Magic Software's iBOLT Breaks Into The Telecom Industry With Deal Wins At Two Of The World's Leading Wireless Companies

Revenues Expected From New Contracts Estimated At \$1.5M Over Two Years

Irvine, California (April 19, 2004) Magic Software Enterprises (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology announced today significant new iBOLT deal wins at two of the world's leading telecom companies. The revenue expected from the new contracts is estimated at \$1.5M over two years.

After many years of high growth, the mobile market is slowing despite the increased level of competition and rapidly falling prices. Many markets have now reached saturation point. Wireless communication companies are faced with growing competition where the major differentiators and competitive advantage points are customer service and product offerings to attract and retain customers.

iBOLT Integration Suite delivers an affordable business integration framework that empowers wireless communication companies to dramatically improve business performance (www.magicsoftware.com/ibolt) in this tough market. iBOLT provides system integrators and corporate development teams with a comprehensive platform for integrating front and back office applications, billing and inventory systems, customer service solutions and ordering systems.

iBOLT enables the design, deployment and integration of systems that can empower customers with on-demand billing information and other real-time services. iBOLT can also help to provide organizations with a single view of their customer across internal entities, increasing services levels while reducing cost. iBOLT is designed to integrate smoothly into existing telecom infrastructures, enabling faster implementation of new and updated systems, future proofing for business expansion, seamless interoperability and rapid return on investment.

Since its inception in 2003, iBOLT has been targeted at the telecom industry as one of its primary verticals, said Menachem Hasfari, CEO of Magic Software. iBOLT provides a comprehensive business integration platform for telecom companies that enables increased competitive advantage and more efficient customer service. By promoting these benefits, we have succeeded in a short timeframe to penetrate some of the top wireless communication companies in the world. We expect this trend will go on and we will continue to see new business for iBOLT in our target vertical markets.

About Magic Software Enterprises

Magic Software Enterprises, a subsidiary of Formula Systems (**Nasdaq: FORTY**), develops, markets and supports software development, deployment and integration technology that enables enterprises to accelerate the process of building and deploying applications that can be rapidly customized and integrated with existing systems.
