**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

**(In thousands, except per share data)**

**(1) Basis of Presentation**

Tennant Company is referred to as Tennant, us, we, or our in these Notes to the Condensed Consolidated Financial Statements.

In our opinion, the accompanying unaudited, Condensed Consolidated Financial Statements contain all adjustments (consisting of only normal recurring adjustments, except as noted elsewhere in the Notes to Condensed Consolidated Financial Statements) necessary to present fairly our financial position as of September 30, 2007, the results of our operations for the three and nine months ended September 30, 2007 and 2006 and cash flows for the nine months ended September 30, 2007 and 2006. These statements are condensed and, therefore, do not include all of the information and note disclosures required by accounting principles generally accepted in the United States of America for complete financial statements. The statements should be read in conjunction with the Consolidated Financial Statements and Notes included in our Annual Report on Form 10-K for the year ended December 31, 2006. The results of operations for the three and nine months ended September 30, 2007 are not necessarily indicative of the results to be expected for the full year.

**Newly Adopted Accounting Pronouncements**

In March 2006, the Financial Accounting Standards Board ( FASB ) released EITF Issue No. 06-3, How Sales Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement ( EITF Issue No. 06-3 ). EITF Issue No. 06-3 concluded that the presentation of sales, use, value-added and certain excise taxes on either a gross (included in revenues and costs) or a net (excluded from revenues) basis is an accounting policy decision that should be disclosed in the financial statements. In addition, for any such taxes that are reported on a gross basis, a company should disclose the amounts of those taxes in interim and annual financial statements for each period for which an income statement is presented if those amounts are significant. We adopted EITF Issue No. 06-3 as of January 1, 2007. Our accounting policy is to present these taxes on a net basis.

In June 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes ( FIN No. 48 ). FIN No. 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. We adopted FIN No. 48 as of January 1, 2007, as further discussed in Note 12.

**(2) Restructuring Charges**

During the third quarter of 2007, management approved a restructuring action in an effort to better match skill sets and talent in evolving functional areas that are critical to successful execution of our strategic priorities. These actions impacted approximately 60 positions within a workforce of 2,700, or about two percent of the employee base.

The restructuring action resulted in the recognition of a pretax charge of \$1,647 (\$1,103 aftertax or \$0.06 per diluted share) in our third quarter ended September 30, 2007. The charge consists primarily of severance and outplacement benefits and is included within selling and administrative expenses in the Consolidated Statements of Earnings. The total cost of severance and outplacement benefits is expected to be incurred by year end and totals approximately \$2,200.

Other costs associated with the restructuring action were \$79 as of September 30, 2007. These costs are expected to total approximately \$300 and will be primarily incurred during the first quarter of 2008. These costs include expenses related to hiring employees to fill the positions impacted and will be expensed as incurred.

**(3) Floorep Acquisition**

In February 2007, we acquired Floorep Limited ( Floorep ), a distributor of cleaning equipment based in Scotland, for a purchase price of \$3,565 in cash, subject to certain post-closing adjustments. The results of Floorep's operations have been included in the Consolidated Financial Statements since February 2, 2007, the date of acquisition. The purchase price allocation is preliminary and may be adjusted based upon the final determination of fair value of assets acquired and liabilities assumed. The components of the purchase price have been allocated as follows:

Net tangible assets acquired, including cash of \$1,507	\$	1,717
Identified intangible assets		690
Goodwill		1,158
	\$	3,565

**(4) Inventories**

Inventories are valued at the lower of cost or market. Inventories at September 30, 2007 and December 31, 2006 consisted of the following:

	September 30, 2007	December 31, 2006
Inventories carried at LIFO:		
Finished goods	\$ 42,628	\$ 36,513
Raw materials, production parts and work-in-process	17,710	20,110
LIFO reserve	(27,456)	(25,731)
<b>Total LIFO inventories</b>	<b>32,882</b>	<b>30,892</b>
Inventories carried at FIFO:		
Finished goods	21,409	21,387
Raw materials, production parts and work-in-process	9,160	8,699
<b>Total FIFO inventories</b>	<b>30,569</b>	<b>30,086</b>
<b>Total inventories</b>	<b>\$ 63,451</b>	<b>\$ 60,978</b>

The LIFO reserve approximates the difference between LIFO carrying cost and replacement cost.

**(5) Comprehensive Income (Loss)**

We report accumulated other comprehensive income (loss) as a separate item in the Shareholders' Equity section of the Balance Sheet. Comprehensive income (loss) is comprised of the net earnings and other comprehensive income (loss). For the three and nine months ended September 30, 2007, other comprehensive income (loss) consisted of foreign currency translation adjustments and amortization of pension items required by SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans (SFAS No. 158). For the three and nine months ended September 30, 2006, other comprehensive income (loss) consisted of foreign currency translation adjustments. The reconciliations of net earnings to comprehensive income (loss) are as follows:

**(9) Stock-Based Compensation**

On January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123(R), Share Based Payment Revised 2004 ( SFAS No. 123(R) ), using the modified prospective transition method. Under this method, stock-based employee compensation cost is recognized using the fair value based method for all new awards granted after January 1, 2006. Compensation costs for unvested stock options and awards that were outstanding as of the adoption date are being recognized, beginning January 1, 2006, over the requisite service period based on the grant date fair value of those options and awards as previously calculated under the pro-forma disclosures pursuant to Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation ( SFAS No. 123 ). As of September 30, 2007, we had six plans under which we have awarded share-based compensation grants, which are described in Note 13 of the 2006 Annual Report on Form 10-K. A maximum of 5,700 shares were originally authorized under these plans; 1,622 shares were available for issuance under current and future equity compensation awards as of September 30, 2007.

**Stock Option and Stock Appreciation Right Awards**

We determined the fair value of our stock option awards using the Black-Scholes option pricing model. The following assumptions were used to value the stock options granted during the nine months ended September 2007 and 2006:

	2007	2006
Expected dividend yield	1.7 - 1.8%	1.9 - 2.1%
Expected volatility	26.3 - 35.3%	21.7 - 75.4%
Risk-free interest rate	4.6 - 5.1%	4.6 - 5.1%
Expected life, in years	1 - 9	2 - 9
Weighted-average expected volatility	30.5%	38.8%
Weighted-average fair value	\$ 10.18	\$ 8.73

Stock options were granted for 28 and 40 shares during the nine months ended September 30, 2007 and 2006, respectively.

The expected life selected for stock options granted during the nine month period represents the period of time that the stock options are expected to be outstanding based on historical data of stock option holder exercise and termination behavior for similar grants. The risk-free interest rate for periods within the contractual life of the stock option is based on the U.S. Treasury rate over the expected life at the time of grant. Expected volatilities are based upon historical volatility of our stock over a period equal to the expected life of each stock option grant. Dividend yield is estimated over the expected life based on our dividend policy and historical dividends paid.

The total grant date fair value of stock options vested during the nine months ended September 30, 2007 and 2006 was \$648 and \$1,210, respectively.

The total intrinsic value of stock options exercised during the nine months ended September 30, 2007 and 2006 was \$6,713 and \$2,767, respectively. New stock option awards granted in 2007 and 2006 vest one-third each year over a three year period and have a ten year contractual term. Compensation expense equal to the grant date fair value is recognized for these awards over the vesting period. Compensation expense is fully recognized for reload options as of the reload date.

At September 30, 2007, the aggregate intrinsic value of shares outstanding and exercisable was \$33,100 and \$30,674, respectively.

In addition to stock options, we also occasionally grant cash-settled stock appreciation rights ( SARs ) to employees in certain foreign locations. Total outstanding SARs as of September 30, 2007, were 11. No new SARs were granted during the first nine months of 2007.

Compensation expense related to stock options and SARs was \$714 and \$770 for the nine month periods ended September 30, 2007 and 2006, respectively. As of September 30, 2007, there was unrecognized compensation cost for unvested options and rights of \$623, of which \$99 is expected to be recognized during the remainder of 2007 and the remaining \$524 during 2008, 2009 and 2010.

Restricted share awards typically have a two or three year vesting period from the effective date of grant. The total fair value of shares vested during the nine months ended September 30, 2007 and 2006 was \$188 and \$47, respectively. Compensation expense related to restricted stock was \$786 and \$444 for the nine month periods ended September 30, 2007 and 2006, respectively. As of September 30, 2007 there was \$1,144 of total unrecognized compensation cost related to unvested shares, of which \$292 is expected to be recognized during the remainder of 2007 and the remaining \$852 during 2008, 2009 and 2010.

**Performance Share Awards**

We also grant performance share awards to key employees as a part of our management compensation program. These awards are earned based upon achievement of certain financial performance targets. We determine the fair value of these awards as of the date of grant and recognize the expense over a three year performance period. The compensation expense for these awards was \$938 and \$1,196 for the nine months ended September 30, 2007 and 2006, respectively.

During November 2005, we also granted a performance share award to the President and Chief Executive Officer which will vest and is earned upon achieving certain total shareholder return targets over a five year performance period. The maximum number of shares of common stock issuable upon payout of the award is 40. Compensation cost is based on the fair value of this award as of the date of grant

Edgar Filing: TENNANT CO - Form 10-Q

and recognized over the derived requisite service period of three years. Compensation expense related to this award was \$106 and \$106 for the nine month periods ended September 30, 2007 and 2006, respectively. As of September 30, 2007, there was \$165 of total unrecognized compensation cost related to this award, of which \$35 is expected to be recognized during the remainder of 2007 and the remaining \$130 during 2008.

**NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

(In thousands, except per share data)

As of September 30, 2007, we had \$1,316 in total share-based liabilities recorded on our balance sheet. During the nine month period ended September 30, 2007 we paid out \$623 related to 2006 share-based liability awards.

**(10) Guarantees**

We record a liability for warranty claims at the time of sale. The amount of the liability is based on the trend in the historical ratio of claims to sales, the historical length of time between the sale and resulting warranty claim, new product introductions and other factors. Warranty periods on machines generally range from one to four years. The changes in warranty reserve balances for the nine months ended September 30, 2007 and 2006 were as follows:

	September 30, 2007	September 30, 2006
Beginning balance	\$ 6,868	\$ 6,146
Additions charged to expense	5,799	5,824
Change in estimate	(45)	153
Foreign currency fluctuations	151	78
Claims paid	(5,830)	(5,803)
Ending balance	\$ 6,943	\$ 6,398

Certain operating leases for vehicles contain residual value guarantee provisions, which would become due at the expiration of the operating lease agreement if the fair value of the leased vehicles is less than the guaranteed residual value. Of those leases that contain residual value guarantees, the aggregate residual value at lease expiration is \$11,463, of which we have guaranteed \$8,723. As of September 30, 2007, we have recorded a liability for the estimated end of term loss related to this residual value guarantee of \$910 for certain vehicles within our fleet. Our fleet also contains vehicles we estimate will settle at a gain. Gains on these vehicles will be recognized at the end of the lease term.

**(11) Retirement Benefit Plans**

As of September 30, 2007, we had four defined benefit retirement plans and a postretirement medical plan, which are described in Note 9 of the 2006 Annual Report on Form 10-K. We have contributed \$150 and \$178 during the third quarter and \$450 and \$543 for the first nine months of 2007 to our pension benefit plans and to our postretirement medical benefit plan, respectively. We expect to contribute approximately \$600 and \$1,000 to our pension benefit plans and to our postretirement medical benefit plan in 2007, respectively.

**(12) Income Taxes**

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN No. 48), on January 1, 2007. The cumulative effect of adopting FIN No. 48 was a decrease in reserves for uncertain tax positions and an increase to the January 1, 2007 balance of retained earnings of \$184. Including this cumulative effect, the Company's recorded liabilities totaled \$5,779 for gross unrecognized tax benefits of \$5,359 and accrued interest and penalties of \$420. If the Company were to prevail on all unrecognized tax benefits, approximately \$1,817 representing unrecognized tax benefits of \$1,713 and interest and penalties of \$104 would impact the Company's effective tax rate. The remaining \$3,962 represents unrecognized tax benefits of \$3,646 and interest and penalties of \$316 that would be received in different taxing jurisdictions in the event that the Company did not prevail on all unrecognized tax benefits recorded.

Consistent with the provisions of FIN No. 48, the Company reclassified the reserves for uncertain tax positions from other current liabilities to non-current liabilities unless the liability is expected to be paid within one year.

The Company and its subsidiaries are subject to U.S. federal income tax as well as income tax of numerous state and foreign jurisdictions. The Company is generally no longer subject to U.S. federal tax examinations for taxable years before 2004 and with limited exceptions, state and foreign income tax examinations for taxable years before 2002.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. Included in the net liability of \$2,220 for unrecognized tax benefits as of January 1, 2007 was approximately \$139 for accrued interest and penalties. To the extent interest and penalties are not assessed with respect to uncertain tax positions, amounts accrued will be reduced and reflected as a reduction of the income tax expense.

## Edgar Filing: TENNANT CO - Form 10-Q

The Company does not anticipate that total unrecognized tax benefits will change significantly within the next 12 months.

During the third quarter of 2007 it was determined that it was now more likely than not that tax net operating loss carryforwards in Germany would be utilized in the future and accordingly the valuation allowance on the related deferred tax asset was reduced to zero. The one-time tax benefit related to the reversal of the German valuation allowance, net of the impact of tax rate changes in foreign jurisdictions on deferred taxes, was approximately \$3,600.

**(13) Financing Arrangements**

During June 2007, the Company entered into a \$125,000 senior unsecured revolving credit facility which expires in June 2012. The interest rate on this credit facility varies and at the Company's option, is based upon LIBOR, prime rate or the federal funds rate, plus a varying basis point spread as defined in the credit agreement. The credit facility requires the company to meet selected covenants. The Company was in compliance with all such covenants at September 30, 2007. There were no outstanding borrowings under this facility as of September 30, 2007.

During August 2007, the Company entered into an unsecured revolving credit facility denominated in foreign currency of 14,600 Renminbi (RMB), or approximately \$1,900 U.S. Dollars, which expires in August 2008. The interest rate on this credit facility is equal to the People's Bank of China's base rate. The balance outstanding on this facility was approximately \$200 U.S. Dollars at September 30, 2007 at a rate of 6.21%.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

**Overview**

Tennant Company is a world leader in designing, manufacturing and marketing of solutions that help create a cleaner, safer world. We provide equipment, service, parts and consumables and specialty surface coatings to contract cleaners, end-user businesses, healthcare facilities, schools and local, state and federal governments. We sell our products through our direct sales and service organization and a network of authorized distributors worldwide. Geographically, our customers are primarily located in North America, Europe and Other International markets including the Middle East, Latin America and Asia Pacific. We strive to be an innovator in our industry through our commitment to understanding our customers' needs and using our expertise to create innovative solutions.

The Management's Discussion and Analysis of Financial Condition and Results of Operations ( MD&A ) should be read in conjunction with the MD&A included in our Annual Report on Form 10-K for the year ended December 31, 2006.

Net earnings for the third quarter of 2007 were up 38.4% to \$11.0 million, or \$0.57 per diluted share. Net earnings for the nine months ended September 30, 2007 increased 26.8% to \$27.3 million, or \$1.42 per diluted share, compared to the same period in 2006. Net earnings in the quarter and first nine months of 2007 benefited from strong growth in net sales, operating profit improvements and a lower effective tax rate resulting from a one-time tax benefit. These benefits were partially offset by a restructuring charge taken in the third quarter of 2007.

Management approved a restructuring action during September 2007 in an effort to better match skill sets and talent in evolving functional areas that are critical to successful execution of strategic priorities as discussed in Note 2 to the Consolidated Financial Statements. These actions impacted approximately 60 positions within a workforce of 2,700, or about two percent of the employee base. The restructuring action resulted in the recognition of a pretax charge of \$1,647 and related expenses of \$79 (\$1,174 after-tax or \$0.06 per diluted share) in our third quarter ended September 30, 2007. These costs consist primarily of severance, outplacement benefits and recruiting expenses and is included within selling and administrative expenses in the Consolidated Statements of Earnings. We expect to recognize costs totaling \$2.5 million related to this action. Of the remaining costs, \$0.6 million is expected to be incurred during the fourth quarter of 2007 and \$0.2 million during 2008.

A net tax benefit of \$0.19 per diluted share was recognized in the third quarter of 2007. The benefit related to the reversal of a valuation allowance on foreign net operating loss carryforwards. This benefit was partially offset by the impact of tax rate changes in foreign jurisdictions on deferred taxes.

Together, the net effect of the \$0.06 per diluted share restructuring charge and net tax benefit of \$0.19 per diluted share was a positive \$0.13 per diluted share in the third quarter of 2007.

### Net Sales

Consolidated net sales increased 10.7% to \$161.3 million for the third quarter of 2007. Consolidated net sales of \$481.6 million for the first nine months of 2007 increased 11.5% compared to the first nine months of 2006. The growth in net sales in both the third quarter and for the first nine months of 2007 was driven by volume growth, principally in North America and Other International markets as well as price increases in all geographies. Direct foreign currency exchange fluctuations increased net sales by approximately 3% in both periods. Acquisitions contributed approximately \$1 million, or approximately 1%, to net sales for the three months ended September 30, 2007 and contributed approximately \$8 million, or approximately 2%, to net sales for the first nine months of 2007.

The following table sets forth the net sales by geographic area for the three and nine month periods ended September 30, 2007 and 2006 and the percentage change from the prior year (dollars in thousands):

	Three Months Ended September 30			Nine Months Ended September 30		
	2007	2006	%	2007	2006	%
North America	\$ 104,672	\$ 94,938	10.3	\$ 309,017	\$ 286,049	8.0
Europe	39,534	35,790	10.5	120,490	103,187	16.8

Total	\$ 161,329	\$ 145,690	10.7	\$ 481,610	\$ 432,117	11.5

#### North America

## Edgar Filing: TENNANT CO - Form 10-Q

North American net sales of \$104.7 million for the third quarter of 2007 increased 10.3% from the third quarter of 2006. Net sales increased 8.0% to \$309.0 million for the nine months ended September 30, 2007 compared to the same period in 2006. Volume growth in all channels contributed to the increase in sales in both periods, led by higher sales to our national accounts and through our distribution network. Equipment sales drove this volume growth fueled by continued success with new products. Organic volume growth in service, parts and consumables and price increases in all product categories also contributed to the increase in North American net sales.

*Europe*

In Europe, net sales increased 10.5% to \$39.5 million for the third quarter of 2007 as compared to the third quarter of 2006. Acquisitions added approximately \$1 million, or approximately 3%, to European net sales in the third quarter. Positive direct foreign currency exchange fluctuations also increased European net sales by approximately 8% in the third quarter of 2007. Europe's organic base was essentially flat in the third quarter of 2007 when compared to the same period in 2006. A shipment of a large order during the third quarter of 2006 for which a similar shipment did not occur in the 2007 third quarter and lower sales of equipment in the United Kingdom offset volume growth from our Hofmans line of outdoor products and a favorable impact from price increases.

European net sales increased 16.8% to \$120.5 million for the nine months ended September 30, 2007. Acquisitions, primarily the acquisition of Hofmans, added approximately \$8 million, or approximately 8%, to European net sales during this period. Positive direct foreign currency exchange fluctuations added approximately 9% to European net sales for the nine months ended September 30, 2007. The remaining change between the nine month periods ended September 30, 2007 and 2006 was attributable to price increases and volume growth in most European markets, offset by lower sales of equipment in the United Kingdom.

*Other International*

In Other International markets, net sales for the third quarter of 2007 totaled \$17.1 million, up 14.4% from the third quarter of 2006. Growth in net sales was primarily driven by organic growth, resulting from expanded market coverage in Brazil and volume growth in Australia and the Middle East. Price increases also contributed to the overall growth in net sales. Positive direct foreign currency translation exchange effects increased sales in Other International markets by approximately 5% in the 2007 third quarter.

Net sales for the first nine months of 2007 in Other International markets increased 21.5% to \$52.1 million compared to the same period last year. Growth in net sales was primarily driven by organic growth in all regions: Latin America, Asia Pacific and the Middle East. Expanded market coverage in Brazil and China was a key contributor to the organic volume growth in net sales. Price increases between periods also contributed to the increase in net sales. Positive direct foreign currency translation exchange effects increased sales by approximately 3% in the first nine months of 2007.

**Gross Profit**

Gross profit margin was 41.4% for the third quarter of 2007 compared with 41.6% reported in 2006. The decline in gross profit margin was primarily due to costs associated with our continued manufacturing footprint consolidation, China expansion and the integration of the Hofmans acquisition. Cost reduction initiatives and price increases were not enough to offset higher raw materials and purchased component costs in the third quarter, especially due to the higher cost of batteries resulting from the escalating lead prices. Partially offsetting these declines was a benefit from positive foreign currency translation exchange effects.

Gross profit margin was 41.8% for the first nine months of 2007 compared with 42.4% in 2006. Costs associated with our manufacturing footprint consolidation, China expansion and the integration of the Hofmans acquisition were the primary factors causing this decrease. In addition, gross profit margins declined because cost reduction initiatives and price increases were not enough to offset higher material costs in the first nine months of 2007, in part due the higher cost of batteries. Partially offsetting these declines was a favorable mix of products sold.

As part of our efforts to mitigate the impact of the increasing cost of lead, we plan to implement a selling price surcharge during the fourth quarter of 2007 on certain products including batteries and battery-operated equipment in North America. Price increases on similar products in Europe were put into effect during the third quarter of 2007.

## Operating Expenses

### *Research & Development Expenses*

Research and development (R&D) expenses in the third quarter of 2007 increased 6.8% to \$5.9 million from \$5.5 million in 2006. R&D expenses as a percentage of net sales were 3.7% for the third quarter of 2007 compared to 3.8% in the comparable quarter last year.

R&D expenses for the nine months ended September 30, 2007 were \$17.4 million, up 7.8% from \$16.2 million in 2006. R&D expenses as a percentage of net sales were 3.6% for the first nine months compared to 3.7% in the same period last year, which is in line with our target of investing 3% to 4% of net sales annually on R&D.

### *Selling & Administrative Expenses*

Selling and administrative (S&A) expenses in the third quarter of 2007 increased 12.6% to \$50.9 million from \$45.2 million in 2006. S&A expenses for the third quarter included a \$1.7 million charge for a restructuring action approved by management during the quarter as discussed in Note 2 to the Condensed Consolidated Financial Statements. The charge consists primarily of severance and outplacement benefits. The remaining 8.8% increase in expenses in the third quarter of 2007 was due to general inflationary cost increases, the inclusion of expenses related to acquired operations and costs to support international market coverage and other strategic initiatives. In addition, an increase in bad debt expense also contributed to the increase between periods. Unfavorable direct foreign currency exchange added approximately \$1.3 million to the increase in S&A expense for the third quarter of 2007.

For the nine months ended September 30, 2007, S&A expenses increased 8.6% to \$149.8 million from \$137.9 million in the comparable period last year. The increase in S&A expenses, in addition to the restructuring charge discussed above, was due to general inflationary cost increases, the inclusion of expenses related to acquired operations and costs to support international market coverage and growth initiatives. In addition, an increase in bad debt expenses also contributed to the increase between periods. Unfavorable direct foreign currency exchange added approximately \$3.5 million to the increase in S&A expense for the nine months ended September 30, 2007. Offsetting these increases was a decrease in performance-based compensation expense.

S&A expenses as a percentage of net sales were 31.6% for the third quarter of 2007, up from 31.0% in the comparable quarter last year. The increase in S&A expenses as a percentage of net sales in the third quarter of 2007 is primarily attributable to the charge recognized for the restructuring action during the quarter.

S&A expenses as a percentage of net sales for the nine months ended September 30, 2007 were 31.1% down from the 31.9% in the comparable period last year. The decrease as a percent of net sales for the nine months is primarily due to sales growing at a faster rate than expenses, despite investments to support our growth initiatives.

### **Interest Income, Net**

Interest income, net was flat between the third quarter of 2007 and 2006, but declined by \$0.7 million for the nine month period ended September 30, 2007, as compared to the same period in 2006. The unfavorable comparison between the first nine months of 2007 and 2006 primarily reflects a decrease in interest income as a result of lower average levels of cash, cash equivalents and short-term investments during the first nine months of 2007 compared to 2006. In addition, we received interest income related to a state tax refund in the second quarter of 2006.

### **Other Income, Net**

Other income, net remained essentially unchanged between the third quarter of 2007 and 2006. Foreign currency translation gains were lower in the third quarter of 2007 when compared to the same period in 2006. This decline was offset, in part, by an increase in ESOP income due to a higher average stock price. The Company benefits from ESOP income when the shares held by the Company's ESOP Plan are utilized and the basis of those shares is lower than the current average stock price. In addition, we incurred expenses in the third quarter of 2006 associated with a potential acquisition that we did not complete. A similar expense was not incurred during the third quarter of 2007.

For the nine month period ended September 30, 2007, other income, net increased by \$0.7 million. The increase in total other income, net for the first nine months of 2007 when compared to the same period in 2006 was primarily driven by an increase in ESOP income of \$1.1 million due to a higher average stock price. Partially offsetting this increase was \$0.5 million in discretionary contributions to Tennant's charitable foundation during 2007. Similar contributions were not made during 2006.

## Income Taxes

The effective tax rate in the third quarter of 2007 was 2.5% compared to the effective tax rate in the third quarter of the prior year of 28.6%. The third quarter of 2007 included net favorable discrete items of \$4.1 million primarily related to the reversal of a German valuation allowance, net of the impact of tax rate changes in foreign jurisdictions on deferred taxes. During the third quarter of 2007 it was determined that it was now more likely than not that tax net operating loss carryforwards in Germany would be utilized in the future and accordingly the valuation allowance on the related deferred tax asset was reduced to zero.

The year-to-date 2007 effective tax rate was 25.9% compared to the year-to-date effective tax rate last year of 32.2%.

We expect our 2007 full year base tax rate will be approximately 36% before the impact of one-time items, resulting in an effective tax rate of between 29% and 31%. Our estimate of the full year effective tax rate is subject to change and may be impacted by changes in our forecasts of operating profit in total or by taxing jurisdiction, or to changes in the tax laws and regulations.

## Liquidity and Capital Resources

On June 19, 2007, we entered into a credit agreement (the "Credit Agreement") with JPMorgan Chase Bank, National Association, as administrative agent, Bank of America, N.A., as syndication agent, BMO Capital Markets Financing, Inc. and U.S. Bank National Association, as Co-Documentation Agents and the Lenders from time to time party thereto. The Credit Agreement provides us and certain of our foreign subsidiaries access to a \$125.0 million senior unsecured revolving credit facility until June 19, 2012. Borrowings may be denominated in U.S. Dollars or certain other currencies. The Credit Agreement contains a \$75.0 million sublimit on foreign currency borrowings and a \$50.0 million sublimit on borrowings by the foreign subsidiaries. The facility is available for general corporate purposes, working capital needs, share repurchases and acquisitions.

The fee for committed funds under the Credit Agreement ranges from an annual rate of 0.08% to 0.225%, depending on our leverage ratio. Borrowings under the Credit Agreement generally bear interest at an annual rate of, at our option, either (i) between LIBOR plus 0.32% to LIBOR plus 1.025%, depending on our leverage ratio, or (ii) the higher of (A) the prime rate or (B) the federal funds rate plus 0.50%.

The Credit Agreement contains customary representations, warranties and covenants, including but not limited to covenants restricting our ability to incur indebtedness and liens and to merge or consolidate with another entity. Further, the Credit Agreement contains a covenant requiring us to maintain an indebtedness to EBITDA ratio as of the end of each quarter of not greater than 3.5 to 1, and to maintain an EBITDA to interest expense ratio of no less than 3.5 to 1. The Credit Agreement also restricts us from paying dividends or repurchasing stock in an amount that exceeds \$50.0 million during any fiscal year if, after giving effect to such payments, our leverage ratio would exceed 2.5 to 1.

On August 23, 2007, we entered into an unsecured revolving credit facility (the "Credit Facility") with Bank of America, National Association which expires on August 23, 2008. This Credit Facility is denominated in Renminbi in the amount of 14.6 million RMB, or approximately \$1.9 million U.S. Dollars, and is available for general corporate purposes, including working capital needs of our China location. The interest rate on borrowed funds is equal to the People's Bank of China's base rate. This facility also allows for the issuance of standby letters of credit, performance bonds and other similar instruments over the term of the facility for a fee of 0.95% of the amount issued.

Our debt-to-total-capitalization ratio was 1.6% at September 30, 2007 and December 31, 2006. Cash, cash equivalents and short-term investments totaled \$31.9 million at September 30, 2007, compared to \$45.3 million at December 31, 2006. We believe that the combination of cash, cash equivalents and short-term investments on hand, as well as internally generated funds and amounts available under the Credit Agreement and Credit Facility are more than sufficient to meet our cash requirements for the next year.

**OPERATING ACTIVITIES** Operating activities provided \$31.4 million of cash for the nine months ended September 30, 2007. Cash provided by operating activities was driven primarily by strong net earnings, partially offset by a decrease in employee compensation and benefits and other accrued expenses and accounts payable. The decrease in employee compensation and benefits and other accrued expenses was primarily a result of payments of prior fiscal year performance awards, annual rebates, incentives and profit sharing. Timing of payments was the primary reason for the decrease in accounts payable.

## Edgar Filing: TENNANT CO - Form 10-Q

In the comparable 2006 period, operating activities provided \$27.7 million of cash, which was primarily driven by year-to-date net earnings, a decrease in receivables and a reduction in accounts payable and employee compensation and benefits and other accrued expenses. The decrease in receivables was due to seasonality of sales volumes. The reduction in accounts payable and employee compensation and benefits and other accrued expenses was due to payments of 2005 performance-based incentives, annual rebates, sales incentives and profit sharing as well as timing of accounts payable payments. An increase in inventory levels due to a buildup of inventory to support new products launched and to support the fourth quarter 2006 expected shipments also impacted operating activities and days inventory on hand for the nine months ended September 30, 2006.

Management evaluates how effectively we utilize two of our key operating assets, receivables and inventories, using accounts receivable Days Sales Outstanding (DSO) and Days Inventory on Hand (DIOH), on a FIFO basis. These metrics are as follows (in days):

	September 30, 2007	December 31, 2006	September 30, 2006
DSO	65	61	64
DIOH	89	82	91

For the period ended September 30, 2007, DSO increased one day compared to the same period last year, primarily due to a higher mix of international receivables which have longer payment terms. In comparison to December 31, 2006, DSO increased four days as a result of a higher mix of international account receivables as well as a higher mix of domestic national account receivables both of which have longer payment terms.

During the third quarter of 2007, DIOH decreased two days compared to the same period last year and increased seven days compared to December 31, 2006. The decrease was primarily due to fluctuations in foreign currency rates and the increase as compared to year end is due to higher inventory levels at our foreign locations due to longer lead times and pipeline fill for new products.

**INVESTING ACTIVITIES** Investing activities during the nine months ended September 30, 2007 used \$19.8 million in cash. The primary use was capital expenditures, which totaled \$23.8 million during the nine months ended September 30, 2007 and included investments in support of our footprint consolidation, global expansion initiatives and new product development. Other significant uses of cash during the first nine months of 2007 included the acquisition of Floorep Limited, a distributor of cleaning equipment based in Scotland. Floorep was purchased for \$2.6 million, net of cash acquired. These uses were offset by net sales activity of short-term investments, which generated \$6.3 million in cash during the nine month period.

We currently anticipate full-year capital spending to be in the range of approximately \$26 to \$28 million.

During the nine month period ended September 30, 2006, investing activities used \$31.0 million of cash. Uses of cash included \$13.2 million for capital expenditures, purchases of short-term investments of \$10.0 million and \$8.5 million for the acquisition of Hofmans Machinefabriek.

**FINANCING ACTIVITIES** Net cash used by financing activities was \$19.0 million during the first nine months of 2007. Significant uses of cash included \$20.5 million for repurchases of common stock under our share repurchase program and \$6.8 million in dividend payments. Proceeds from issuance of common stock generated \$7.7 million of cash in the first nine months of 2007, primarily driven by employee stock option exercises.

During the first nine months of 2006, net cash used by financing activities was \$3.0 million. Significant uses of cash included \$6.3 million in dividend payments as well as repurchases of common stock under our share repurchase program of \$2.8 million. Proceeds from issuance of common stock driven by employee stock option exercises of \$6.7 million were a significant source of cash during this period.

**Item 3. Quantitative and Qualitative Disclosures About Market Risk**

*Foreign Currency Risk*

Due to the global nature of our operations, we are subject to exposures resulting from foreign currency exchange fluctuations in the normal course of business. Our primary exchange rate exposure is with the Euro, the Canadian dollar, the Australian dollar, the British pound, the Chinese yuan and the Japanese yen against the U.S. dollar. The direct financial impact of foreign currency exchange includes the effect of translating profits from local currencies to U.S. Dollars, the impact of currency fluctuations on the transfer of goods between Tennant operations in the United States and abroad and transaction gains and losses. In addition to the direct financial impact, foreign currency exchange has an indirect financial impact on our results, including the effect on sales volumes within local economies and the impact of pricing actions taken as a result of foreign exchange rate fluctuations. We could experience favorable or unfavorable foreign exchange effects for the remainder of 2007, compared with prior year results.

Because our products are currently manufactured or sourced primarily from the United States, a stronger dollar generally has a negative impact on results from operations outside the United States while a weaker dollar generally has a positive effect. Our objective in managing the exposure to foreign currency fluctuations is to minimize the earnings effects associated with foreign exchange rate changes on certain of our foreign currency-denominated assets and liabilities. We periodically enter into various contracts, principally forward exchange contracts, to protect the value of certain of our foreign currency-denominated assets and liabilities. The gains and losses on these contracts generally approximate changes in the value of the related assets and liabilities.

*Commodity Risk*

We are subject to exposures resulting from potential cost increases related to our purchases of raw materials or other product components. We do not use derivative commodity instruments to manage our exposures to changes in commodity prices such as steel, oil, gas, lead and other commodities.

Various factors beyond our control affect the price of oil and gas, including but not limited to worldwide and domestic supplies of oil and gas, political instability or armed conflict in oil-producing regions, the price and level of foreign imports, the level of consumer demand, the price and availability of alternative fuels, domestic and foreign governmental regulation, weather-related factors and the overall economic environment. We purchase petroleum-related component parts for use in our manufacturing operations. In addition, our freight costs associated with shipping and receiving product and sales and service vehicle fuel costs are impacted by fluctuations in the cost of oil and gas. If the price of oil and gas continue to increase, our results could be unfavorably impacted in 2007.

Increases in worldwide demand and other factors affect the price for steel and related products. We do not maintain an inventory of raw or fabricated steel in excess of near-term production requirements. As a result, increases in the price of steel can significantly increase the cost of our steel-based raw materials and component parts if we are not able to fully mitigate with price increases or cost-reduction actions.

During 2006 and through the period ended September 30, 2007, our raw materials and other purchased component costs, such as batteries, were unfavorably impacted by commodity prices and we were not able to fully mitigate these higher costs with selling price increases and cost-reduction actions. We will continue to focus on mitigating the risk of continued future raw material or other product component cost increases through product pricing, negotiations with our vendors and cost-reduction actions. The success of these efforts will depend upon our ability to increase our selling prices in a competitive market and our ability to achieve cost savings. If the commodity prices remain at their current levels or continue to increase, our results may continue to be unfavorably impacted in 2007.

*Other Matters*

Management regularly reviews our business operations, processes and overall organizational structure with the objective of improving financial performance and maximizing our return on investment. As a result of this ongoing process to improve financial performance, we may incur restructuring charges in the future which, if taken, could be material to our financial results.

Additional information on market risk is included in the Management's Discussion and Analysis section of our 2006 Annual Report on Form 10-K.

**Cautionary Statement Relevant to Forward-Looking Information**

Certain statements contained in this document as well as other written and oral statements made by us from time to time are considered forward-looking statements within the meaning of the Private Securities Litigation Reform Act. These statements do not relate to strictly historical or current facts and provide current expectations or forecasts of future events. Any such expectations or forecasts of future events are subject to a variety of factors. These include factors that affect all businesses operating in a global market as well as matters specific to us and the markets we serve. Particular risks and uncertainties presently facing us include:

Geopolitical and economic uncertainty throughout the world.

Changes in laws, including changes in accounting standards and taxation changes.

Inflationary pressures.

Potential for increased competition in our business.

Relative strength of the U.S. dollar, which affects the cost of our materials and products bought and sold internationally.

Fluctuations in the cost or availability of raw materials and purchased components.

Success and timing of new products.

Ability to achieve projections of future financial and operating results.

Successful integration of acquisitions, including recoverability of acquired goodwill and intangible assets.

Ability to achieve operational efficiencies, including synergistic and other benefits of acquisitions.

Ability to achieve anticipated global sourcing cost reductions.

Unforeseen product quality problems.

Ability to acquire, retain and protect proprietary intellectual property rights.

Effects of litigation, including threatened or pending litigation.

Price and timing of the sale of our Maple Grove, Minnesota manufacturing facility.

Ability to benefit from production reallocation plans, including benefits from our expansion into China.

Ability to achieve growth plans.

We caution that forward-looking statements must be considered carefully and that actual results may differ in material ways due to risks and uncertainties both known and unknown. Shareholders, potential investors and other readers are urged to consider these factors in evaluating forward-looking statements and are cautioned not to place undue reliance on such forward-looking statements. For additional information about factors that could materially affect Tennant's results, please see our other Securities and Exchange Commission filings, including the Risk Factors section of our 2006 Annual Report on Form 10-K.

We do not undertake to update any forward-looking statement, and investors are advised to consult any further disclosures by us on this matter in our filings with the Securities and Exchange Commission and in other written statements we make from time to time. It is not possible to anticipate or foresee all risk factors, and investors should not consider any list of such factors to be an exhaustive or complete list of all risks or uncertainties.

**Item 4. Controls and Procedures**

(a) Evaluation of disclosure controls and procedures. Based on their evaluation as of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms.

(b) Changes in internal controls. There were no changes in our internal controls over financial reporting during the most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

**PART II OTHER INFORMATION****Item 1A. Risk Factors**

There have been no material changes in our risk factors from those disclosed in our 2006 Annual Report on Form 10-K.

**Item 2. Unrestricted Sales of Equity Securities and Use of Proceeds**

In November 2004, Tennant Company's Board of Directors authorized the repurchase of 400,000 shares of our common stock under the share repurchase program approved by the Board of Directors in May 2001. In August 2006, the Board of Directors approved the adjustment of the number of shares then available for repurchase to reflect the impact of the two-for-one stock split in July 2006. On May 3, 2007, the Board of Directors authorized the repurchase of 1,000,000 additional shares of our common stock. Share repurchases are made from time to time in the open market or through privately negotiated transactions, primarily to offset the dilutive effect of shares issued through our stock-based compensation programs.
