are also approximately 38 employees at the Company's properties outside of the State of California that are subject to similar co-employment relationships with Administaff. The employees and the Company are not party to any collective bargaining

agreement, and the Company believes that its employee relations are satisfactory.

On May 3, 2004, Justice entered into a Settlement Agreement with Felcor to resolve disputes regarding certain obligations of Felcor and others under the terms of the Hotel Lease. Pursuant to the terms of the Settlement Agreement, Felcor was required to pay to Justice \$5,000,000 towards the costs of capital repairs, replacements and improvements necessary to place the hotel in the condition required by the Hotel Lease at the end of its term. Felcor also agreed to transfer to Justice and terminate its leasehold estate and its option right under the Hotel Lease, effective June 30, 2004. In addition, the parties to the Settlement agreed to mutual releases and to cooperate for a smooth transition of the operations of the Hotel. The Settlement Agreement was fully effectuated as of June 30, 2004.

To assist in the operations of the Hotel, Justice entered into a Management Agreement with Dow Hotel Company, LLC, a Washington limited liability company, effective July 1, 2004. The Management Agreement is for a term of 10 years, with an option of Justice to extend the original term for another 10 year period. The Management Agreement provides for a base management fee to Dow of up to 2.5% of annual gross operating revenues of the hotel and incentive fees not to exceed, in the aggregate, 4% of gross operating revenues. The Management Agreement can be terminated by Justice upon at least 60 days written notice, subject to certain termination fees during the first year of the Agreement.

The Partnership leases the garage portion of the Hotel to Evon. The garage lease provides for a monthly rental of sixty percent (60%) of gross parking revenues with a minimum rent of \$21,750 per month. That lease expires in November 2010. The lessee is responsible for insurance, repairs and maintenance, utilities and all taxes assessed against the improvements to the leased premises. The garage is operated by Ampco Parking pursuant to a sublease agreement with Evon.

During July 2002, Justice entered into a lease with Tru Spa, LLC, which was amended effective January 1, 2004. The lease premises consist of approximately 5,400 square feet of space on the lobby level of the Hotel for the construction and operation of a health and beauty spa. The term of the lease is for ten years commencing with the opening of the spa on June 1, 2003, with a five year option to extend the term. The spa lease provides for minimum monthly rent of \$11,667, additional rent of \$2,072 (up to a total of \$250,000 to help defray certain relocation construction costs) and other

tenant fees.

REAL ESTATE INVESTMENT POLICIES

The most significant investment activity of the Company has been to acquire, renovate, operate, and when appropriate, sell income-producing real estate. Through its marketable securities portfolio the Company has indirectly invested in additional real estate related investments such as hotels and office buildings.

The Company is presently looking for new real estate investment opportunities and plans to continue to concentrate its real estate investments in developed properties. The acquisition of new real estate investments will depend on the Company's ability to find suitable investment opportunities and the availability of sufficient financing to acquire such investments. The Company plans to borrow funds to leverage its investment capital. The amount of the mortgage debt will depend on a number of factors including, but not limited to, the availability of financing and the ability of projected property cash flows to support its operations and debt service.

MARKETABLE SECURITIES INVESTMENT POLICIES

In addition to real estate, the Company also invests from time to time in income producing instruments, corporate debt and equity securities, mortgage backed securities, securities issued by REIT's and other companies which invest primarily in real estate.

-11-

The Company's securities investments are made under the supervision of a Securities Investment Committee of the Board of Directors. The Committee currently has three members and is chaired by the Company's Chairman of the Board and President, John V. Winfield. The Committee has delegated authority to manage the portfolio to the Company's Chairman and President together with such assistants and management committees he may engage. The Committee has established investment guidelines for the Company's investments. These guidelines presently include: (i) corporate equity securities should be listed on the New York or American Stock Exchanges or the Nasdaq NMS Market; (ii) securities should be priced above \$5.00 per share; and (iii) investment in a particular issuer should not exceed 5% of the market value of the total portfolio. The investment policies do not require the Company to divest itself of investments, which initially meet these guidelines but subsequently fail to meet one or more of the investment criteria. Non-conforming investments require the approval of the Securities Investment Committee. The Committee has in the past approved non-conforming investments and may in the future approve non-conforming investments. The Securities investment Committee may modify these guidelines from time to time.

The Company's investment portfolio is diversified with 120 different equity securities. The Company has three individual positions that comprise of more than 5% of the equity value of the portfolio with the largest being 10.4% of the value of the portfolio. The amount of the Company's investment in any particular issue may increase or decrease, and additions or reductions to its securities portfolio may occur, at any time. While it is the internal policy of the Company to limit its initial investment in any single equity to less than 5% of its total portfolio value, that investment could eventually exceed 5% as a result of equity appreciation or reductions in other positions. Marketable securities are stated at market value as determined by the most recently traded price of each security at the balance sheet date. As of June 30, 2004, the market value of the Company's marketable securities was \$66,610,000.

The Company may also invest, with the approval of the Securities Investment Committee, in unlisted companies, through private placements. Those investments in non-marketable securities are carried at cost on the Company's balance sheet as part of other investments and are reviewed for impairment on a periodic basis.

As part of its investment strategies, the Company may assume short positions

Edgar Filing: INTERGROUP CORP - Form 10KSB

in marketable securities. Short sales are used by the Company to potentially offset normal market risks undertaken in the course of its investing activities or to provide additional return opportunities. As of June 30, 2004, the Company had obligations for securities sold (equities short) of \$21,585,000 and had no naked short positions.

In addition, the Company may utilize margin for its marketable securities purchases through the use of standard margin agreements with national brokerage firms. The use of available leverage is guided by the business judgment of management and is subject to any internal investment guidelines, which may be imposed by the Securities Investment Committee. The margin used by the Company may fluctuate depending on market conditions. The use of leverage could be viewed as risky and the market values of the portfolio may be subject to large fluctuations. As of June 30, 2004, the Company had a margin balance of \$22,445,000 and incurred \$1,437,000 and \$210,000 in margin interest expense during the fiscal years ended June 30, 2004 and June 30, 2003, respectively.

-12-

On July 18, 2003, the disinterested members of the respective Boards of Directors of the Company's subsidiary, Santa Fe and Santa Fe's subsidiary, Portsmouth, established a performance based compensation program for the Company's CEO, John V. Winfield, to keep and retain his services as a direct and active manager of the securities portfolios of those companies. On January 12, 2004, the disinterested members of the Securities Investment Committee of InterGroup also established a performance based compensation program for Mr. Winfield, which was ratified by the Board of Directors. The terms of that compensation arrangement is discussed in detail in Item 10 "Executive Compensation" of this Report. During fiscal years ended June 30, 2004 and June 30, 2003, the Company and its subsidiaries paid \$2,077,000 and \$654,000 respectively, to the Company's CEO as performance based compensation related to the management of the securities portfolios.

As Chairman of the Securities Investment Committee, the Company's President and Chief Executive officer, John V. Winfield, directs the investment activity of the Company in public and private markets pursuant to authority granted by the Board of Directors. Mr. Winfield also serves as Chief Executive Officer and Chairman of Santa Fe and Portsmouth and oversees the investment activity of those companies. Depending on certain market conditions and various risk factors, the Chief Executive Officer, his family, Santa Fe and Portsmouth may, at times, invest in the same companies in which the Company invests. The Company encourages such investments because it places personal resources of the Chief Executive Officer and his family members, and the resources of Santa Fe and Portsmouth, at risk in connection with investment decisions made on behalf of the Company.

Item 6. Management Discussion and Analysis of Financial Condition and Results of Operations.

INTRODUCTION

The discussion below and elsewhere in the Report includes forward-looking statements about the future business results and activities of the Company, which, by their very nature, involve a number of risks and uncertainties. When used in this discussion, the words "estimate", "project", "anticipate" and similar expressions, are subject to certain risks and uncertainties, such as

Edgar Filing: INTERGROUP CORP - Form 10KSB

the impact of terrorism and war on the national and international economies, including tourism and the securities markets, changes in general economic conditions, local real estate markets, and competition, as well as uncertainties relating to uninsured losses, securities markets, and litigation, including those discussed below that could cause actual results to differ materially from those projected. Readers are cautioned not to place undue reliance on these forward-looking statements. The Company undertakes no obligation to publicly release the results of any revisions to those forward-looking statements, which may be made to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

RESULTS OF OPERATIONS

For the Year Ended June 30, 2004 as compared to June 30, 2003.

The Company's net income increased to \$3,071,000 for the year ended June 30, 2004 from \$2,567,000 for the year ended June 30, 2003. This was primarily due to the increase in income from investment transactions and the increase in the equity in net income of Justice Investors. The increase was partially offset by the increase in the loss from real estate operations.

The loss from real estate operations increased to \$1,695,000 from \$1,049,000 as the result of lower rental income and higher operating expenses. Rental income decreased to \$13,757,000 from \$14,148,000 due to higher vacancies and higher rent concessions given to tenants as a result of a soft rental market across the country. Rental rates and rental concessions are determined by market conditions in the areas in which the Company operates in. The low interest environment over the last three years promoted a boom in the single-family housing market in which existing and prospective tenants had the option to purchase a home over renting an apartment. As the result of this environment, apartment operators around the country were forced to reduce rental rates as well as provide higher rental concessions in order to maintain occupancy. The result was the reduction in rental income. Additionally, the Company's 30-unit apartment complex located in Los Angeles, California was shut down for the entire year to undergo a major renovation which reduced rental income. The reduction in rental income was partially offset by the purchase of the 358-unit apartment in Las Colinas, Texas and the leasing of the commercial building in Los Angeles, California.

Property operating expenses increased to \$7,164,000 from \$6,873,000 primarily due to the increase in insurance expense on all of its properties and the increase in repairs and maintenance and utilities expenses on several of the Company's out-of-state properties. The increase was partially offset by a reduction in property related salary expenses. The increase in insurance expense is consistent with the increase in insurance premiums for all apartment operators subsequent to the September 11, 2001 terrorist attacks.

-16-

Mortgage interest expense increased to \$3,929,000 from \$3,394,000 as the result of higher mortgage balances due to the refinancing of mortgages on properties located in Houston, Texas, Morris County, New Jersey, and one of its Austin, Texas properties in the latter part of fiscal 2003. The increase was also due to the new \$20,000,000 mortgage related to the purchase of the Las Colinas, Texas property.

Equity in net income of Justice Investors increased to \$3,136,000 in fiscal

Edgar Filing: INTERGROUP CORP - Form 10KSB

2004 from \$1,404,000 in fiscal 2003 primarily as a result of an increase in Partnership revenues to \$9,369,000 from \$3,971,000, due to two nonrecurring payments to Justice during the current fiscal year, partially offset by increased partnership costs. In May of 2004, a \$5,000,000 settlement payment was made to Justice from the hotel lessee to resolve disputes regarding certain obligations of Felcor and others under the terms of the Hotel Lease. That settlement payment is being held in a separate partnership account and will be applied towards the costs of capital repairs, replacements and improvements necessary to place the hotel in the condition required by the Hotel Lease at the end of its term. The Partnership expects to utilize all of the settlement proceeds for such costs by its December 31, 2004 year end, which may impact the Company's equity in net income of Justice Investors for fiscal 2005. Felcor also agreed to transfer to Justice and terminate its leasehold estate and its option right under the Hotel Lease, effective June 30, 2004. In addition, Justice received a payment in December 2003 from the hotel lessee in the amount \$296,000 for part of the replacement costs of the sloped window system of the Hotel, which was recorded as other income by Justice. The Partnership incurred much greater costs and expenses in fiscal 2004 of \$2,507,000 compared to \$873,000 in fiscal 2003. That increase was attributable to increased partnership costs during the current fiscal year for consultants, experts and legal services relating the partnership's enforcement of the lessee's obligations and termination of the Hotel Lease, renovation and repositioning of the Hotel, and additional depreciation and interest costs related to the build-out of the new spa and meeting rooms in the Hotel and other capital improvements.

Average daily room rates for the Hotel increased modestly to approximately \$92 in fiscal 2004 from approximately \$90 in fiscal 2003, while average monthly occupancy rates increased to approximately 71% from approximately 67%. Many factors continued to significantly impact the operations of the Hotel in fiscal 2004. Unlike other areas in California, the Bay Area has been especially slow to recover from the devastating impact that the terrorist attacks of September 11, 2001, had on tourism and the hospitality industry. The continued weakness in the Bay Area due to the failure of numerous internet and technology companies, has also resulted in a decrease in business travel and a reduction by airlines in the number of flights into San Francisco. The hotel has also faced more competition from new properties and from higher end properties that provide greater amenities to its guests, especially for the business traveler. These properties have also reduced room rates as hotel operators struggle to obtain occupancy. Partnership is committed to making the Hotel competitive in its market by undertaking a significant renovation of the property and seeking a new, more upscale, brand for the Hotel.

The Company's income from investment transactions increased to \$8,715,000 from 4,221,000 due primarily to the increase in net investment gains to \$13,722,000 from \$6,601,000 and the increase in dividend and interest income to \$777,000 from \$336,000. These increases were partially offset by the increase in margin and trading expenses to \$4,629,000 from \$2,716,000 and an impairment loss from other investments of \$1,155,000 recorded in the current year.

-17-

Net gains on marketable securities increased to \$13,722,000 for the year ended June 30, 2004 from \$6,601,000 for the year ended June 30, 2003 as the result of the significant appreciation in the market value of the Company's investment portfolio during the current year. For the year ended June 30, 2004, the Company had net unrealized gains of \$4,181,000 and net realized gains of \$9,541,000. For the fiscal year ended June 30, 2003, the Company had net unrealized gains of \$9,482,000 and realized losses of \$2,881,000. There were no gross unrealized positions on any securities held which existed for more than one year. Gains and losses on marketable securities and other

Edgar Filing: INTERGROUP CORP - Form 10KSB

investments may fluctuate significantly from period to period in the future and could have a significant impact on the Company's net income. However, the amount of gain or loss on marketable securities and other investments for any given period may have no predictive value and variations in amount from period to period may have no analytical value. For a more detailed description of the composition of the Company's marketable securities please see the Marketable Securities section below.

During the current year, the Company recorded an impairment loss from other investments in the amount of \$1,155,000 against two private investments made during the year totaling \$2,000,000 that were considered impaired.

Margin interest and trading expenses increased to \$4,629,000 from \$2,716,000 primarily due to the increase in margin interest expense and the increase in the performance bonus granted to the Company's CEO. Margin interest expense increased to \$1,437,000 from \$210,000 as the result of the increase in average daily margin balances. The performance bonus granted to the Company's CEO for the management of the investment portfolio increased to \$2,077,000 from \$1,376,000 as the result of the increase in the net investment gains to \$13,722,000 from \$6,601,000.

Other income decreased to \$143,000 from \$2,842,000 primarily due to the legal settlement on an insurance claim in the amount of \$2,700,000 that was recorded in the fiscal year ended June 30, 2003.

The provision for income tax expense increased to \$3,515,000 from \$2,199,000 as the result of higher pre-tax income generated in the current year.

Minority interest expense increased to \$1,821,000 from \$802,000 as a result of higher income generated by the Company's subsidiary, Santa Fe during the current year.

MARKETABLE SECURITIES

CONTRACTUAL OBLIGATIONS

The Company's contractual obligations and commercial commitments are its mortgages. The annual principal payments on the mortgages for the five-year period and thereafter commencing July 1, 2004 are approximately as follows:

Year ending June 30,	
2005	\$ 4,783,000
2006	1,496,000
2007	5,384,000
2008	1,602,000

Edgar Filing: INTERGROUP CORP - Form 10KSB

2009	5,541,000
Thereafter	70,765,000

Total	\$89,571,000
	=====

IMPACT OF INFLATION

The Company's residential and commercial rental properties provide income from short-term operating leases and no lease extends beyond one year. Rental increases are expected to offset anticipated increased property operating expenses.

The Company's revenue from its interest in Justice Investors is primarily dependent on hotel revenues. Hotel room rates are typically impacted by supply and demand factors, not inflation, because rental of a hotel room is usually for a limited number of nights. Room rates are usually adjusted to account for inflationary cost increases; therefore, the impact of inflation should be minimal.

CRITICAL ACCOUNTING POLICIES

The Company reviews its long-lived assets including its investment in real estate and other investments for impairment when circumstances indicate that a potential loss in carrying value may have occurred. To the extent that projected future undiscounted cash flows from the operation of the hotel property, owned through the Company's investment in Justice Investors, and rental properties are less than the carrying value of the assets, the carrying value of the assets are reduced to their fair value. For other investments, the Company reviews the investment's operating results, financial position and other relevant factors to determine whether the estimated fair value of the asset is less than the carrying value of the asset.

In March 2004, the EITF ratified its consensus on Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments (EITF 03-1). On September 30, 2004, the Financial Accounting Standard Board (FASB) issued a final FASB Staff Position, FSP EITF Issue 03-1-1 that delays the effective date for the measurement and recognition guidance included in EITF 03-1. Disclosures required by EITF 03-1 have not been deferred and the Company has adopted those disclosures.

Marketable securities are stated at market value as determined by the most recently traded price of each security at the balance sheet date. Marketable securities are classified as trading with net change in unrealized gains or losses included in earnings. The Company's other accounting policies are straightforward in their application.

THE INTERGROUP CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Business and Significant Accounting Policies and Practices:

Description of the Business

The InterGroup Corporation ("InterGroup" or the "Company") was formed to buy,

Edgar Filing: INTERGROUP CORP - Form 10KSB

develop, operate and dispose of real property and to engage in various investment activities to benefit the Company and its shareholders.

As of June 30, 2004 and 2003, the Company had the power to vote 75.2% and 68.8%, respectively, of the voting shares of Santa Fe Financial Corporation ("Santa Fe"), a public company (OTCBB: SFEF). Those percentages include the power to vote an approximately 4% interest in the common stock in Santa Fe owned by the Company's Chairman and President pursuant to a voting trust agreement entered into on June 30, 1998.

Santa Fe's revenue is primarily generated through the management of its 68.9% owned subsidiary, Portsmouth Square, Inc. ("Portsmouth"), a public company (OTCBB: PRSI), which derives its revenue primarily as a general partner and a 49.8% limited partner in Justice Investors, a California limited partnership ("Justice" or the "Partnership"). Justice owns the land, improvements and leaseholds commonly known as the Holiday Inn Select Downtown & Spa, a 565-room hotel in San Francisco, California (the "Hotel").

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and all controlled subsidiaries. All significant inter-company transactions and balances have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Investment in Real Estate

Investments in real estate are stated at cost. Depreciation of buildings, improvements and equipment is provided on the straight-line method based upon estimated useful lives of five to forty years for buildings and improvements and five to ten years for equipment. Expenditures for repairs and maintenance are charged to expense as incurred and improvements are capitalized.

In accordance with Statement of Financial Accounting Standards No. 144 (SFAS 144), "Accounting for Impairment or Disposal of Long-Lived Assets", the Company reviews its rental property assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If expected future cash flows (undiscounted and excluding interest costs) are less than the carrying value of the rental asset, the asset is written down to its fair value. The estimation of expected future net cash flows is inherently uncertain and relies to a considerable extent on assumptions regarding current and future economic and market conditions, and

-28-

the availability of capital. If, in future periods, there are changes in the estimates or assumptions incorporated into the impairment review analysis, the changes could result in an adjustment to the carrying amount of the long-lived asset. No impairment losses have been recorded in 2004 and 2003.

Cash and Cash Equivalents

Edgar Filing: INTERGROUP CORP - Form 10KSB

The Company considers all highly liquid financial instruments purchased with an original maturity of three months or less to be cash equivalents.

Restricted Cash

Restricted cash is comprised of amounts held by lenders for payment of real estate taxes, insurance, replacement reserves for the operating properties and tenant security deposits that are invested in certificates of deposit.

Marketable Securities

Marketable securities are stated at market value as determined by the most recently traded price of each security at the balance sheet date. Marketable securities are classified as trading securities with all unrealized gains and losses on the Company's investment portfolio recorded through the statement of operations.

Other Investments

The Company may also invest, with the approval of the Securities Investment Committee, in unlisted companies, through private placements. Those investments in non-marketable securities are carried at the lower of cost or estimated fair value on the Company's balance sheet as part of other investments and reviewed for impairment on a periodic basis.

Due to Securities Broker

Various securities brokers have advanced funds to the Company for the purchase of marketable securities under standard margin agreements.

Obligation for Securities Sold

Obligation for securities sold represents the fair market value of shares sold with the promise to deliver that security at some future date and the fair market value of shares underlying the written call options with the obligation to deliver that security when and if the option is exercised. The obligation may be satisfied with current holdings of the same security or by subsequent purchases of that security. Unrealized gains and losses from changes in the obligation are included in earnings.

Treasury Stock

The Company records the acquisition of treasury stock under the cost method.

Rental Income

Rental income is recognized as earned. Revenue recognition from apartment rentals commences when an apartment unit is placed in service and occupied by a rent-paying tenant. Apartment units are leased on a short-term basis, with no lease extending beyond one year.

-29-

Income Taxes

Deferred income taxes are determined using the liability method. A deferred tax asset or liability is determined based on the difference between the financial statement and tax basis of assets and liabilities as measured by

Edgar Filing: INTERGROUP CORP - Form 10KSB

statutory tax rates. Deferred tax expense is the result of changes in the asset and/or liability for deferred taxes.

Fair Value of Financial Instruments

The carrying amount of cash and cash equivalents, restricted cash, marketable securities, other investments, mortgage notes payable, amounts due securities brokers and obligations for securities sold approximates fair value. The fair value of mortgage notes payable is estimated using discounted cash flows of future payments based on the borrowing rates available to the Company for debt with similar terms and maturities.

Stock-Based Compensation Plans

Effective December 15, 2002, the Company adopted Statement of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation-Transition and Disclosure", which amends Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS 148). In accounting for its plans, the Company, as allowable under the provisions of SFAS 148, applies Accounting Principles Board Opinions No. 25, "Accounting for Stock issued to Employees." As a result of this election, the Company does not recognize compensation expense for its stock option plans. Had the Company determined compensation cost based on the fair value for its stock options at grant date (based on 15,000 and 15,000 in fiscal years 2004 and 2003, respectively), net income and earnings per share would have been reduced to the pro forma amounts as follows:

	2004	2003
Net income	\$ 3,071,000	\$ 2,567,000
Stock based employee Compensation expense*	(64,000)	(62,000)
Pro forma net income	\$ 3,007,000	\$ 2,505,000
Earnings per share		
Basic as reported	\$ 1.22	\$ 0.95
Basic pro forma	\$ 1.19	\$ 0.92
Diluted as reported	\$ 1.08	\$ 0.86
Diluted pro forma	\$ 1.06	\$ 0.84

*Determined under fair value based on method for awards net of related tax effects(40%).

The difference between the net income as reported and the pro forma net income is due to subtraction of the fair market value of the vested stock options of \$107,000 and \$104,000, respectively, for the fiscal years ended June 30, 2004 and 2003.

The Black-Scholes option pricing model was used with the following weighted-average assumptions for 2004; risk-free interest rate of 2.15%; dividend yield of 0%; expected Common Stock market price volatility factor of 24.99; and a weighted-average expected life of the options of 10 years. The weighted-average fair value of options granted in fiscal years 2004 and 2003 were \$7.12 and \$6.35 per share, respectively. The aggregate fair value of the options granted in fiscal years 2004 and 2003 were \$107,000 and \$104,000 respectively.

Edgar Filing: INTERGROUP CORP - Form 10KSB

Earnings Per Share

Basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding. The computation of diluted earnings per share is similar to the computation of basic earnings per share except that the weighted-average number of common shares is increased to include the number of additional common shares that would have been outstanding if potential dilutive common shares had been issued. The Company's only potentially dilutive common shares are stock options. Stock options are included in diluted earnings per share by application of the treasury stock method. As of June 30, 2004, the Company had 318,000 stock options that were considered potentially dilutive common shares and 60,000 stock options that were considered anti-dilutive. These amounts were included in the calculation for diluted earnings per share.

Recently Issued Accounting Standards

In January 2003, the FASB issued its new consolidation accounting model through FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. In December 2003, FIN 46 was reissued as FIN 46R, which contained revisions to address certain implementation issues. Under GAAP, a company must consolidate any entity in which it has a "controlling financial interest." The long-standing voting interest model defined this term as ownership of more than 50 percent of the entity's voting interests. FIN 46 makes two critical changes: it defines when a company should base "controlling financial interest" on factors other than voting rights, and requires that a new "risk and rewards" model be applied in these situations.

The adoption of FIN 46 as revised by FIN 46R did not have a material impact on the Company's financial condition or results of operations.

In March 2004, the EITF ratified its consensus on Issue No. 03-1, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments (EITF 03-1). EITF 03-1 requires certain quantitative and qualitative disclosures for debt and marketable equity securities classified as available-for-sale or held to maturity under SFAS 115. On September 30, 2004, the Financial Accounting Standards Board (FASB) issued a final FASB Staff Position, FSP EITF Issue 03-1-1 that delays the effective date for the measurement and recognition guidance included in EITF 03-1. Disclosures required by EITF 03-1 have not been deferred and the Company has adopted those disclosures.

2. Investment in Real Estate:

At June 30, 2004, the Company's investment in real estate consisted of twenty seven properties located throughout the United States. These properties include twenty three apartment complexes, two single-family houses as strategic investments, and two commercial real estate properties, one of which serves as the Company's corporate headquarters. Twenty two of the twenty three apartment complexes are completed, operating properties. The one non-operating apartment complex is undergoing a major renovation.

In August 2003, the Company acquired a single-family house in Los Angeles, California for \$700,000. In October 2003, the Company obtained a mortgage loan of \$525,000 on this unencumbered property.

-31-

In April 2004, the Company purchased a 358-unit apartment complex in Los Colinas, Texas for \$27,145,000 in a tax-deferred exchange with the St. Louis,

Edgar Filing: INTERGROUP CORP - Form 10KSB

Missouri property sold in August 2001. To finance the purchase, the Company obtained a nine year \$20,000,000 mortgage note. In accordance with SFAS 141, "Business Combinations," the acquisition value was allocated to the land and building utilizing an "as if vacant" methodology, with the balance of the purchase price allocated to identifiable intangible assets. Identifiable intangible assets relate to the value of the in-place operating leases and comprise of: (i) origination value, which represents the "cost avoidance" value associated with acquired in-place leases; and (ii) value of the renewal of in-place leases, which represents the estimated loss of revenue and costs incurred to renew the operating leases following its expiration. The origination value and the value of the renewal of in-place tenant leases are recorded as a deferred charge and are amortized over the remaining lease term of twelve months.

Based on this valuation, the purchase price and closing costs were allocated as follows:

Land	\$ 4,050,000
Building	22,429,000
Intangible asset - origination costs	206,000
Intangible asset - renewal lease-up costs	460,000

	\$27,145,000
	=====

During the year ended June 30, 2004, the Company recorded an amortization expense associated with these intangible assets in the amount of \$111,000. The remaining \$555,000 intangible assets balance will be amortized on a straight-line basis over the remaining life of ten months.

3. Marketable Securities and Other Investments:

The Company's investment portfolio consists primarily of corporate equities. The Company has also invested in corporate bonds and income producing securities, which may include interests in real estate based companies and REITs, where financial benefit could inure to its shareholders through income and/or capital gain.

At June 30, 2004, all of the Company's marketable securities are classified as trading securities. In accordance with SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," the change in the unrealized gains and losses on these investments are included earnings. Trading securities are summarized as follows:

As of June 30, 2004

Investment	Cost	Gross Unrealized Gain	Gross Unrealized Loss	Net Unrealized Gain	Market Value
-----	-----	-----	-----	-----	-----
Corporate					
Equities	\$52,890,000	\$17,803,000	(\$4,083,000)	\$13,720,000	\$66,610,000

As of June 30, 2003

Investment	Cost	Gross Unrealized Gain	Gross Unrealized Loss	Net Unrealized Gain	Market Value
-----	-----	-----	-----	-----	-----

Edgar Filing: INTERGROUP CORP - Form 10KSB

Corporate					
Equities	\$47,749,000	\$10,321,000	(\$3,081,000)	\$7,240,000	\$54,989,000

-32-

The Company may utilize margin for its marketable securities purchases through the use of standard margin agreements with national brokerage firms. The use of available leverage is guided by the business judgment of management.

The Company also invests with the approval of the Securities Investment Committee, in unlisted companies, through private placements. These investments in non-marketable securities are carried at cost on the Company's balance sheet as part of other investments and are reviewed for impairment on a periodic basis. As of June 30, 2004, the Company had investments in unlisted companies (other investments) of \$2,347,000 with an impairment on other investments totaling \$1,155,000. The investment is presented net of the impairment loss and is included on the balance sheet in prepaid expenses and other assets.

For other investments, the Company reviews the investment's operating results, financial position and other relevant factors to determine whether there has been a permanent impairment in the carrying value of other investments. If an impairment is determined to exist, the carrying value or the investment is reduced to its estimated fair value.

As part of the investment strategies, the Company may assume short positions in marketable securities. Short sales are used by the Company to potentially offset normal market risks undertaken in the course of its investing activities or to provide additional return opportunities. Marketable securities are stated at market value as determined by the most recently traded price of each security at the balance sheet date. 4. Investment in Justice Investors:

The consolidated accounts include a 49.8% interest in Justice Investors through the Company's interest in Santa Fe. Justice owns the land improvements and leasehold commonly known as the Holiday Inn Select Downtown & Spa, a 565-room hotel in the financial district of San Francisco, California. Portsmouth is both a general and limited partner in Justice and oversees operations and shares management responsibilities with the other general partner. Portsmouth records its investment in Justice on the equity basis.

The Company amortizes the step up in the asset values allocable to the depreciable assets of its investment in Justice Investors over 40 years, which approximates the remaining life of the primary asset, the hotel building.

For the Company's investment in Justice, to the extent that projected future

Edgar Filing: INTERGROUP CORP - Form 10KSB

undiscounted cash flows from the operation of the Hotel property are less than the carrying value of the asset, the investment would be considered permanently impaired and the carrying value of the asset would be reduced to its fair value.
