

BANK OF NOVA SCOTIA  
 Form FWP  
 September 05, 2018

Filed Pursuant to Rule 433  
 Dated September 5, 2018  
 Registration No. 333-215597

Market Linked Securities – Leveraged Upside Participation to a Cap and Contingent Downside, Principal at Risk Securities Linked to the S&P 500<sup>®</sup> Index due April 4, 2022  
 Term Sheet to the Preliminary Pricing Supplement dated September 5, 2018

Summary of Terms

|                               |   |
|-------------------------------|---|
| Issuer                        | The Bank of Nova Scotia (the “Bank”)  |
| Term                          | Approximately 3.5 years   |
| Market Measure                | S&P 500 <sup>®</sup> Index (SPX) (the “Index”)  |
| Pricing Date                  | Expected to be September 27, 2018   |
| Trade Date                    | Expected to be September 27, 2018   |
| Issue Date                    | Expected to be October 2, 2018*   |
| Principal Amount              | \$1,000 per Security  |
| Original Offering Price       | 100.00% of the Principal Amount of each Security  |
| Redemption Amount at Maturity | See “How the Redemption Amount at Maturity is Calculated” on page 3   |
| Maturity Date                 | April 4, 2022   |
| Starting Level                | The closing level of the Index on the Pricing Date  |
| Ending Level                  | The closing level of the Index on the Calculation Day   |
| Capped Value                  | [\$1,330.00-\$1,380.00] per \$1,000 Principal Amount of the Securities (the actual amount to be determined on the Pricing Date)   |
| Threshold Level               | To be determined on the Pricing Date (equal to the Starting Level multiplied by 70.00%)   |
| Participation Rate            | 150.00%   |
| Percentage Change             | The percentage increase or decrease in the Ending Level from the Starting Level. The Percentage Change may reflect a positive return (based on any increase in the level of the Index over the life of the Securities) or a negative return (based on any decrease in the level of the Index over the life of the Securities) |
| Calculation Day               | March 28, 2022  |
| Calculation Agent             | Scotia Capital Inc., an affiliate of the Bank   |
| Denominations                 | \$1,000 and any integral multiple of \$1,000  |

Edgar Filing: BANK OF NOVA SCOTIA - Form FWP

Agent Discount Up to 3.150% of which dealers, including those using the trade name Wells Fargo Advisors (“WFA”), may receive a selling concession of up to 2.000%, and WFA will receive a distribution expense fee of 0.075%

CUSIP/ISIN 064159MC7 / US064159MC72

Underwriters Scotia Capital (USA) Inc.; Wells Fargo Securities, LLC

\*We expect that delivery of the Securities will be made against payment therefor on or about the 3rd Business Day following the Trade Date (this settlement cycle being referred to as “T+3”). Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended, trades in the secondary market generally are required to settle in 2 Business Days (“T+2”), unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the Securities on the Trade Date will be required, by virtue of the fact that each Security initially will settle in 3 Business Days (T+3), to specify alternative settlement arrangements to prevent a failed settlement.

Investment Description

·Linked to the S&P 500® Index

Unlike ordinary debt securities, the Securities do not pay interest or repay a fixed amount of principal at maturity.

·Instead, the Securities provide for a payment at maturity that may be greater than, equal to or less than the Principal Amount of the Securities, depending on the performance of the Index from its Starting Level to its Ending Level.

The payment at maturity will reflect the following terms:

**oIf the value of the Index increases:**

You will receive the Principal Amount plus 150.00% participation in the upside performance of the Index, subject to the Capped Value of [\$1,330.00-\$1,380.00] (to be determined on the Pricing Date) per \$1,000 Principal Amount of the Securities;

**oIf the value of the Index decreases but the decrease is not more than 30.00%:**

You will be repaid the Principal Amount;

**oIf the value of the Index decreases by more than 30.00%:**

You will receive less than the Principal Amount and will have full downside exposure to the decrease in the level of the Index from the Starting Level.

·Investors may lose more than 30.00%, and possibly all, of the Principal Amount.

All payments on the Securities are subject to the credit risk of the Bank, and you will have no right to any securities tracked by the Index; if The Bank of Nova Scotia defaults on its obligations, you could lose some or all of your investment.

·No periodic interest payments or dividends.

·No exchange listing; designed to be held to maturity.

If the Securities priced today, the estimated value of the Securities would be between \$923.53 (92.353%) and \$950.50 (95.050%) per \$1,000 Principal Amount. See “The Bank’s Estimated Value of the Securities” in the preliminary pricing supplement.

The Securities have complex features and investing in the Securities involves risks not associated with an investment in conventional debt securities. See “Selected Risk Considerations” in this term sheet, “Additional Risks” in the preliminary pricing supplement, “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and “Risk Factors” in the prospectus supplement and prospectus.

This introductory term sheet does not provide all the information that an investor should consider prior to making an investment decision. This term sheet should be read in conjunction with the preliminary pricing supplement, product prospectus supplement, prospectus supplement, and prospectus.

NOT A BANK DEPOSIT AND NOT INSURED OR GUARANTEED BY THE FDIC OR ANY OTHER  
GOVERNMENTAL AGENCY

## Hypothetical Payout Profile

The profile to the right is based on a Capped Value of \$1,355.00 (the midpoint of the range indicated herein) per \$1,000 Principal Amount of the Securities, a Participation Rate of 150.00% and the Threshold Level of 70.00% of the Starting Level.

This graph has been prepared for purposes of illustration only. Your actual return will depend on the actual Capped Value and Ending Level and whether you hold your Securities to maturity.

## Hypothetical Returns on the Securities

| Hypothetical Ending Level | Hypothetical Percentage Change from the hypothetical Starting Level to the hypothetical Ending Level | Hypothetical Redemption Amount at Maturity per Security | Hypothetical pre-tax total rate of return | Hypothetical pre-tax annualized rate of return <sup>(1)</sup> |
|---------------------------|--|---|---|---|
| 4,312.04                  | 50.00%   | \$1,355.00  | 35.50%                                    | 8.85%   |
| 3,737.10                  | 30.00%   | \$1,355.00  | 35.50%                                    | 8.85%   |
| 3,555.03                  | 23.67%   | \$1,355.00  | 35.50%                                    | 8.85%   |
| 3,449.63                  | 20.00%   | \$1,300.00  | 30.00%                                    | 7.62%   |

| 2,012.28                  | -30.00%  | \$1,000.00  | 0.00%                                     | 0.00%   |
| 1,983.54                  | -31.00%  | \$690.00  | -31.00%                                   | -10.31%   |
| 1,437.35                  | -50.00%  | \$500.00  | -50.00%                                   | -18.82%   |
| 718.67                    | -75.00%  | \$250.00  | -75.00%                                   | -35.87%   |
| 0.00                      | -100.00%   | \$0.00  | -100.00%                                  | -100.00%  |

Each Security has a Principal Amount of \$1,000.

<sup>(1)</sup> The annualized rates of return are calculated on a semi-annual bond equivalent basis with compounding.

<sup>(2)</sup> The hypothetical Starting Level (the closing level of the Index on August 24, 2018).

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive on the Maturity Date and the resulting pre-tax rates of return will depend on the actual Ending Level and Capped Value.

## How the Redemption Amount at Maturity is Calculated

The Redemption Amount at Maturity will be determined as follows:

If the Ending Level is greater than the Starting Level, then the Redemption Amount at Maturity will equal the lesser of:

(a) the Principal Amount + (Principal Amount x Participation Rate x Percentage Change) and (b) the Capped Value

If the Ending Level is less than or equal to the Starting Level, but greater than or equal to the Threshold Level, the Redemption Amount at Maturity will be equal to \$1,000

If the Ending Level is less than the Threshold Level, the Redemption Amount at Maturity will be equal to: Principal Amount + (Principal Amount x Percentage Change)

If the Ending Level is less than the Threshold Level, you will lose more than 30.00%, and possibly all, of your initial investment.

\*The graph above sets forth the daily closing levels of the Index for the period from January 1, 2013 to August 24, 2018. The closing level on August 24, 2018 was 2,874.69. The historical performance of the Index is not an indication of the future performance of the Index during the term of the Securities.

## Selected Risk Considerations

The risks set forth below are discussed in detail in “Additional Risks” in the pricing supplement, “Additional Risk Factors Specific to the Notes” in the product prospectus supplement and “Risk Factors” in the prospectus supplement and prospectus. Please review those risk disclosures carefully.

The inclusion of dealer spread and projected profit from hedging in the original offering price is likely to adversely affect secondary market prices.

Risk of loss at maturity: Any payment on the Securities at maturity depends on the Percentage Change of the Index. The Bank will only repay you the full Principal Amount of your Securities if the Percentage Change does not reflect a decrease in the Index of more than 30.00%. If the Percentage Change is negative by more than 30.00%, meaning the Ending Level is less than the Threshold Level, you will lose more than 30.00%, and possibly all of your initial investment in an amount equal to the negative Percentage Change. Accordingly, you may lose more than 30.00%, and possibly all, of your investment in the Securities if the percentage decline from the Starting Level to the Ending Level is greater than 30.00%.

- The contingent downside feature applies only at maturity.
- Your potential Redemption Amount at Maturity is limited by the Capped Value.
- The Bank's estimated value of the Securities will be lower than the original offering price of the Securities.
- The Bank's estimated value does not represent future values of the Securities and may differ from other's estimates.

## Edgar Filing: BANK OF NOVA SCOTIA - Form FWP

- The Bank's estimated value is not determined by reference to credit spreads for our conventional fixed-rate debt.
- The Securities differ from conventional debt securities.
- No Interest: The Securities will not bear interest and, accordingly, you will not receive any interest payments on the Securities.
- Your investment is subject to the credit risk of The Bank of Nova Scotia.
- The Securities are subject to market risk.
- The Participation Rate applies only at maturity.
- The Redemption Amount at Maturity is not linked to the level of the Index at any time other than the Calculation Day.
- If the levels of the Index or the Index constituent stocks change, the market value of your Securities may not change in the same manner.
- Holding the Securities is not the same as holding the Index constituent stocks.
- There is no assurance that the investment view implicit in the Securities will be successful.
- The Index reflects price return only and not total return.
- Past performance is not indicative of future performance.
- We may sell additional Securities at a different issue price.
- Changes affecting the Index could have an adverse effect on the value of the Securities.
- The Bank cannot control actions by the sponsor of the Index and the sponsor of the Index has no obligation to consider your interests.
- The price at which the Securities may be sold prior to maturity will depend on a number of factors and may be substantially less than the amount for which they were originally purchased.
- The Securities lack liquidity.
- Hedging activities by the Bank and/or the Underwriters may negatively impact investors in the Securities and cause our respective interests and those of our clients and counterparties to be contrary to those of investors in the Securities.
- Market activities by the Bank or the Underwriters for their own respective accounts or for their respective clients could negatively impact investors in the Securities.
- The Bank, the Underwriters and their respective affiliates regularly provide services to, or otherwise have business relationships with, a broad client base, which has included and may include the issuers of the Index constituent stocks.
- Other investors in the Securities may not have the same interests as you.
- The calculation agent can postpone the Calculation Day for the Securities if a market disruption event with respect to the Index occurs.
- There is no affiliation between any Index constituent stock issuers or the sponsor of the Index and us, and neither we nor any of the Underwriters is responsible for any disclosure by any of the Index constituent stock issuers or the sponsor of the Index.
- A participating dealer or its affiliates may realize hedging profits projected by its proprietary pricing models in addition to any selling concession, creating a further incentive for the participating dealer to sell the Securities to you.
- Uncertain tax treatment: Significant aspects of the tax treatment of the Securities are uncertain. You should consult your tax advisor about your tax situation. See "Canadian Income Tax Consequences" and "U.S. Federal Income Tax Consequences" in the pricing supplement.

### Not suitable for all investors

Investment suitability must be determined individually for each investor. The Securities described herein are not a suitable investment for all investors. In particular, no investor should purchase the Securities unless they understand and are able to bear the associated market, liquidity and yield risks. Unless market conditions and other relevant factors change significantly in your favor, a sale of the Securities prior to maturity is likely to result in sale proceeds that are substantially less than the Principal Amount per Security. The Underwriters and their respective affiliates are not obligated to purchase the Securities from you at any time prior to maturity.

## Edgar Filing: BANK OF NOVA SCOTIA - Form FWP

The issuer has filed a registration statement (including a prospectus) with the SEC for the offering to which this communication relates. Before you invest, you should read the prospectus in that registration statement and other documents, including the preliminary pricing supplement, the issuer has filed with the SEC for more complete information about the issuer and this offering. You may get these documents for free by visiting EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, the issuer, any Underwriter or any dealer participating in the offering will arrange to send you the prospectus if you request it by calling your financial advisor or by calling Wells Fargo Securities, LLC at 866-346-7732.

### Not a research report

This material is not a product of the Bank's research department.

### Consult your tax advisor

Investors should review carefully the preliminary pricing supplement and consult their tax advisors regarding the application of the U.S. federal tax laws to their particular circumstances, as well as any tax consequences arising under the laws of any state, local or non-U.S. jurisdiction.
