PART I

Item 1. Description of Business

History

Trans Energy, Inc. is engaged in the exploitation, development and production of natural gas and oil, and, to a lesser extent, the marketing and transportation of natural gas. We own and operate approximately 245 oil and gas wells in West Virginia. We also own and operate an aggregate of over 20 miles of 4-inch and 6-inch gas transmission lines located within West Virginia in the counties of Ritchie and Tyler. We also have approximately 20,000 gross acres under lease in West Virginia primarily in the counties of Wetzel and Marion.

Our principal executive offices are located at 210 Second Street, P.O. Box 393, St. Marys, West Virginia 26170, and our telephone number is (304) 684-7053.

Recent Events

Sale of Arvilla

On April 7, 2006, we finalized the agreement to sell our well servicing and maintenance business in exchange for shares of Trans Energy common stock, certain natural gas properties and other considerations, which agreement was initially entered into on January 3, 2006. Terms of the sale were satisfied on March 31, 2006. Part of the reason for the sale was the inability of our board of directors to agree on the direction of Trans Energy with Arvilla as a significant subsidiary. Under the terms of the definitive agreement and through our wholly owned subsidiary, Arvilla, Inc. Trans Energy sold to Clarence E. Smith and Rebecca L. Smith, both directors of Trans Energy, 100% of the outstanding membership interests of Arvilla Oilfield Services, LLC, a West Virginia limited liability company ("AOS").

AOS provides well servicing, workover and related transportation services to independent oil and natural gas producers in the northeast region of the United States. It also performs ongoing maintenance and major overhauls necessary to optimize the level of production from existing oil and natural gas wells and provides certain ancillary services during the drilling and completion of new wells. AOS offers its services in Ohio, Pennsylvania, New York, Virginia, Kentucky and West Virginia and also owns a fleet of well service equipment.

We originally acquired AOS from Clarence and Rebecca Smith on January 31, 2005 through a merger of our subsidiary, Trans Energy Acquisitions, with and into Arvilla, Inc., with Arvilla being the surviving entity. As consideration, we issued 1,185,024 shares of our common stock, of which 1,042,821 shares were issued to the Smiths, both of whom became directors of Trans Energy following the acquisition. AOS's operations were previously conducted as Arrow Oilfield Service Company, a division of Belden & Blake Corporation, a privately held

Edgar Filing: TRANS ENERGY INC - Form 10KSB

company engaged in the exploration, development and production of oil and natural gas. In June 2004, the Smiths acquired Arrow Oilfield Service Company from Belden & Blake and created Arvilla Oilfield Services, LLC as the operating entity. Subsequently, the Smiths created Arvilla, Inc. that acquired all the membership interests of Arvilla Oilfield Services in order to facilitate its acquisition by Trans Energy.

As a result of consummating the definitive agreement, Clarence and Rebecca Smith returned to us 521,411 shares of their Trans Energy common stock. The Smiths have also conveyed to Trans Energy all of their interest in and to five oil and gas wells located in Tyler County, West Virginia. Assignments for the wells originally was to be held in escrow pending satisfaction by Trans Energy of two promissory notes in the aggregate amount of \$763,000 payable to AOS and to Arvilla Pipeline Construction Co., Inc., a separate entity owned by Clarence and Rebecca Smith. However, pursuant to the First Amendment to Definitive Agreement, the parties agreed that the wells would be transferred at the closing and we agreed to pay AOS \$176,239 on or before April 30, 2006, and pay Arvilla Pipeline \$115,000 on or before April 30, 2006. To secure these payments by Trans Energy, Clarence and Rebecca Smith held a lien on a certain Deed of Trust until the debt was satisfied.

Upon execution of the definitive agreement, Clarence Smith resigned as our Chief Executive Officer, but remained on our board of directors until the closing. At the closing, both Clarence and Rebecca Smith resigned as directors of Trans Energy and Arvilla, Inc. Clarence and Rebecca Smith have also agreed not to sell an amount of their remaining Trans Energy common stock during each calendar quarter on or after March 22, 2006, in an aggregate amount greater of

-3-

(i) 50,000 shares (adjusted for stock splits or stock dividends; or (ii) one percent of the total outstanding shares of Trans Energy common stock on the date of any such sale.

Finally, the closing of the transaction was expressly conditioned on the receipt of a fairness opinion from a qualified independent party stating that the transactions contemplated by the definitive agreement were fair to Trans Energy and our stockholders. That opinion was issued and delivered to Trans Energy on March 31, 2006.

Sale of Wyoming Wells and Properties

In April 2006, we finalized a definitive Agreement for Sale of Oil and Gas Properties related to the sale of all of our holdings in Wyoming including certain wells, overriding royalties and undeveloped acreage located in Campbell County, Wyoming. The assets were sold at public auction through the Oil & Gas Asset Clearinghouse in Houston, Texas. The gross sales price for the properties was \$1,003,000.

The wells sold by us, all located in Campbell County, Wyoming, included the Pinion Fee #1, Sagebrush Federal #1, Sagebrush Federal #2, Sagebrush Federal #3 (injector), Boley #31-36 Sandbar, State #1-36 Sandbar and State #2-36 Sandbar. Also included in the sales were an overriding royalty on two wells (Sagebrush Federal #1 and Sagebrush Federal #2) and Tract TR4-B, and 2,530 undeveloped acres, also located in Campbell County, Wyoming.

Purchase of Marion County West Virginia wells and acreage

On August 14, 2006, Trans Energy, Inc. entered into an Assignment and Bill

Edgar Filing: TRANS ENERGY INC - Form 10KSB

of Sale (the "Agreement ") with George Hillyer, Trustee of Texas Energy Trust Company, a Delaware Business Trust ("Tetco"), BOK Operating Company, a Delaware corporation ("BOK"), and Prima Oil Company, Inc., a Delaware corporation ("Prima") that is wholly owned by Trans Energy. TETCO and BOK are collectively referred to as the "Seller." Under the terms of the Agreement, the Sellers agreed to sell, assign and convey to Trans Energy all of Sellers' rights, title and interest in the assets of Cobham Gas Industries, Inc. ("Cobham") including approximately 120 wells , both producing and non-producing (referred to herein as the "Wells"), leases, pipelines, equipment and rolling stock (the "Assets"). Also assigned and conveyed to Trans Energy are certain rights-of-way and roads that may be needed to maintain, produce and abandon the conveyed Wells.

In consideration for the acquisition of assets, Trans Energy paid Mr. Hillyer and BOK, the sole owner of Cobham, \$600,001 and one million shares of Trans Energy common stock. The shares of common stock are subject to certain restrictions regarding the future sale of the shares.

Purchase of Dewhurst wells and acreage in Wetzel County, West Virginia -----

On September 28, 2006, Trans Energy, Inc. completed the acquisition of the J.B. Dewhurst oil and gas lease, consisting of a 100% working interest and 87.5% net revenue interest in seven wells located on 2,200 acres in Grant District, Wetzel County, West Virginia. The purchase price for the lease was \$800,000 that was paid at the closing.

The lease was acquired from Tom O'Donnell, Bay Oil Company, LLC and Beacon Lombard Corporation. Conveyance of the lease is by good and sufficient general warranty assignment, free and clear of all liens and encumbrances and includes the entire working interest, all wells, personal property, fixtures and improvements located on the lease.

Sale of Leatherwood Assets -----

On January 9, 2007 Trans Energy, Inc. completed the assignment for cash to Leatherwood, Inc., a Pennsylvania corporation, of six oil and/or gas wells located in Mannington District, Marion County, West Virginia. The assigned wells are designated as follows: O.N. Koen No. 1, Moffett No. 2, Simon Moore No. 3, Simon Moore No. 1, Simon Moore No. 2 and W.T. Morris No. 2.

Trans Energy assigned all of its right, title, operating rights and interest in and to the aforementioned wells, including the absolute right to produce, operate and maintain the wells. The assignment is by good and sufficient general warranty assignment, free and clear of all liens and encumbrances and includes the entire working interest, all wells, equipment, personal property, gathering and distribution pipelines and other fixtures and improvements located on the property.

Leatherwood becomes responsible for the plugging and abandoning of the acquired wells, as necessary, and for any reclamation of the lands after

-4-

plugging and abandoning operations are completed. All plugging and abandoning operations will be done in accordance with the applicable rules and regulations of the State of West Virginia or other jurisdictional authorities.

Upon effectiveness of the assignment of the lease, all production, revenue, costs, expenses and other liabilities attributable to the assigned wells will

Edgar Filing: TRANS ENERGY INC - Form 10KSB

belong to Leatherwood. For a period of one year following the effective date, Trans Energy will have the right, at its sole cost and expense, to permit and drill one or more oil and gas wells located on two of the assigned properties.

Purchase of acreage in Kansas -----

On January 10, 2007, Trans Energy acquired from National Gulf Production, Inc. of Giddings, Texas, 75% of National Gulf's rights and interests in and to certain oil and gas leases covering the oil and gas in and under certain tracts of land containing approximately 3,120 acres located in Trego County, Kansas. National Gulf originally acquired the leases pursuant to a farmout agreement with Wevco Production, Inc. In connection with the agreement, Trans Energy and National Gulf will acquire certain 3-D seismic data on the subject leases.

In consideration for the leases Trans Energy will pay its proportionate 75% of the farmout fee, or approximately \$146,250, plus its proportionate 75% of the seismic acquisition, processing and interpretation cost, a total of approximately \$285,000. The final seismic cost will be adjusted when completed.

The lease has a reservation by Wevco of an overriding royalty interest of 3.5% and the right, but not the obligation, to participate up to 25% at cost, in the wells drilled by National Gulf and Trans Energy. There will also be an overriding royalty interest of 1% to the Project Geophysicist and National Gulf will retain an overriding royalty interest of 2%, resulting in an 81% working interest. National Gulf will also earn a 6.15% carried working interest.

Upon completion of each well capable of commercial production, Trans Energy will be entitled to receive an assignment of its proportionate share of the 20 acre producing unit, or other unit size as may be directed or allowed by the State. This assignment will be made without warranty of title, express or implied.

From the date of the agreement Trans Energy and National Gulf will have one year to drill the first well and will also have an option for six months after completion of any well to drill another well, until all drillable 20 acre units in the leases are drilled. In the event Trans Energy and National Gulf do not drill the first well within one year, or do not drill subsequent wells within the prescribed six month periods, then this agreement terminates with respect to all undrilled areas, unless such failure to perform is due to an act of God, labor disputes, riots, or any other cause beyond the control of the parties. In such an event, the required time to perform would be extended for the period of the interruption.

Trans Energy and National Gulf will enter into a mutually acceptable participation and operating agreement, whereby National Gulf will be the Operator and will drill and operate the wells that are drilled on the leases.

Business History

Our business strategy is to economically increase reserves, production and the sale of natural gas and oil from existing and acquired properties in the Appalachian Basin and elsewhere, in order to maximize shareholders' return over the long term. Our strategic location in West Virginia enables us to actively pursue the acquisition and development of producing properties in that area that will enhance our revenue base without proportional increases in overhead costs.

We operate oil and natural gas properties and transport and market natural gas through our transmission systems in West Virginia. Although management desires to acquire additional oil and natural gas properties and to become more involved in exploration and development, this can only be accomplished if we can secure future funding. Management intends to continue to develop and increase

Edgar Filing: TRANS ENERGY INC - Form 10KSB

the production from oil and natural gas properties that we currently own. We will continue to transport and market natural gas through our pipelines. During 2004 we sold approximately 7.6 miles of our 6-inch pipeline and approximately 10 miles of our 4-inch pipeline for cash and other consideration. In 2004, we sold approximately 3 miles of 6-inch pipeline and approximately 5.7 miles of 4-inch pipeline.

-5-

Cobham Gas Industries, Inc.

On November 5, 2004, we finalized an agreement with Texas Energy Trust Company, a Delaware Business Trust with offices in Irving, Texas, whereby we acquired certain oil and gas leases and leasehold interests located in Wetzel and Marion Counties, West Virginia, and other assets. Our acquisition of Cobham includes its two subsidiaries, Penine Resources, Inc. and Belmont Energy, Inc. The acquisition was accomplished by our wholly owned subsidiary, Prima Oil Company, Inc., acquiring from Texas Energy Trust 100% of the issued and outstanding shares (2,100 shares) of Cobham Gas Industries, Inc., a Delaware corporation. Under the terms of the agreement, we acquired certain wells, leases, pipelines, gas purchase agreements, oil hauling agreements, equipment, right of ways and other miscellaneous items related to the leases located in West Virginia. A total of 229 wells were acquired, of which 98 are producing, located on approximately 15,000 leased acres. Among the assets acquired are certain vehicles and heavy equipment and various other drilling equipment.

In consideration for the acquired property, we paid a purchase price of \$892,344, of which approximately \$489,000 is payable in cash and the balance in 244,633 shares of restricted Trans Energy common stock, post-split, to be issued following the effectiveness of our one share for 150 shares reverse stock split in January 2005. An initial payment of \$250,000 was paid at the closing with the remaining balance to be paid quarterly in equal installments beginning January 1, 2005, with the final payment due October 1, 2005.

The wells are situated in well defined fields producing from the shallow Devonian formation. Big Injun, Gordon and Thirty Foot are sands in the Devonian foundation that have produced substantial natural gas in West Virginia. The field/acreage positions consist of three specific areas; Mannington, Smithfield/Wallace and Dents Run. The Mannington field consists of 107 wells encompassing 4,573 acres. These wells are Big Injun wells, at approximately 2,900 - 3,000 feet in depth, dependent on elevation. The Smithfield/Wallace field consists of 92 wells encompassing 9,223 acres. The majority of these wells are Big Injun wells, although there are several Gordon wells in the field. Management believes that future development can expand the Gordon and Bayard play. The Dents Run field consists of 30 wells encompassing 1,097 acres. These wells are completed through the Thirty Foot sand.

On September 1, 2005, together with our wholly owned subsidiary Prima Oil Company, Inc., we finalized the sale of certain assets to Texas Energy Trust Company and its trustee, George Hillyer ("Buyer"). These assets include the following:

- * Certain leases for the production of oil and natural gas located in Marion County, West Virginia (the "Marion County Leases");
- * Certain oil or natural gas wells located on the Marion County Leases (the "Marion County Wells"), together with all of the equipment and other tangible personal property physically attached to any of the wells, including all pipelines, rights of way, easements, well head equipment and leasehold estates;

Edgar Filing: TRANS ENERGY INC - Form 10KSB

- * Certain vehicles and other equipment, parts, inventories and hand tools;
- * Miscellaneous well logs, maps, production data, sales records and histories, royalty payment records and other information concerning the Marion County Leases and Marion County Wells;
- * A \$50,000 reclamation bond pursuant to which all of the Marion County Wells, and others, are permitted;
- * Certain cash and trade accounts receivable generated by the operations and results of operations of the Marion County Leases and Marion County Wells, realized on or after August 1, 2005; and
- * All the outstanding capital common stock of Cobham Gas Industries held by Trans Energy, Inc. or any of our affiliates.

-6-

In consideration for the above referenced assets, the Buyer provided the following to us:

- * The return to us of 244,633 shares of Trans Energy, Inc. common stock initially issued to Buyer in January 2005 and which shares are to be valued at the closing price per share of our common stock on the closing date;
- * The return to us of all of Buyer's options, warrants and future rights to acquire any securities of Trans Energy or any of our affiliates;
- * We retain the right to use through December 31, 2005 the \$50,000 reclamation bond in order to comply with certain West Virginia bonding requirements; and
- * Buyer will assume responsibility for the payment of certain loans in the amount of \$96,839, the liabilities related to the plugging of certain of the Marion County Wells, all expenses related to operation, maintenance and ownership of the Marion County Leases and the Marion County Wells incurred on or after August 1, 2005.

In addition to the above, we have agreed to fulfill the remaining payment obligations to Buyer under that certain agreement dated November 5, 2004, and we will retain responsibility for the payment of certain debts related to Cobham Gas Industries.

Powder River Basin Wyoming

On March 6, 1998, we entered into an agreement to purchase from GCRL Energy, Ltd. all of its interest in the Powder River Basin in Campbell and Crook Counties, Wyoming, consisting of interests in five (5) wells, four (4) of which are producing, interests in 30,000 leasehold acres, and interests in approximately seventy-three miles of 3-D seismic data. The properties include three producing fields from Minnelusa Sandstone and were discovered on 3-D seismic. We made an initial payment for the properties of \$50,000 and the balance of \$2,987,962 was paid for with proceeds from the sale of debentures.

The following table sets forth information concerning the existing oil production per day of the producing wells located on the GCRL property.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Name of Well	Gross Bbls. Oil Per Day	Net % to TENG	Net Bbls. to TENG
-----	-----	-----	-----
Sagebrush Flat (one unit)	61	42.15%	26
Pinon Fee #1	19	51.2%	9
Swartz Draw	27	27.7%	7
	-----		-----
Total	107		42

In April 2006, we finalized a definitive Agreement for Sale of Oil and Gas Properties related to the sale of certain wells, overriding royalties and undeveloped acreage located in Campbell County, Wyoming. The assets were sold at public auction through the Oil & Gas Asset Clearinghouse in Houston, Texas. The gross sales price for the properties is \$1,003,000.

The wells sold by us, all located in Campbell County, Wyoming, include the Pinion Fee #1, Sagebrush Federal #1, Sagebrush Federal #2, Sagebrush Federal #3 (injector), Boley #31-36 Sandbar, State #1-36 Sandbar and State #2-36 Sandbar. Also included in the sales were overriding royalties on two wells (Sagebrush Federal #1 and Sagebrush Federal #2) and Tract TR4-B, and 2,530 undeveloped acres, also located in Campbell County.

Current Business Activities

We operate our oil and natural gas properties and transport and market natural gas through our transmission systems in West Virginia. Although management desires to acquire additional oil and natural gas properties and to become more involved in exploration and development, this can only be

-7-

accomplished if we can secure future funding. Management intends to continue to develop and increase the production from the oil and natural gas properties that it currently owns.

We will continue to transport and market natural gas through our various pipelines in 2007.

During 2006, we drilled 4 new wells in Doddridge County, West Virginia to the Gordon formation. The four new wells were the Lyon #2, Lyon #3, Lyon #4 and Lyon #6 of which we own a 100% working interest in each well.

Research and Development

We have not allocated funds for conducting research and development activities. We do not anticipate allocating funds for research and development in the immediate future.

Marketing

We operate exclusively in the oil and gas industry. Natural gas production from wells owned by us is generally sold to various intrastate and interstate pipeline companies and natural gas marketing companies. Sales are generally made on the spot market or under short-term contracts (one year or less) providing for variable or market sensitive prices. These prices often are tied to natural gas futures contracts as posted in national publications.

Natural gas delivered through our pipeline network is sold through a contract with Sancho Oil and Gas Corporation to Dominion Hope Gas, a local

Edgar Filing: TRANS ENERGY INC - Form 10KSB

utility. Some of the gas is sold at a fixed price on a year long basis and some at a variable price per month per Mcf. Under our contract with Sancho, we have the right to sell natural gas subject to the terms and conditions of a 20-year contract, as amended, that Sancho entered into with Hope Gas in 1988. This agreement is a flexible volume supply agreement whereby we receive the full price which Sancho charges the end user less a \$.05 per Mcf marketing fee paid to Sancho. In addition to the natural gas produced by our wells, we also purchased approximately 876 Mcf of natural gas per day in 2005.

The natural gas from our Wetzel County wells is sold to East Resources or Equitable Gas. The gas from our Doddridge County wells is sold to Dominion Hope through a Trans Energy, Inc. contract.

We sell our oil production to third party purchasers under agreements at posted field prices. These third parties purchase the oil at the various locations where the oil is produced.

Although management believes that we are not dependent upon any one customer, our marketing arrangement with Sancho accounted for approximately 77% of our revenue for the year ended December 31, 2006, and approximately 77% for 2005. This marketing agreement is in effect until September 1, 2008.

Competition

We are in direct competition with numerous oil and natural gas companies, drilling and income programs and partnerships exploring various areas of the Appalachian Basin and elsewhere competing for customers. Many competitors are large, well-known oil and gas and/or energy companies, although no single entity dominates the industry. Many of our competitors possess greater financial and personnel resources enabling them to identify and acquire more economically desirable energy producing properties and drilling prospects than us. Additionally, there is competition from other fuel choices to supply the energy needs of consumers and industry. Management believes that there exists a viable market place for smaller producers of natural gas and oil and for operators of smaller natural gas transmission systems.

Government Regulation

The oil and gas industry is extensively regulated by federal, state and local authorities. The scope and applicability of legislation is constantly monitored for change and expansion. Numerous agencies, both federal and state,

-8-

have issued rules and regulations binding on the oil and gas industry and its individual members, some of which carry substantial penalties for noncompliance. To date, these mandates have had no material effect on our capital expenditures, earnings or competitive position.

Legislation and implementing regulations adopted or proposed to be adopted by the Environmental Protection Agency and by comparable state agencies, directly and indirectly, affect our operations. We are required to operate in compliance with certain air quality standards, water pollution limitations, solid waste regulations and other controls related to the discharging of materials into, and otherwise protecting the environment. These regulations also relate to the rights of adjoining property owners and to the drilling and production operations and activities in connection with the storage and transportation of natural gas and oil.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

We may be required to prepare and present to federal, state or local authorities data pertaining to the effect or impact that any proposed operations may have upon the environment. Requirements imposed by such authorities could be costly, time-consuming and could delay continuation of production or exploration activities. Further, the cooperation of other persons or entities may be required for us to comply with all environmental regulations. It is conceivable that future legislation or regulations may significantly increase environmental protection requirements and, as a consequence, our activities may be more closely regulated which could significantly increase operating costs. However, management is unable to predict the cost of future compliance with environmental legislation. As of the date hereof, management believes that we are in compliance with all present environmental regulations. Further, we believe that our oil and gas explorations do not pose a threat of introducing hazardous substances into the environment. If such event should occur, we could be liable under certain environmental protection statutes and laws. We presently carry insurance for environmental liability.

Our exploration and development operations are subject to various types of regulation at the federal, state and local levels. Such regulation includes the requirement of permits for the drilling of wells, the regulation of the location and density of wells, limitations on the methods of casing wells, requirements for surface use and restoration of properties upon which wells are drilled, and governing the abandonment and plugging of wells. Exploration and production are also subject to property rights and other laws governing the correlative rights of surface and subsurface owners.

We are subject to the requirements of the Occupational Safety and Health Act, as well as other state and local labor laws, rules and regulations. The cost of compliance with the health and safety requirements is not expected to have a material impact on our aggregate production expenses. Nevertheless, we are unable to predict the ultimate cost of compliance.

Although past sales of natural gas and oil were subject to maximum price controls, such controls are no longer in effect. Other federal, state and local legislation, while not directly applicable to us, may have an indirect effect on the cost of, or the demand for, natural gas and oil.

Employees

As of the end of our fiscal year on December 31, 2006, we employed fifteen full-time employees, consisting of four executives, four marketing and clerical persons, and seven production employees.

None of our employees are members of any union, nor have they entered into any collective bargaining agreements. We believe that our relationship with our employees is good. With the successful implementation of our business plan, we may seek additional employees in the next year to handle anticipated potential growth.

-9-

Facilities

We currently occupy approximately 4,000 square feet of office space in St. Marys, West Virginia, which we share with our subsidiaries, Tyler Construction Company and Ritchie County Gathering Systems. We lease an aggregate of approximately 4,000 square feet from an unaffiliated third party under a verbal arrangement for \$1,400 per month, inclusive of utilities.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

In addition, we acquired a new lease of approximately 2,000 square feet of office space in Parkersburg, West Virginia, which we share with our subsidiaries, Tyler Construction Company and Ritchie County Gathering Systems. This office is dedicated to our financial operations. We lease an aggregate of approximately 2,000 square feet from an unaffiliated third party under a written lease agreement for \$1,450 per month, inclusive of utilities.

Industry Segments

We are presently engaged in two industry segments. The first is the transportation and marketing of natural gas and oil; the second is the exploration, development, and production of natural gas and oil. Reference is made to Note 15, contained in the financial statements included herewith for the disclosure of our segmented revenues, expenses, and operating loss for the past two fiscal years.

Risk Factors

You should carefully consider the risks and uncertainties described below and other information in this report. If any of the following risks or uncertainties actually occur, our business, financial condition and operating results, would likely suffer. Additional risks and uncertainties, including those that are not yet identified or that we currently believe are immaterial, may also adversely affect our business, financial condition or operating results.

We have a history of losses and may realize future losses.

As a result of our revenue decreasing approximately 7% during the fiscal year ended December 31, 2006, we may not achieve, or subsequently maintain profitability if anticipated revenues do not increase in the future. We have experienced operating losses, negative cash flow from operations and net losses in each quarterly and annual period for the past several years. As of December 31, 2006, our net operating loss carryforward was approximately \$25 million and our accumulated deficit was approximately \$33 million. We expect to continue to incur significant expenses in connection with

- * exploration and development of new and existing properties;
- * costs of sales and marketing efforts;
- * construction of gathering system infrastructure;
- * additional personnel; and
- * increased general and administrative expenses.

Accordingly, we will need to generate significant revenues to achieve and attain, and eventually sustain profitability. If revenues do not increase, we may be unable to attain or sustain profitability on a quarterly or annual basis. Any of these factors could cause the price of our stock to decline.

We have a significant working capital deficit that makes it more difficult to obtain capital necessary for our operations and which may have an adverse effect on our future business.

-10-

As of December 31, 2006, we had a working capital deficit of \$2,318,875. If our business does not produce positive working capital in the future, our business and financial condition would most likely be materially and negatively impacted.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

It may be necessary for us to seek additional funding, which may not be available on terms favorable to us, or at all.

Management believes that we may need to seek additional funding in the future to provide sufficient working capital and funds for capital expenditures. If we cannot meet future capital requirements through realized revenues from our ongoing business, we may have to raise additional capital by borrowing or by selling equity or equity-linked securities, which would dilute the ownership percentage of our existing stockholders. Also, these securities could also have rights, preferences or privileges senior to those of our common stock. Similarly, if we raise additional capital by issuing debt securities, those securities may contain covenants that restrict us in terms of how we operate our business, which could also affect the value of our common stock. If we borrow more money, we will have to pay interest and may also have to agree to restrictions that limit operating flexibility. We may not be able to obtain funds needed to finance operations at all, or may be able to obtain funds only on very unattractive terms. Management may also explore other alternatives such as a joint venture with other oil and gas companies. There can be no assurances, however, that we will conclude any such transaction.

There are many competitors in the oil and gas industry.

We encounter many competitors in the oil and gas industry including in the exploration and development of properties and the sale of oil and gas. Management expects competition to continue to intensify in the future. Many existing and potential competitors have greater financial resources, larger market share and more customers than us, which may enable them to establish a stronger competitive position than we have. If we fail to address competitive developments quickly and effectively, we will not be able to grow and our business will be adversely affected.

Our operating results are likely to fluctuate significantly and cause our stock price to be volatile which could cause the value of your investment in our shares to decline.

Quarterly and annual operating results are likely to fluctuate significantly in the future due to a variety of factors, many of which are outside of our control. If operating results do not meet the expectations of securities analysts and investors, the trading price of our common stock could significantly decline which may cause the value of your investment to decline. Some of the factors that could affect quarterly or annual operating results or impact the market price of our common stock include:

- * our ability to develop properties and to market our oil and gas;
- * the timing and amount of, or cancellation or rescheduling of, orders for our oil and gas;
- * our ability to retain key management, sales and marketing and engineering personnel;
- * a decrease in the prices of oil and gas; and
- * changes in costs of exploration or marketing oil and gas.

Due to these and other factors, quarterly and annual revenues, expenses and results of operations could vary significantly in the future, and period-to-period comparisons should not be relied upon as indications of future performance.

Our business could be adversely affected by any adverse economic developments in the oil and gas industry and/or the economy in general.

The oil and gas industry is susceptible to significant change that may influence our business development due to a variety of factors, many of which are outside our control. Some of these factors include:

Edgar Filing: TRANS ENERGY INC - Form 10KSB

- * varying demand for oil and gas;
- * fluctuations in price;
- * competitive factors that affect pricing;
- * attempts to expand into new markets;
- * the timing and magnitude of capital expenditures, including costs relating to the expansion of operations;
- * hiring and retention of key personnel;
- * changes in generally accepted accounting policies, especially those related to the oil and gas industry; and
- * new government legislation or regulation.

-11-

Any of the above factors or a significant downturn in the oil and gas industry or with economic conditions generally, could have a negative effect on our business and on the price of our common stock.

Our future success depends on retaining existing key employees and hiring and assimilating new key employees. The loss of key employees or the inability to attract new key employees could limit our ability to execute our growth strategy, resulting in lost profitability and a slower rate of growth.

Our future success depends, in part, on the ability to retain our key employees including executive officers. Also, we do not carry, nor do we anticipate obtaining, "key man" insurance on our executives. It would be difficult for us to replace any one of these individuals. In addition, as we grow we may need to hire additional key personnel. We may not be able to identify and attract high quality employees or successfully assimilate new employees into our existing management structure.

If we are unable to manage our growth effectively, our operations and financial performance could be adversely affected.

The ability to manage and operate our business as we execute our anticipated growth will require effective planning. Significant future growth could strain our internal resources, leading to a lower quality of service and other problems that could adversely affect our financial performance. Our ability to manage future growth effectively will also require us to successfully attract, train, motivate, retain and manage new employees and continue to update and improve our operational, financial and management controls and procedures. If we do not manage our growth effectively, our operations could be adversely affected, resulting in slower growth and a failure to achieve or sustain profitability.

Going concern issue.

Our ability to continue as a going concern is dependant upon our ability to achieve a profitable level of operations. We may need, among other things, additional capital resources which we will seek through loans from banks or other forms of financing.

Risks relating to ownership of our common stock

The price of our common stock is extremely volatile and investors may not be able to sell their shares at or above their purchase price, or at all.

Our common stock is presently traded on the OTC Bulletin Board, although there is no assurance that a viable market will continue. The price of our

Edgar Filing: TRANS ENERGY INC - Form 10KSB

shares in the public market is highly volatile and may fluctuate substantially because of:

- * actual or anticipated fluctuations in our operating results;
- * changes in or failure to meet market expectations;
- * conditions and trends in the oil and gas industry; and
- * fluctuations in stock market price and volume, which are particularly common among securities of small capitalization companies.

Future sales or the potential for sale of a substantial number of shares of our common stock could cause the market value to decline and could impair our ability to raise capital through subsequent equity offerings.

If we do not generate necessary cash from our operations to finance future business, we may need to raise additional funds through public or private financing opportunities. The issuance of a substantial number of our common shares to individuals or in the public markets, or the perception that these sales may occur, could cause the market price of our common stock to decline and could materially impair our ability to raise capital through the sale of additional equity securities. Any such issuances would dilute the equity interests of existing stockholders.

We do not intend to pay dividends.

To date, we have never declared or paid a cash dividend on shares of our common stock. We currently intend to retain any future earnings for growth and development of business and, therefore, do not anticipate paying any dividends in the foreseeable future.

-12-

Possible "Penny Stock" Regulation.

Trading of our common stock on the OTC Bulletin Board may be subject to certain provisions of the Securities Exchange Act of 1934, commonly referred to as the "penny stock" rule. A penny stock is generally defined to be any equity security that has a market price less than \$5.00 per share, subject to certain exceptions. If our stock is deemed to be a penny stock, trading in our stock will be subject to additional sales practice requirements on broker-dealers. These may require a broker dealer to:

- * make a special suitability determination for purchasers of penny stocks;
- * receive the purchaser's written consent to the transaction prior to the purchase; and
- * deliver to a prospective purchaser of a penny stock, prior to the first transaction, a risk disclosure document relating to the penny stock market.

Consequently, penny stock rules may restrict the ability of broker-dealers to trade and/or maintain a market in our common stock. Also, many prospective investors may not want to get involved with the additional administrative requirements, which may have a material adverse effect on the trading of our shares.

Item 2. Description of Property

Our properties consist essentially of working and royalty interests owned by us in various oil and gas wells and leases located in West Virginia. Our

Edgar Filing: TRANS ENERGY INC - Form 10KSB

proved reserves for the years ended December 31, 2006, 2005 and 2004 are set forth below:

	December 31,		
	2006	2005	2004
Natural Gas (mmcf)			
Developed	13,161,354	4,263	542,955
Undeveloped	--	--	--
Total Proved	13,161,354	4,263	542,955
Crude Oil (Bbl)			
Developed	1,340,964	215,844	106,649
Undeveloped	--	--	--
Total Proved	1,340,964	215,844	106,649

Productive Gas Wells

The following summarizes the Company's productive oil and gas wells as of December 31, 2006. Productive wells are producing wells and wells capable of production. Gross wells are the total number of wells in which the Company has an interest. Net wells are the sum of the Company's fractional interests owned in the gross wells.

	Gross	Net
Oil and gas wells, West Virginia	245	245
	245	245

Oil and Gas Acreage

The following table sets forth the undeveloped leasehold acreage, by area, held by the Company as of December 31, 2006. Undeveloped acres are acres on which wells have not been drilled or completed to a point that would permit the production of commercial quantities of oil and gas, regardless of whether or not such acreage contains proved reserves. Gross acres are the total number of acres in which the Company has a working interest. Net acres are the sum of the Company's fractional interests owned in the gross acres. In certain leases, the Company's ownership varies at different depths; therefore, the net acres in these leases are calculated using the lowest ownership interest at any depth.

	Gross	Net
West Virginia, approximately	20,000	20,000
	20,000	20,000

The estimates for 2005 and 2004 are based primarily on the reports of Robert L. Richards (Wyoming), Geologist and presently an officer and director of Trans Energy, and Mark V. Schumacher, PE (West Virginia). The estimates for 2006 are based upon the report of Schlumberger Technology Corporation, independent petroleum consultants, dated February 27, 2007.

Such reports are, by their very nature, inexact and subject to changes and

Edgar Filing: TRANS ENERGY INC - Form 10KSB

revisions. Proved developed reserves are reserves expected to be recovered from existing wells with existing equipment and operating methods. Proved undeveloped reserves are expected to be recovered from new wells drilled to known reservoirs on undrilled acreage for which existence and recoverability of such reserves can be estimated with reasonable certainty, or from existing wells where a relatively major expenditure is required to establish production. No estimates of reserves have been included in any reports to any federal agency other than the SEC. See SFAS 69 Supplemental Disclosures included as part of our consolidated financial statements.

Set forth in the following schedule is the average sales price per unit of oil, expressed in barrels ("bbl"), and of natural gas, expressed in thousand cubic feet ("mcf"), produced by us for the past three fiscal years. The increase in the cost of oil production in 2006 is attributed to expenses incurred putting water flood into operation.

	Years ended December 31,		
Average sales price:	2006	2005	2004
Gas (per mcf)	\$ 6.78	\$ 10.28	\$ 7.40
Oil (per bbl)	47.26	56.20	30.24
Average cost of production:			
Gas (per mcf)	--	--	--
Oil (per bbl)	\$ 16.28	\$ 16.19	14.19

We have not filed any estimates of total, proved net oil and gas reserves with any federal authority or agency since the beginning of our last fiscal year.

The following schedule sets forth the capitalized costs relating to oil and gas producing activities by us for the past three fiscal years.

	Years ended December 31,		
	2006	2005	2004
Proved oil and gas producing properties and related lease and well equipment	\$ 6,208,786	\$ 6,134,651	\$ 7,093,676
Unproved oil and gas properties	10,156	64,004	95,945
Accumulated depreciation and depletion	(1,569,997)	(4,038,399)	(3,870,874)
Net Capitalized Costs	\$ 4,648,945	\$ 2,160,256	\$ 3,318,747

The following schedule summarizes changes in the standardized measure of discounted future net cash flows relating to our proved oil and gas reserves.

	Years ended December 31,		
	2006	2005	2004

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Standardized measure, beginning of year	\$23,044,241	\$ 4,438,836	\$ 1,864,377
Oil and gas sales, net of production costs	(580,885)	(392,855)	(125,966)
Sales of mineral in place	--	--	--
Purchases	--	--	2,375,205
Net change due to revisions in quantity estimates and accretion of discount	4,913,361	18,998,260	325,220

Standardized measure, end of year	\$ 27,376,717	\$23,044,241	\$ 4,438,836
	=====	=====	=====

-14-

We do not anticipate investing in or purchasing assets and/or property for the purpose of capital gains. It is our intention to purchase assets and/or property for the purpose of enhancing our primary business operations. We are not limited as to the percentage amount of our assets we may use to purchase any additional assets or properties.

Item 3. Legal Proceedings

Certain material pending legal proceedings to which we are a party or to which any of our property is subject is set forth below.

On September 22, 2000, Tioga Lumber Company obtained a judgment of \$43,300 plus interest in the Circuit Court of Pleasants County, West Virginia, against Tyler Construction Company for breach of contract. On February 28, 2002, we reached a negotiated payment schedule with Tioga and made the initial payment. We believe that we have satisfied the balance owed to Tioga of \$26,233.58, although the judgment has not yet been released. We are proceeding to secure the release of the judgment.

On July 28, 1999, Core Laboratories, Inc. obtained a judgment against the Company for non-payment of an account payable. The judgment calls for monthly payments of \$351 and is bearing interest at 10.00% per annum. At December 31, 2006, the Company had accrued a balance of \$14,062 plus accrued interest of \$7,250 which is included in judgments payable. The balance due on this judgment including the related interest was paid in full on February 28, 2007.

On July 1, 1998, RR Donnelly obtained a judgment against the Company for non-payment of accounts payable. The judgment calls for monthly payments of \$3,244 and is bearing interest at 10.00% per annum. At December 31, 2006, the Company has accrued a balance of \$63,705 plus accrued interest of \$33,029 which is included in judgments payable. Each of the judgments were paid in full on February 28, 2007. The balance due on this judgment including the related interest was paid in full on February 28, 2007.

We may be engaged in various other lawsuits and claims, either as plaintiff or defendant, in the normal course of business. In the opinion of management, based upon advice of counsel, the ultimate outcome of these lawsuits will not have a material impact on our financial position or results of operations.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of our securities holders during the fourth quarter of the fiscal year ended December 31, 2006.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

PART II

Item 5. Market for Common Equity and Related Stockholder Matters

Our common stock is quoted on the OTC Bulletin Board under the symbol TENG. Prior to the effectiveness of our reverse stock split on January 28, 2005, our stock traded under the symbol of TSRG. Set forth in the table below are the quarterly high and low prices of our common stock as obtained from the OTC Bulletin Board for the past two fiscal years and adjusted for the one share for 150 shares reverse stock split.

	High	Low
	-----	-----
2006		

First Quarter	\$ 0.90	\$ 0.58
Second Quarter	\$ 0.70	\$ 0.50
Third Quarter	\$ 0.85	\$ 0.51
Fourth Quarter	\$ 1.00	\$ 0.66
2005		

First Quarter	\$ 2.55	\$ 1.55
Second Quarter	\$ 1.97	\$ 0.70
Third Quarter	\$ 1.85	\$ 1.10
Fourth Quarter	\$ 1.75	\$ 0.71

-15-

As of March 29, 2007, there were approximately 388 holders of record of our common stock, which figure does not take into account those shareholders whose certificates are held in the name of broker-dealers or other nominee accounts.

Dividend Policy

We have not declared or paid cash dividends or made distributions in the past, and we do not anticipate that we will pay cash dividends or make distributions in the foreseeable future. We currently intend to retain and reinvest future earnings to finance operations.

Item 6. Management's Discussion and Analysis or Plan of Operation

The following information should be read in conjunction with the consolidated financial statements and notes thereto appearing elsewhere in this Form 10-KSB.

Results of Operations

The following table sets forth the percentage relationship to total revenues of principal items contained in the statements of operations of the consolidated financial statements included herewith for the two most recent fiscal years ended December 31, 2006 and 2005. It should be noted that percentages discussed throughout this analysis are stated on an approximate basis.

Fiscal Years Ended
December 31,

Edgar Filing: TRANS ENERGY INC - Form 10KSB

	----- 2006 -----	----- 2005 -----
Total revenues.....	100%	100%
Total costs and expenses.....	151	115
Total other income (expenses).....	19	(6)
Loss before income taxes and discontinued operations	(32)	(21)
Discontinued operations.....	(27)	--
Income taxes.....	--	--
Net (loss).....	(59)	(21)

For the Year Ended December 31, 2006 Compared to the Year Ended December 31, 2005

Total revenues of \$1,420,802 for the year ended December 31, 2006 ("2006") decreased 7% compared to \$1,526,728 for the year ended December 31, 2005 ("2005"), due primarily to the loss of the Cobham revenues for 2005 partially offset by the increase of oil and gas prices in 2006. In 2006, oil made up 25% of total revenues compared to 23% in 2005, and gas represented 75% of revenues in 2006 compared to 77% in 2005. The changes were considered minimal representing only a slight difference in percentage points.

We had an operating loss of \$1,685,316 for 2006 compared to our operating loss of \$951,813 in 2005. Total operating expenses increased 25% in 2006 primarily due to the 141% increase in selling, general and administrative. These increases were offset by a 40% decrease in production costs for the period. The increase in selling, general and administrative expenses was primarily due to the recording of \$1,686,450 in expense for the value of common stock issued to employees and consultants. As we reorganized our management team after the sale of Arvilla we found it necessary to issue shares to attract the caliber of people we need to move the Company forward. We do not expect this stock compensation expense to reoccur in 2007. We realized a loss on the sale of assets of \$178,393 in 2005 compared to a gain of \$678,319 in 2006.

Other income (expenses) as a percentage of revenues increased from negative 7% in 2005 to a positive 7% in 2006. This change is attributed to a gain on extinguishment of debt in 2006 offset by an increase in interest expense from \$126,885 in 2005 to \$221,210 in 2006 due to the borrowing of debt for well drilling and improvement. We realized a gain on extinguishment of debt of \$315,365 in 2006, compared to \$9,685 in 2005.

Our net loss for 2006 was \$2,948,528 versus a net loss of \$1,050,119 for 2005. The increase in net loss in 2006 is primarily attributed to increase in general and administrative expenses as described above and the loss from disposal of discontinued operations of \$1,541,142.

-16-

Net Operating Losses

We have accumulated approximately \$25 million of net operating loss carryforwards as of December 31, 2006, which may be offset against future taxable income through 2026. The use of these losses to reduce future income taxes will depend on the generation of sufficient taxable income prior to the expiration of the net operating loss carryforwards. In the event of certain changes in control, there will be an annual limitation on the amount of net operating loss carryforwards which can be used. No tax benefit has been reported

Edgar Filing: TRANS ENERGY INC - Form 10KSB

in the financial statements for the year ended December 31, 2006 because the potential tax benefits of the loss carryforward is offset by valuation allowance of the same amount.

Liquidity and Capital Resources

Historically, working capital needs have been satisfied through our operating revenues and from borrowed funds. Our working capital deficit at December 31, 2006 was \$2,610,953 compared with a deficit of \$3,012,700 at December 31, 2005. We anticipate meeting working capital needs during the 2007 fiscal year with revenues from operations and possibly from capital raised through the sale of either equity or debt securities. We have no other current agreements or arrangements for additional funding and there can be no assurance such funding will be available to us, or if available, such funding will be on acceptable or favorable terms to us.

As of December 31, 2006, we had total assets of \$6,251,409 and stockholders' equity of \$710,396 compared to total assets of \$10,934,424 and total stockholders' equity of \$497,076 at December 31, 2005. The decrease in total assets and increase in stockholders' equity at December 31, 2006 is attributed to the disposal of Arvilla and the settlement of debt for common stock. We have recorded a long-term liability of \$190,364 as an asset retirement obligation that relates to, in part, the estimated cost to plug wells in the event it becomes necessary.

Because we have generated significant losses from operations through December 31, 2006 and have a working capital deficit at December 31, 2006, there exists substantial doubt about our ability to continue as a going concern. Revenues have not been sufficient to cover operating costs and to allow us to continue as a going concern. Potential proceeds from the future sale of common stock, other contemplated debt and equity financing, and increases in operating revenues from new development would enable us to continue as a going concern. There can be no assurance that we can or will be able to complete any debt or equity financing.

In the opinion of management, inflation has not had a material effect on the operations of Trans Energy.

Forward-Looking and Cautionary Statements

This report includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements may relate to such matters as anticipated financial performance, future revenues or earnings, business prospects, projected ventures, new products and services, anticipated market performance and similar matters. When used in this report, the words "may," "will," "expect," "anticipate," "continue," "estimate," "project," "intend," and similar expressions are intended to identify forward-looking statements regarding events, conditions, and financial trends that may affect our future plans of operations, business strategy, operating results, and financial position. We caution readers that a variety of factors could cause our actual results to differ materially from the anticipated results or other matters expressed in forward-looking statements. These risks and uncertainties, many of which are beyond our control, include:

-17-

- * the sufficiency of existing capital resources and our ability to raise additional capital to fund cash requirements for future operations;
- * uncertainties involved in the rate of growth of our business and

Edgar Filing: TRANS ENERGY INC - Form 10KSB

- acceptance of any products or services;
- * volatility of the stock market, particularly within the technology sector; and
- * general economic conditions.

Although we believe the expectations reflected in these forward-looking statements are reasonable, such expectations cannot guarantee future results, levels of activity, performance or achievements.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 157, "Fair Value Measurements" which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. Where applicable, SFAS No. 157 simplifies and codifies related guidance within GAAP and does not require any new fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier adoption is encouraged. The Company does not expect the adoption of SFAS No. 157 to have a significant effect on its financial position or results of operation.

In June 2006, the Financial Accounting Standards Board issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109", which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006. The Company does not expect the adoption of FIN 48 to have a material impact on its financial reporting, and the Company is currently evaluating the impact, if any, the adoption of FIN 48 will have on its disclosure requirements.

-18-

Item 7. Financial Statements

Our financial statements as of and for the fiscal years ended December 31, 2006 and 2005 have been examined to the extent indicated in their report by Malone & Bailey, PC and H J & Associates, LLC, independent certified public accountants, respectively, and have been prepared in accordance with generally accepted accounting principles and pursuant to Regulation S-B as promulgated by the SEC. The aforementioned financial statements are included herein starting with page F-1.

Item 8. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

On September 8, 2006, HJ & Associates, LLC was terminated as the certifying accountant. HJ & Associates, LLC has served from the inception of the Company as the certifying accountant. From the date on which HJ & Associates LLC was engaged until the date HJ & Associates, LLC was terminated, there were no disagreements with HJ & Associates, LLC on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of HJ & Associates, LLC would have caused HJ & Associates, LLC to make reference to the subject matter of the disagreements in connection with any reports it would have issued, and there were no "reportable events" as that term is defined in Item 304(a)(1)(iv)

Edgar Filing: TRANS ENERGY INC - Form 10KSB

of Regulation S-B.

On September 8, 2006, the Company entered into an engagement letter with Malone & Bailey, PC to assume the role of its new certifying accountant. During the two most recent fiscal years and the subsequent interim periods prior to the engagement of Malone & Bailey, PC, the Registrant did not consult with Malone & Bailey, PC with regard to the application of accounting principles to a specified transaction, either completed or proposed; or the type of audit opinion that might be rendered on the Company's financial statements; or any matter that was either the subject of a disagreement or a reportable event (as described in Item 304(a)(1)(iv) of Regulation S-B).

The decision to change principal auditors and the engagement of the new principal auditor was recommended and approved by the Registrant's Board of Directors.

Item 8A. Controls and Procedures

As of the end of the period covered by this annual report, we carried out an evaluation, under the supervision and with the participation of management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934. In designing and evaluating the disclosure controls and procedures, management recognizes that there are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their desired control objectives. Additionally, in evaluating and implementing possible controls and procedures, management is required to apply its reasonable judgment.

Based upon the required evaluation, our chief executive officer and chief financial officer concluded as of December 31, 2006, our disclosure controls and procedures were not effective in timely alerting them to material information relating to the company required to be disclosed by us in the reports that we file or submit under the Exchange Act to be recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Our auditors had several adjusting entries for the year ended December 31, 2006. We are working to improve our processes and our communications with our auditors.

There have been no significant changes in our internal controls over financial reporting or in other factors that could significantly affect internal controls over financial reporting subsequent to the date we carried out our evaluation.

Item 8B. Other Information

None.

Reports on Form 8-K

Since the beginning of our fiscal fourth quarter commencing October 1, 2006 through the date of this report, we have filed current reports on Form 8-K reporting the following:

October 9, 2006 - reporting under Item 3.02 that Trans Energy has Issued an aggregate of 4,247,461 shares of common stock to 13 persons for debt owed and services rendered.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

January 7, 2007 - reporting under Item 2.01 the completion of the assignment for cash of all rights, title and interest in six oil and/or gas wells to Leatherwood, Inc., a Pennsylvania corporation. Reporting also the acquisition of 75% of the rights and interests in certain oil and gas leases in and under certain tracts of land containing approximately 3,120 acres located in Trego County, Kansas.

PART III

Item 9. Directors, Executive Officers, Promoters and Control Persons; Compliance with Section 16(a) of the Exchange Act

The following table sets forth the names, ages, and offices held by our directors and executive officers:

Name ----	Position -----	Director Since -----	Age ---
James K. Abcouwer	C.E.O., President and Chairman	April 2006	52
Loren E. Bagley	Vice President and Director	August 1991	64
William F. Woodburn	Secretary / Treasurer Chief Operating Officer and Director	August 1991	64
Robert L. Richards	Director	September 2001	59
John G. Corp	Director	February 2005	46

On January 6, 2006, our board of directors elected James K. Abcouwer as our new President and Chief Executive Officer. On April 27, 2006 Mr. Abcouwer was elected as a member of the board of directors and its Chairman.

All directors hold office until the next annual meeting of stockholders and until their successors have been duly elected and qualified. There are no agreements with respect to the election of directors. We have not compensated our directors for service on the Board of Directors or any committee thereof, but directors are reimbursed for expenses incurred for attendance at meetings of the Board and any committee thereof. Executive officers are appointed annually by the Board and each executive officer serves at the discretion of the Board. The Executive Committee of the Board of Directors, to the extent permitted under Nevada law, exercises all of the power and authority of the Board in the management of the business and affairs of Trans Energy between meetings of the Board.

The business experience of each of the persons listed above during the past five years is as follows:

James K. Abcouwer became President and C.E.O. in January 2006. Mr. Abcouwer has 25 years of experience in the energy industry and is the former C.E.O. of Columbia Natural Resources, Inc., an independent natural gas producer in the Appalachian Basin. He has also served as President and C.E.O. of EnergyUSA, a unit of NiSource Inc. Mr. Abcouwer is a 1975 graduate of the United States Military Academy at West Point, and received a Masters in Business Administration degree from Harvard Business School in 1982. Additionally, he is co-owner of Northstar Energy Corp. of Charleston, W Va., an independent oil and gas development company.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Loren E. Bagley served as our President and C.E.O. from September 1993 to September 2001, at which time he resigned as President and was appointed Vice President. From 1979 to the present, Mr. Bagley has been self-employed in the oil and gas industry as president, C.E.O. or vice president of various corporations which he has either started or purchased, including Ritchie County Gathering Systems, Inc. Mr. Bagley's experience in the oil and gas industry includes acting as a lease agent, funding and drilling of oil and gas wells, supervising production of over 175 existing wells, contract negotiations for purchasing and marketing of natural gas contracts, and owning a well logging company specializing in analysis of wells. Prior to becoming involved in the oil and gas industry, Mr. Bagley was employed by the United States government with the Agriculture Department. Mr. Bagley attended Ohio University and Salem College and earned a B.S. Degree.

John G. Corp became a director on February 28, 2005. Mr. Corp has more than 25 years of extensive experience in drilling, production and oilfield service operations in the Appalachian Basin. Prior to joining Trans Energy, Inc., he held various management positions with Belden & Blake Corp. from 1987-2004. He has a BS degree in Petroleum Engineering from Marietta (Ohio) College and is a member of the Society of Petroleum Engineers, the Ohio Oil & Gas Association and is chairman of the Technical Advisory Committee or the Ohio Department of Natural Resources.

William F. Woodburn has served as our Vice President from August 1991 to September 2001, at which time he resigned as Vice President and was appointed Secretary / Treasurer. In January 2006, Mr. Woodburn was named as our Chief Operating Officer. Mr. Woodburn has been actively engaged in the oil and gas business in various capacities for the past twenty years. For several years prior to 1991, Mr. Woodburn supervised the production of oil and natural gas and managed the pipeline operations of Tyler Construction Company, Inc. and Tyler Pipeline, Inc. Mr. Woodburn is a stockholder and serves as President of Tyler Construction Company, Inc., and is also a stockholder of Tyler Pipeline, Inc. which owns and operates oil and gas wells in addition to natural gas pipelines, and Ohio Valley Welding, Inc. which owns a fleet of heavy equipment that services the oil and gas industry. Prior to his involvement in the oil and gas industry, Mr. Woodburn was employed by the United States Army Corps of Engineers for twenty four years and was Resident Engineer on several construction projects. Mr. Woodburn graduated from West Virginia University with a B.S. in civil engineering.

Robert L. Richards became a director and was appointed President and C.E.O. in September 2001. On February 28, 2004, Mr. Richards relinquished his position as C.E.O., but remained as a director. From 1982 to the present, he has been President of Robert L. Richards, Inc. a consulting geologist firm with 27 years experience in the petroleum industry. He has also served as a geologist with Exxon, exploration geologist with Union Texas Petroleum, and regional exploration manager for Carbonit Exploration, Inc. From 2000 to the present, he has been President and C.E.O. of Derma - Rx, Inc., a formulator and marketer of skin care products. Also, from 1992 to August 2000, Mr. Richards was C.E.O. of Kaire Nutraceuticals, Inc., a developer and marketer of health and nutritional products. Mr. Richards served as Vice President of Continental Tax Corporation from March 1989 to August 1992. He has five and one-half years experience in the United States Air Force as an Instructor Pilot. Mr. Richards holds a B.S. degree in geology from Brigham Young University.

Item 10. Executive Compensation

We currently have a bonus and profit sharing compensation plan for the

Edgar Filing: TRANS ENERGY INC - Form 10KSB

benefit of employees and officers of the company. The program is primarily focused on senior officers, but certain elements of the plan are made available to key managers and to any employee in certain circumstances. In addition, management is presently in the process of developing a deferred compensation plan for employees and officers of the company, which will be presented to the board of directors later in 2007. We currently have an employment contract with Mr. Abcouwer with a two year term that includes bonus compensation for accomplishment of certain objectives related to value creation and enhancement.

For the fiscal year ended December 31, 2006, our Chief Executive Officer was paid cash compensation of \$120,000. No other executive officers received cash compensation greater than \$60,000 in any of the past three fiscal years.

-21-

Item 11. Security Ownership of Certain Beneficial Owners and Management

The following table sets forth information, to the best of our knowledge as December 31, 2006, with respect to each person known by us to own beneficially more than 5% of our outstanding common stock, each director and all directors and officers as a group. Unless otherwise noted, the address of each person listed below is that of Trans Energy, 210 Second Street, St. Marys, West Virginia 26170.

Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership	Percent of Class(1)
James K. Abcouwer *	1,467,610 (2)	15.5%
Robert L. Richards *	261,754 (3)	2.8%
Loren E. Bagley *	1,191,874 (4)	12.6%
William F. Woodburn *	1,746,626 (5)	18.5%
John G. Corp.*	45,000	0.5%
All directors and executive officers a group (5 persons)		49.9%

* Indicates director and/or executive officer at December 31, 2006

- (1) Based upon 9,450,565 shares of common stock outstanding. (2) Includes 1,287,500 shares of common stock held in the name of the Abcouwer Family Limited Partnership Trust.
- (3) Includes 80,087 shares held in the name of Argene Richards, wife of Mr. Richards.
- (4) Includes 33,543 shares held in the name of Carolyn S. Bagley, wife of Mr. Bagley, over which Mrs. Bagley retains voting power.
- (5) Includes 133,670 shares in the name of Janet L. Woodburn, wife of Mr. Woodburn, over which shares Mrs. Woodburn retains voting power, and 314,070 in the name of a corporation in which William and Janet Woodburn are officers and shareholders.

Item 12. Certain Relationships and Related Transactions

During the past two fiscal years, there have been no transactions between us and any officer, director, nominee for election as director, or any shareholder owning greater than five percent (5%) of our outstanding shares, nor any member of the above referenced individuals' immediate family, except as set forth below.

Loren E. Bagley is President of Sancho, a principal purchaser of our

Edgar Filing: TRANS ENERGY INC - Form 10KSB

natural gas. Mr. Bagley's wife, Carolyn S. Bagley is a director and owner of 33% of the outstanding capital stock of Sancho. Under our contract with Sancho, we have the right to sell natural gas subject to the terms and conditions of a 20-year contract, as amended, that Sancho entered into with Hope Gas in 1988. This agreement is a flexible volume supply agreement whereby we receive the full price which Sancho receives less a \$.05 per Mcf marketing fee paid to Sancho. The price of the natural gas is based upon the greater of the residential gas commodity index or the published Inside F.E.R.C. Index, at our option, for the first 1,500 Mcf purchased per day by Hope Gas and thereafter the price is the Inside F.E.R.C. Index. The residential gas commodity index does not directly fluctuate with the overall price of natural gas. The Inside F.E.R.C. Index fluctuates monthly with the change in the price of natural gas. While such option provides certain price protection for us there can be no assurance that prices paid by us to suppliers will be lower than the price which we would receive under the Hope Gas arrangement. During 2006, we paid Sancho an aggregate of approximately \$20,195 pursuant to such contract.

-22-

It is our policy that any future material transactions between us and members of management or their affiliates shall be on terms no less favorable than those available from unaffiliated third parties.

Item 14. Principal Accountants Fees and Services

We do not have an audit committee and as a result our entire board of directors performs the duties of an audit committee. Our board of directors will approve in advance the scope and cost of the engagement of an auditor before the auditor renders audit and non-audit services. As a result, we do not rely on pre-approval policies and procedures.

Audit Fees

The aggregate fees billed by our independent auditors, Malone & Bailey, PC and H J & Associates, LLC for professional services rendered for the audit of our annual financial statements included in our Annual Reports on Form 10-KSB for the years ended December 31, 2006 and 2005, and for the review of quarterly financial statements included in our Quarterly Reports on Form 10-QSB for the quarters ending March 31, June 30 and September 30, 2006 and 2005, were:

	2006	2005
	-----	-----
Malone & Bailey PC	\$ 38,500	\$ -0-
HJ& Associates, LLC	\$ 97,249	\$ 105,000

Audit Related Fees

For the years ended December 31, 2006 and 2005, there were no fees billed for assurance and related services by Malone & Bailey, PC or H J & Associates, LLC relating to the performance of the audit of our financial statements which

Edgar Filing: TRANS ENERGY INC - Form 10KSB

are not reported under the caption "Audit Fees" above.

Tax Fees

For the years ended December 31, 2006 and 2005, fees billed by Malone & Bailey, PC or H J & Associates, LLC, respectively, for tax compliance, tax advice and tax planning were \$-0- and \$2,300, respectively.

We do not use the auditors for financial information system design and implementation. These services, which include designing or implementing a system that aggregates source data underlying the financial statements or generates information that is significant to our financial statements, are provided internally or by other service providers. We do not engage the auditors to provide compliance outsourcing services.

The board of directors has considered the nature and amount of fees billed by Malone & Bailey, PC and H J & Associates, LLC and believes that the provision of services for activities unrelated to the audit is compatible with maintaining Malone & Bailey, PC's and H J & Associates, LLC's independence.

Consolidated Statements of Cash Flows	F-8
Notes to the Consolidated Financial Statements	F-10

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors
Trans Energy, Inc. and Subsidiaries
St. Marys, West Virginia

We have audited the accompanying consolidated balance sheet of Trans Energy, Inc. and Subsidiaries (the Company) as of December 31, 2006 and the related consolidated statements of operations, stockholders' equity and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2006 and the results of their operations and their cash flows for the year then ended, in conformity with United States generally accepted accounting principles.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 2 to the consolidated financial statements, the Company has generated significant losses from operations, has an accumulated deficit of \$33,026,735 and has a working capital deficit of \$2,610,953 at December 31, 2006, which together raises substantial doubt about the Company's ability to continue as a going concern. Management's plans in regards to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors
Trans Energy, Inc. and Subsidiaries
St. Marys, West Virginia

We have audited the accompanying consolidated statements of operations, stockholders' equity and cash flows of Trans Energy, Inc. and Subsidiaries (the Company) for the year ended December 31, 2005. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the results of operations and cash flows of the Company for the year ended December 31, 2005, in conformity with United States generally accepted accounting principles.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 8 to the December 31, 2005 consolidated financial statements, the Company had generated significant losses from operations, had an accumulated deficit of \$30,078,207 and had a working capital deficit of \$3,012,700 at December 31, 2005, which together raises substantial doubt about the Company's ability to continue as a going concern. Management's plans in regards to these matters are also described in Note 8 to the December 31, 2005 financial statements. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

TRANS ENERGY, INC. AND SUBSIDIARIES
 Notes to the Consolidated Financial Statements
 December 31, 2006 and 2005

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Organization

The Company was incorporated in the State of Idaho on January 16, 1964. On January 11, 1988, the Company changed its name to Apple Corporation. In 1988, the Company acquired oil and gas leases and other assets from Ben's Run Oil Company (a Virginia limited partnership) and has since engaged in the business of oil and gas production.

On November 5, 1993, the Board of Directors caused to be incorporated in the State of Nevada, a new corporation by the name of Trans Energy, Inc., with the specific intent of effecting a merger between Trans Energy, Inc. of Nevada and Apple Corp. of Idaho, for the sole purpose of changing the domicile of the Company to the State of Nevada. On November 15, 1993, Apple Corp. and the newly formed Trans Energy, Inc. executed a merger agreement whereby the shareholders of Apple Corp. exchanged all of their issued and outstanding shares of common stock for an equal number of shares of Trans Energy, Inc. common stock. Trans Energy, Inc. was the surviving corporation and Apple Corp. was dissolved.

Principles of Consolidation

The consolidated financial statements include the Company and its wholly-owned subsidiaries, Prima Oil Company, Inc., Ritchie County Gathering Systems, Inc., Tyler Construction Company, Inc, and Tyler Energy, Inc. In addition, the consolidated financial statements include two of the Company's other subsidiaries, Arvilla Oilfield Services, LLC which was disposed of subsequent to December 31, 2005 and has been presented as "discontinued operations" in these consolidated financial statements. All significant intercompany accounts and transactions have been eliminated.

Oil and Gas Properties

The Company uses the successful efforts method of accounting for oil and gas producing activities. Costs to acquire mineral interests in oil and gas properties, to drill and equip exploratory wells that find proved reserves, and to drill and equip development wells are capitalized. Costs to drill exploratory wells that do not find proved reserves, geological and geophysical costs, and costs of carrying and retaining unproved properties are expensed.

Unproved oil and gas properties that are individually significant are periodically assessed for impairment of value, and a loss is recognized at the time of impairment by providing an impairment allowance. Other unproved properties are amortized based on the Company's experience of successful drilling and average holding period. Capitalized costs of producing oil and gas properties, after considering estimated dismantlement and abandonment costs and estimated salvage values, are depreciated and depleted by the unit-of-production method. Support equipment and other property and equipment are depreciated over their estimated useful lives.

On the sale or retirement of a complete unit of a proved property, the cost and related accumulated depreciation, depletion, and amortization are eliminated from the property accounts, and the resultant gain or loss is recognized. On the retirement or sale of a partial unit of proved property, the cost is charged to accumulated depreciation, depletion, and amortization with a resulting gain or loss recognized in income.

Edgar Filing: TRANS ENERGY INC - Form 10KSB

F-10

TRANS ENERGY, INC. AND SUBSIDIARIES
Notes to the Consolidated Financial Statements
December 31, 2006 and 2005

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Oil and Gas Properties (Continued)

On the sale of an entire interest in an unproved property for cash or cash equivalent, gain or loss on the sale is recognized, taking into consideration the amount of any recorded impairment if the property had been assessed individually.

If a partial interest in an unproved property is sold, the amount received is treated as a reduction of the cost of the interest retained.

Loss per Share of Common Stock

The basic loss per share of common stock is based on the weighted average number of shares issued and outstanding during the year. Fully diluted loss per share is the same as basic loss per share as the common stock equivalents are antidilutive in nature.

	For the Years Ended December 31,	
	2006	2005

	=====	=====

Provision for Taxes

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carryforwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are

Edgar Filing: TRANS ENERGY INC - Form 10KSB

reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Revenue Recognition Policy

The Company recognizes gas revenues upon delivery of the gas to the customers' pipeline from the Company's pipelines when recorded as received by the customer's meter. The Company recognizes oil revenues when pumped and metered by the customer.

F-11

TRANS ENERGY, INC. AND SUBSIDIARIES Notes to the Consolidated Financial Statements December 31, 2006 and 2005

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Property and Equipment

Fixed assets are stated at cost. Depreciation on vehicles, machinery and equipment is provided using the straight line method over expected useful lives of five years. Depreciation on pipelines is provided using the straight-line method over the expected useful lives of fifteen years.

Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Long-Lived Assets

The Company reviews long-lived assets and identifiable intangibles whenever events or circumstances indicate that the carrying amounts of such assets may not be fully recoverable. The Company evaluates the recoverability of long-lived assets by measuring the carrying amounts of the assets against the estimated undiscounted cash flows associated with these assets. At the time such evaluation indicates that the future undiscounted cash flows of certain long-lived assets are not sufficient to recover the assets' carrying value, the assets are adjusted to their fair values (based upon discounted cash flows).

Accounts Receivable

Accounts receivable are carried at the expected net realizable value. The allowance for doubtful accounts is based on management's assessment of the collectibility of specific customer accounts and the aging of the accounts receivables. If there were a deterioration of a major customer's creditworthiness, or actual defaults were higher than historical experience, our estimates of the recoverability of the

Edgar Filing: TRANS ENERGY INC - Form 10KSB

amounts due to us could be overstated, which could have a negative impact on operations.

Recent Accounting Pronouncements

The Company does not expect the adoption of any recently issued accounting pronouncements to have a significant effect on its material position or results of operations.

F-11

TRANS ENERGY, INC. AND SUBSIDIARIES Notes to the Consolidated Financial Statements December 31, 2006 and 2005

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Share Based Compensation

As permitted by FASB Statement No. 123 "Accounting for Stock Based Compensation", the Company elected to measure and record compensation cost relative to employee stock option costs in accordance with Accounting Principles Board ("APB") Opinion 25, "Accounting for Stock Issued to Employees," and related interpretations and make pro forma disclosures of net income and earnings per share as if the fair value method of valuing stock options had been applied. Under APB Opinion 25, compensation cost is recognized for stock options granted to employees when the option price is less than the market price of the underlying common stock on the date of grant.

In January 2006, the Company adopted the provisions of Statement of Financial Accounting Standards No. 123R. Under FASB Statement 123R, the Company estimates the fair value of each stock award at the grant date by using the Black-Scholes option pricing model with the following weighted average assumptions used for grants, respectively; dividend yield of zero percent for all years; expected volatility of 68.35% and 68.72%; risk-free interest rate of 5.00% and 4.08% and expected lives of 10 years for the years ended December 31, 2006 and 2005, respectively.

Had compensation cost for the Company's stock options granted to directors and employees been based on the fair value as determined by the Black-Scholes option pricing model at the grant date under the accounting provisions of SFAS No. 123, the Company would have recorded an additional expense of \$837,416, pertaining to the vested portion of the options, for the year ended December 31, 2005. Also under these same provisions, the Company's net loss would have been changed by the pro forma amounts indicated below:

	For the Year Ended December 31, 2005

Net loss:	
As reported	\$ (1,050,119)
Pro forma	\$ (1,887,535)
Basic loss per share:	
As reported	\$ (0.22)
Pro forma	\$ (0.40)

Reclassifications

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Certain amounts in prior financial statements have been reclassified to conform to the 2006 financial statement presentation.

NOTE 2 - GOING CONCERN

The Company's consolidated financial statements are prepared using United States generally accepted accounting principles applicable to a going concern which contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company has incurred cumulative operating losses through December 31, 2006 of \$33,026,735 and has a working capital deficit at December 31, 2006 of \$2,610,953.

F-13

TRANS ENERGY, INC. AND SUBSIDIARIES Notes to the Consolidated Financial Statements December 31, 2006 and 2005

NOTE 2 - GOING CONCERN (Continued)

Revenues have not been sufficient to cover its operating costs and to allow it to continue as a going concern. The potential proceeds from the sale of common stock, sale of drilling programs, and other contemplated debt and equity financing, and increases in operating revenues from new development and business acquisitions would enable the Company to continue as a going concern. There can be no assurance that the Company can or will be able to complete any debt or equity financing. The Company's consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOTE 3 - DISCONTINUED OPERATIONS

On January 3, 2006 the Company entered into a definitive agreement to sell its well servicing and maintenance business, Arvilla Oilfield Services, LLC, a West Virginia limited liability company, to Clarence E. Smith and Rebecca L. Smith, both directors of the Company. As a result of consummating the definitive agreement, Clarence and Rebecca Smith returned to the Company 521,411 shares of Trans Energy common stock. Clarence and Rebecca Smith also conveyed to the Company all of their interest in and to five oil and gas wells located in Tyler County, West Virginia. Upon execution of the definitive agreement, Clarence Smith resigned as our Chief Executive Officer, but remained on our board of directors until the closing effective on March 31, 2006. On April 7, 2006 both Clarence and Rebecca Smith resigned from the board of directors.

The Company has accounted for the financial statements of Arvilla Oilfield Services, LLC as discontinued operations and recorded a loss from discontinued operations of \$1,541,141, which is included in the statement of operations for the year ended December 31, 2006.

The accompanying financial statements have been presented to reflect the operations of Arvilla Oil Field Services, LLC as discontinued. Operating results for the years ended December 31, 2006 and 2005 are as follows:

	2006	2005
	-----	-----
Revenues	\$ 2,684,858	\$ 10,218,520
Cost of sales	(1,471,481)	(6,679,099)
General and administrative	(988,655)	(3,251,257)
Other income (expense)	(40,947)	(267,821)

Edgar Filing: TRANS ENERGY INC - Form 10KSB

	-----	-----
Net income	\$ 183,775	\$ 20,343
	=====	=====

NOTE 4 - PROPERTY AND EQUIPMENT

At December 31, 2006, property and equipment consisted of:

Vehicles	\$	159,693
Machinery and equipment		381,050
Furniture and Fixtures		31,695
Leasehold improvements		2,825
Accumulated depreciation		(84,510)

Total Fixed Assets	\$	490,753
		=====

NOTE 5 - OIL AND GAS PROPERTIES

On April 12, 2006 the Company finalized a definitive agreement for sale of certain wells, overriding royalties and undeveloped acreage located in Campbell County, Wyoming. The assets were sold at public auction through the Oil & Gas Asset Clearinghouse in Houston, Texas. The gross sales price for the properties was \$1,003,000, with net proceeds of \$951,725 to the Company.

On August 14, 2006, the Company purchased various oil and gas wells and interests as well as equipment in West Virginia for 1,000,000 shares of the Company's common stock valued at \$680,000 and cash of \$660,000.

NOTE 6 - JUDGMENTS PAYABLE

On July 28, 1999, Core Laboratories, Inc. obtained a judgment against the Company for non-payment of an account payable. The judgment calls for monthly payments of \$351 and is bearing interest at 10.00% per annum. At December 31, 2006, the Company had accrued a balance of \$14,062 plus accrued interest of \$7,250, which are included in judgments payable. The balance due on this judgment including the related interest was paid in full on February 28, 2007.

On July 1, 1998, RR Donnelly obtained a judgment against the Company for non-payment of accounts payable. The judgment calls for monthly payments of \$3,244 and is bearing interest at 10.00% per annum. At December 31, 2006, the Company has accrued a balance of \$63,705 plus accrued interest of \$33,023, which is included in judgments payable. Each of the judgments were paid in full on February 28, 2007. The balance due on this judgment including the related interest was paid in full on February 28, 2007.

NOTE 8 - ASSET RETIREMENT OBLIGATION

The following is a description of the changes to the Company's asset retirement obligation for 2006 and 2005:

Asset retirement obligation at beginning of year	\$ 799,393	\$ 1,571,749
Acquisition of oil and gas properties	312,963	--
Disposition of subsidiary	--	(810,006)
Accretion expense	15,144	37,650
Revision in cost estimates	(937,136)	--
	-----	-----
Asset retirement obligation at end of year	\$ 190,364	\$ 799,393
	=====	=====

NOTE 9 - PROVISION FOR TAXES

At December 31, 2006, the Company had net operating loss carryforwards of approximately \$25,000,000 that may be offset against future taxable income from the year 2006 through 2026. No tax benefit has been reported in the December 31, 2006 consolidated financial statements since the potential tax benefit is offset by a valuation allowance of the same amount.

Due to the change in ownership provisions of the Tax Reform Act of 1986, net operating loss carryforwards for Federal income tax reporting purposes are subject to annual limitations. Should a change in ownership occur, net operating loss carryforwards may be limited as to use in future years.

Net deferred tax assets consist of the following components as of December 31, 2006 and 2005:

	2006	2005
	-----	-----
Deferred tax assets:		
NOL carryover	\$ 9,586,971	\$ 9,874,400
Accrued expenses	82,589	283,800
	-----	-----
Total deferred tax assets	9,669,560	10,158,200
Valuation allowance	(9,669,560)	(10,158,200)
	-----	-----
Net deferred tax asset	\$ --	\$ --
	=====	=====

The income tax provision differs from the amount of income tax determined by applying the U.S. federal and state income tax rates of 39% to pretax income from continuing operations for the years ended December 31, 2006 and 2005 due to the following:

	2006	2005
	-----	-----
Book income	\$ (582,302)	\$ (409,546)
Other	71,672	(7,934)
Stock and options for services	704,828	50,115
Contributed services	--	97,500

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Capital loss carryover	(280,416)	68,654
Accrued expenses	(201,211)	6,049
Valuation allowance	287,429	195,162
	-----	-----
	\$ --	\$ --
	=====	=====

F-16

NOTE 10 - COMMITMENTS

On July 24, 2006, the Company entered into a one year lease for its corporate office. Rent of \$1,450 is due monthly. Future lease obligations as of December 31, 2006 are \$8,700.

NOTE 11 - STOCKHOLDERS' EQUITY

Preferred Stock -The Company has authorized 10,000,000 shares of \$.001 par value preferred stock. The preferred stock shall have preference as to dividends and to liquidation of the Company.

Common Stock - The Company has authorized 500,000,000 shares of \$.001 par value common stock.

In January 2005, the Company issued 50,000 shares of common stock for services valued at \$92,500.

In January 2005, the Company issued 1,185,024 shares of common stock for an acquisition of a subsidiary valued at \$ 2,370,048.

In 2005, key employees of the Company contributed services valued at \$250,000.

In July 2005, the Company issued 141,668 shares of the common stock for debt relief of \$255,000.

In August 2005, the Company received 244,633 shares of the common stock of the Company in return for the sale of certain assets of the Company. These shares have been accounted for as treasury stock at a cost basis of \$286,467.

In December 2005, the Company issued 20,000 shares of common stock for consulting services valued at \$36,000.

In April 2006, the Company received 521,411 shares of the common stock of the Company in return for the sale of certain assets of the Company at a cost basis of \$469,270. The Company then cancelled the 766,044 shares held in treasury.

In August 2006, the Company issued 1,000,000 shares of common stock for an acquisition of oil and gas properties valued at \$ 680,000.

In October 2006, the Company issued 2,807,000 shares of common stock for consulting services valued at \$1,686,450, 337,500 shares of common stock for cash of \$270,000 and 1,119,961 shares of common stock for debt of \$609,136.

	=====			=====	

NOTE 13 - RELATED PARTY TRANSACTIONS

a. Marketing Agreement - Sancho

Natural gas delivered through the Company's pipeline network is sold either to Sancho Oil and Gas Corporation ("Sancho"), a company controlled by the Vice President of the Company, at the industrial facilities near Sistersville, West Virginia, or to Dominion Gas, a local utility, on an on-going basis at a variable price per month per Mcf.

Under its contract with Sancho, the Company has the right to sell natural gas subject to the terms and conditions of a 20-year contract, as amended, that Sancho entered into with Dominion Gas in 1988. This agreement is a flexible volume supply agreement whereby the Company receives the full price which Sancho charges the end user less a \$0.05

Edgar Filing: TRANS ENERGY INC - Form 10KSB

per Mcf marketing fee paid to Sancho.

b. Well Drilling and Operating Agreement

In June 2000, the Company entered into a well drilling and operating agreement with Sancho Oil and Gas Corporation ("Sancho"), a company controlled by the Vice President of the Company, on an on-going basis. Sancho provided seven drill-down wells located in Tyler County, West Virginia and the Company was to pay 100% of the cost of drilling and completing the well including any topside equipment needed and other related equipment. The Company received 75% of the working interest in each of the wells completed.

c. Receivables and Payables

The Company has various payables to the officers and companies of the officers. These amounts have been grouped together with a net payable of \$379,616 and receivable of \$554,100 at December 31, 2006.

NOTE 14 - ECONOMIC DEPENDENCE AND MAJOR CUSTOMERS

The Company's marketing arrangement with Sancho accounted for approximately 100% of Tyler Construction Company's revenue for the years ended December 31, 2006 and 2005. This marketing agreement is in effect until December 1, 2008. Another customer also generated 100% of Ritchie County sales in 2006 and 2005.

F-18

NOTE 15 - BUSINESS SEGMENTS

The Company conducts its operations principally as oil and gas sales with Trans Energy, Prima Oil, and Cobham Gas & Oil, Inc., Penine Resources, Inc., and Belmont Energy, Inc. and pipeline transmission with Ritchie County and Tyler Construction.

Certain financial information concerning the Company's operations in different industries is as follows:

	For the Years Ended December 31,	Oil and Gas Sales	Pipeline Transmission	Corporate Unallocated
	-----	-----	-----	-----
Oil and gas revenue	2006	\$ 1,192,083	\$ 228,719	\$ --

NOTE 16 - SUBSEQUENT EVENTS

On January 9, 2007 the Company completed the assignment for cash to Leatherwood, Inc., of six oil and/or gas wells located in West Virginia. The Company assigned all of its right, title, operating rights and interest, including the absolute right to produce, operate and maintain the wells.

Also on January 10, 2007, the Company acquired from National Gulf Production, Inc. 75% of National Gulf's rights and interests in and to certain oil and gas leases covering the oil and gas in and under certain tracts of land containing approximately 3,120 acres located in Trego County, Kansas for cash of \$285,000.

On February 7, 2007, the Company entered into an agreement with P.D. Farr to purchase all rights, title and interests in the 384 acre Ezra Hays Lease in West Virginia including, but not limited to, oil and gas wells, associated well equipment, interest in the natural gas sales pipeline, all rights to Dominion Gas sales meter and all pertinent rights-of-way for \$138,000. On December 16, 2006 the Company paid the sum of \$10,000 as a down payment to be applied against the agreed to sales price as stated above, leaving an unpaid balance of \$128,000 due in installments, to be paid in full by July 10, 2007.

Purchases of minerals in place	--	--
Extensions and discoveries	--	--
Production	(1,593)	(133,861)
Sales of minerals in place	--	--
End of the year 2006	1,340,964	13,161,354
Proved developed reserves:	Oil	Gas

Edgar Filing: TRANS ENERGY INC - Form 10KSB

	BBL -----	MCF -----
End of the year 2006	330,570	3,310,161
End of the year 2005	215,844	4,263

During the years ended December 31, 2006 and 2005, the Company had reserve studies and estimates prepared on its various properties. The difficulties and uncertainties involved in estimating proved oil and gas reserves makes comparisons between companies difficult. Estimation of reserve quantities is subject to wide fluctuations because it is dependent on judgmental interpretation of geological and geophysical data.

Standardized Measure of Discounted Future Net Cash Flows Relating to Proved Oil and Gas Reserves

	December 31, -----	
	2006 ----	2005 ----
Future cash inflows	\$ 166,383,422	\$ 36,322,180
Future production and development costs	(50,080,837)	(7,990,879)
Future production tax expense	(8,319,171)	--
	-----	-----
Future net cash flows	107,983,414	28,331,301
Discounted for estimated timing of cash flows	(80,606,697)	(5,287,060)
	-----	-----
Standardized measure of discounted future net cash flows	\$ 27,376,717	\$ 23,044,241
	=====	=====

Future income taxes were determined by applying the statutory income tax rate to future pre-tax net cash flow relating to proved reserves.

TRANS ENERGY, INC. AND SUBSIDIARIES
Supplemental Oil and Gas Disclosures
December 31, 2006 and 2005
(Unaudited)

The following schedule summarizes changes in the standardized measure of discounted future net cash flow relating to proved oil and gas reserves:

	For the Years Ended December 31, -----	
	2006	2005
Standardized measure, beginning of year	\$ 23,044,241	\$ 4,438,836

Edgar Filing: TRANS ENERGY INC - Form 10KSB

Oil and gas sales, net of production costs	(580,885)	(392,855)
Sales of mineral in place	--	--
Purchases	--	--
Net change due to revisions in quantity estimates	4,367,637	18,750,298
Accretion of discount items	545,724	247,962
	-----	-----
 Standardized measure, end of year	 \$ 27,376,717	 \$ 23,044,241
	=====	=====

The above schedules relating to proved oil and gas reserves, standardized measure of discounted future net cash flows and changes in the standardized measure of discounted future net cash flows have their foundation in engineering estimates of future net revenues that are derived from proved reserves and prepared using the prevailing economic conditions. These reserve estimates are made from evaluations conducted by independent geologists, of such properties and will be periodically reviewed based upon updated geological and production data. Estimates of proved reserves are inherently imprecise. The above standardized measure does not include any restoration costs due to the fact the Company does not own the land.

Subsequent development and production of the Company's reserves will necessitate revising the present estimates. In addition, information provided in the above schedules does not provide definitive information as the results of any particular year but, rather, helps explain and demonstrate the impact of major factors affecting the Company's oil and gas producing activities. Therefore, the Company suggests that all of the aforementioned factors concerning assumptions and concepts should be taken into consideration when reviewing and analyzing this information.
