**Magic Software Announces The Release of eDeveloper V10**

*Initial shipping to start March 30 to Ramp-up Customers*

Cebit, Germany (March 13, 2006) -- Magic Software Enterprises Ltd. (Nasdaq: MGIC), a leading provider of state-of-the-art business integration and development technology, announced today that it would start shipping eDeveloper V10, its ground breaking Composite Application development and deployment Framework on March 30. The new version would become generally available on June 30th, 2006.

eDeveloper V10 delivers industry-leading composite applications capability, XML based repository and rules engine, enhanced application development, version control and debugging features, all of which assist in developing solutions in the most robust and rapid metadata driven application development and deployment environment ever.

The release of V10 will begin with a Ramp-up program (controlled release). This program is scheduled to run from March 30th, 2006 to June 30th, 2006. The Ramp-up program is offered to a selection of representative customers and provides them with hands-on support during the porting of their applications to the new version. The Ramp-Up Program follows 9 months of extensive testing within the eDeveloper Beta Program.

eDeveloper has pioneered the concepts of metadata driven application development and deployment, which are presently recognized and the foundation for Service Oriented Architectures (SOA) and Composite Applications." said Avikam Perry, CTO and vice president of Research and Development at Magic Software. "V10 was designed to incorporate the latest standards in Metadata and Service Governance and provides full support for both Service Oriented and Event Driven application paradigms. We have excellent feedback from our customers as well as from external experts, and we remain faithful to our long term policy offering seamless upgrade path to our vast user community" he added.

David Assia, Chairman and acting CEO of Magic Software Enterprises added Magic eDeveloper V10, is one of the most significant products ever launched by Magic since its inception. eDeveloper V10 is at the forefront of the new technology wave of Integrated Service Environments. It leverages magic's incredible experience in application development and metadata, delivering state of the art technology to enable the company to lead the world in this market.

### **About Magic Software Enterprises**

Magic Software provides a Service Oriented Platform (Application Integration, Business Process Management and Composite Applications) to rapidly develop, change and deploy solutions integrated with existing and legacy systems. Magic Software enables enterprises to increase their agility and rapidly adapt to business changes, by aligning their IT with their business operations, accelerating the evolution to a Service Oriented Architecture through Application Integration and Business Process Management.
