

TRI CONTINENTAL CORP
Form N-30D
March 11, 2003

73rd Annual Report 2002

Tri-Continental Corporation

an investment you can live with

Tri-Continental Corporation invests to produce future growth of both capital and income, while providing reasonable current income.

TY is Tri-Continental Corporation's symbol for its Common Stock on the New York Stock Exchange.

Tri-Continental Corporation

To the Stockholders:

February 7, 2003

For the year ended December 31, 2002, Tri-Continental posted a total return of $\square 26.35\%$ based on net asset value and $\square 28.18\%$ based on market price, while the Standard & Poor's 500 Composite Stock Index (S&P 500) returned $\square 22.10\%$ and the Lipper Closed-End Growth & Income Funds Average returned $\square 19.63\%$. During 2002, Tri-Continental's portfolio was positioned for an economic rebound. Unfortunately, the recovery was weaker than expected, resulting in unfavorable relative investment results.

The past year was highly challenging for equity investors as the major stock indices recorded their third consecutive annual loss, something that has not happened in the post-World War II era. Investor confidence was undermined by geopolitical uncertainty, worries about the strength of the economic recovery, accounting scandals, and well-publicized corporate malfeasance.

While economic reports ultimately painted a brightening picture for the US during the year, a commensurate recovery in corporate profits did not occur in 2002. Once the crisis of confidence brought on by corporate governance scandals abated, investor anxiety was fed by continued moribund corporate spending and worries over the impact of a protracted military engagement in the Middle East.

Despite the difficulties of the last year, we believe the US economy is improving and should expand moderately in 2003. The economy has posted several straight quarters of GDP growth, consumer spending is stable, and inflation remains benign. There are also encouraging signs coming out of the corporate sector, which was the economy's weakest link in the recent downturn. Corporate earnings are beginning to strengthen, companies have been paying off debt, and capital spending by businesses (excluding telecommunications and utilities) is beginning to trend upward. Additionally, there is broad consensus in Washington on the need for some sort of fiscal stimulus to spur job creation and help the economy recover from its current weakness. While the

ultimate size of the stimulus package will be debated, the ultimate impact on the capital markets should be positive.

We are mindful that there are risks to this outlook, including the possibility of a prolonged war and/or new terror attacks, but we are encouraged by the government's emphasis on homeland security and the confrontation of terrorism. Over the long term, this should be positive for the capital markets. While Tri-Continental's portfolio is still positioned for an economic recovery, it also includes exposure to defensive sectors should the recovery continue to be weak or be further delayed.

1

Tri-Continental Corporation

After three straight years of negative stock market performance, investors are understandably frustrated, and some may be tempted to give up on stocks. However, we believe that, instead of losing faith, now is precisely the time to maintain or increase equity investments. Historically, stocks have outpaced inflation and provided attractive returns over longer periods of time, and we believe stocks will continue to play an important role in a diversified portfolio of investments.

We would again like to extend our appreciation to those Stockholders who participated in Tri-Continental's 2002 Mid-Year Survey. Your feedback helps us to have a better sense of Stockholders' needs and concerns. Survey results can be found on pages 10 and 11 of this report.

We thank you for your continued support of Tri-Continental Corporation, and look forward to serving your investment needs for many years to come. A discussion with your Portfolio Managers regarding the Corporation's results follows this letter.

By order of the Board of Directors,

William C. Morris
Chairman

Brian T. Zino
President

2

Tri-Continental Corporation

Interview With Your Portfolio Managers, Ben-Ami Gradwohl and David Guy

What were Tri-Continental's investment results in 2002?

For the 12 months ended December 31, 2002, Tri-Continental Corporation posted a total return of 26.35% based on net asset value and 28.18% based on market price. During the same time period, the Standard & Poor's 500 Composite Stock Index (S&P 500) returned 22.10%, and the Corporation's peers, as measured by the Lipper Closed-End Growth & Income Funds Average, returned 19.63%.

What economic and market factors affected the Corporation's results during 2002?

During the past year, Tri-Continental, and the stock market as a whole, operated within a very negative investment environment characterized by a tense geopolitical situation, mixed news on the economy, and worries regarding corporate governance and accounting practices. As a result, investor confidence was severely undermined, and 2002 was the third consecutive down year for the stock market. Such a long run of negative annual returns had not occurred in over half a century. The market tended to move quickly in 2002, experiencing periods of sharp price movements, both on the upside and the downside, and often not based on fundamentals. For example, in the fourth quarter the stocks of several merchant energy companies with serious litigation troubles shot up in price. Other high-volatility companies also benefited during these surges.

Throughout the economic slowdown, consumer spending has held up, though it has tapered off in recent months. Investors have been waiting, so far in vain, for a rebound in corporate capital spending. Businesses continue to be cautious regarding expense budgets while demand for their products is weak. In some industries, particularly autos and electronics, prices have fallen so low that many companies are finding profits to be unattainable or seriously squeezed. Gross domestic product (GDP) has expanded for five consecutive quarters, but much of that reflects the strength of the consumer.

What was your investment strategy during 2002?

Currently, the portfolio has no significant overweightings relative to the S&P 500. Earlier in the year, we had a slight overweighting in defense stocks and defense-related technology stocks, given the war on terrorism and the possibility of a military engagement in Iraq.

Tri-Continental’s largest weightings at year-end were in capital goods, consumer staples, and pharmaceuticals and biotechnology. We are still waiting for the economic recovery to really take hold. There have been encouraging signs, but a rebound is not yet assured. Because we expect continued volatility and a muted economic rebound, we have sought to diversify Tri-Continental's portfolio in order to reduce risk as much as possible. At the same time, our goal is to own what we feel to be the best stocks over the long term.

A Team Approach

Tri-Continental Corporation is managed by the Seligman Disciplined Investment Group, headed by Ben-Ami Gradwohl and David Guy. They are assisted by a group of seasoned professionals who are responsible for research and trading consistent with Tri-Continental’s investment objective. Group members include Bettina Abrams, Jackson Chow, Michael McGarry, Hendra Soetjahja, Jonathan Roth (trader), Brian Turner, and Nancy Wu.

The rates of return will vary and the principal value of an investment will fluctuate. Shares, if sold, may be worth more or less than their original cost. Performance data quoted does not reflect the deduction of taxes that a stockholder may pay on Corporation distributions or on the sale of Corporation shares. Past performance is not indicative of future investment results. Due to market volatility, current performance may be higher or lower than the performance quoted above.

* Returns for periods of less than one year are not annualized.

** These rates of return reflect changes in market price or net asset value, as applicable, and assume that all distributions within the period are taken in additional shares.

*** The Lipper Closed-End Growth & Income Funds Average and the S&P 500 are unmanaged benchmarks that assume reinvestment of all distributions. The Lipper Closed-End Growth & Income Funds Average excludes the effect of taxes and any costs associated with the purchase of shares, and the S&P 500 excludes the effect of taxes, fees and sales charges. The Lipper Closed-End Growth & Income Funds Average measures the performance of closed-end mutual funds with objectives similar to those of the Corporation. The S&P 500 measures the performance of 500 of the largest US companies based on market capitalizations. Investors cannot invest directly in an index or an average.

[□] Preferred Stockholders were paid dividends totaling \$2.50 per share.

^{□□} Represents the per share amount of net unrealized depreciation of portfolio securities as of December 31, 2002.

Tri-Continental Corporation

Interview With Your Portfolio Managers *(continued)*

What sectors contributed positively to portfolio performance?

Almost all sectors of the stock market declined in 2002. Some of Tri-Continental's stock selections in the areas of banking, health care equipment, capital goods, and biotechnology contributed positively to performance.

What sectors detracted from portfolio performance?

Tri-Continental's technology holdings (specifically, software and services and hardware and equipment) performed poorly overall. During the second half of the year, Tri-Continental's holdings in utilities and financials were severely hit by the fallout from the corporate accounting and governance scandals. During the fourth quarter, high-volatility stocks such as telecommunications companies, large-cap technology companies, and energy traders rose quickly and sharply in price. Since Tri-Continental's exposure was more heavily weighted toward better-quality, lower-volatility stocks, our lack of exposure to lower-quality stocks hurt performance significantly.

What is your outlook for 2003?

We are cautiously optimistic regarding the future of the stock market. Many areas of concern remain, e.g.: the war on terrorism, the increasingly likely conflict in Iraq, falling consumer confidence and spending, unresolved corporate governance issues, and continued anemic corporate spending and profits. However, we also see reasons for optimism. The US government has provided an extraordinary degree of stimulus for the economy, and we believe that these actions will produce the desired effect of increasing economic activity. The recovery may be gradual, however. Since 2001, the US Federal Reserve Board has cut the federal funds rate 12 times, and interest rates now stand at a 40-year low. The tax cuts passed last year, as well as those now being contemplated, should also have a positive impact. Finally, increased government spending on defense and homeland security should have a secondary effect of aiding the recovery.

Corporate budgets for 2003 are generally flat or only slightly increased from 2002. While this may not seem particularly encouraging, the fact that budgets have not been slashed may indicate that we have seen the worst in corporate cutbacks, and that this sector of the economy may have bottomed. An increase in corporate capital spending is crucial to the long-term health of the economy and for a sustained increase in stock prices. We have recently begun to see an increase in corporate earnings, which may give corporations the confidence they need to resume spending. Tri-Continental's portfolio continues to be positioned for what we believe will be a moderate economic recovery. We do not expect a return to 1990s-style gains, but we believe 2003 will see a strengthening of the equity markets.

The views and opinions expressed are those of the Portfolio Manager(s), are provided for general information only, and do not constitute specific tax, legal, or investment advice to, or recommendation for, any person. There can be no guarantee as to the accuracy of market forecasts. Opinions, estimates, and forecasts may be changed without notice.

Tri-Continental Corporation

Highlights of the Year

Net asset value of each share of Common Stock was \$15.72 at December 31, compared to \$21.69 at the start of the year. Assuming the reinvestment of dividends in additional shares, the total return was (26.35)%.

Operating expenses for the year were \$16,295,925. The ratio of expenses to average net investment assets was 0.67%, up from 2001's expense ratio of 0.59%. This was due to a decrease in net assets and an increase in transfer agent expenses.

Common Stock dividends, paid quarterly, totaled \$0.26 per share on an average of 127,995,000 shares, compared to \$0.28 in 2001 when, on average, there were approximately 2,274,000 more shares outstanding.

Preferred Stock dividends, paid each quarter, completed 73 years of uninterrupted payments. Total net investment income available to cover the \$2.50 Preferred Stock dividend was equivalent to \$42.43 per Preferred share.

Stock Repurchase Program

For the period from November 16, 2001, through November 20, 2002, the Corporation repurchased 9,503,046 shares, representing 7.4% of outstanding shares at the beginning of the period. This compares to 7,671,581 shares repurchased in the year ended November 15, 2001, representing 6.2% of shares outstanding.

Tri-Continental Corporation

Stockholder Services

Tri-Continental provides a number of services to make maintaining an investment in its Common Stock more convenient.

Purchases of Common Stock. Under the Automatic Dividend Investment and Cash Purchase Plan, and other Stockholder plans, purchases of Common Stock are made by the Corporation in the open market and from Stockholders participating in withdrawal plans to satisfy Plan requirements. Those shares are then sold to Stockholders using the Plan. During 2002, 2,654,532 shares were purchased by Stockholders through the Plan.

The Corporation may make additional purchases of its Common Stock in the open market at such prices and in such amounts as the Board of Directors may deem advisable. As discussed further under Stock Repurchase Program on page 13, during 2002 the Corporation purchased 6,850,800 additional shares.

Traditional Individual Retirement Account (IRA). You may contribute up to \$3,000 per year to a Traditional IRA provided you have earned income and are under age 70 1/2. A working or non-working spouse may also contribute up to \$3,000 to a separate Traditional IRA. Individuals age 50 and over may contribute up to \$500 extra as [catch-up contributions.] Contributions to a Traditional IRA may be deductible or non-deductible. If you are single and are *not* covered by an employer's retirement plan, your contribution will always be deductible. For individuals who are covered by a plan, contributions will be fully deductible if your modified adjusted gross income (MAGI) in 2003 is less than \$40,000. For spouses who are both covered by a plan, contributions will be fully deductible if your MAGI is less than \$60,000. If one spouse does not work or is not covered by a retirement plan, that spouse's contribution will be fully deductible provided your household MAGI does not exceed \$150,000. If your contribution is not deductible, you may still take advantage of the tax-deferred accumulation of earnings in your Traditional IRA.

Rollover IRA. You may be eligible to roll over a distribution of assets received from another IRA, a qualified employee benefit plan, or tax-deferred annuity into a Rollover IRA with Tri-Continental. To avoid a tax penalty, the transfer to a Rollover IRA generally must occur within 60 days of receipt of the qualifying distribution. If you do not make a direct transfer of a distribution from a qualified employee benefit plan or a tax-deferred annuity to a Rollover IRA, the payor of the distribution must withhold 20% of the distribution.

Roth IRA. You (and a working or non-working spouse) may each make an after-tax contribution of up to \$3,000 per year to a Roth IRA provided you have earned income and meet the eligibility requirements. Your modified adjusted gross income (MAGI) must be less than \$95,000 (individuals) or \$150,000 (married couples) to be eligible to make a full contribution to a Roth IRA. You are eligible to make a partial Roth IRA contribution if your MAGI is below \$110,000 (individuals) or \$160,000 (married couples). Total contributions to a Roth IRA and a Traditional IRA cannot exceed \$3,000 in any year. Individuals age 50 and over may contribute up to \$500 extra as [catch-up contributions.] Earnings grow tax-free and will be distributed to you tax-free and penalty-free provided that you hold your account for at least five years **and** you take the distribution either after age 59 1/2, for disability, upon death, or to make a first-time home purchase (up to \$10,000). Unlike a Traditional IRA, you may contribute to a Roth IRA even if you are over age 70 1/2 (if you have earned income), and you are not required to take minimum distributions at age 70 1/2. You may convert an

8

Tri-Continental Corporation

Stockholder Services (continued)

existing Traditional IRA to a Roth IRA to take advantage of tax-free distributions. You must pay taxes on any earnings and deductible contributions in your Traditional IRA before converting it to a Roth IRA. Talk to your financial advisor for more details on converting your Traditional IRA.

Retirement Planning **Qualified Plans** Unincorporated businesses and the self-employed may take advantage of the same benefits in their retirement plans that are available to corporations. Contribution levels can go as high as 100% of earned income, to a maximum of \$40,000 per participant. For retirement plan purposes, no more than \$205,000 may be taken into account as earned income under the plan in 2003 and future years (subject to adjustments to reflect cost of living increases). Social Security integration and employee vesting schedules are also available as options in the Tri-Continental prototype retirement plans. Although you already may be participating in an employer's retirement plan, you may be eligible to establish another plan based upon income from other sources, such as director's fees.

Retirement Plan Services provides information about our prototype retirement plans. The toll-free telephone number is (800) 445-1777 in the Continental US and (212) 682-7600 outside the US.

Gifts Free of Federal Tax are often made using Tri-Continental Common Stock. You may give as much as \$11,000 a year to as many individuals as desired free of federal gift tax, and a married couple may give up to \$22,000 a year.

The Automatic Cash Withdrawal Plan enables owners of Common shares with a market value of \$5,000 or more to receive a fixed amount from their investment at regular intervals. Investors use the plan to supplement current or retirement income, for educational expenses, or for other purposes.

Federal Taxes

Quarterly dividends paid on both the Preferred and Common Stocks for 2002 are subject to federal income tax as ordinary income. Under the Internal Revenue Code, 96.56% of the 2002 quarterly dividends paid to Common and Preferred Stockholders qualifies for the dividends received deduction available to corporate Stockholders. In order to claim the dividends received deduction for these distributions, corporate Stockholders must have held their shares for 46 days or more during the 90-day period beginning 45 days before each ex-dividend date.

Tri-Continental Corporation

Stockholder Survey Results

In Tri-Continental's 2002 Mid-Year Report, the Corporation enclosed a survey card designed to garner feedback from Stockholders. We are pleased to announce that we received nearly 4,000 responses and would like to thank you for taking the time to respond.

This survey card was designed as a way to complement the Corporation's yearly 20-minute phone survey of 500 randomly chosen Stockholders. Like the phone survey, the mail-in card allows us to track general trends in Stockholder demographics and satisfaction. However, where the phone survey is limited to Stockholders whose holdings are registered with the Manager, the mail-in card allows us to hear from the roughly 50% of our Stockholders who hold their shares in street name (investors who own their shares at a broker/dealer).

Of the 4,000 Stockholders who responded, roughly 45% were registered and 55% were street name. Below you will find a summary of the results. Although the number of responses we received was large, that does not necessarily mean that the results tabulated below are representative of the Corporation's Stockholders taken as a group.

		Registered	Street Name

Tri-Continental Corporation

A History of Building Long-Term Wealth and Income

Tri-Continental invests primarily to produce long-term growth of both capital and income, while providing reasonable current income. The chart below shows the growth of Tri-Continental Stockholders' capital over the past 20 years. The total cost of 1,000 shares of Tri-Continental purchased on December 31, 1982, was \$26,875. Stockholders who took capital gain distributions in shares would have realized a three and a half-fold increase in the market value of these 1,000 shares to \$96,978 by year-end 2002. For those who chose to take their dividends as well as capital gains in additional shares, the value of their investment in Tri-Continental Corporation would have grown to a market value of \$174,998 at the end of 2002.

** Assumes the Stockholder did not exercise or sell the transferable rights distributed in connection with the 1992 rights offering. Either the exercise or sale of the rights would improve the above results.*

For the 20-year period ended December 31, 2002. The information provided above is based on past performance, which is no guarantee of future results, and excludes any commissions or sales charges associated with the purchase of Tri-Continental shares. The rate of return will vary, and the principal value of an investment will fluctuate. Shares, if sold, may be worth more or less than their original cost. If sales charges had been included, performance would have been lower. In addition, capital gain and dividend distributions taken in additional shares are subject to personal income tax in the year earned. The examples shown do not reflect the effect of such taxes.

The chart above illustrates that Tri-Continental's performance cannot be judged based upon stock-price appreciation/depreciation alone. Indeed, stock-price appreciation/depreciation is a small component of Tri-Continental's total return. For Stockholders who take their capital gains in additional shares, and particularly for Stockholders who are able to take both their capital gains and their dividends in additional shares, the value of an investment in Tri-Continental has appreciated steadily over the years. This is because, while

Tri-Continental's stock price may not increase significantly, investors who take their distributions in additional shares may benefit from an increasing number of shares owned.

Tri-Continental Corporation

Stock Repurchase Program

In November 2002, the Board of Directors authorized the renewal of Tri-Continental's ongoing share repurchase program. The program, which began in November 1998, authorizes the Corporation to repurchase up to 7.5% of the Corporation's shares over a 12-month period, provided that the discount remains wider than 10%. The Board's decision benefits all Stockholders, allowing them to continue to enjoy the advantages of Tri-Continental's closed-end structure, while seeking to increase the NAV of the Corporation's outstanding shares.

For the 12 months ended November 16, 2002, the Corporation repurchased 9.5 million shares, 7.4% of stock outstanding November 16, 2001. This is the closest Tri-Continental has come to the 7.5% limitation since the Repurchase Program was initiated in 1998. The Corporation bought back 4.4% of stock outstanding in both the first and second years the program was in place and 6.2% in the third year.

Introduce Tri-Continental to a Friend

["Introduce Tri-Continental to a Friend"] is a program designed to help encourage potential investors to consider investing in Tri-Continental. The initiative targets the more than 44,000 current Stockholders of record, individual investors, Wall Street analysts, and financial consultants through a comprehensive effort including advertising, direct mail, and one-on-one meetings. Tri-Continental has also published a brochure that traces its history since its launch in 1929.

Reply cards allowing Stockholders to request ["The Story of Tri-Continental"] brochure and the ["Introduce Tri-Continental to a Friend"] investor package have been inserted in the Mid-Year and Annual Reports since the program's inception. Response has been excellent, with several thousand copies of the brochure and the investor package distributed to date. A new reply card is inserted in this Annual Report.

Stockholders are invited to request that an investor package be sent to one or more family members, friends, or associates. This package includes a letter from Mr. William C. Morris, Tri-Continental's Chairman, a copy of the most recent Stockholder Report, a Prospectus, ["The Story of Tri-Continental"] brochure, and a pamphlet explaining the attributes of closed-end funds.

Tri-Continental Corporation

Notes to Financial Statements

1. Significant Accounting Policies The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America, which require management to make certain estimates and assumptions at the date of the financial statements. The following summarizes the significant accounting policies of the Corporation:

- a. Security Valuation** Investments in stocks, limited partnership interests, and short-term holdings maturing in more than 60 days are valued at current market values or, in their absence, fair value determined in accordance with procedures approved by the Board of Directors. Securities traded on an exchange are valued at last sales prices or, in their absence and in the case of over-the-counter securities, at the mean of bid and asked prices. Short-term holdings maturing in 60 days or less are valued at amortized cost.
- b. Federal Taxes** There is no provision for federal income tax. The Corporation has elected to be taxed as a regulated investment company and intends to distribute substantially all taxable net income and net realized gain.
- c. Security Transactions and Related Investment Income** Investment transactions are recorded on trade dates. Identified cost of investments sold is used for both financial statements and federal income tax purposes. Dividends receivable and payable are recorded on ex-dividend dates. Interest income is recorded on the accrual basis.
- d. Distributions to Stockholders** The treatment for financial statement purposes of distributions made during the year from net investment income or net realized gains may differ from their ultimate treatment for federal income tax purposes. These differences are caused primarily by differences in the timing of the recognition of certain components of income, expense or capital gain, and the recharacterization of foreign exchange gains or losses to either ordinary income or realized capital gain for federal income tax purposes.

Where such differences are permanent in nature, they are reclassified in the components of net investment assets based on their ultimate characterization for federal income tax purposes. Any such reclassification will have no effect on net assets, results of operations, or net asset value per share of the Corporation.

2. Capital Stock Transactions Under the Corporation's Charter, dividends on the Common Stock cannot be declared unless net assets, after such dividends and dividends on Preferred Stock, equal at least \$100 per share of Preferred Stock outstanding. The Preferred Stock is subject to redemption at the Corporation's option at any time on 30 days' notice at \$55 per share (or a total of \$41,400,700 for the shares outstanding) plus accrued dividends, and entitled in liquidation to \$50 per share plus accrued dividends.

The Corporation, in connection with its Automatic Dividend Investment and Cash Purchase Plan and other Stockholder plans, acquires and issues shares of its own Common Stock, as needed, to satisfy Plan requirements. For the year ended December 31, 2002, 2,654,532 shares were purchased from Plan participants at a cost of \$41,998,152, which represented a weighted average discount of 12.22% from the net asset value of those acquired shares. A total of 1,596,880 shares were issued to Plan participants during the year for proceeds of \$26,284,545, at a discount of 11.20% from the net asset value of those shares.

For the year ended December 31, 2002, the Corporation purchased 6,850,800 shares of its Common Stock in the open market at an aggregate cost of \$111,326,749, which represented a weighted average discount of 11.65% from the net asset value of those acquired shares.

At December 31, 2002, 291,825 shares of Common Stock were reserved for issuance upon exercise of 12,970 Warrants, each of which entitled the holder to purchase 22.50 shares of Common Stock at \$1.00 per share. Assuming the exercise of all Warrants outstanding at December 31, 2002, net investment assets would have increased by \$291,825 and the net asset value of the Common Stock would have been \$15.69 per share. The number of Warrants exercised during the years 2002 and 2001, was 381 and 67, respectively.

Tri-Continental Corporation

Notes to Financial Statements (continued)

3. Purchases and Sales of Securities Purchases and sales of portfolio securities, excluding short-term investments, amounted to \$3,651,810,922 and \$3,734,781,443, respectively. At December 31, 2002, the cost of investments for federal income tax purposes was \$2,218,861,563. The tax basis cost was greater than the cost for financial reporting purposes due to the tax deferral of losses on wash sales in the amount of \$8,339,810. The tax basis gross unrealized appreciation and depreciation of portfolio securities amounted to \$46,253,301 and \$269,991,328, respectively.

4. Repurchase Agreements The Corporation may enter into repurchase agreements with commercial banks and with broker/dealers deemed to be creditworthy by J. & W. Seligman & Co. Incorporated (the "Manager"). Securities received as collateral subject to repurchase agreements are deposited with the Corporation's custodian and, pursuant to the terms of the repurchase agreements, must have an aggregate market value greater than or equal to the repurchase price plus accrued interest at all times. Procedures have been established to monitor, on a daily basis, the market value of repurchase agreements' underlying securities to ensure the existence of the proper level of collateral. The repurchase agreement held as of December 31, 2002, matured pursuant to its terms.

5. Management Fee, Administrative Services, and Other Transactions The Manager manages the affairs of the Corporation and provides for the necessary personnel and facilities. Compensation of all officers of the Corporation, all directors of the Corporation who are employees of the Manager, and all personnel of the Corporation and the Manager is paid by the Manager. The Manager receives a fee, calculated daily and payable monthly, equal to a percentage of the Corporation's daily net assets at the close of business on the previous business day. The management fee rate is calculated on a sliding scale of 0.45% to 0.375%, based on average daily net assets of all the investment companies managed by the Manager. The management fee for the year

ended December 31, 2002, was equivalent to an annual rate of 0.41% of the average daily net assets of the Corporation.

Seligman Data Corp., which is owned by the Corporation and certain associated investment companies, charged the Corporation at cost \$4,204,239 for stockholder account services in accordance with a methodology approved by the Corporation's directors. Costs of Seligman Data Corp. directly attributable to the Corporation were charged to the Corporation. The remaining charges were allocated to the Corporation by Seligman Data Corp. pursuant to a formula based on the Corporation's net assets, stockholder transaction volume and number of stockholder accounts. The Corporation's investment in Seligman Data Corp. is recorded at a cost of \$43,681.

Certain officers and directors of the Corporation are officers or directors of the Manager and/or Seligman Data Corp.

The Corporation has a compensation arrangement under which directors who receive fees may elect to defer receiving such fees. Directors may elect to have their deferred fees accrue interest or earn a return based on the performance of the Corporation or other funds in the Seligman Group of Investment Companies. The cost of such fees and earnings/loss accrued thereon is included in directors' fees and expenses, and the accumulated balance thereof at December 31, 2002, of \$225,274 is included in other liabilities. Deferred fees and related accrued earnings are not deductible for federal income tax purposes until such amounts are paid.

6. Capital Loss Carryforward and Other Tax Adjustments [At December 31, 2002, the Corporation had a net capital loss carryforward for federal income tax purposes of \$687,863,434, which is available for offset against future taxable net capital gains, expiring in varying amounts through 2010. The amount was determined after adjustments for certain differences between financial reporting and tax purposes, such as wash sale losses. Accordingly, no capital gain distributions are expected to be paid to stockholders until net capital gains have been realized in excess of available capital loss carryforwards.

In addition, the Corporation elected to defer to January 1, 2003, the recognition for tax purposes of net losses of \$37,298,808 realized on sales of investments after October 31, 2002. These losses will be available to offset future taxable net gains.

Tri-Continental Corporation

Notes to Financial Statements (continued)

7. Restricted Securities [At December 31, 2002, the Tri-Continental Financial Division of the Corporation comprised two investments that were purchased through private offerings and cannot be sold without prior registration under the Securities Act of 1933 or pursuant to an exemption therefrom. These investments are valued at fair value as determined in accordance with procedures approved by the Board of Directors of the Corporation. The acquisition dates of investments in the limited partnerships, along with their cost and values at December 31, 2002, were as follows:

Investments	Acquisition Date(s)	Cost	Value
WCAS Capital Partners II, L.P.	12/11/90 to 3/24/98	\$ 4,727,686	\$ 3,015,352
Whitney Subordinated Debt Fund, L.P.	7/12/89 to 11/10/98	2,620,165	1,845,044
Total		\$ 7,347,851	\$ 4,860,396

Tri-Continental Corporation

Financial Highlights

The Corporation's financial highlights are presented below. "Per share operating performance" data is designed to allow investors to trace the operating performance, on a per Common share basis, from the beginning net asset value to the ending net asset value, so that investors can understand what effect the individual items have on their investment, assuming it was held throughout the period. Generally, the per share amounts are derived by converting the actual dollar amounts incurred for each item, as disclosed in the financial statements, to their equivalent per Common share amounts, using average shares outstanding.

"Total investment return" measures the Corporation's performance assuming that investors purchased shares of the Corporation at the market value or net asset value as of the beginning of the period, invested dividends and capital gains paid, as provided for in the Corporation's Prospectus and Automatic Dividend Investment and Cash Purchase Plan, and then sold their shares at the closing market value or net asset value per share on the last day of the period. The computations do not reflect taxes or any sales commissions investors may incur in purchasing or selling shares of the Corporation.

The ratios of expenses and net investment income to average net investment assets and to average net assets for Common Stock for the periods presented do not reflect the effect of dividends paid to Preferred Stockholders.

	Year Ended December 31,

Tri-Continental Corporation

Report of Independent Auditors

The Board of Directors and Security Holders,
Tri-Continental Corporation:

We have audited the accompanying statement of assets and liabilities and the statement of capital stock and surplus of Tri-Continental Corporation, including the portfolio of investments, as of December 31, 2002, the related statement of operations for the year then ended, the statements of changes in net investment assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2002, by correspondence with the Corporation's custodian and brokers. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Tri-Continental Corporation as of December 31, 2002, and the results of its operations, the changes in its net investment assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.
