Forward-Looking Statements

MSB Financial Corp. (the “Company”) may from time to time make written or oral “forward-looking statements,” including statements contained in the Company’s filings with the Securities and Exchange Commission (including this Annual Report on Form 10-K and the exhibits thereto), in its reports to stockholders and in other communications by the Company, which are made in good faith by the Company pursuant to the “safe harbor” provisions of the private securities litigation reform act of 1995.

These forward-looking statements involve risks and uncertainties, such as statements of the Company’s plans, objectives, expectations, estimates and intentions, that are subject to change based on various important factors (some of which are beyond the Company’s control). The following factors, among others, could cause the Company’s financial performance to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements: The strength of the United States economy in general and the strength of the local economies in which the Company conducts operations; the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the board of governors of the federal reserve system, inflation, interest rate, market and monetary fluctuations; the timely development of and acceptance of new products and services of the Company and the perceived overall value of these products and services by users, including the features, pricing and quality compared to competitors’ products and services; the willingness of users to substitute competitors’ products and services for the Company’s products and services; the success of the Company in gaining regulatory approval of its products and services, when required; the impact of changes in financial services’ laws and regulations (including laws concerning taxes, banking, securities and insurance); technological changes, acquisitions; market volatility; changes in consumer spending and saving habits; and the success of the Company at managing the risks involved in the foregoing.

The Company cautions that the foregoing list of important factors is not exclusive. The Company does not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company.

Item 1. Business

General

The Company is a federally chartered corporation organized in 2004 for the purpose of acquiring all of the capital stock that Millington Savings Bank (the “Bank”) issued in its mutual holding company reorganization. During the fiscal year ended June 30, 2007, the Company conducted its initial public offering and sold 2,529,281 shares for net proceeds of approximately \$24.5 million. The Company’s principal executive offices are located at 1902 Long Hill Road, Millington, New Jersey 07946-0417 and its telephone number at that address is (908) 647-4000.

MSB Financial, MHC (the “MHC”) is a federally chartered mutual holding company that was formed in 2004 in connection with the mutual holding company reorganization. The MHC has not engaged in any significant business since its formation. So long as the MHC is in existence, it will at all times own a majority of the outstanding stock of the Company.

The Bank is a New Jersey-chartered stock savings bank and its deposits are insured by the Federal Deposit Insurance Corporation. As of June 30, 2012, the Bank had 53 full time equivalent employees.

The Bank is regulated by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation. The MHC and the Company are regulated as savings and loan holding companies by the Board of Governors of the Federal Reserve System (“FRB”), as successor to the Office of Thrift Supervision (“OTS”) under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”).

Throughout this document, references to “we,” “us,” or “our” refer to the Bank or Company, or both, as the context indicates.

Competition

We operate in a market area with a high concentration of banking and other financial institutions, and we face substantial competition in attracting deposits and in originating loans. A number of our competitors are significantly larger institutions with greater financial and managerial resources and lending limits. Our ability to compete successfully is a significant factor affecting our growth potential and profitability.

Our competition for deposits and loans historically has come from other insured financial institutions such as local and regional commercial banks, savings institutions, and credit unions located in our primary market area. We also compete with mortgage banking and finance companies for real estate loans and with commercial banks and savings institutions for consumer loans, and we face competition for funds from investment products such as mutual funds, short-term money funds and corporate and government securities. There are large competitors operating throughout our total market area, and we also face strong competition from other community-based financial institutions.

Lending Activities

We have traditionally focused on the origination of one-to four-family loans and home equity loans and lines of credit, which together comprise a substantial portion of the total loan portfolio. We also provide financing for commercial real estate, including multi-family dwellings/apartment buildings, service/retail and mixed-use properties, churches and non-profit properties, medical and dental facilities and other commercial real estate. In recent years, construction loans have decreased as a component of our portfolio. We also originate commercial and industrial loans. Our consumer loans are comprised of auto loans, personal loans and account loans and overdraft lines of credit.

Loan Portfolio Composition. The following tables analyze the composition of the Bank's loan portfolio by loan category at the dates indicated. Except as set forth below, there were no concentrations of loans exceeding 10% of total loans.

Type of Loans:	At June 30, 2012		2011		2010		2009		2008	
	Amount	Percent	Amount	Percent	Amount	Percent	Amount	Percent	Amount	Percent
(Dollars in thousands)										
One-to four-family real estate	\$141,927	57.65 %	\$149,399	57.66 %	\$155,241	56.94 %	\$155,143	54.68 %	\$145,868	56.31 %

Less:										
Construction loans in process	(2,261)		(3,452)		(4,027)		(5,609)		(3,568)	
Allowance for loan losses	(3,065)		(2,170)		(2,588)		(1,808)		(1,025)	
Deferred loan fees	(354)		(224)		(197)		(222)		(146)	
Total loans receivable, net	\$240,520		\$253,251		\$265,814		\$276,058		\$254,290	

Loan Maturity Schedule. The following table sets forth the maturity of the Company's loan portfolio at June 30, 2012. Demand loans, loans having no stated maturity, and overdrafts are presented as due in one year or less. The construction loans presented in the table as of June 30, 2012 are net of \$2.3 million of undistributed amounts. The table presents contractual maturities and does not reflect repricing or the effect of prepayments. Actual maturities may differ.

	At June 30, 2012							Total
	One-to Four- Family Real Estate	Commercial Real Estate	Construction	Consumer	Home Equity	Commercial and Industrial		
	(In thousands)							
Amounts Due: Within 1 Year	\$ 7,012	\$ 2,178	\$ 7,606	\$ 902	\$ 434	\$ 4,533	\$ 22,665	
After 1 year:								
1 to 5 years	21,262	9,467	1,802	142	9,934	4,397	47,004	
5 to 10 years	10,034	9,314	-	63	16,948	105	36,464	
After 10 years	103,619	11,222	-	-	21,908	1,057	137,806	
Total due after one year	134,915	30,003	1,802	205	48,790	5,559	221,274	
	\$ 141,927	\$ 32,181	\$ 9,408	\$ 1,107	\$ 49,224	\$ 10,092	\$ 243,939	

The following table sets forth the dollar amount of all loans at June 30, 2012 due after June 30, 2013, which have fixed interest rates and which have floating or adjustable interest rates.

	Fixed Rates	Floating or Adjustable Rates	Total
	(In thousands)		
One-to four-family real estate	\$ 127,667	\$ 7,248	\$ 134,915
Commercial real estate	30,003	—	30,003
Construction	1,802	—	1,802
Consumer	205	—	205
Home equity	18,678	30,112	48,790
Commercial and industrial	2,217	3,342	5,559
Total	\$ 180,572	\$ 40,702	\$ 221,274

One-to Four-Family Real Estate Mortgages. Our primary lending activity consists of the origination of one-to four-family first mortgage loans. Fixed rate, conventional mortgage loans are offered by the Company with terms from 5 to 30 years.

We also originate fixed rate balloon mortgages with terms of 3 to 10 years. At the end of each term the mortgage may be paid off in full with no penalty or, provided that the loan is in good standing and there has been no negative change in value of the collateral, we may extend the existing mortgage on new terms, at a new interest rate. If the mortgage is extended, there may be additional charges at the time of each extension.

We originate adjustable rate mortgages, or ARMs, with up to 30 year terms at rates based upon the U.S. Treasury One Year Constant Maturity as an index. Our ARMs currently reset on an annual basis, beginning with the first year, and have a 200 basis point annual increase cap and a 600 basis point lifetime adjustment cap. We do not originate “teaser” rate or negative amortization loans.

Substantially all residential mortgages include “due on sale” clauses, which are provisions giving us the right to declare a loan immediately payable if the borrower sells or otherwise transfers an interest in the property to a third party. Property appraisals on real estate securing one-to four-family residential loans are made by state certified or licensed independent appraisers and are performed in accordance with applicable regulations and policies. We require title insurance policies on all first lien one-to four-family residential loans. Homeowners, liability, fire and, if applicable, flood insurance policies are also required.

We provide financing on residential investment properties with either 3 to 10 year balloon mortgages, 3, 5, 7 or 10 year adjustable rate mortgages or 5 to 30 year fixed duration mortgages. At the end of each term a balloon mortgage on an investment property may be paid off in full with no penalty or, provided that the loan is in good standing and there has been no negative change in the value of the collateral, we may extend the existing mortgage on new terms, at a new interest rate. If the mortgage is extended, there may be additional charges at the time of each extension. Our investment property lending product is available to individuals or proprietorships, partnerships, limited liability corporations, and corporations with personal guarantees. All investment property is underwritten on its ability substantially to carry itself, unless the property is a two-family residence with the mortgagor living in one of the units. Preference is given to those loans where rental income covers all operating expenses, including but not limited to principal and interest, real estate taxes, hazard insurance, utilities, maintenance, and reserve.

The cash coverage ratio to cover operating expenses must be at least 1.25 times. Any negative cash flow will be included in borrower's total debt ratio.

We generally originate one-to four-family first mortgage loans, for primary residence, for up to 80% loan-to-value and investment properties for up to 75%.

Commercial Real Estate Mortgages. Our commercial real estate lending includes multi-family dwellings/apartment buildings, service/retail and mixed-use properties, churches and non-profit properties, medical and dental facilities and other commercial real estate. Our commercial real estate mortgage loans are either 3 to 10 year balloon mortgages (with a maximum amortization period of 25 years) or 15 year fixed duration mortgages. This type of lending is made available to proprietorships, partnerships, limited liability companies and corporations with personal guarantees. All commercial property is underwritten on its ability substantially to provide satisfactory cash flows. A cash flow and lease analysis is performed for each property. Preference is given to those loans where rental income covers all operating expenses, including but not limited to principal and interest, real estate tax, hazard insurance, utilities, maintenance, and reserve. The cash coverage ratio to cover operating expenses must be at least 1.25 times. Any negative cash flow will be included in the limit on the borrower's total debt ratio. Cash from other assets of the borrower, who may own multiple properties and generate a surplus, can be made available to cover debt-service shortages of the financed property. The maximum loan-to-value ratio on most commercial real estate loans we originate is 70%.

The management skills of the borrower are judged on the basis of his/her professional experience and must be documented to meet the Bank's satisfaction in relation to the desired project. The assets of the borrower must indicate his/her ability to support the proposed investment, both in terms of liquidity and net worth, and tangible history of the borrower's capability and experience must be evident.

Unlike single-family residential mortgage loans, which generally are made on the basis of the borrower's ability to make repayment from his or her employment and other income, and which are secured by real property the value of which tends to be more easily ascertainable, multi-family and commercial real estate loans typically are made on the basis of the borrower's ability to make repayment from the cash flow of the borrower's business or rental income. As a result, the availability of funds for the repayment of commercial real estate and multi-family loans may be substantially dependent on the success of the business itself and the general economic environment. Commercial real estate and multi-family loans, therefore, have greater credit risk than one-to four-family residential mortgages or consumer loans. In addition, commercial real estate and multi-family loans generally result in larger balances to single borrowers, or related groups of borrowers and also generally require substantially greater evaluation and oversight efforts.

Construction Loans. We originate construction loans for an owner-occupied residence or to a builder with a valid contract of sale. With prior Board of Director approval, we also provide financing for speculative residential or commercial construction and development. Individual consideration is given to builders based on their past performance, workmanship, and financial worth. Our construction lending includes loans for construction or major renovations or improvements of owner-occupied residences. The portfolio is virtually divided equally between owner-occupied properties and real estate developers.

Construction loans are mortgages with up to an 18 month duration. Funds are disbursed periodically upon inspections made by our inspectors on the percentage of work completed, as per the approved budget. Funds disbursed may not exceed 50% of the loan-to-value of land and 75% of the loan-to-value of improvements any time during construction. Interest rates on disbursed funds are based on the rates and terms set at the time of closing. The majority of our construction loans are variable rate loans

with rates tied to the prime rate published in The Wall Street Journal, plus a premium. Payments on disbursed funds must be made on a monthly basis.

Construction lending is generally considered to involve a higher degree of credit risk than residential mortgage lending. If the estimate of construction cost proves to be inaccurate, we may be compelled to advance additional funds to complete the construction with repayment dependent, in part, on the success of the ultimate project rather than the ability of a borrower or guarantor to repay the loan. If we are forced to foreclose on a project prior to completion, there is no assurance that we will be able to recover the entire unpaid portion of the loan. In addition, we may be required to fund additional amounts to complete a project and may have to hold the property for an indeterminate period of time.

Consumer Loans. Our consumer lending products consist of new and used auto loans, secured and unsecured personal loans, account loans and overdraft lines of credit. The maximum term for a loan on a new or used automobile is six years and four years, respectively. We will lend up to 80% of retail value or dealer invoice on a car loan. We offer a reduction on the interest rate for car loans if payments are automatically deducted from a Millington checking or statement savings account.

Our personal loans have terms of up to four years with a minimum and maximum balance of \$1,000 and \$5,000, respectively. A reduction to the interest rate is offered for loans with automatic debit repayment from a Millington checking or statement savings account. Our account loans permit a depositor to borrow up to 90% of his or her funds on deposit with us in certificate of deposit accounts. The interest rate is the current rate paid to the depositor, plus a premium. A minimum payment of interest only is required. We offer an overdraft line of credit with a minimum of \$500 and up to a maximum of \$5,000 and an interest rate tied to the prime rate published in The Wall Street Journal, plus a premium.

Consumer lending is generally considered to involve a higher degree of credit risk than residential mortgage lending. Consumer loan repayment is dependent on the borrower's continuing financial stability and can be adversely affected by job loss, divorce, illness, personal bankruptcy and other factors. The application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on consumer loans in the event of a default. Account loans are fully secured.

Home Equity Loans and Lines of Credit. We offer fixed rate home equity loans and variable rate home equity lines of credit with a minimum credit limit of \$5,000. Collateral valuation is established through a variety of methods, including an on-line appraisal valuation estimator, drive by appraisals, recent assessed tax value, purchase price or consideration value as evidenced by a deed or property search report or a report of real estate comparables from a licensed realtor. Loan requests over \$100,000, however, require full appraisals, and requests over \$500,000 require Loan Committee approval. Loan requests over \$1.0 million require Board approval. The loan-to-value limit on home equity lending is 80% on owner occupied property and 70% on investment property. The variable rate on home equity lines of credit is adjusted monthly and is currently set at prime for owner occupied properties and prime plus a premium for investment properties. The fixed rate loans on investment property are also higher than fixed rate owner occupied home equity loans. We generally provide home equity financing only for a first or second lien position.

Our fixed rate home equity loans have terms of 5 to 30 years. Our variable rate home equity lines of credit have terms of 15 years, and we also offer an interest only home equity line of credit based on a 10 year term. The loan-to-value limit on interest only home equity financing is 70% on owner-occupied property and 60% on investment property. We also offer bridge loans with a variable rate and a 70% loan-to-value limit on owner-occupied property and 60% on investment property.

Commercial and Industrial Loans. We offer revolving lines of credit to businesses to finance short-term working capital needs like accounts receivable and inventory. These lines of credit may be unsecured or secured by accounts receivable and inventory or real estate. We generally provide such financing for no more than a 3 year term and with a variable rate.

We also originate commercial term loans to fund longer-term borrowing needs such as purchasing equipment, property improvements or other fixed asset needs. These loans are secured by new and used machinery, equipment, fixtures, furniture or other long-term fixed assets and have terms of 1 to 15 years. We originate commercial term loans for other general long-term business purposes, and these loans are secured by real estate. Interest on commercial term loans is payable monthly and principal may be payable monthly or quarterly.

The normal minimum amount for our commercial term loans and lines of credit is \$5,000. We generally will not lend more than \$250,000 on a commercial line of credit or \$500,000 on a commercial term loan. We typically do not provide working capital loans to businesses outside our normal market area or to new businesses where repayment is dependent solely on future profitable operation of the business. We avoid originating loans for which the primary source of repayment could be liquidation of the collateral securing the loan in light of poor repayment prospects. We typically require personal guarantees on all commercial loans, regardless of other collateral securing the loan.

The loan-to-value limits related to commercial lending vary according to the collateral. Loans secured by real estate may be originated for up to 80% loan-to-value. Other limits are as follows: Savings accounts-90% of the deposit amount; new equipment-75% of purchase price; and used equipment-lesser of 75% of purchase price or 75% of current market value.

Loans to One Borrower. The Bank's regulatory limit on total loans to any borrower or attributed to any one borrower is 15% of unimpaired capital and surplus. Accordingly, as of June 30, 2012, our loans to one borrower legal limit was approximately \$5.5 million.

The Bank's lending policies require Board approval before any borrower's existing and/or committed borrowings from the Bank may exceed \$1.0 million in the aggregate. Any single loan in excess of \$1.0 million also requires prior Board approval.

Loan Originations, Purchases, Sales, Solicitation and Processing. Our customary sources of loan applications include repeat customers, referrals from realtors and other professionals and "walk-in" customers. Our residential loan originations are driven by the Bank's reputation, as opposed to being advertising driven.

We normally do not sell loans into the secondary mortgage market and did not sell any loans in the five year period ended June 30, 2012. Because it has been our policy to retain the loans we originate in our portfolio, we have not uniformly originated our real estate mortgage loans to meet the documentation standards to sell loans in the secondary mortgage market. We may do so, however, in the future if we find it desirable in connection with interest rate risk management to sell longer term fixed rate mortgages into the secondary mortgage market.

We did not purchase any whole loans in the five-year period ended June 30, 2012. We did, however, purchase insignificant participation interests in loans originated by other banks during this period.

Loan Approval Procedures and Authority. Lending policies and loan approval limits are approved and adopted by the Board of Directors. Lending authority is vested primarily in President and Chief Executive Officer and Vice President and Chief Lending Officer. Each of these officers may approve loans within the following limits: first mortgage real estate and construction loans up to \$500,000; home equity loans up to \$500,000; consumer loans up to \$500,000; and commercial loans up to \$500,000. Loans in excess of \$500,000 but under \$1.0 million require the approval of the Loan Committee. Prior Board approval is required for all loan products in excess of \$1.0 million. The Board also must give prior approval for any aggregation of existing and/or committed loans to one borrower that exceeds \$1.0 million. Certain other Bank employees also have limited lending authority.

Asset Quality

Loan Delinquencies and Collection Procedures. The Company's procedures for delinquent loans are as follows:

1 5 d a y slate charge added, first delinquent notice mailed
delinquent:

3 0 d a y ssecond delinquent notice mailed
delinquent:

4 5 d a y sadditional late charge, third delinquent notice mailed, telephone
delinquent: contact made

6 0 d a y stelephone contact made, separate letter mailed
delinquent:

9 0 d a y sdecision made to foreclose or workout
delinquent:

When a loan is 90 days delinquent, the Vice President - Lending may determine to refer it to an attorney for repossession or foreclosure. All reasonable attempts are made to collect from borrowers prior to referral to an attorney for collection. In certain instances, we may modify the loan or grant a limited moratorium on loan payments to enable the borrower to reorganize his or her financial affairs, and we attempt to work with the borrower to establish a repayment schedule to cure the delinquency.

As to mortgage loans, if a foreclosure action is taken and the loan is not reinstated, paid in full or refinanced, the property is sold at judicial sale at which we may be the buyer if there are no adequate offers to satisfy the debt. Any property acquired as the result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned until it is sold or otherwise disposed of. When real estate owned is acquired, it is recorded at the lower of cost or its fair market value less estimated selling costs. The initial writedown of the property is charged to the allowance for loan losses. Adjustments to the carrying value of the property that result from subsequent declines in value are charged to operations in the period in which the declines occur. At June 30, 2012, we did not hold real estate owned.

As to commercial loans, the Company requests updated financial statements when the loan becomes 90 days delinquent. As to account loans, the outstanding balance is collected from the related account along with accrued interest when the loan is 180 days delinquent.

Loans are reviewed on a regular basis, and all delinquencies of 60 days or more are reported to the Board of Directors. Loans are placed on non-accrual status when they are more than 90 days delinquent, except for such loans which are "well secured" and "in the process of collection." In addition a loan may be placed on non-accrual status at any time if, in the opinion of management, the collection of the loan in full is doubtful. An asset is "well secured" if it is secured (1) by collateral in the form of liens on or pledges of real or personal property, including securities, that have a realizable value sufficient to discharge the debt (including accrued interest) in full, or (2) by the guarantee of a financially responsible party. An asset is "in process of collection" if collection of the asset is proceeding in due course either (1)

through legal action, including judgment enforcement procedures, or (2) in appropriate circumstances, through collection efforts not involving legal action which are reasonably expected to result in repayment of the debt or its restoration to a current status in the near future.

Interest accrued and unpaid during the year the loan is placed on non-accrual status is charged against interest income. Interest accrued and unpaid in prior years is charged against the allowance for loan losses. Subsequent payments are either applied to the outstanding principal balance or recorded as interest income, depending on the assessment of the ultimate collectability of the loan. At June 30, 2012, we had approximately \$14.6 million of loans that were held on a non-accrual basis, all of which were classified as impaired with \$5.8 million subject to specific loss allowances totaling \$841,000.

Non-Performing Assets. The following table provides information regarding our non-performing loans and other non-performing assets as of the dates indicated.

	2012	2011	At June 30, 2010		2009	2008
	(Dollars in thousands)					
Loans accounted for on a non-accrual basis:						
One-to four-family real estate	\$ 9,003	\$ 8,317	\$ 6,764	\$ 3,714	\$ 1,234	
Commercial real estate	2,337	3,132	3,465	926	410	
Construction	1,258	1,027	864	—	—	
Consumer	—	2	9	—	—	
Home equity	923	950	2,281	1,356	634	
Commercial and industrial	1,064	642	514	550	658	
Total	14,585	14,070	13,897	6,546	2,936	
Accruing loans contractually past due 90 days or more:						
One-to four-family real estate	1,263	1,369	1,439	2,394	1,615	
Commercial real estate	—	—	—	—	378	
Construction	—	—	—	250	—	
Consumer	1	—	2	10	16	
Home equity	906	934	321	78	234	
Commercial and industrial	—	—	—	377	—	
Total	2,170	2,303	1,762	3,109	2,243	
Total non-performing loans	\$ 16,755	\$ 16,373	\$ 15,659	\$ 9,655	\$ 5,179	
Total non-performing assets (1)	\$ 16,755	\$ 17,234	\$ 16,726	\$ 9,655	\$ 5,179	
Loans modified in troubled debt restructuring						
	\$ 7,061	\$ 543	\$ 6,555	\$ 2,181	\$ —	
Total non-performing loans to total loans	6.81%	6.32%	5.74%	3.40%	2.00%	
Total non-performing loans to total assets	4.82%	4.69%	4.36%	2.74%	1.68%	
Total non-performing assets to total assets	4.82%	4.93%	4.66%	2.74%	1.68%	

(1) Total non-performing assets consist of total non-performing loans and other real estate owned of \$-, \$861, \$1,067, \$ - and \$ - at June 30, 2012, 2011, 2010, 2009 and 2008, respectively.

During the year ended June 30, 2012, gross interest income of \$813,000 would have been recorded on loans accounted for on a non-accrual basis if those loans had been current, and \$292,000 of interest collected on a cash basis was included in income.

Classified Assets. In compliance with the Uniform Credit Classification and Account Management Policy adopted by the Federal Deposit Insurance Corporation, the Company has an internal loan review program, whereby non-performing loans are classified as special mention, substandard, doubtful or loss. It is our policy to review the loan portfolio, in accordance with regulatory classification procedures, on at least a quarterly basis. When a loan is classified as substandard or doubtful, management is required to evaluate the loan for impairment. When management classifies a portion of a loan as loss, a reserve equal to 100% of the loss amount is required to be established or the loan is to be charged-off, if a conforming loss event has occurred.

An asset that does not currently expose the Company to a sufficient degree of risk to warrant an adverse classification, but which possesses credit deficiencies or potential weaknesses that deserve management's close attention is classified as "special mention."

An asset classified as "substandard" is inadequately protected by the current net worth and paying capacity of the obligor or the collateral pledged, if any. Assets so classified have well-defined weaknesses and are characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected.

An asset classified as "doubtful" has all the weaknesses inherent in a "substandard" asset with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The possibility of a loss on a doubtful asset is high.

That portion of an asset classified as "loss" is considered uncollectible and of such little value that its continuance as an asset, without charge-off, is not warranted. This classification does not necessarily mean that an asset has absolutely no recovery or salvage value; but rather, it is not practical or desirable to defer writing off a basically worthless asset even though partial recovery may be affected in the future.

Management's classification of assets is reviewed by the Board on a regular basis and by the regulatory agencies as part of their examination process. An independent loan review firm performs periodic reviews of our loan portfolio.

The following table discloses the Company's classification of assets as of June 30, 2012.

	At June 30, 2012 (In thousands)
Special Mention	\$ 5,872
Substandard	1,787
Doubtful	2,927
Loss	531
Total	\$ 11,117

At June 30, 2012, 13 out of the 26 loans adversely classified totaling \$4.7 million are included as non-performing loans in the non-performing assets table.

Allowance for Credit Losses. The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded credit commitments. The allowance for loan losses represents management's estimate of losses inherent in the loan portfolio as of the consolidated statement of financial condition date and is recorded as a reduction to loans. The reserve for unfunded credit commitments represents management's estimate of losses inherent in its unfunded loan commitments and is recorded in other liabilities on the consolidated statement of financial condition. The allowance for loan losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. All, or part, of the principal balance of loans receivable that are deemed uncollectible are charged against the allowance when management determines that the repayment of that amount is highly unlikely. Any subsequent recoveries are credited to the allowance. Non-residential consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible.

Management, in determining the allowance for loan losses, considers the Company's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available. The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as impaired. For loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price of the impaired loan) is lower than the carrying value of that loan. The general component covers pools of loans by loan class. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these classes of loans, adjusted for qualitative factors. Each factor is assigned a value to reflect improving, stable or declining conditions based on management's best judgment using relevant information available at the time of the evaluation. The unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

The allowance calculation methodology includes segregation of the total loan portfolio into segments. The Company's loans receivable portfolio is comprised of the following segments: residential mortgage, commercial real estate, construction, consumer and, commercial and industrial. Some segments of the Company's loan receivable portfolio are further disaggregated into classes which allows management to better monitor risk and performance.

The residential mortgage loan segment is disaggregated into two classes: one-to four-family loans, which are primarily first liens, and home equity loans, which consist of first and second liens. The commercial real estate loan segment consists of both owner and non-owner occupied loans which have medium risk due to historical activity on these type loans. The construction loan segment is further disaggregated into two classes: one-to four-family owner occupied, which includes land loans, whereby the owner is known and there is less risk, and other, whereby the property is generally under development and tends to have more risk than the one-to four-family owner occupied loans. The commercial and industrial loan segment consists of loans made for the purpose of financing the activities of commercial customers. The majority of commercial and industrial loans are secured by real estate and thus carry a lower risk than traditional commercial and industrial loans. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts.

Management evaluates individual loans in all of the loan segments (including loans in residential mortgage and consumer segments) for possible impairment if the loan is either in nonaccrual status, risk rated Substandard or worse or has been modified in a troubled debt restructuring. A loan is considered

impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

Loans whose terms are modified are classified as troubled debt restructurings if the Company grants such borrowers concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a reduction in interest rate, a below market interest rate based on risk, or an extension of a loan's stated maturity date. Nonaccrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive months after modification. Loans classified as troubled debt restructurings are designated as impaired

The evaluation of the need and amount of the allowance for impaired loans and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

In addition, the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation, as an integral part of their examination processes, periodically review our loan and real estate owned portfolios and the related allowance for loan losses and valuation allowance for real estate owned. They may require the allowance for loan losses or the valuation allowance for real estate owned to be increased based on their review of information available at the time of the examination, which would negatively affect our earnings.

The following table sets forth information with respect to the Bank's allowance for loan losses for the periods indicated:

	Year Ended June 30,				
	2012	2011	2010	2009	2008
	(Dollars in thousands)				
Allowance balance at beginning of period	\$ 2,170	\$ 2,588	\$ 1,808	\$ 1,025	\$ 926

Allocation of Allowance for Loan Losses. The following table sets forth the allocation of the Company's allowance for loan losses by loan category and the percent of loans in each category to total loans receivable at the dates indicated. The portion of the loan loss allowance allocated to each loan category does not represent the total available for future losses that may occur within the loan category since the total loan loss allowance is a valuation allocation applicable to the entire loan portfolio.

Securities Portfolio

Our investment policy is designed to manage cash flows and foster earnings within prudent interest rate risk and credit risk guidelines. The portfolio mix is governed by our short term and long term liquidity needs. Rate-of-return, cash flow, rating and guarantor-backing are also considered when making investment decisions. The purchase of principal only and stripped coupon interest only security instruments is specifically not authorized by our investment policy. Furthermore, other than government related securities which may not be rated, we only purchase securities with a rating of AAA or AA. We invest primarily in mortgage-backed securities, U.S. Government obligations, U.S. Government agency issued securities and Corporate Bonds.

Mortgage-backed securities represent a participation interest in a pool of mortgages issued by U.S. government agencies or government-sponsored enterprises, such as Federal Home Loan Mortgage Corporation (“Freddie Mac”), the Government National Mortgage Association (“Ginnie Mae”), and the Federal National Mortgage Association (“Fannie Mae”), as well as non-government, private corporate issuers. Mortgage-backed securities are pass-through securities and generally yield less than the mortgage loans underlying the securities. The characteristics of the underlying pool of mortgages, i.e., fixed-rate or adjustable-rate, as well as prepayment risk, are passed on to the certificate holder.

Mortgage-backed securities issued or sponsored by U.S. government agencies and government-sponsored entities are guaranteed as to the payment of principal and interest to investors. Private corporate issuers’ mortgage-backed securities typically offer rates above those paid on government agency issued or sponsored securities, but lack the guaranty of those agencies.

Corporate bonds often pay higher rates than government or municipal bonds, because they tend to be riskier. The bond holder receives interest payments (yield) and principal and is repaid on a fixed maturity date. Corporate bonds can mature anywhere between 1 to 30 years and changes in interest rates are generally reflected in the bond prices. Corporate bonds carry no claims to ownership and do not pay a dividend, but are considered to be less risky than stocks, since the company has to pay off all of its debts (including bonds) before it handles its obligations to stockholders. Corporate bonds have a wide range of ratings and yields because the financial health of the issuers can vary widely,

FASB ASC 320, “Investments - Debt and Equity Securities,” requires that securities be categorized as “held to maturity,” “trading securities” or “available for sale,” based on management’s intent as to the ultimate disposition of each security. FASB ASC 320 allows debt securities to be classified as “held to maturity” and reported in financial statements at amortized cost if the reporting entity has the positive intent and ability to hold these securities to maturity. Securities that might be sold in response to changes in market interest rates, changes in the security’s prepayment risk, increases in loan demand, or other similar factors cannot be classified as “held to maturity.”

At the present time, nearly our entire securities portfolio is purchased with the intent to hold each security until maturity. At June 30, 2012, we maintained a small trading account totaling \$52,000 and the rest of our securities portfolio was classified as held to maturity. Securities not classified as “held to maturity” or as “trading securities” are classified as “available for sale” and are reported at fair value with unrealized gains and losses on the securities impacting equity. There were no available for sale securities at June 30, 2012 and 2011.

Individual securities are considered impaired when their fair values are less than their amortized cost. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are “temporary” or “other-than-temporary” in accordance with applicable accounting

guidance including, but not limited to, ASC 320. Accordingly, the Company accounts for temporary impairments based upon security classification as either trading, available for sale or held to maturity. Temporary impairments on “available for sale” securities are recognized, on a tax-effected basis, through other comprehensive income with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Temporary impairments of “held to maturity” securities are not recognized in the consolidated financial statements; however, information concerning the amount and duration of impairments on held to maturity securities is disclosed in the notes to the consolidated financial statements. The carrying value of securities held in a trading portfolio is adjusted to fair value through earnings on a quarterly basis.

Other-than-temporary impairments on securities that the Company has decided to sell or will more likely than not be required to sell prior to the full recovery of their fair value to a level equal to or exceeding amortized cost are recognized in earnings. Otherwise, the other-than-temporary impairment is bifurcated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows expected to be collected on a debt security falls below its amortized cost. The noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. Credit-related other-than-temporary impairments are recognized in earnings while noncredit-related other-than-temporary impairments are recognized, net of deferred taxes, in other comprehensive income.

At June 30, 2012, our securities portfolio did not contain securities of any issuer, other than the U.S. Government agencies and government-sponsored enterprises, having an aggregate book value in excess of 10% of stockholders' equity. We do not currently participate in hedging programs, interest rate caps, floors or swaps, or other activities involving the use of off-balance sheet derivative financial instruments, however, we may in the future utilize such instruments if we believe it would be beneficial for managing our interest rate risk.

The following table sets forth certain information regarding the carrying values, weighted average yields and maturities of our held to maturity securities portfolio at June 30, 2012. Our held to maturity securities portfolio is carried at amortized cost. This table shows contractual maturities and does not reflect repricing or the effect of prepayments. Actual maturities of the securities held by us may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without prepayment penalties. Callable securities pose reinvestment risk because we may not be able to reinvest the proceeds from called securities at an equivalent or higher interest rate.

Sources of Funds

General. Deposits are our major source of funds for lending and other investment purposes. To the extent that our loan originations may exceed the funding available from deposits, we have borrowed funds from the Federal Home Loan Bank to supplement the amount of funds for lending and funding daily operations.

In addition, we derive funds from loan and mortgage-backed securities principal repayments, interest, and proceeds from the maturity and call of investment securities. Loan and securities payments are a relatively stable source of funds, while deposit inflows and outflows are significantly influenced by pricing strategies and money market conditions.

Deposits. Our current deposit products include checking and savings accounts, certificates of deposit and fixed or variable rate individual retirement accounts (IRAs). Deposit account terms vary, primarily as to the required minimum balance amount, the amount of time, if any, that the funds must remain on deposit and the applicable interest rate. Our savings account menu includes regular passbook, statement, money market and club accounts. We also offer a six-level tiered savings account. Our certificates of deposit currently range in terms from 6 months to 10 years. Our IRAs are available with the same maturities as certificates of deposit accounts, with the exception of the 30 month term. We offer a two year certificate of deposit that permits the depositor to increase the interest rate to the current two year rate once during the term.

Deposits are obtained primarily from within New Jersey. The Bank also utilizes brokered deposits as a funding source. Brokered deposits at June 30, 2012 totaled \$3.1 million. Premiums or incentives for opening accounts are sometimes offered. We periodically select particular certificate of deposit maturities for promotion in connection with asset/liability management and interest rate risk concerns.

The determination of deposit and certificate interest rates is based upon a number of factors, including: (1) need for funds based on loan demand, current maturities of deposits and other cash flow needs; (2) a current survey of a selected group of competitors' rates for similar products; (3) economic conditions; and (4) business plan projections.

A large percentage of our deposits are in certificates of deposit. The inflow of certificates of deposit and the retention of such deposits upon maturity are significantly influenced by general interest rates and money market conditions, making certificates of deposit traditionally a more volatile source of funding than core deposits. Our liquidity could be reduced if a significant amount of certificates of deposit maturing within a short period of time were not renewed. To the extent that such deposits do not remain with us, they may need to be replaced with borrowings which could

increase our cost of funds and negatively impact our net interest rate spread and our financial condition.

The following table sets forth the distribution of average deposits for the periods indicated and the weighted average nominal interest rates for each period on each category of deposits presented.

The following table shows the amount of the Company's certificates of deposit of \$100,000 or more by time remaining until maturity as of June 30, 2012.

Remaining Time Until Maturity:	Certificates of Deposit (In thousands)	
Within three months	\$	7,945
Three through six months		6,459
Six through twelve months		7,838
Over twelve months		26,730
Total	\$	48,972

Borrowings. To supplement our deposits as a source of funds for lending or investment, we have borrowed funds in the form of advances from the Federal Home Loan Bank of New York. At June 30, 2012, our collateralized borrowing limit with the Federal Home Loan Bank was \$78.1 million and our outstanding borrowings with the Federal Home Loan Bank totaled \$20.0 million. Information regarding our total borrowings as of June 30, 2012 is set forth in the following table.

	Balance	At June 30, 2012		Maturity
		Rate		
Total Borrowings:				
Ten year fixed rate convertible advance	\$ 10,000	3.272	%	November 2017
Ten year fixed rate convertible advance	\$ 10,000	3.460	%	March 2018

Advances from the Federal Home Loan Bank of New York are typically secured by the Federal Home Loan Bank stock and a portion of our residential mortgage loans and by other assets, mainly securities which are obligations of or guaranteed by the U.S. government. Additional information regarding our borrowings is included under Note 9 to our consolidated financial statements beginning on page F-1.

Subsidiary Activity

MSB Financial Corp. has no direct subsidiaries other than Millington Savings Bank. The Bank has one wholly owned subsidiary, Millington Savings Service Corp., formed in 1984. The service corporation is currently inactive.

Regulation and Supervision

The Bank and the Company operate in a highly regulated industry. This regulation establishes a comprehensive framework of activities in which they may engage and is intended primarily for the protection of the Deposit Insurance Fund and depositors. Set forth below is a brief description of certain laws that relate to the regulation of the Bank and the Company. The description does not purport to be complete and is qualified in its entirety by reference to applicable laws and regulations.

Regulatory authorities have extensive discretion in connection with their supervisory and enforcement activities, including the imposition of restrictions on operations, the classification of assets and the adequacy of the allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, or legislation, including changes in the regulations

governing mutual holding companies, could have a material adverse impact on the Company and the Bank. The adoption of regulations or the enactment of laws that restrict the operations of the Bank and/or the Company or impose burdensome requirements upon one or both of them could reduce their profitability and could impair the value of the Bank's franchise, resulting in negative effects on the trading price of the Company's common stock.

Dodd-Frank Wall Street Reform and Consumer Protection Act

On July 21, 2010, the Dodd-Frank was signed into law. The Dodd-Frank Act is intended to affect a fundamental restructuring of federal banking regulation. Among other things, the Dodd-Frank Act created a new Financial Stability Oversight Council to identify systemic risks in the financial system and gave federal regulators new authority to take control of and liquidate financial firms. The Dodd-Frank Act eliminated our current primary federal regulator, the Office of Thrift Supervision, and subjected savings and loan holding companies to greater regulation. The Dodd-Frank Act additionally created a new independent federal regulator to administer federal consumer protection laws. The Dodd-Frank Act has and is expected to continue to have a significant impact on our business and operations. Among the provisions that are likely to affect us are the following:

Elimination of OTS. As a result of the Dodd-Frank Act, the OTS, our former primary federal regulator was eliminated effective July 21, 2011. The primary federal regulator of the Company is now the Board of Governors of the Federal Reserve System (the "Federal Reserve"). The Federal Reserve generally has rulemaking, examination, supervision and oversight authority over our operations and the FDIC will retain secondary authority over the Bank.

New Limits on MHC Dividend Waivers. Effective as of the date of transfer of OTS's duties, the Dodd-Frank Act made significant changes in the law governing waivers of dividends by mutual holding companies. After that date, a mutual holding company may only waive the receipt of a dividend from a subsidiary if no insider of the mutual holding company or their associates or tax-qualified or non-tax-qualified employee stock benefit plan holds any shares of the class of stock to which the waiver would apply, the mutual holding company gives written notice of its intent to waive the dividend at least 30 days prior to the proposed payment date, and the Federal Reserve does not object. The Federal Reserve will not object to a dividend waiver if it determines that the waiver would not be detrimental to the safe and sound operation of the savings association, the mutual holding company's board determines that the waiver is consistent with its fiduciary duties and the mutual holding company has waived dividends prior to December 1, 2009. MSB Financial Corporation is grandfathered under this provision. In addition, waived dividends must be taken into account in determining the appropriate exchange ratio for a second-step conversion of a mutual holding company unless the mutual holding company has waived dividends prior to December 1, 2009. On July 21, 2011, an interim final regulation adopted by the Federal Reserve added an additional requirement that any dividend waivers be approved by members at least every 12 months.

Holding Company Capital Requirements. Effective as of the transfer date, the Federal Reserve was authorized to establish capital requirements for savings and loan holding companies. These capital requirements must be countercyclical so that the required amount of capital increases in times of economic expansion and decreases in times of economic contraction, consistent with safety and soundness. Savings and loan holding companies will also be required to serve as a source of financial strength for their depository institution subsidiaries. Within five years after enactment, the Dodd-Frank Act requires the Federal Reserve to apply consolidated capital requirements that are no less stringent than those currently applied to depository institutions to depository institution holding companies that were not supervised by the Federal Reserve as of May 19, 2009. Under these standards, trust preferred securities

will be excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by a bank or savings and loan holding company with less than \$15 billion in assets.

Deposit Insurance. The Dodd-Frank Act permanently increases the maximum deposit insurance amount for banks, savings institutions and credit unions to \$250,000 per depositor, retroactive to January 1, 2009, and extended unlimited deposit insurance to non-interest bearing transaction accounts through December 31, 2012. The Dodd-Frank Act also broadened the base for FDIC insurance assessments, required the FDIC to increase the reserve ratio of the Deposit Insurance Fund from 1.15% to 1.35% of insured deposits by 2020 and eliminated the requirement that the FDIC pay dividends to insured depository institutions when the reserve ratio exceeds certain thresholds. The Dodd-Frank Act also eliminated the federal statutory prohibition against the payment of interest on business checking accounts.

Qualified Thrift Lender Test. Under the Dodd-Frank Act, a savings association that fails the qualified thrift lender test will be prohibited from paying dividends, except for dividends that: (i) would be permissible for a national bank; (ii) are necessary to meet obligations of a company that controls the savings association; and (iii) are specifically approved by the Federal Reserve. In addition, a savings association that fails the qualified thrift lender test will be deemed to have violated Section 5 of the HOLA and may become subject to enforcement actions thereunder.

Corporate Governance. The Dodd-Frank Act required publicly traded companies to give stockholders a non-binding vote on executive compensation at their first annual meeting taking place six months after the date of enactment and at least every three years thereafter and on so-called “golden parachute” payments in connection with approvals of mergers and acquisitions. The legislation also authorized the SEC to promulgate rules that would allow stockholders to nominate their own candidates using a company’s proxy materials. Additionally, the Dodd-Frank Act also directed the federal banking regulators to promulgate rules prohibiting excessive compensation paid to executives of depository institutions and their holding companies with assets in excess of \$1.0 billion, regardless of whether the company is publicly traded or not. The Dodd-Frank Act gave the SEC authority to prohibit broker discretionary voting on elections of directors and executive compensation matters.

Transactions with Affiliates and Insiders. The Dodd-Frank Act expands the definition of affiliate for purposes of quantitative and qualitative limitations of Section 23A of the Federal Reserve Act to include mutual funds advised by a depository institution or its affiliates. The Dodd-Frank Act will apply Section 23A and Section 22(h) of the Federal Reserve Act (governing transactions with insiders) to derivative transactions, repurchase agreements and securities lending and borrowing transaction that create credit exposure to an affiliate or an insider. Any such transactions with affiliates must be fully secured. The current exemption from Section 23A for transactions with financial subsidiaries will be eliminated. The Dodd-Frank Act will additionally prohibit an insured depository institution from purchasing an asset from or selling an asset to an insider unless the transaction is on market terms and, if representing more than 10% of capital, is approved in advance by the disinterested directors.

Debit Card Interchange Fees. Effective July 21, 2011, the Dodd-Frank Act required that the amount of any interchange fee charged by a debit card issuer with respect to a debit card transaction must be reasonable and proportional to the cost incurred by the issuer. Within nine months of enactment, the Federal Reserve Board is required to establish standards for reasonable and proportional fees which may take into account the costs of preventing fraud. The restrictions on interchange fees, however, do not apply to banks that, together with their affiliates, have assets of less than \$10 billion.

Consumer Financial Protection Bureau. The Dodd-Frank Act created a new, independent federal agency called the Consumer Financial Protection Bureau (“CFPB”), which was granted broad

rulemaking, supervisory and enforcement powers under various federal consumer financial protection laws, including the Equal Credit Opportunity Act, Truth in Lending Act, Real Estate Settlement Procedures Act, Fair Credit Reporting Act, Fair Debt Collection Act, the Consumer Financial Privacy provisions of the Gramm-Leach-Bliley Act and certain other statutes. The CFPB has examination and primary enforcement authority with respect to depository institutions with \$10 billion or more in assets. Smaller institutions will be subject to rules promulgated by the CFPB but will continue to be examined and supervised by federal banking regulators for consumer compliance purposes. The CFPB has authority to prevent unfair, deceptive or abusive practices in connection with the offering of consumer financial products. The Dodd-Frank Act authorized the CFPB to establish certain minimum standards for the origination of residential mortgages including a determination of the borrower's ability to repay. In addition, the Dodd-Frank Act allowed borrowers to raise certain defenses to foreclosure if they receive any loan other than a "qualified mortgage" as defined by the CFPB. The Dodd-Frank Act permitted states to adopt consumer protection laws and standards that are more stringent than those adopted at the federal level and, in certain circumstances, permitted state attorneys general to enforce compliance with both the state and federal laws and regulations.

Holding Company Regulation

General. The Company is a savings and loan holding company within the meaning of Section 10 of the HOLA. As a result of the Dodd-Frank Act, it is now required to file reports with the Federal Reserve and is subject to regulation and examination by the Federal Reserve, as successor to the OTS. The Company must also obtain regulatory approval from the Federal Reserve before engaging in a certain transactions, such as mergers with or acquisitions of other financial institutions. In addition, the Federal Reserve has enforcement authority over the Company and any non-savings institution subsidiaries. This permits the Federal Reserve to restrict or prohibit activities that it determines to be a serious risk to the Bank. This regulation is intended primarily for the protection of the depositors and not for the benefit of stockholders of the Company.

The Federal Reserve has indicated that, to the greatest extent possible taking into account any unique characteristics of savings and loan holding companies and the requirements of the HOLA, it intends to apply its current supervisory approach to the supervision of bank holding companies to savings and loan holding companies. The stated objective of the Federal Reserve will be to ensure the savings and loan holding company and its non-depository subsidiaries are effectively supervised and can serve as a source of strength for, and do not threaten the safety and soundness of the subsidiary depository institutions. The Federal Reserve has generally adopted the substantive provisions of OTS regulations governing savings and loan holding companies on an interim final basis with certain modifications as discussed below.

Activities Restrictions. As a savings and loan holding company and as a subsidiary holding company of a mutual holding company, the Company is subject to statutory and regulatory restrictions on its business activities. The non-banking activities of the Company and its non-savings institution subsidiaries are restricted to certain activities specified by the Federal Reserve regulation, which include performing services and holding properties used by a savings institution subsidiary, activities authorized for savings and loan holding companies as of March 5, 1987 and non-banking activities permissible for bank holding companies pursuant to the Bank Holding Company Act of 1956, as amended, or authorized for financial holding companies pursuant to the Gramm-Leach-Bliley Act. Before engaging in any non-banking activity or acquiring a company engaged in any such activities, the Company must file with the Federal Reserve either a prior notice or (in the case of non-banking activities permissible for bank holding companies) an application regarding its planned activity or acquisition. Under the Dodd-Frank Act, a savings and loan holding company may only engage in activities authorized for financial holding companies if they meet all of the criteria to qualify as a financial holding company. Accordingly, the

Federal Reserve will require savings and loan holding companies to elect to be treated as financial holding companies in order to engage in financial holding company activities. In order to make such an election, the savings and loan holding company and its depository institution subsidiaries must be well capitalized and well managed.

Mergers and Acquisitions. The Company must obtain approval from the Federal Reserve before acquiring, directly or indirectly, more than 5% of the voting stock of another savings institution or savings and loan holding company or acquiring such an institution or holding company by merger, consolidation, or purchase of its assets. Federal law also prohibits a savings and loan holding company from acquiring more than 5% of a company engaged in activities other than those authorized for savings and loan holding companies by federal law; or acquiring or retaining control of a depository institution that is not insured by the FDIC. In evaluating an application for the Company to acquire control of a savings institution, the Federal Reserve would consider the financial and managerial resources and future prospects of the Company and the target institution, the effect of the acquisition on the risk to the insurance funds, the convenience and the needs of the community and competitive factors.

Waivers of Dividends by MSB Financial MHC. As previously permitted by OTS policies, the MHC has historically waived the receipt of dividends from the Company. The OTS reviewed dividend waiver notices on a case-by-case basis and, in general, did not object to any such waiver if; (i) the mutual holding company's board of directors determines that such waiver is consistent with such directors' fiduciary duties to the mutual holding company's members, and (ii) the waiver would not be detrimental to the safe and sound operations of the subsidiary savings association. During the year ended June 30, 2012, the MHC waived its right, upon non-objection from the OTS, to receive cash dividends of \$278,000 declared during the year.

Effective with the transfer of OTS's jurisdiction over savings and loan holding companies to the Federal Reserve (the "transfer date"), mutual holding companies may only waive the receipt of a dividend from a subsidiary if no insider of the mutual holding company or their associates or tax-qualified or non-tax-qualified employee stock benefit plan holds any shares of the class of stock to which the waiver would apply, or the mutual holding company gives written notice of its intent to waive the dividend at least 30 days prior to the proposed payment date and the Federal Reserve does not object. The Federal Reserve may not object to a dividend waiver if it determines that the waiver would not be detrimental to the safe and sound operation of the savings association, the mutual holding company's board determines that the waiver is consistent with its fiduciary duties and the mutual holding company has waived dividends prior to December 1, 2009.

The Federal Reserve's interim final rule on dividend waivers added additional requirements before a dividend waiver will be approved. The Federal Reserve now requires that any notice of waiver of dividends include a board resolution together with any supporting materials relied upon by the MHC board to conclude that the dividend waiver is consistent with the board's fiduciary duties. The resolution must include; (i) a description of the conflict of interest that exists because of a MHC director's ownership of stock in the subsidiary declaring the dividend and any actions taken to eliminate the conflict of interest, such as a waiver by the directors of their right to receive dividends; (ii) a finding by the MHC that the waiver is consistent with its fiduciary duties despite any conflict of interest; (iii) an affirmation that the MHC is able to meet the terms of any loan agreement for which the stock of the subsidiary is pledged or to which the MHC is subject; and (iv) any affirmation that majority of the MHC's members have approved a waiver of dividends within the past 12 months and that the proxy statement used for such vote included certain disclosures.

Conversion of the MHC to Stock Form. Federal regulations permit the MHC to convert from the mutual form of organization to the capital stock form of organization, commonly referred to as a

second step conversion. In a second step conversion a new holding company would be formed as a successor to the Company, the MHC's corporate existence would end and certain depositors of the Bank would receive the right to subscribe for shares of the new holding company. In a second step conversion, each share of common stock held by stockholders other than the MHC would be automatically converted into a number of shares of common stock of the new holding company determined pursuant to an exchange ratio that ensures that the Company's stockholders own the same percentage of common stock in the new holding company as they owned in the Company immediately prior to the second step conversion. The total number of shares held by the Company's stockholders after a second step conversion also would be increased by any purchases by the Company's stockholders in the stock offering of the new holding company conducted as part of the second step conversion.

Under the Dodd-Frank Act, waived dividends must be taken into account in determining the appropriate exchange ratio for a second-step conversion of a mutual holding company unless the mutual holding company has waived dividends prior to December 1, 2009.

Acquisition of Control. Under the federal Change in Bank Control Act, a notice must be submitted to the Federal Reserve if any person (including a company), or group acting in concert, seeks to acquire "control" of a savings and loan holding company. An acquisition of "control" can occur upon the acquisition of 10% or more of the voting stock of a savings and loan holding company or as otherwise defined by the Federal Reserve. Under the Change in Bank Control Act, the Federal Reserve has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that so acquires control is then subject to regulation as a savings and loan holding company.

Holding Company Capital Requirements. Effective as of the transfer date, the Federal Reserve was authorized to establish capital requirements for savings and loan holding companies. These capital requirements must be countercyclical so that the required amount of capital increases in times of economic expansion and decrease in times of economic contraction, consistent with safety and soundness. Savings and loan holding companies will also be required to serve as a source of financial strength for their depository institution subsidiaries. Within five years after enactment, the Dodd-Frank Act requires the Federal Reserve to apply consolidated capital requirements that are no less stringent than those currently applied to depository institutions and to depository institution holding companies that were not supervised by the FRB as of May 19, 2009. Under these standards, trust preferred securities will be excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by a bank or savings and loan holding company with less than \$15 billion in assets.

In addition to changes resulting from the Dodd-Frank Act, recent proposals published by the Basel Committee on Banking Supervision, or the Basel Committee, if adopted, could lead to significantly higher capital requirements, higher capital charges and more restrictive leverage and liquidity ratios. In July and December 2009, the Basel Committee published proposals relating to enhanced capital requirements for market risk and new capital and liquidity risk requirements for banks. On September 12, 2010, the Basel Committee announced an agreement on additional capital reforms that increases required Tier 1 capital and minimum Tier 1 common equity capital and requires banks to maintain an additional capital conservation buffer during times of economic prosperity. On June 4, 2012, the Federal Reserve proposed new capital requirements that are consistent with Basel III and, if adopted, could affect our business. If adopted as proposed, the proposed rules will require, among other things, a minimum common equity Tier 1 capital ratio of 4.5 percent, net of regulatory deductions, and establish a capital conservation buffer of an additional 2.5 percent of common equity to risk-weighted assets above the regulatory minimum capital requirement, establishing a minimum common equity Tier 1 ratio plus capital conservation buffer at 7 percent. In addition, the proposed rules increase the minimum Tier 1 capital requirement from 4 percent to 6 percent of risk-weighted assets. The proposed rules also specify that

a bank with a capital conservation buffer of less than 2.5 percent would potentially face limitations on capital distributions and bonus payments to executives. The proposed rules would require a phase-out over a 10-year period of the inclusion of trust preferred securities as a component of Tier 1 capital beginning in 2013.

Regulation of the Bank

General. As a New Jersey chartered, Federal Deposit Insurance Corporation-insured savings bank, the Bank is regulated by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation. The Bank's operations are subject to extensive regulation, including restrictions or requirements with respect to loans to one borrower, the percentage of non-mortgage loans or investments to total assets, capital distributions, permissible investments and lending activities, liquidity, transactions with affiliates and community reinvestment. The Bank must file regulatory reports concerning its activities and financial condition, and must obtain regulatory approvals prior to entering into certain transactions, such as mergers with or acquisitions of other financial institutions. The New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation regularly examine the Bank and prepare reports to the Bank's Board of Directors on deficiencies, if any, found in its operations. The regulatory authorities have substantial discretion to impose enforcement action on an institution that fails to comply with applicable regulatory requirements, particularly with respect to its capital requirements.

Federal Deposit Insurance. The Bank's deposits are insured to applicable limits by the FDIC. The maximum deposit insurance amount has been permanently increased from \$100,000 to \$250,000 as a result of the passage of the Dodd-Frank Act. The FDIC has adopted a risk-based premium system that provides for quarterly assessments based on an insured institution's ranking in one of four risk categories based on their examination ratings and capital ratios. Well-capitalized institutions with the CAMELS ratings of 1 or 2 are grouped in Risk Category I and, until 2009, were assessed for deposit insurance at an annual rate of between five and seven basis points with the assessment rate for an individual institution determined according to a formula based on a weighted average of the institution's individual CAMELS component ratings plus either five financial ratios or the average ratings of its long-term debt. Institutions in Risk Categories II, III and IV were assessed at annual rates of 10, 28 and 43 basis points, respectively.

Starting in 2009, the FDIC significantly raised the assessment rate in order to restore the reserve ratio of the Deposit Insurance Fund to the statutory minimum of 1.15%. For the quarter beginning January 1, 2009, the FDIC raised the base annual assessment rate for institutions in Risk Category I to between 12 and 14 basis points while the base annual assessment rates for institutions in Risk Categories II, III and IV were increased to 17, 35 and 50 basis points, respectively. For the quarter beginning April 1, 2009 the FDIC set the base annual assessment rate for institutions in Risk Category I to between 12 and 16 basis points and the base annual assessment rates for institutions in Risk Categories II, III and IV at 22, 32 and 45 basis points, respectively. An institution's assessment rate could be lowered by as much as five basis points based on the ratio of its long-term unsecured debt to deposits or, for smaller institutions based on the ratio of certain amounts of Tier 1 capital to adjusted assets. The assessment rate could be adjusted for Risk Category I institutions that have a high level of brokered deposits and have experienced higher levels of asset growth (other than through acquisitions) and could be increased by as much as ten basis points for institutions in Risk Categories II, III and IV whose ratio of brokered deposits to deposits exceeds 10%. Reciprocal deposit arrangements like CDARS® were treated as brokered deposits for Risk Category II, III and IV institutions but not for institutions in Risk Category I. An institution's base assessment rate could also be increased if an institution's ratio of secured liabilities (including FHLB advances and repurchase agreements) to deposits exceeds 25%. The maximum adjustment for secured liabilities for institutions in Risk Categories I, II, III and IV would be 8, 11, 16 and

22.5 basis points, respectively, provided that the adjustment could not increase an institution's base assessment rate by more than 50%.

The FDIC imposed a special assessment equal to five basis points of assets less Tier 1 capital as of June 30, 2009, payable on September 30, 2009, and reserved the right to impose additional special assessments. In November, 2009, instead of imposing additional special assessments, the FDIC amended the assessment regulations to require all insured depository institutions to prepay their estimated risk-based assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012 on December 30, 2009. For purposes of estimating the future assessments, each institution's base assessment rate in effect on September 30, 2009 was used, assuming a 5% annual growth rate in the assessment base and a 3 basis point increase in the assessment rate in 2011 and 2012. The prepaid assessment will be applied against actual quarterly assessments until exhausted. Any funds remaining after June 30, 2013 will be returned to the institution. If the prepayment would impair an institution's liquidity or otherwise create significant hardship, it may apply for an exemption. Requiring this prepaid assessment does not preclude the FDIC from changing assessment rates or from further revising the risk-based assessment system.

The Dodd-Frank Act requires the FDIC to take such steps as necessary to increase the reserve ratio of the Deposit Insurance Fund from 1.15% to 1.35% of insured deposits by 2020. In setting the assessments, the FDIC is required to offset the effect of the higher reserve ratio against insured depository institutions with total consolidated assets of less than \$10 billion. The Dodd-Frank Act also broadens the base for FDIC insurance assessments so that assessments will be based on the average consolidated total assets less average tangible equity capital of a financial institution rather than on its insured deposits. The FDIC has adopted a new restoration plan to increase the reserve ratio to 1.15% by September 30, 2020 with additional rulemaking scheduled for 2011 regarding the method to be used to achieve a 1.35% reserve ratio by that date and offset the effect on institutions with assets less than \$10 billion in assets. Pursuant to the new restoration plan, the FDIC will forgo the 3 basis point increase in assessments scheduled to take effect on January 1, 2011.

The FDIC has adopted new assessment regulations that redefine the assessment base as average consolidated assets less average tangible equity. Insured banks with more than \$1.0 billion in assets must calculate quarterly average assets based on daily balances while smaller banks and newly chartered banks may use weekly averages. In the case of a merger, the average assets of the surviving bank for the quarter must include the average assets of the merged institution for the period in the quarter prior to the merger. Average assets would be reduced by goodwill and other intangibles. Average tangible equity will equal Tier 1 capital. For institutions with more than \$1.0 billion in assets average tangible equity will be calculated on a weekly basis while smaller institutions may use the quarter-end balance. Beginning April 1, 2011, the base assessment rate for insured institutions in Risk Category I will range between 5 to 9 basis points and for institutions in Risk Categories II, III, and IV will be 14, 23 and 35 basis points. An institution's assessment rate will be reduced based on the amount of its outstanding unsecured long-term debt and for institutions in Risk Categories II, III and IV may be increased based on their brokered deposits. Risk Categories are eliminated for institutions with more than \$10 billion in assets which will be assessed at a rate between 5 and 35 basis points.

In addition, all FDIC-insured institutions are required to pay assessments to the FDIC to fund interest payments on bonds issued by the Financing Corporation ("FICO"), an agency of the Federal government established to recapitalize the Federal Savings and Loan Insurance Corporation. The FICO assessment rates, which are determined quarterly, averaged .01% of insured deposits on an annualized basis in fiscal year 2010. These assessments will continue until the FICO bonds mature in 2017.

Regulatory Capital Requirements. Federal Deposit Insurance Corporation capital regulations require savings institutions to meet three minimum capital standards: (1) tangible capital equal to 1.5% of

total adjusted assets, (2) “Tier 1” or “core” capital equal to at least 4% (3% if the institution has received the highest possible rating on its most recent examination) of total adjusted assets, and (3) risk-based capital equal to 8% of total risk-weighted assets. At June 30, 2012, the Bank was in compliance with the minimum capital standards and qualified as “well capitalized.” For the Bank’s compliance with these regulatory capital standards, see Note 14 to the consolidated financial statements. In assessing an institution’s capital adequacy, the Federal Deposit Insurance Corporation takes into consideration not only these numeric factors but also qualitative factors, and has the authority to establish higher capital requirements for individual institutions where necessary.

The Federal Deposit Insurance Corporation may require any savings institution that has a risk-based capital ratio of less than 8%, a ratio of Tier 1 capital to risk-weighted assets of less than 4% or a ratio of Tier 1 capital to total adjusted assets of less than 4% (3% if the institution has received the highest rating on its most recent examination) to take certain action to increase its capital ratios. If the savings institution’s capital is significantly below the minimum required levels of capital or if it is unsuccessful in increasing its capital ratios, the institution’s activities may be restricted.

For purposes of the capital regulations, tangible capital is defined as core capital less all intangible assets except for certain mortgage servicing rights. Tier 1 or core capital is defined as common stockholders’ equity, non-cumulative perpetual preferred stock and related surplus, minority interests in the equity accounts of consolidated subsidiaries, and certain non-withdrawable accounts and pledged deposits of mutual savings banks. The Bank does not have any non-withdrawable accounts or pledged deposits. Tier 1 and core capital are reduced by an institution’s intangible assets, with limited exceptions for certain mortgage and non-mortgage servicing rights and purchased credit card relationships. Both core and tangible capital are further reduced by an amount equal to the savings institution’s debt and equity investments in “non-includable” subsidiaries engaged in activities not permissible for national banks other than subsidiaries engaged in activities undertaken as agent for customers or in mortgage banking activities and subsidiary depository institutions or their holding companies.

The risk-based capital standard for savings institutions requires the maintenance of total capital of 8% of risk-weighted assets. Total capital equals the sum of core and supplementary capital. The components of supplementary capital include, among other items, cumulative perpetual preferred stock, perpetual subordinated debt, mandatory convertible subordinated debt, intermediate-term preferred stock, the portion of the allowance for loan losses not designated for specific loan losses and up to 45% of unrealized gains on equity securities. The portion of the allowance for loan and lease losses includable in supplementary capital is limited to a maximum of 1.25% of risk-weighted assets. Overall, supplementary capital is limited to 100% of core capital. For purposes of determining total capital, a savings institution’s assets are reduced by the amount of capital instruments held by other depository institutions pursuant to reciprocal arrangements and by the amount of the institution’s equity investments (other than those deducted from core and tangible capital) and its high loan-to-value ratio land loans and non-residential construction loans.

A savings institution’s risk-based capital requirement is measured against risk-weighted assets, which equal the sum of each on-balance-sheet asset and the credit-equivalent amount of each off-balance-sheet item after being multiplied by an assigned risk weight. These risk weights range from 0% for cash to 100% for delinquent loans, property acquired through foreclosure, commercial loans, and certain other assets.

Qualified Thrift Lender Test. Savings institutions must meet a qualified thrift lender test or they become subject to the business activity restrictions and branching rules applicable to national banks. To qualify as a qualified thrift lender, a savings institution must either (i) be deemed a “domestic building and loan association” under the Internal Revenue Code by maintaining at least 60% of its total assets in

specified types of assets, including cash, certain government securities, loans secured by and other assets related to residential real property, educational loans and investments in premises of the institution or (ii) satisfy the statutory qualified thrift lender test set forth in the Home Owners' Loan Act by maintaining at least 65% of its portfolio assets in qualified thrift investments (defined to include residential mortgages and related equity investments, certain mortgage-related securities, small business loans, student loans and credit card loans). For purposes of the statutory qualified thrift lender test, portfolio assets are defined as total assets minus goodwill and other intangible assets, the value of property used by the institution in conducting its business, and specified liquid assets up to 20% of total assets. A savings institution must maintain its status as a qualified thrift lender on a monthly basis in at least nine out of every twelve months. The Bank met the qualified thrift lender test as of June 30, 2012 and in each of the last twelve months and, therefore, qualifies as a qualified thrift lender.

A savings bank that fails the qualified thrift lender test and does not convert to a bank charter generally will be prohibited from: (1) engaging in any new activity not permissible for a national bank, (2) paying dividends not permissible under national bank regulations, and (3) establishing any new branch office in a location not permissible for a national bank in the institution's home state. In addition, if the institution does not requalify under the qualified thrift lender test within three years after failing the test, the institution would be prohibited from engaging in any activity not permissible for a national bank and would have to repay any outstanding advances from the Federal Home Loan Bank as promptly as possible.

Community Reinvestment Act. Under the Community Reinvestment Act, every insured depository institution, including the Bank, has a continuing and affirmative obligation consistent with its safe and sound operation to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The Community Reinvestment Act does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community. The Community Reinvestment Act requires the depository institution's record of meeting the credit needs of its community to be assessed and taken into account in the evaluation of certain applications by such institution, such as a merger or the establishment of a branch office by the Bank. An unsatisfactory Community Reinvestment Act examination rating may be used as the basis for the denial of an application. The Bank received a "satisfactory" rating in its most recent Community Reinvestment Act examination.

Federal Home Loan Bank System. The Bank is a member of the Federal Home Loan Bank of New York, which is one of twelve regional federal home loan banks. Each Federal Home Loan Bank serves as a reserve or central bank for its members within its assigned region. It is funded primarily from funds deposited by financial institutions and proceeds derived from the sale of consolidated obligations of the Federal Home Loan Bank System. It makes loans to members pursuant to policies and procedures established by its board of directors.

As a member, the Bank is required to purchase and maintain stock in the Federal Home Loan Bank of New York in an amount equal to the greater of 1% of its aggregate unpaid residential mortgage loans, home purchase contracts or similar obligations at the beginning of each year or 5% of its outstanding Federal Home Loan Bank advances. The FHLB imposes various limitations on advances such as limiting the amount of certain types of real estate related collateral to 30% of a member's capital and limiting total advances to a member.

The Federal Home Loan Banks are required to provide funds for the resolution of troubled savings institutions and to contribute to affordable housing programs through direct loans or interest subsidies on advances targeted for community investment and low- and moderate-income housing

projects. These contributions have adversely affected the level of Federal Home Loan Bank dividends paid and could continue to do so in the future. In addition, these requirements could result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members.

Item 1A. Risk Factors

Not applicable as the Company is a “smaller reporting company.”

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

At June 30, 2012, our investment in property and equipment, net of depreciation and amortization, totaled \$9.4 million, including leasehold improvements and construction in progress. The following table lists our offices.

Office Location	Year Facility Opened		Leased or Owned
Millington Main Office 1902 Long Hill Road Millington, NJ	1994	(1)	Owned
Dewy Meadow Branch Office 415 King George Road Basking Ridge, NJ	2002		Leased
RiverWalk Branch Office 675 Martinsville Road Basking Ridge, NJ	2005	(2)	Leased
Martinsville Branch Office 1924 Washington Valley Road Martinsville, NJ	2006		Leased
Bernardsville Branch Office 122 Morristown Road Bernardsville, NJ	2008		Owned

(1)The Bank’s main office opened in 1911 in Millington, New Jersey. The Bank moved into its current main office in 1994.

(2)The Bank’s first branch office opened in 1998 in Liberty Corner, New Jersey. This office was relocated in 2005.

Item 3. Legal Proceedings

The Bank, from time to time, is a party to routine litigation which arises in the normal course of business, such as claims to enforce liens, condemnation proceedings on properties in which we hold security interests, claims involving the making and servicing of real property loans, and other issues incident to our business. There were no lawsuits pending or known to be contemplated against the Company or the Bank at June 30, 2012 that would have a material effect on operations or income.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Common Equity, Related Stockholder Matters and Purchases of Equity Securities

(a) **Market Information.** The Company's common stock trades on the NASDAQ Stock Market under the symbol "MSBF". The table below shows the reported high and low closing prices of common stock reported by NASDAQ and dividends declared during the periods indicated.

	High	Low	Dividends
2011			
Quarter ended September 30, 2010	\$ 8.07	\$ 6.55	\$ 0.03
Quarter ended December 31, 2010	\$ 7.48	\$ 5.66	\$ 0.03
Quarter ended March 31, 2011	\$ 6.70	\$ 5.15	\$ 0.03
Quarter ended June 30, 2011	\$ 6.11	\$ 5.16	\$ 0.03
2012			
Quarter ended September 30, 2011	\$ 5.85	\$ 4.23	\$ 0.03
Quarter ended December 31, 2011	\$ 5.50	\$ 4.25	\$ 0.03
Quarter ended March 31, 2012	\$ 6.00	\$ 4.26	\$ 0.03
Quarter ended June 30, 2012	\$ 6.84	\$ 4.76	\$ 0.03

Dividends. Declarations of dividends by the Board of Directors depend on a number of factors, including investment opportunities, growth objectives, financial condition, profitability, tax considerations, minimum capital requirements, regulatory limitations, and general economic as well as stock market conditions. The timing, frequency and amount of dividends are determined by the Board of Directors.

Stockholders. As of September 24, 2012, there were approximately 581 shareholders of record of the Company's common stock. This number does not include brokerage firms, banks and registered clearing agents acting as nominees for an indeterminate number of beneficial ("street name") owners.

(b) Not applicable

(c) Issuer Purchases of Equity Securities.

Treasury stock repurchases during the fourth quarter of fiscal year 2012 for the Company were as follows:

Period	Total number of shares purchased	Average price paid per share	Total number of shares Purchased as part of Publicly announced plans or programs	Maximum number of Shares that may be Purchased under the plans or programs
April, 2012	1,000	\$ 6.33	1,000	37,337
May, 2012	—	—	—	37,337
June, 2012	500	5.30	500	36,837
Total	1,500	\$ 5.98	1,500	

Item 6. Selected Financial Data

Not applicable as the Company is a smaller reporting company.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

This discussion and analysis reflects the Company's consolidated financial statements and other relevant statistical data and is intended to enhance your understanding of our financial condition and results of operations. You should read the information in this section in conjunction with the Company's consolidated financial statements and accompanying notes thereto beginning on page F-1 following Item 15 of this Form 10-K.

Overview

Our primary business is attracting retail deposits from the general public and using those deposits, together with funds generated from operations, principal repayments on securities and loans and borrowed funds, for our lending and investing activities. Our loan portfolio consists of one- to four-family residential real estate mortgages, commercial real estate mortgages, construction loans, commercial loans, home equity loans and lines of credit, and other consumer loans. We also invest in U.S. Government obligations and mortgage-backed securities and to a lesser extent, corporate bonds.

We reported net income of \$497,000 for the fiscal year ended June 30, 2012 as compared to net income of \$706,000 for fiscal 2011.

Net interest income for fiscal 2012 was down approximately 4.0% as compared to fiscal 2011. Non-interest expense had declined approximately 7.3%. The net interest rate spread decreased in fiscal 2012 to 3.22%, compared to 3.33% for fiscal 2011, mainly as a result of a lower interest rate environment. For the year ended June 30, 2012, interest income decreased by \$1.3 million or 8.8% while interest expense decreased by \$890,000 million or 21.1% as compared to 2011.

Total assets were \$347.3 million at June 30, 2012, a 0.6% decrease compared to \$349.5 million at June 30, 2011. The decrease in assets occurred primarily as the result of a \$12.8 million decrease in loans receivable, net, offset by an increase of \$9.0 million in securities held to maturity and an increase of \$2.8 million in cash and cash equivalent balances. Deposits were \$283.8 million at June 30, 2012, compared to \$286.2 million at June 30, 2011. FHLB advances were \$20.0 million at June 30, 2012 and June 30, 2011.

Stockholders' equity at June 30, 2012 was \$40.9 million compared to our stockholders' equity at the prior year-end of \$40.7 million, due to \$497,000 of net income, an increase of \$274,000 in paid-in capital and \$169,000 in ESOP shares earned, offset by the repurchase of \$423,000 in treasury stock, the declaration of \$310,000 in cash dividends declared on our common stock and a \$9,000 increase in accumulated other comprehensive loss. Our return on average equity for fiscal 2012 was 1.21% compared to 1.74% for fiscal 2011. The decrease in return on average equity for 2012 reflects the decrease in net income for the fiscal year ended June 30, 2012 as compared to the year ended June 30, 2011.

The Company experienced a reduction in loan and deposit growth during the twelve months ended June 30, 2012, primarily due to a slowing economy. Loans receivable, net, and deposits decreased by \$12.8 million and \$2.4 million, or 5.0% and 0.8%, respectively, while the Company's securities held to maturity increased by \$9.0 million or 21.6%, as did cash and cash equivalent balances increased by \$2.8 million or 9.0%. Borrowings remained unchanged from June 30, 2011 to June 30, 2012.

Critical Accounting Policies

Our accounting policies are integral to understanding the results reported and are described in Note 2 to our consolidated financial statements beginning on page F-1. In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the dates of the consolidated statements of financial condition and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates. A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses.

The allowance for loan losses is established through provisions for loan losses charged against income. Loans deemed to be uncollectible are charged against the allowance for loan losses, and subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is maintained at a level by management which represents the evaluation of known and inherent risks in the loan portfolio at the consolidated balance sheet date that are both probable and reasonable to estimate. Management's periodic evaluation of the adequacy of the allowance is based on the Company's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions, and other relevant factors. This evaluation is inherently subjective, as it requires material estimates that may be susceptible to significant change, including the amounts and timing of future cash flows expected to be received on impaired loans.

In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize additions to the allowance for loan losses based on their judgments about information available to them at the time of their examinations

The allowance calculation methodology includes segregation of the total loan portfolio into segments. The Company's loans receivable portfolio is comprised of the following segments: residential mortgage, commercial real estate, construction, consumer and, commercial and industrial. Some segments of the Company's loan receivable portfolio are further disaggregated into classes which allows management to better monitor risk and performance.

The residential mortgage loan segment is disaggregated into two classes: one-to four-family loans, which are primarily first liens, and home equity loans, which consist of first and second liens. The

commercial real estate loan segment consists of both owner and non-owner occupied loans which have medium risk due to historical activity on these type loans. The construction loan segment is further disaggregated into two classes: one-to four-family owner occupied, which includes land loans, whereby the owner is known and there is less risk, and other, whereby the property is generally under development and tends to have more risk than the one-to four-family owner occupied loans. The commercial and industrial loan segment consists of loans made for the purpose of financing the activities of commercial customers. The majority of commercial and industrial loans are secured by real estate and thus carry a lower risk than traditional commercial and industrial loans. The consumer loan segment consists primarily of installment loans (direct and indirect) and overdraft lines of credit connected with customer deposit accounts.

The allowance consists of specific, general and unallocated components. The specific component is related to loans that are classified as impaired. For loans classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. The general component covers pools of loans by loan class and is based on historical loss experience adjusted for qualitative factors. These qualitative risk factors include:

1. Lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices.
2. National, regional, and local economic and business conditions as well as the condition of various market segments, including the value of underlying collateral for collateral dependent loans.
3. Nature and volume of the portfolio and terms of loans.
4. Experience, ability, and depth of lending management and staff.
5. Volume and severity of past due, classified and nonaccrual loans as well as and other loan modifications.
6. Quality of the Company's loan review system, and the degree of oversight by the Company's Board of Directors.
7. Existence and effect of any concentrations of credit and changes in the level of such concentrations.
8. Effect of external factors, such as competition and legal and regulatory requirements.

Each factor is assigned a value to reflect improving, stable or declining conditions based on management's best judgment using relevant information available at the time of the evaluation.

Management evaluates individual loans in all of the loan segments (including loans in residential mortgage and consumer segments) for possible impairment if the loan is greater than \$200,000 and if the loan is either in nonaccrual status is risk rated Substandard or worse or has been modified in a troubled debt restructuring. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

Loans the terms of which are modified are classified as troubled debt restructurings if the Company grants such borrowers concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a reduction

in interest rate, a below market interest rate based on risk, or an extension of a loan's stated maturity date. Nonaccrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive months after modification. Loans classified as troubled debt restructurings are designated as impaired.

Once the determination has been made that a loan is impaired, impairment is measured by comparing the recorded investment in the loan to one of the following:(a) present value of expected cash flows (discounted at the loan's effective interest rate), (b) loan's observable market price or (c) fair value of collateral adjusted for expected selling costs. The method is selected on a loan by loan basis with management primarily utilizing the fair value of collateral method.

The estimated fair values of the real estate collateral are determined primarily through third-party appraisals. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the original appraisal and the condition of the property. Appraised values are discounted to arrive at the estimated selling price of the collateral, which is considered to be the estimated fair value. The discounts also include estimated costs to sell the property.

The estimated fair values of the non-real estate collateral, such as accounts receivable, inventory and equipment, are determined based on the borrower's financial statements, inventory reports, accounts receivable agings or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets.

The evaluation of the need and amount of the allowance for impaired loans and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

Comparison of Financial Condition at June 30, 2012 and 2011

General. Total assets were \$347.3 million at June 30, 2012, compared to \$349.5 million at June 30, 2011. The Company experienced a \$12.7 million or 5.0%, decrease in loans receivable, net, while securities held to maturity and cash and cash equivalent balances increased by \$9.0 million and \$2.8 million or 21.6% and 9.0%, respectively. Deposits decreased \$2.4 million or 0.8%, while advances from the Federal Home Loan Bank of New York remained unchanged. The increase in securities held to maturity and cash and cash equivalents was primarily due to a decrease in loan balances as a result of low demand, and tempered by a decrease in deposit balances during this period.

Total assets decreased by \$2.1 million or 0.6% between years, as did total liabilities by \$2.3 million or 0.7%, and the ratio of average interest-earning assets to average-interest bearing liabilities increased to 109.22% for fiscal 2012 as compared to 107.25% for fiscal 2011. Stockholders' equity increased \$198,000 or 0.5% to \$40.9 million at June 30, 2012 compared to \$40.7 million at June 30, 2011.

Loans. Loans receivable, net, declined \$12.8 million, or 5.0% from \$253.3 million at June 30, 2011 to \$240.5 at June 30, 2012. As a percentage of assets, loans decreased to 69.2% from 72.5%. The Company's commercial and industrial loans grew by \$767,000 or 8.2% during the year, as did deposit account loans by \$238,000 or 48.5% and personal loans by \$3,000 or 15.0%. One-to four-family residential loans decreased by \$7.5 million or 5.0%, construction loans decreased by \$3.8 million or 22.7%, and home equity loans decreased by \$1.0 million or 2.0%, as did commercial real estate loans,

automobile loans, and overdraft protection loans by \$379,000, \$42,000 and \$32,000 or 1.2%, 17.8% and 16.5%, respectively, between June 30, 2011 and June 30, 2012.

Securities. Our portfolio of securities held to maturity was at \$50.7 million at June 30, 2012 as compared to \$41.7 million at June 30, 2011. Maturities, calls and principal repayments during the year totaled \$52.6 million as compared to \$40.0 million during the prior year. We purchased \$61.6 million of new securities during the year ended June 30, 2012 compared to \$34.2 million during the year ended June 30, 2011.

Deposits. Total deposits at June 30, 2012 were \$283.8 million, a \$2.4 million decrease as compared to \$286.2 million at June 30, 2011. Demand deposits, in aggregate, increased by \$3.3 million, while savings and club accounts decreased by \$3.3 million, as did certificate of deposit accounts by \$2.4 million.

Borrowings. Total borrowings at June 30, 2012 and 2011 amounted to \$20.0 million. The Company did not make or repay any long term borrowings during 2012 and did not have short-term borrowings at June 30, 2012 and 2011.

Equity. Stockholders' equity was \$40.9 million at June 30, 2012 compared to \$40.7 million at June 30, 2011, an increase of \$198,000 or 0.5%. The \$274,000 increase in paid in capital was primarily due to compensation expense attributable to the Company's stock-based compensation plan. Other increases in equity were due to \$497,000 in net income and \$169,000 in ESOP shares earned, which were offset by the declaration of \$310,000 in cash dividends declared on our common stock, a \$423,000 increase in treasury stock due to repurchases, and an \$9,000 increase in accumulated other comprehensive loss.

Comparison of Operating Results for the Two Years Ended June 30, 2012

General. Our results of operations depend primarily on our net interest income. Net interest income is the difference between the interest income we earn on our interest-earning assets and the interest we pay on our interest-bearing liabilities. It is a function of the average balances of loans and investments versus deposits and borrowed funds outstanding in any one period and the yields earned on those loans and investments and the cost of those deposits and borrowed funds. Our results of operations are also affected by our provision for loan losses, non-interest income and non-interest expense. Non-interest income includes service fees and charges, and income on bank owned life insurance. Non-interest expense includes salaries and employee benefits, occupancy and equipment expense and other general and administrative expenses such as service bureau fees and advertising costs.

Our net income for the year ended June 30, 2012 was \$497,000, a 29.6% decrease compared to net income of \$706,000 for the year ended June 30, 2011. This decrease was the result of an increase in the provision for loan losses, a decrease in net interest income and a decrease in non-interest income, offset by a decrease in non-interest expenses and income taxes for the year ended June 30, 2012, compared to the year ended June 30, 2011.

Net Interest Income. Net interest income for the year ended June 30, 2012 amounted to \$10.5 million, 4.0% lower than net interest income for the year ended June 30, 2011 of \$10.9 million. Interest income decreased by \$1.3 million, or 8.8%, as did interest expense by \$890,000 or 21.1% for the year ended June 30, 2012.

Average earning assets decreased by \$2.9 million or 0.9% for the year ended June 30, 2012, compared to the year ended June 30, 2011, while the average rate on earning assets which decreased by 37 basis points to 4.38% for the year ended June 30, 2012, resulting in a decrease of \$1.3 million or 8.8% in total interest income compared to the year ended June 30, 2011. Interest income on loans decreased by \$1.5 million or 11.5% for the year ended June 30, 2012, compared to the year ended June 30, 2011, as did the average yield by 28 basis points to 4.75%. Average loan receivable balances decreased \$16.4 million or 6.2% to \$248.1 million for the year ended June 30, 2012, compared to \$264.5 million for the year ended June 30, 2011. Interest income on securities held to maturity increased \$215,000 or 12.5% for the year ended June 30, 2012, compared to the year ended June 30, 2011. Average securities held to maturity balances increased \$14.2 million or 30.4% for the year ended June 30, 2012, compared to the year ended June 30, 2011, and the yield on the investment held to maturity portfolio decreased by 50 basis points to 3.18% for the year ended June 30, 2012, compared to the year ended June 30, 2011. Interest income on other interest-earning assets decreased by \$18,000 or 16.8% for the year ended June 30, 2012, compared to the year ended June 30, 2011 due to an average balance decrease of \$743,000 or 10.2%, and an 11 basis point decrease in yield to 1.35%.

Total interest expense decreased \$890,000, or 21.1% for the year ended June 30, 2012, compared to the year ended June 30, 2011. Average interest-bearing liabilities decreased \$8.0 million or 2.7%, from \$296.8 million for the year ended June 30, 2011, to \$288.8 million for the year ended June 30, 2012, as did the average rate on interest-bearing liabilities which decreased by 26 basis points to 1.16% for the year ended June 30, 2012, resulting in a decrease of \$890,000 or 21.1% in total interest expense compared to the year ended June 30, 2011. Interest expense on deposits decreased \$890,000 or 25.1% for the year ended June 30, 2012, compared to the year ended June 30, 2011, as a result of a 29 basis point reduction to 0.99% in the average rate on interest-bearing deposits, and a \$8.0 million or 2.9% decrease in average interest-bearing deposits. The average balance of NOW, super NOW and money market demand account balances increased \$2.7 million or 8.6%, while the average balance of savings balances decreased \$4.9 million or 4.2%, and the average balance of certificates of deposit decreased by \$5.8 million or 4.6% for the year ended June 30, 2012 compared to the same period ended June 30, 2011. The average rate on savings and club deposits, certificates of deposit and NOW, super NOW and money market demand accounts decreased by 30 basis points, 29 basis points, and 14 basis points, respectively, for the year ended June 30, 2012 compared to the year ended June 30, 2011. Total interest expense on FHLB advances was \$684,000 for both years ended June 30, 2012 and June 30, 2011. Federal Home Loan Bank advance average balances were \$20.0 million, at an average rate of 3.42% for both years ended June 30, 2012 and June 30, 2011.

Our net interest rate spread was 3.22% for the year ended June 30, 2012 compared to 3.33% for the year ended June 30, 2011. The spread decreased during the year ended June 30, 2012 as our average yield on interest-earning assets decreased by 37 basis points to 4.38% from 4.75%, while the cost of interest-bearing liabilities also decreased by 26 basis points to 1.16% from 1.42%, compared to the same period ended June 30, 2011.

Provision for Loan Losses. The allowance for loan losses is a valuation account that reflects our estimation of the losses inherent in our loan portfolio to the extent they are both probable and reasonable to estimate. The allowance is established through provisions for loan losses that are charged to income in the period they are established. We charge losses on loans against the allowance for loan losses when we believe the collection of loan principal is unlikely. Recoveries on loans previously charged-off are added back to the allowance. The provision for the year ended June 30, 2012 was \$2.2 million as compared to \$1.7 million for the year before. The allowance for loan losses as a percentage of non-performing loans was 18.3% at June 30, 2012 compared to 13.3% at June 30, 2011 and the allowance for loan losses as a percentage of total loans was 1.24% at June 30, 2012 compared to 0.84% at June 30, 2011. While at June 30, 2012 non-performing loans increased \$383,000 from the prior year, most of these loans are adequately

collateralized by real estate. Of the \$16.8 million in non-performing loans at June 30, 2012, \$9.0 million required specific loss allowances totaling \$1,066,000.

Non-Interest Income. This category includes fees derived from checking accounts, ATM transactions and debit card use and mortgage related fees. It also includes increases in the cash-surrender value of our bank owned life insurance. Overall, non-interest income was \$662,000 for the year ended June 30, 2012 compared to \$773,000 for the year ended June 30, 2011, a decrease of \$111,000 or 14.4%.

Income from fees and service charges totaled \$341,000 for the year ended June 30, 2012 compared to \$469,000 for the year ended June 30, 2011, a reduction of \$128,000 or 27.3%. The decrease was due in part to a reduction in service fees on demand deposit accounts, including a \$78,000 investment security prepayment penalty fee that was realized in the prior year period.

The unrealized loss on the Bank's trading security portfolio was \$8,000 for the year ended June 30, 2012, compared to an unrealized gain of \$13,000 for the year ended June 30, 2011.

Income on bank owned life insurance was \$201,000 and \$196,000 for the years ended June 30, 2012 and 2011, respectively.

Other non-interest income was \$128,000 and \$95,000 for the years ended June 30, 2012 and 2011, respectively. The increase was primarily attributable to an increase in income on other real estate owned.

Non-Interest Expenses. Total non-interest expenses decreased by \$637,000 or 7.3% during the year ended June 30, 2012 and amounted to \$8.1 million and \$8.8 million for the years ended June 30, 2012 and 2011, respectively.

Other non-interest expense totaled \$920,000 for the year ended June 30, 2012, compared to \$1.3 million for the year ended June 30, 2011, a decrease of \$348,000 or 27.4%. The decrease in other non-interest expense was primarily attributable to decreases in other real estate and non-operating expenses. Occupancy and equipment expense decreased by \$225,000 or 13.6% to \$1.4 million for the year ended June 30, 2012 compared to \$1.7 million for the year ended June 30, 2011, primarily due to decreases in property taxes and other building and depreciation expenses. FDIC assessment expense totaled \$295,000 for the year ended June 30, 2012 compared to \$438,000 for the year ended June 30, 2011, a decrease of \$143,000 or 32.7%. The reduction in FDIC insurance was attributable to the revised regulatory methodology used in calculating quarterly assessments that went into effect beginning with the April 30, 2011 assessment period. Salaries and employee benefits expense totaled \$3.8 million for the year ended June 30, 2012 compared to \$3.9 million for the year ended June 30, 2011, a \$66,000 or 1.7% reduction in expense compared to the prior year. The decrease in salaries and employee benefits expense was primarily due to a reduction in the number of employees and related salary expense, which was offset by an increase in employee benefit expense, for the year ended June 30, 2012 compared to the year ended June 30, 2011. Salaries and employee benefits are our main non-interest expense and represented 46.9% and 44.2% of non-interest expenses for the years ended June 30, 2012 and 2011, respectively. Advertising expense totaled \$174,000 for the year ended June 30, 2012 compared to \$224,000 for the year ended June 30, 2011, representing a reduction of \$50,000 or 22.3%. The decrease in advertising expense was attributable to a reduction in spending. Professional service expense increased by \$82,000 or 19.0% to \$514,000, as did service bureau fees by \$57,000 or 13.8% to \$470,000 for the year ended June 30, 2012 compared to \$432,000 and \$413,000, respectively, for the year ended June 30, 2011. The increase in professional service expense was primarily related to increases in consultant and legal expenses, whereas the increase in service bureau fees was attributable to an increase in service fees. Directors' compensation increased \$56,000 or 12.2% for the year ended June 30, 2012 compared to the

year ended June 30, 2011, primarily as a result of former President/CEO, now receiving director compensation.

Income Taxes. Income tax expense for the year ended June 30, 2012 was \$283,000 as compared to \$515,000 for the year ended June 30, 2011. The effective tax rate was 36.3% for the year ended June 30, 2012 compared to 42.2% for the year ended June 30, 2011.

Edgar Filing: MSB FINANCIAL CORP. - Form 10-K

Average Balance Sheet. The following tables set forth certain information for the years ended June 30, 2012, 2011 and 2010. The average yields and costs are derived by dividing income or expense by the average daily balance of assets or liabilities, respectively, for the periods presented.

	Year Ended June 30,								
	2012			2011			2010		
	Average Balance	Interest Earned/Paid	Average Yield/Cost	Average Balance	Interest Earned/Paid	Average Yield/Cost	Average Balance	Interest Earned/Paid	Average Yield/Cost

liabilities

-
- (1) Non-accruing loans have been included, and the effect of such inclusion was not material. The allowance for loan losses is excluded, while construction loans in process and deferred fees are included.
 - (2) Includes Federal Home Loan Bank of New York stock at cost and term deposits with other financial institutions.
 - (3) Net interest rate spread represents the difference between the average yield on interest-earning assets and the average cost of interest-bearing liabilities.
 - (4) Net interest margin represents net interest income as a percentage of average interest-earning assets.

Rate/Volume Analysis. The following table reflects the sensitivity of our interest income and interest expense to changes in volume and in prevailing interest rates during the periods indicated. Each category reflects the: (1) changes in volume (changes in volume multiplied by past rate); (2) changes in rate (changes in rate multiplied by past volume); and (3) net change. The net change attributable to the combined impact of volume and rate has been allocated proportionally to the absolute dollar amounts of change in each.

Liquidity, Commitments and Capital Resources

The Bank must be capable of meeting its customer obligations at all times. Potential liquidity demands include funding loan commitments, cash withdrawals from deposit accounts and other funding needs as they present themselves. Accordingly, liquidity is measured by our ability to have sufficient cash reserves on hand, at a reasonable cost and/or with minimum losses.

Senior management is responsible for managing our overall liquidity position and risk and is responsible for ensuring that our liquidity needs are being met on both a daily and long term basis. The Financial Review Committee, comprised of senior management and chaired by President and Chief Executive Officer is responsible for establishing and reviewing our liquidity procedures, guidelines, and strategy on a periodic basis.

Our approach to managing day-to-day liquidity is measured through our daily calculation of investable funds and/or borrowing needs to ensure adequate liquidity. In addition, senior management constantly evaluates our short-term and long-term liquidity risk and strategy based on current market conditions, outside investment and/or borrowing opportunities, short and long-term economic trends, and anticipated short and long-term liquidity requirements. The Bank's loan and deposit rates may be adjusted as another means of managing short and long-term liquidity needs. We do not at present participate in derivatives or other types of hedging instruments to meet liquidity demands, as we take

a conservative approach in managing liquidity.

43

At June 30, 2012, the Bank had outstanding commitments to originate loans of \$2.7 million, unused lines of credit of \$21.8 million (including \$17.7 million for home equity lines of credit), and standby letters of credit of \$327,000. Certificates of deposit scheduled to mature in one year or less at June 30, 2012, totaled \$63.0 million.

The Bank had contractual obligations related to the long-term operating leases for the three branch locations that it leases (Dewy Meadow, RiverWalk and Martinsville). For additional information regarding the Bank's lease commitments as of June 30, 2012, see Note 10 to our consolidated financial statements beginning on page F-1.

The Bank has access to cash through borrowings from the Federal Home Loan Bank, as needed, to meet its day-to-day funding obligations. At June 30, 2012, its total loans to deposits ratio was 84.8%. At June 30, 2012, the Bank's collateralized borrowing limit with the Federal Home Loan Bank was \$78.1 million, of which \$20.0 million was outstanding. As of June 30, 2012, the Bank also had a \$20.0 million line of credit with a financial institution for reverse repurchase agreements (which is a form of borrowing) that it could access if necessary.

Consistent with its goals to operate a sound and profitable financial organization, the Bank actively seeks to maintain its status as a well-capitalized institution in accordance with regulatory standards. As of June 30, 2012, the Bank exceeded all applicable regulatory capital requirements. See Note 14 to our consolidated financial statements beginning at page F-1 for more information about the Bank's regulatory capital compliance.

Off-Balance Sheet Arrangements

We are a party to financial instruments with off-balance-sheet risk in the normal course of our business of investing in loans and securities as well as in the normal course of maintaining and improving Millington Savings Bank's facilities. These financial instruments include significant purchase commitments such as commitments to purchase investment securities or mortgage-backed securities and commitments to extend credit to meet the financing needs of our customers. At June 30, 2012, our significant off-balance sheet commitments consisted of commitments to originate loans of \$2.7 million, construction loans in process of \$2.3 million, unused lines of credit of \$21.8 million (including \$17.7 million for home equity lines of credit) and standby letters of credit of \$327,000.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Our exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit is represented by the contractual amount of those instruments. We use the same credit policies in making commitments and conditional obligations as we do for on-balance-sheet instruments. Since a number of commitments typically expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. For additional information regarding our outstanding lending commitments at June 30, 2012, see Note 15 to our consolidated financial statements beginning on page F-1.

Impact of Inflation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. These principles require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation.

Our primary assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on our performance than the effects of general levels of inflation. Interest rates, however, do not necessarily move in the same direction or with the same magnitude as the price of goods and services, since such prices are affected by inflation. In a period of rapidly rising interest rates, the liquidity and maturities of our assets and liabilities are critical to the maintenance of acceptable performance levels.

The principal effect of inflation on earnings, as distinct from levels of interest rates, is in the area of non-interest expense. Expense items such as employee compensation, employee benefits and occupancy and equipment costs may be subject to increases as a result of inflation. An additional effect of inflation is the possible increase in the dollar value of the collateral securing loans that we have made. We are unable to determine the extent, if any, to which properties securing our loans have appreciated in dollar value due to inflation.

Recent Accounting Pronouncements

Note 19 to the consolidated financial statements is incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Management of Interest Rate Risk and Market Risk

Qualitative Analysis. Because the majority of our assets and liabilities are sensitive to changes in interest rates, a significant form of market risk for us is interest rate risk, or changes in interest rates.

We derive our income mainly from the difference or "spread" between the interest earned on loans, securities and other interest-earning assets, and interest paid on deposits, borrowings and other interest-bearing liabilities. In general, the larger the spread, the more we earn. When market rates of interest change, the interest we receive on our assets and the interest we pay on our liabilities will fluctuate. This can cause decreases in our spread and can adversely affect our income.

Several years ago market interest rates were at historically low levels. Beginning in June 2004 through June 2007, the U.S. Federal Reserve increased its target federal funds rate, raising it 17 times, from 1.00% to 5.25% during this period. The Federal Reserve subsequently reduced its target federal fund rate 3 times during the fiscal year ended June 30, 2009 from 0 to 1/4%. A normalization of the prior year's inverted yield occurred during that year as a result of the Federal Reserves policy. The Federal Reserve did not make any further changes to its federal funds rate during the fiscal year-ended June 30, 2012. The federal funds rate and other short-term market interest rates, which we use as a guide to our deposit pricing, have decreased, while intermediate-and long-term market interest rates have remained stable, which we use as a guide to our loan pricing, have not decreased nor increased proportionately. The Bank has begun to realize a reduction in its deposit portfolio average rate more recently.

Quantitative Analysis. The following table presents the Bank's net portfolio value as of June 30, 2012. The Bank outsources its interest rate risk modeling and the net portfolio values (own in this table were calculated by an outside consultant, based on information provided by the Bank.

At June 30, 2012

Changes in Rates	Net Portfolio Value		Net Portfolio Value as % of Present Value of Assets		
	\$ Amount	\$ Change	% Change	Net Portfolio	Basis Point
				Value Ratio	Change
	(In thousands)				
+500 bp	19,160	(29,827)	(60.89%)	6.35%	(743bp)
+400 bp	28,868	(20,119)	(41.07%)	9.17%	(461bp)
+300 bp	36,899	(12,088)	(24.68%)	11.27%	(251bp)
+200 bp	43,982	(5,006)	(10.22%)	12.99%	(80bp)
+100 bp	47,951	(1,036)	(2.12%)	13.78%	-bp
0 bp	48,987	—	%	13.78%	-bp

(1) The -100bp and -200bp scenarios are not disclosed due to the low prevailing interest rate environment

Future interest rates or their effect on net portfolio value or net interest income are not predictable. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, prepayments, and deposit run-offs, and should not be relied upon as indicative of actual results. Certain shortcomings are inherent in this type of computation. Although certain assets and liabilities may have similar maturity or periods of repricing, they may react at different times and in different degrees to changes in the market interest rates. The interest rate on certain types of assets and liabilities, such as demand deposits and savings accounts, may fluctuate in advance of changes in market interest rates, while rates on other types of assets and liabilities may lag behind changes in market interest rates. Certain assets, such as adjustable rate mortgages, generally have features that restrict changes in interest rates on a short-term basis and over the life of the asset. In the event of a change in interest rates, prepayments and early withdrawal levels could deviate significantly from those assumed in making calculations set forth above. Additionally, an increased credit risk may result as the ability of many borrowers to service their debt may decrease in the event of an interest rate increase.

Notwithstanding the discussion above, the quantitative interest rate analysis presented above indicates that a rapid increase or decrease in interest rates would adversely affect our net interest margin and earnings.

Item 8. Financial Statements and Supplementary Data

The Company's consolidated financial statements are contained in this Annual Report on Form 10-K immediately following Item 15.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

Item 9A. Controls and Procedures

(a) Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of June 30, 2012. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective as of June 30, 2012.

(a) Internal Control Over Financial Reporting

1. Management's Annual Report on Internal Control Over Financial Reporting.

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorization of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements prepared for external purposes in accordance with generally accepted accounting principles. Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of the changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Under supervision and with the participation of management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control-Integrated Framework, management concluded that our internal control over financial reporting was effective as of June 30, 2012.

2. Report of Independent Registered Public Accounting Firm

Not applicable as the Company is a smaller reporting company.

3. Change in Internal Control over Financial Reporting

No change in the Company's internal controls over financial reporting (as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934, as amended) occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information that appears under the headings "Proposal I – Election of Directors," "Section 16(a) Beneficial Reporting Compliance" and "Corporate Governance" in the Registrant's definitive proxy statement for the Registrant's 2012 Annual Meeting of Stockholders to be filed with the Securities and Exchange Commission (the "Proxy Statement") is incorporated herein by reference.

The Company has adopted a Code of Ethics that applies to its CEO and CFO/Chief Accounting Officer. A copy of the Code of Ethics is posted on the Company's website at www.millingtonsb.com/home/investor.

Item 11. Executive Compensation

The information that appears under the headings "Executive Compensation" and "Director Compensation" in the Proxy Statement is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

- (a) Security Ownership of Certain Beneficial Owners. Information required by this item is incorporated herein by reference to the section captioned "Principal Holders of our Common Stock" in the Proxy Statement.
- (b) Security Ownership of Management. Information required by this item is incorporated herein by reference to the section captioned "Principal Holders of our Common Stock" and "Proposal I – Election of Directors" in the Proxy Statement.
- (c) Changes in Control. Management of the Company knows of no arrangements, including any pledge by any person of securities of the Company, the operation of which may at a subsequent date result in a change in control of the registrant.
- (d) Securities Authorized for Issuance Under Equity Compensation Plans. Set forth below is information as of June 30, 2012 with respect to compensation plans under which equity securities of the Registrant are authorized for issuance.

Equity Compensation Plan Information

	(A)	(B)	(C)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
MSB Financial Corp. and Subsidiaries

We have audited the accompanying consolidated statements of financial condition of MSB Financial Corp. and Subsidiaries (the “Company”) as of June 30, 2012 and 2011, and the related consolidated statements of comprehensive income, changes in stockholders’ equity, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company’s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of MSB Financial Corp. and Subsidiaries as of June 30, 2012 and 2011, and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

Note 1 – Organization and Business

MSB Financial Corp. (the “Company”) is a federally-chartered corporation organized in 2004 for the purpose of acquiring all of the capital stock that Millington Savings Bank (the “Savings Bank”) issued in its mutual holding company reorganization. The Company’s principal business is the ownership and operation of the Savings Bank.

MSB Financial, MHC (the “MHC”) is a federally-chartered mutual holding company that was formed in 2004 in connection with the mutual holding company reorganization. The MHC has not engaged in any significant business other than its ownership interest in the Company since its formation. So long as the MHC is in existence, it will at all times own a majority of the outstanding stock of the Company. At June 30, 2012, the MHC owned 60.8% of the Company’s outstanding common shares.

The Savings Bank is a New Jersey chartered stock savings bank and its deposits are insured by the Federal Deposit Insurance Corporation. The primary business of the Savings Bank is attracting retail deposits from the general public and using those deposits together with funds generated from operations, principal repayments on securities and loans and borrowed funds, for its lending and investing activities. The Savings Bank’s loan portfolio primarily consists of one-to-four family residential loans, commercial loans, and consumer loans. It also invests in U.S. government obligations and mortgage-backed securities. The Savings Bank is regulated by the New Jersey Department of Banking and Insurance and the Federal Deposit Insurance Corporation. The Board of Governors of the Federal Reserve System (the “Federal Reserve”) regulates the MHC and the Company as savings and loan holding companies.

The primary business of Millington Savings Service Corp (the “Service Corp”) was the ownership and operation of a single commercial rental property. This property was sold during the year ended June 30, 2007. Currently the Service Corp is inactive.

Note 2 - Summary of Significant Accounting Policies

Basis of Consolidated Financial Statement Presentation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries, the Savings Bank and the Savings Bank’s wholly owned subsidiary the Service Corp. All significant intercompany accounts and transactions have been eliminated in consolidation.

The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”). In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the dates of the consolidated statements of financial condition and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates.

A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses. Management believes that the allowance for loan losses is adequate. While management uses all available information to recognize losses on loans, future additions to the allowance for loan losses may be necessary based on changes in economic conditions in the Savings Bank’s market area. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Savings Bank’s allowance for loan losses. Such agencies may require the Savings Bank to recognize additions to the allowance for loan losses based on their judgments about information available to them at the time of their examinations.

The Company has evaluated events and transactions occurring subsequent to the consolidated statement of financial condition date of June 30, 2012 for items that should potentially be recognized or disclosed in these consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

F-8

Note 2 - Summary of Significant Accounting Policies (Continued)

Cash and Cash Equivalents

Cash and cash equivalents include cash and amounts due from depository institutions and interest-bearing deposits with banks with original maturities of three months or less.

Securities

Investments in debt securities that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity securities and reported at amortized cost. Debt and equity securities that are bought and held principally for the purpose of being sold in the near term are classified as trading securities and reported at fair value, with unrealized holding gains and losses included in earnings. Debt and equity securities not classified as trading securities or as held to maturity securities are classified as available for sale securities and reported at fair value, with unrealized holding gains or losses, net of applicable income taxes, reported in a separate component of stockholders' equity. The Company had no available for sale securities as of June 30, 2012 and 2011.

Individual securities are considered impaired when fair value is less than amortized cost. Management evaluates all securities with unrealized losses quarterly to determine if such impairments are "temporary" or "other-than-temporary" in accordance with applicable accounting guidance prescribed in Financial Accounting Standards Board ("FASB") ASC 320, "Investment - Debt and Equity Securities". Accordingly, the Company accounts for temporary impairments based upon security classification as either trading, available for sale or held to maturity. Temporary impairments on available for sale securities are recognized, on a tax-effected basis, through other comprehensive income (loss) with offsetting entries adjusting the carrying value of the security and the balance of deferred taxes. Temporary impairments of held to maturity securities are not recognized in the consolidated financial statements; however, information concerning the amount and duration of impairments on held to maturity securities is disclosed in the notes to the consolidated financial statements. The carrying value of securities held in the trading portfolio is adjusted to fair value through earnings on a monthly basis.

Other-than-temporary impairments on securities that the Company has decided to sell or will more likely than not be required to sell prior to the full recovery of their fair value to a level equal to or exceeding amortized cost are recognized in earnings. Otherwise, the other-than-temporary impairment is bifurcated into credit-related and noncredit-related components. The credit-related impairment generally represents the amount by which the present value of the cash flows expected to be collected on a debt security falls below its amortized cost. The noncredit-related component represents the remaining portion of the impairment not otherwise designated as credit-related. Credit-related other-than-temporary impairments are recognized in earnings while noncredit-related other-than-temporary impairments are recognized, net of deferred taxes, in other comprehensive income (loss).

The Company reviews its investment portfolio on a quarterly basis for indications of impairment. This review includes analyzing the length of time and the extent to which the fair value has been lower than the cost, and the financial condition and near-term prospects of the issuer, including any specific events which may influence the operations of the issuer. The Company also assesses its intent with regard to selling or holding each security as well as any conditions which may require the sale of security prior to the recovery of fair value to a level which equals or exceeds amortized cost.

Discounts and premiums on securities are accreted/amortized to maturity by use of the level-yield method. Gain or loss on sales of securities is based on the specific identification method.

Note 2 - Summary of Significant Accounting Policies (Continued)

Concentration of Risk

The Savings Bank's lending activities are concentrated in loans secured by real estate located in the State of New Jersey.

Loans Receivable

Loans are stated at their outstanding unpaid principal balances, net of an allowance for loan losses and any deferred fees or costs. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the yield (interest income) of the related loans. The Company is generally amortizing these amounts over the contractual life of the loan.

For all classes of loans receivable, the accrual of interest is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan is currently performing. A loan may remain on accrual status if it is in the process of collection and is well collateralized. When a loan is placed on nonaccrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against the allowance for loan losses. Interest received on nonaccrual loans including impaired loans generally is either applied against principal or reported as interest income, according to management's judgment as to the collectability of principal. Generally, loans are restored to accrual status when the obligation is brought current, has performed in accordance with the contractual terms for a reasonable period of time (generally six months) and the ultimate collectability of the total contractual principal and interest amount is no longer in doubt. The past due status of all classes of loans receivable is determined based on contractual due dates for loan payments.

Allowance for Credit Losses

The allowance for credit losses consists of the allowance for loan losses and the reserve for unfunded credit commitments. The allowance for loan losses represents management's estimate of losses inherent in the loan portfolio as of the balance sheet date and is recorded as a reduction to loans. The reserve for unfunded lending commitments totaling \$30,000 and \$40,000 at June 30, 2012 and 2011, respectively, represents management's estimate of losses inherent in unfunded loan commitments and is recorded in other liabilities on the consolidated statement of financial condition. The allowance for loan losses is increased by the provision for loan losses, and decreased by charge-offs, net of recoveries. All, or part, of the principal balance of loans receivable that are deemed uncollectible are charged against the allowance for loan losses when management determines that the repayment of that amount is highly unlikely. Any subsequent recoveries are credited to the allowance for loan losses. Non-residential consumer loans are generally charged off no later than 120 days past due on a contractual basis, earlier in the event of bankruptcy, or if there is an amount deemed uncollectible.

The allowance for loan losses is maintained at a level considered adequate to provide for losses that can be reasonably anticipated. Management performs a quarterly evaluation of the adequacy of the allowance. The allowance is based on the Company's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions and other relevant factors. This evaluation is inherently subjective as it requires material estimates that may be susceptible to significant revision as more information becomes available.

The allowance calculation methodology includes segregation of the total loan portfolio into segments. The Company's loans receivable portfolio is comprised of the following segments: residential mortgage, commercial real estate,

construction, consumer and, commercial and industrial. Some segments of the Company's loan receivable portfolio are further disaggregated into classes which allows management to better monitor risk and performance.

F-10

Note 2 - Summary of Significant Accounting Policies (Continued)

The residential mortgage loan segment is disaggregated into two classes: one-to four-family loans, which are primarily first liens, and home equity loans, which consist of first and second liens. The commercial real estate loan segment consists of both owner-and non-owner-occupied loans which have medium risk due to historical activity on these type loans. The construction loan segment is further disaggregated into two classes: one-to-four family owner occupied, which includes land loans, whereby the owner is known and there is less risk, and other, whereby the property is generally under development and tends to have more risk than the one-to-four family owner occupied loans. The commercial and industrial loan segment consists of loans made for the purpose of financing the activities of commercial customers. The majority of commercial and industrial loans are secured by real estate and thus carry a lower risk than traditional commercial and industrial loans. The consumer loan segment consists primarily of installment loans and overdraft lines of credit connected with customer deposit accounts.

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are classified as impaired. For loans that are classified as impaired, an allowance is established when the discounted cash flows (or collateral value or observable market price of the impaired loan) is lower than the carrying value of that loan. The general component covers pools of loans by loan class. These pools of loans are evaluated for loss exposure based upon historical loss rates for each of these classes of loans, adjusted for qualitative factors. These qualitative risk factors include:

1. Lending policies and procedures, including underwriting standards and collection, charge-off, and recovery practices.
2. National, regional, and local economic and business conditions as well as the condition of various market segments, including the value of underlying collateral for collateral dependent loans.
3. Nature and volume of the portfolio and terms of loans.
4. Experience, ability, and depth of lending management and staff.
5. Volume and severity of past due, classified and nonaccrual loans as well as and other loan modifications.
6. Quality of the Company's loan review system, and the degree of oversight by the Company's Board of Directors.
7. Existence and effect of any concentrations of credit and changes in the level of such concentrations.
8. Effect of external factors, such as competition and legal and regulatory requirements.

Each factor is assigned a value to reflect improving, stable or declining conditions based on management's best judgment using relevant information available at the time of the evaluation.

An unallocated component is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

Management evaluates individual loans in all of the loan segments (including loans in residential mortgage and consumer segments) for possible impairment if the loan is either in nonaccrual status, risk rated Substandard or worse or has been modified in a troubled debt restructuring. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally

are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed.

F-11

Note 2 - Summary of Significant Accounting Policies (Continued)

Loans the terms of which are modified are classified as troubled debt restructurings if the Company grants such borrowers concessions and it is deemed that those borrowers are experiencing financial difficulty. Concessions granted under a troubled debt restructuring generally involve a reduction in interest rate, below market rate, or an extension of a loan's stated maturity date or a non-interest bearing deficiency note. Nonaccrual troubled debt restructurings are restored to accrual status if principal and interest payments, under the modified terms, are current for six consecutive months after modification. Loans classified as troubled debt restructurings are designated as impaired.

Once the determination has been made that a loan is impaired, impairment is measured by comparing the recorded investment in the loan to one of the following:(a) present value of expected cash flows (discounted at the loan's effective interest rate), (b) loan's observable market price or (c) fair value of collateral adjusted for expected selling costs. The method is selected on a loan by loan basis with management primarily utilizing the fair value of collateral method.

The estimated fair values of the real estate collateral are determined primarily through third-party appraisals. When a real estate secured loan becomes impaired, a decision is made regarding whether an updated certified appraisal of the real estate is necessary. This decision is based on various considerations, including the age of the most recent appraisal, the loan-to-value ratio based on the original appraisal and the condition of the property. Appraised values are discounted to arrive at the estimated selling price of the collateral, which is considered to be the estimated fair value. The discounts also include estimated costs to sell the property.

The estimated fair values of the non-real estate collateral, such as accounts receivable, inventory and equipment, are determined based on the borrower's financial statements, inventory reports, accounts receivable agings or equipment appraisals or invoices. Indications of value from these sources are generally discounted based on the age of the financial information or the quality of the assets.

The evaluation of the need and amount of the specific allowance for impaired loans and whether a loan can be removed from impairment status is made on a quarterly basis. The Company's policy for recognizing interest income on impaired loans does not differ from its overall policy for interest recognition.

Other Real Estate Owned

Other real estate owned represents real estate acquired through formal foreclosure or by taking possession of the real estate and is initially recorded at the lower of cost or fair value, less estimated selling costs. Write-downs required at the time of acquisition are charged to the allowance for loan losses establishing a new cost basis. Thereafter, the Company maintains an allowance for decreases in the properties' estimated fair value, through charges to earnings. Such charges are included in other non-interest expense along with any additional property maintenance.

Premises and Equipment

Premises and equipment are comprised of land, at cost, and buildings, building improvements, furnishings and equipment and leasehold improvements, at cost, less accumulated depreciation and amortization. Depreciation and amortization charges are computed on the straight-line method over the following estimated useful lives:

Years
5 - 50

Building and improvements	
Furnishings and equipment	3 – 7
Leasehold improvements	Shorter of useful life or term of lease

F-12

Note 2 - Summary of Significant Accounting Policies (Continued)

Significant renewals and betterments are capitalized to the premises and equipment account. Maintenance and repairs are charged to operations in the year incurred. Rental income is netted against occupancy costs in the consolidated statements of income.

Federal Home Loan Bank Stock

Federal law requires a member institution of the Federal Home Loan Bank (“FHLB”) system to hold restricted stock of its district’s Federal Home Loan Bank according to a predetermined formula based on advances available and outstanding. The restricted stock is carried at cost. Management’s determination of whether these shares are impaired is based on an assessment of the ultimate recoverability of its cost rather than by recognizing temporary declines in value. The determination of whether a decline affects the ultimate recoverability of cost is influenced by criteria such as (1) the significance of the decline in net assets of the FHLB as compared to the capital stock amount for the FHLB and the length of time this situation has persisted, (2) commitments by the FHLB to make payments required by law or regulation and the level of such payments in relation to the operating performance of the FHLB, and (3) the impact of legislative and regulatory changes on institutions and, accordingly, on the customer base of the FHLB.

Management believes no impairment charge was necessary related to the FHLB restricted stock during 2012 or 2011.

Bank Owned Life Insurance

Bank owned life insurance is carried at net cash surrender value. The change in the net cash surrender value is recorded as a component of non-interest income.

Defined Benefit Plans

In accordance with applicable guidance prescribed in FASB ASC 715, “Compensation – Retirement Benefits”, the Company recognizes the over-funded or under-funded status of a defined benefit postretirement plan as an asset or liability in the consolidated statement of financial condition, with changes in the funded status recorded through other comprehensive income (loss) in the year in which those changes occur. The funded status of the plan is calculated using actuarial concepts which involve making assumptions regarding discount rate, mortality, expected rate of compensation increases and others.

Stock-based Compensation Plans

In accordance with FASB ASC 718, “Compensation – Stock Compensation”, the Company recognizes compensation expense for the total the fair value of all share-based compensation awards granted over the requisite service periods. In addition, ASC 718 requires that cash flow activity be reported on a financing rather than an operating cash flow basis for the benefits, if any, of realized tax deductions in excess of previously recognized tax benefits on compensation expense.

Advertising

The Company expenses advertising and marketing costs as incurred.

Income Taxes

The Company and its subsidiaries file a consolidated federal income tax return with the MHC. Federal income taxes are allocated based on the contribution of their respective income or loss to the consolidated income tax return. Separate state income tax returns are filed.

Federal and state income taxes have been provided in these consolidated financial statements on the basis of reported income. The amounts reflected on the income tax returns differ from these provisions due principally to temporary differences in the reporting of certain items of income and expense for financial reporting and

Note 2 - Summary of Significant Accounting Policies (Continued)

income tax reporting purposes. Deferred income taxes are recorded to recognize such temporary differences.

The Company follows the provisions of FASB ASC 740, "Income Taxes", formerly FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes ("FIN48"). ASC 740 prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return, and also provides guidance on derecognizing, classification, interest and penalties, accounting in interim periods, disclosure and transition. As a result of the Company's evaluation under ASC 740, no significant income tax uncertainties have been identified. Therefore, the Company recognized no adjustment for unrecognized income tax benefits for the years ended June 30, 2012 and 2011. The Company's policy is to recognize interest and penalties on unrecognized tax benefits in income tax expense in the consolidated statement of income. The Company did not recognize any interest and penalties for the years ended June 30, 2012 and 2011. The tax years subject to examination by the taxing authorities are the years ended June 30, 2011, 2010, and 2009.

Off-Balance Sheet Credit-Related Financial Instruments

In the ordinary course of business, the Company enters into commitments to extend credit, including commitments under lines of credit. Such financial instruments are recorded when they are funded.

Earnings per Share

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding, exclusive of the Employee Stock Ownership Plan ("ESOP") shares not yet committed to be released. Diluted earnings per share is calculated by adjusting the weighted average number of shares of common stock outstanding to include the effect of contracts or securities exercisable (such as stock options) or which could be converted into common stock, if dilutive, using the treasury stock method. Diluted earnings per share did not differ from basic earnings per share for the years ended June 30, 2012 and 2011, as the 275,410 weighted average number of outstanding stock options for the years ended June 30, 2012 and 2011, were all anti-dilutive.

Other Comprehensive Income (Loss)

Other comprehensive income (loss) includes benefit plans amounts recognized under ASC 715, "Comprehensive-Retirement Benefits". This item of other comprehensive income (loss) reflects, net of tax, prior service costs and unrealized net losses that had not been recognized in the consolidated financial statements prior to the implementation of ASC 715 along with actuarial losses arising during the current period.

Interest Rate Risk

The Savings Bank is principally engaged in the business of attracting deposits from the general public and using these deposits, together with other funds, to purchase securities and to make loans primarily secured by real estate. The potential for interest-rate risk exists as a result of the generally shorter duration of the Savings Bank's interest-sensitive liabilities compared to the generally longer duration of its interest-sensitive assets. In a rising rate environment, liabilities will generally reprice faster than assets, thereby reducing net interest income. For this reason, management regularly monitors the maturity structure of the Savings Bank's assets and liabilities in order to measure its level of interest-rate risk and to plan for future volatility.

Note 3 - Stock Offering and Stock Repurchase Program

A Registration Statement on Form S-1 (File No. 333-137294), as amended, was filed by the Company with the Securities and Exchange Commission pursuant to the Securities Act of 1933, as amended, relating to the offer for sale of up to 2,199,375 shares (subject to increase to 2,529,281 shares) of its common stock at \$10.00 per share. The offering closed on January 4, 2007 and 2,529,281 shares were sold for gross proceeds of \$25,292,810, including 202,342 shares sold to the Savings Bank's newly established ESOP. Net proceeds of the offering totaled approximately \$24.5 million. Concurrent with the closing of the offering, the MHC received 3,091,344 shares of Company common stock in exchange for the 10,000 shares previously owned. At June 30, 2012, the MHC is the majority stockholder of the Company owning 60.8% of the Company's outstanding common stock. Prior to January 4, 2007, the MHC owned 100% of the Company's outstanding 10,000 shares of common stock.

On January 29, 2008, the Board of Directors authorized a stock repurchase program pursuant to which the Company intended to repurchase up to 5% of its outstanding shares (excluding shares held by the MHC), representing up to 126,464 shares. During the year ended June 30, 2008, the Company purchased 55,992 shares under this program at a cost of \$609,000 or approximately \$10.88 per share. The remaining 70,472 shares under this program were repurchased during the year ended June 30, 2009.

On August 21, 2008, the Company announced that the Board of Directors had authorized a second stock repurchase program pursuant to which the Company intended to repurchase up to an additional 5%, or 120,140 shares. The Company repurchased all 120,140 shares authorized under this repurchase program during the year ended June 30, 2009.

On February 9, 2009, the Board of Directors authorized a third stock repurchase program pursuant to which the Company intended to repurchase up to 114,134 shares or approximately 5% of its outstanding shares. The Company repurchased 63,100 shares authorized under this repurchase program during the year ended June 30, 2009.

On August 17, 2009, the Company announced that the Board of Directors had authorized a fourth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the third stock repurchase program which had expired on August 10, 2009. During the year ended June 30, 2010, the Company repurchased 51,034 shares authorized under this repurchase program at a cost of \$460,000 or \$9.01 per share.

On March 12, 2010, the Company announced that the Board of Directors had authorized a fifth stock repurchase program pursuant to which the Company intended to repurchase up to an additional 5%, or 108,427 shares. During the years ended June 30, 2010 and 2011, the Company repurchased 76,419 and 3,300 shares authorized under this repurchase program at a cost of \$637,000 or \$7.99 per share, respectively.

On October 12, 2010, the Company announced that the Board of Directors had authorized a sixth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the fifth stock repurchase program (28,708 shares). As of December 31, 2010, the date of this program's expiration, the Company repurchased 6,065 shares authorized under this repurchase program at a cost of \$37,000 or \$6.06 per share.

On March 3, 2011, the Company announced that the Board of Directors had authorized a seventh repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the sixth stock repurchase program which expired on December 31, 2010 (22,643 shares). As of June 30, 2011, the Company repurchased 7,600 shares authorized under this repurchase program at a cost of \$44,000 or \$5.74 per share.

Note 3 - Stock Offering and Stock Repurchase Program (Continued)

On June 20, 2011, the Company announced that the Board of Directors had authorized an eighth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the seventh stock repurchase program (15,043 shares). During the first quarter of fiscal 2012, the Company repurchased 1,699 shares authorized under the seventh repurchase program at a cost of \$9,000 or \$5.50 per share.

On September 12, 2011, the Company announced that the Board of Directors had authorized a ninth stock repurchase program pursuant to which the Company intended to repurchase the balance of shares that were still outstanding from the eighth stock repurchase program (13,344 shares). The Company repurchased these shares during the second quarter of 2012 at a cost of \$67,000 or \$5.05 per share.

On November 9, 2011, the Company announced that the Board of Directors had authorized a tenth stock repurchase program pursuant to which the Company intended to repurchase up to an additional 5% of the Company's outstanding shares, or 103,005 shares. As of March 31, 2012, the Company repurchased 64,668 shares authorized under the tenth repurchase program at a cost of \$337,000 or \$5.21 per share. During the nine months ended March 31, 2012, an aggregate of 79,711 shares were repurchased under the aforementioned plans at a cost of \$414,000 or \$5.19 per share.

On March 12, 2012, the Company announced that the Board of Directors had authorized an eleventh repurchase program pursuant to which the Company intends to repurchase the balance of shares that were still outstanding from the tenth stock repurchase program (38,837 shares). As of June 30, 2012, the Company repurchased 2,000 shares authorized under this repurchase program at a cost of \$12,000 or \$5.81 per share.

On June 18, 2012, the Company announced the Board of Directors had authorized a twelfth repurchase program pursuant to which the Company intends to repurchase the balance of shares that were still outstanding from the eleventh stock repurchase program. Under this program, the Company intends to repurchase up to 36,837 shares. On August 21, 2012, the Company repurchased the remaining 36,837 shares authorized under this repurchase program at a cost of \$217,000 or \$5.89 per share.

During the twelve months ended June 30 2012, an aggregate of 81,211 shares were repurchased under the aforementioned programs at a cost of \$423,000 or \$5.20 per share.

The MHC waived its right, upon the non-objection of the Office of Thrift Supervision, to receive cash dividends declared on the 3,091,344 shares of Company common stock that it owned through the nine month period ended March 31, 2012. The MHC did receive \$93,000 in cash dividends on the 3,091,344 shares that it owned during the quarter ended June 30, 2012, as the Company's new regulator (the Federal Reserve) suspended the previous dividend waiver program. During the year ended June 30, 2012, the MHC waived its right to receive dividends declared by the Company totaling approximately \$278,000.

Note 4 - Securities Held to Maturity

The amortized cost of securities held to maturity and their estimated fair values are summarized as follows:

	Amortized Cost	Gross Unrealized Gains (In thousands)	Gross Unrealized Losses	Fair Value
June 30, 2012:				
U.S. Government agencies	\$ 37,018	\$ 428	\$ 1	\$ 37,445
Mortgage-backed securities	10,120	456	32	10,544
Corporate bonds	2,143	—	16	2,127
Certificates of deposits	1,425	2	3	1,424
	\$ 50,706	\$ 886	\$ 52	\$ 51,540
June 30, 2011:				
U.S. Government agencies	\$ 40,266	\$ 200	\$ 387	\$ 40,079
Mortgage-backed securities	1,427	96	—	1,523
	\$ 41,693	\$ 296	\$ 387	\$ 41,602

All mortgage-backed securities at June 30, 2012 and 2011 have been issued by FNMA, FHLMC or GNMA and are secured by 1-4 family residential real estate.

The amortized cost and estimated fair value of securities held to maturity at June 30, 2012, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	(In thousands)	
U.S. Government agencies:		
Due after one year through five years	\$ 3,000	\$ 3,006
Due after five years through ten years	1,017	1,000
Due thereafter	33,001	33,439
	37,018	37,445
Mortgage-backed securities	10,120	10,544
Corporate Bonds		
Due after one year through five years	1,528	1,519
Due after five years through ten years	615	608
	2,143	2,127
Certificates of Deposits		
Due after one year through five years	1,180	1,179
Due after five years through ten years	245	245
	1,425	1,424

\$ 50,706 \$ 51,540

There were no sales of securities held to maturity during the years ended June 30, 2012 and 2011. At June 30, 2012 and 2011, securities held to maturity with a fair value of approximately \$825,000 and \$1,094,000, respectively, were pledged to secure public funds on deposit.

F-17

Note 4 - Securities Held to Maturity (Continued)

The following table provides the gross unrealized losses and fair value of securities in an unrealized loss position, by the length of time that such securities have been in a continuous unrealized loss position:

	Less than 12 Months		More than 12 Months		Total	
	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses	Fair Value	Gross Unrealized Losses
(In thousands)						
June 30, 2012:						
U.S. Government agencies	\$2,000	\$1	\$—	\$—	\$2,000	\$1
Mortgage-backed securities	4,030	32	—	—	4,030	32
Corporate bonds	2,127	16	—	—	2,127	16
Certificates of deposits	442	3	—	—	442	3
	\$8,599	\$52	\$—	\$—	\$8,599	\$52
June 30, 2011:						
U.S. Government agencies	\$29,859	\$387	\$—	\$—	\$29,859	\$387

At June 30, 2012, management concluded that the unrealized losses above (which related to two U.S. Government agency bonds, two mortgage-backed securities, four corporate bonds and two certificates of deposit compared to one U.S. Government agency bond, as of June 30, 2011) are temporary in nature since they are not related to the underlying credit quality of the issuer. The Company does not intend to sell these securities and it is not more-likely-than-not that the Company would be required to sell these securities prior to the full recovery of fair value to a level which equals or exceeds amortized cost. The losses above are primarily related to market interest rates.

Note 5 - Loans Receivable and Allowance for Loan Losses

The composition of total loans receivable at June 30, 2012 and 2011 is as follows:

	2012	2011
	(In thousands)	
Residential mortgage:		
One-to-four family	\$ 141,927	\$ 149,399
Home equity	49,224	50,240
	191,151	199,639
Commercial real estate	32,181	32,559
Construction	11,669	16,633
Commercial and industrial	10,092	9,325
	53,942	58,517
Consumer:		
Deposit accounts	728	491
Automobile	194	236
Personal	23	20
Overdraft protection	162	194
	1,107	941
Total Loans Receivable	246,200	259,097
Loans in process	(2,261)	(3,452)
Deferred loan fees	(354)	(224)
	\$ 243,585	\$ 255,421

At June 30, 2012 and 2011, the Company had loans in the amount of \$26.1 million and \$15.3 million, respectively, that were considered to be impaired. At June 30, 2012 and 2011, \$9.0 million and \$3.6 million of the loans deemed impaired were subject to specific allowances totaling \$1.1 million and \$685,000, respectively. The average balances of impaired loans outstanding during the years ended June 30, 2012 and 2011 were \$24.4 million and \$15.3 million, respectively. Interest income recorded on impaired loans during the years ended June 30, 2012 and 2011 was \$774,000 and \$382,000, respectively. During the years ended June 30, 2012 and 2011, \$3.8 million and \$3.1 million of loans were modified in troubled debt restructurings.

Note 5 - Loans Receivable and Allowance for Loan Losses (Continued)

The following tables present impaired loans by class, segregated by those for which a related allowance was required and those for which a related allowance was not necessary as of June 30, 2012 and 2011. The average recorded investment and interest income recognized is presented for the year ended June 30, 2012.

	June 30, 2012			Year Ended June 30, 2012	
	Recorded Investment	Unpaid Principal Balance	Related Allowance (In thousands)	Average Recorded Investment	Interest Income Recognized
With no related allowance recorded:					
Residential mortgage					
One-to-four family	\$10,622	\$10,980	\$-	\$9,824	\$347
Home equity	2,933	3,071	-	2,503	137

Credit Quality Indicators

Management uses an eight point internal risk rating system to monitor the credit quality of the loans in the Company's commercial real estate, construction and commercial and industrial loan segments. The borrower's overall financial condition, repayment sources, guarantors and value of collateral, if appropriate, are evaluated annually or when credit deficiencies, such as delinquent loan payments, arise. The criticized rating categories utilized by management generally follow bank regulatory definitions. The first six risk rating categories are considered not criticized, and are aggregated as "Pass" rated. The "Special Mention" category includes assets that are currently protected, but are potentially weak, resulting in increased credit risk and deserving management's close attention. If uncorrected, the potential weaknesses may result in deterioration of the repayment prospects. Loans classified "Substandard" have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt and have a distinct possibility that some loss will be sustained if the weaknesses are not corrected. They include loans that are inadequately protected by the current sound net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans classified "Doubtful" have all the weaknesses inherent in loans classified "Substandard" with the added characteristic that collection or liquidation in full, on the basis of current conditions and facts, is highly improbable. Loans classified as a "Loss" are considered uncollectible and subsequently charged off.

Note 5 - Loans Receivable and Allowance for Loan Losses (Continued)

The following table presents the classes of the loans receivable portfolio summarized by the aggregate "Pass" and the criticized categories of "Special Mention", "Substandard", "Doubtful" and "Loss" within the internal risk rating system as of June 30, 2012 and 2011:

As of June 30, 2012	Pass	Special Mention	Substandard	Doubtful	Loss	Total
	(In thousands)					
Commercial real estate Construction	\$ 26,610	\$ 2,861	\$ 1,355	\$ 1,262	\$ 41	\$ 32,129
One-to-four family owner occupied	1,774	1,793	225	-	147	3,939
Other	3,322	1,150	-	791	190	5,453
Commercial and Industrial	8,767	68	207	874	153	10,069
Total	\$ 40,473	\$ 5,872	\$ 1,787	\$ 2,927	\$ 531	\$ 51,590

As of June 30, 2011	Pass	Special Mention	Substandard	Doubtful	Loss	Total
	(In thousands)					
Commercial real estate Construction	\$ 28,017	\$ 900	\$ 3,144	\$ 474	\$ -	\$ 32,535
One-to-four family owner occupied	7,113	-	-	-	-	7,113
Other	306	-	4,726	704	323	6,059
Commercial and Industrial	8,220	327	264	401	99	9,311
Total	\$ 43,656	\$ 1,227	\$ 8,134	\$ 1,579	\$ 422	\$ 55,018

Management further monitors the performance and credit quality of the loan receivable portfolio by analyzing the age of the portfolio as determined by the length of time a recorded payment is past due. Loans on which the accrual of interest has been discontinued amounted to \$14,585,000 and \$14,070,000 at June 30, 2012 and 2011, respectively. During the years ended June 30, 2012 and 2011, \$292,000 and \$308,000, respectively, in interest was collected and recognized on these loans. During the years ended June 30, 2012 and 2011, had all such loans been performing in accordance with their original terms, interest income of \$813,000 and \$843,000, respectively, would have been recognized.

The Company is committed to lending approximately \$175,000 in additional funds on two of the non-accrual loans which will be used to make improvements to the properties which are intended to increase the value of the properties. At June 30, 2012 and 2011, the Savings Bank had loans which were ninety days or more delinquent and still accruing interest of \$2.2 million and \$2.3 million, respectively. Such loans were considered to be well collateralized and in the process of collection. The following table represents the classes of the loans receivable portfolio summarized by aging categories of performing loans and non-accrual loans as of June 30, 2012 and 2011:

Note 5 - Loans Receivable and Allowance for Loan Losses (Continued)

Note 5 - Loans Receivable and Allowance for Loan Losses (Continued)

Federal regulatory agencies, as an integral part of their examination process, periodically review the Savings Bank's allowance for loan losses and may require the Savings Bank to recognize additions to the allowance based on their judgments about information available to them at the time of their examination, which may not be currently available to management. Based on management's comprehensive analysis of the loan portfolio, management believes the current level of the allowance for loan losses is adequate.

The following table presents changes in the allowance for loan losses for the years ended June 30, 2012 and 2011:

	Year Ended June 30, 2012							Total
	Residential Mortgage	Commercial Real Estate	Construction	Commercial and Industrial	Consumer	Unallocated		
	(In Thousands)							
Allowance for loan losses:								
Balance, beginning	\$ 1,130	\$ 303	\$ 514	\$ 211	\$ 12	\$ -	\$ -	\$ 2,170

Note 5 - Loans Receivable and Allowance for Loan Losses (Continued)

Troubled Debt Restructurings

The recorded investment balance of TDRs totaled \$15.4 million and \$15.5 million at June 30, 2012 and June 30, 2011, respectively. The majority of the Savings Bank's TDRs are on accrual status. TDRs on accrual status were \$8.3 million and \$12.3 million at June 30, 2012 and June 30, 2011, while TDRs on non-accrual status were \$7.1 million and \$3.2 million at these respective dates. At June 30, 2012 and June 30, 2011, the allowance for loan losses included specific reserves of \$234,000 and \$145,000, respectively, related to TDRs.

The following table summarizes by class loans modified in TDRs during the year ended June 30, 2012. The Company had eight loans modified in TDRs during the year ended June 30, 2012. Two of these loans were restructured as interest only for a one year period and another, for a two year period. Two of these loans were re-amortized to extend the maturities, one over thirty years and the other over forty years. Two loans were given lower rates; one loan received a reduced rate for six months and the other loan was switched from a thirty year fixed product into an adjustable rate mortgage. For both of these loans, the payments will be applied towards principal, interest and escrow. The last loan was restructured by capitalizing past due amounts and granting a lower rate.

	Number of Contracts	Year Ended June 30, 2012	
		Pre-Modification Outstanding Recorded Investments	Post-Modification Outstanding Recorded Investments
(In thousands)			
Residential Mortgage			
One-to-four family	8	\$ 3,809	\$ 3,806
Total	8	\$ 3,809	\$ 3,860

During the year June 30, 2011, \$3.1 million of loans were modified in a TDR.

The following table summarizes loans modified in TDRs during the previous 12 months and for which there was a subsequent payment default during the year ended June 30, 2012. A loan is considered to be in payment default once it is 90 days contractually past due under the modified terms.

	Number of Contracts	Year Ended June 30, 2012	
		Pre-Modification Outstanding Recorded Investments	Post-Modification Outstanding Recorded Investments
(In thousands)			
Residential Mortgage			
One-to-four family	2	\$ 1,107	\$ 1,031
Home equity	1	170	170
Commercial and industrial	1	205	205
Total	4	\$ 1,482	\$ 1,406

Note 6 - Premises and Equipment

The components of premises and equipment at June 30, 2012 and 2011 are as follows:

	2012	2011
	(In thousands)	
Land	\$ 1,937	\$ 1,937
Buildings and improvements	8,454	8,430
Leasehold improvements	1,780	1,780
Furnishings and equipment	1,850	1,839
Assets being developed for future use	12	16
	14,033	14,002
Accumulated depreciation and amortization	(4,633)	(4,164)
	\$ 9,400	\$ 9,838

Note 7 - Accrued Interest Receivable

The components of interest receivable at June 30, 2012 and 2011 are as follows:

	2012	2011
	(In thousands)	
Loans	\$ 993	\$ 1,102
Securities held to maturity	348	232
	\$ 1,341	\$ 1,334

Note 8 - Deposits

Deposits at June 30, 2012 and 2011 consist of the following classifications:

	2012		2011	
	Amount	Average Rate (Dollars in thousands)	Amount	Average Rate
Non-interest bearing demand	\$ 17,251	—%	\$ 17,494	—%
NOW	31,351	0.17	28,829	0.21
Super NOW	2,516	0.25	1,959	0.35
Savings and club	110,481	0.27	113,733	0.46
Money market demand	2,543	0.28	2,096	0.38
Certificates of deposit	119,656	1.60	122,064	1.94
	\$ 283,798	0.80%	\$ 286,175	1.04%

A summary of certificates of deposit by maturity at June 30, 2012 is as follows (in thousands):

Year ended June 30:	
2013	\$ 62,976
2014	25,199
2015	13,574
2016	8,601
2017	5,251
Thereafter	4,055
	\$ 119,656

The aggregate amount of certificates of deposit with a minimum denomination of \$100,000 was \$48,972,000 and \$51,842,000 at June 30, 2012 and 2011, respectively. Generally, deposits in excess of \$250,000 are not insured by the FDIC.

A summary of interest expense on deposits for the years ended June 30, 2011 and 2010 is as follows:

	2012	2011
	(In thousands)	
NOW, super NOW and money market demand	\$ 60	\$ 100
Savings and club	417	794
Certificates of deposit	2,175	2,648
	\$ 2,652	\$ 3,542

Note 9 - Borrowings

The Company participates in the Federal Home Loan Bank of New York (the "FHLB of NY") Overnight Advance Program. Advances under this program allow the Company to borrow up to the balance of its qualifying mortgage

loans that have been pledged as collateral, less any related outstanding indebtedness. As of June 30, 2012 and 2011, the Company had \$78.1 million and \$87.9 million, respectively, available for borrowing under this agreement. The Company did not have any overnight borrowings with the FHLB of NY as of June 30, 2012 and 2011.

F-28

Note 9 – Borrowings (Continued)

Term advances due to the FHLB of NY at June 30, 2012 and 2011 consisted of the following:

Maturity	Fixed Interest Rate		2012	2011
			(Dollars in thousands)	
November 27, 2017	3.272	%	\$ 10,000	\$ 10,000
March 05, 2018	3.460		10,000	10,000
	3.366	%	\$ 20,000	20,000

The advances are secured by a blanket assignment of unpledged and qualifying mortgage loans.

As of June 30, 2012, the Bank also had a \$20.0 million line of credit with a financial institution for reverse repurchase agreements that it could access if necessary. There were no amounts outstanding on the line at June 30, 2012 and 2011.

Note 10 - Lease Commitments and Total Rental Expense

The Company leases three branch locations under long-term operating leases. Future minimum lease payments by year and in the aggregate, under noncancellable operating leases with initial or remaining terms of one year or more, consisted of the following at June 30, 2012 (in thousands):

Year Ended June 30:		
2013		\$ 407
2014		349
2015		233
2016		233
2017		249
Thereafter		601
		\$ 2,072

The total rental expense for all leases for the years ended June 30, 2012 and 2011 was approximately \$411,000 and \$401,000, respectively.

Note 11 - Income Taxes

The income tax provision consists of the following for the years ended June 30, 2012 and 2011:

	2012	2011
	(In thousands)	
Current expense:		
Federal	\$ 603	\$ 316
State	182	115
	785	431
Deferred (benefit) expense:		
Federal	(391)	69
State	(111)	15
	(502)	84
	\$ 283	\$ 515

A reconciliation of the statutory federal income tax at a rate of 34% to the income tax expense included in the statements of income at June 30, 2012 and 2011, is as follows:

	2012		2011	
	Amount	% of Pretax Income	Amount	% of Pretax Income
	(Dollars in thousands)			
Federal income tax at statutory rate	\$ 266	34.0%	\$ 415	34.0%
State tax, net of federal benefit	47	6.0	70	5.7
Bank Owned Life Insurance	(69)	(8.8)	(66)	(5.5)
Stock options	63	8.1	58	4.8
Other	(24)	(3.1)	38	3.1
	\$ 283	36.2%	\$ 515	42.1%

The components of the deferred tax asset at June 30, 2012 and 2011 are as follows:

	2012	2011
	(In thousands)	
Deferred tax assets:		
Allowances for losses on loans and commitments	\$ 1,236	\$ 883
Uncollected interest	460	403
Benefit plans	944	870

Edgar Filing: MSB FINANCIAL CORP. - Form 10-K

FDIC insurance assessment	72	72
Other	33	31
	2,745	2,259
Deferred tax liabilities		
Depreciation	(110)	(132)
Net deferred tax asset	\$ 2,635	2,127

F-30

Note 11 - Income Taxes (Continued)

Retained earnings include \$1,466,000 at June 30, 2012 and 2011, for which no provision for income tax has been made. These amounts represent deductions for bad debt reserves for tax purposes which were only allowed to savings institutions which met certain definitional tests prescribed by the Internal Revenue Code of 1986, as amended. The Small Business Job Protection Act of 1996 (the "Act") eliminated the special bad debt deduction granted solely to thrifts. Under the terms of the Act, there would be no recapture of the pre-1988 (base year) reserves. However, these pre-1988 reserves would be subject to recapture under the rules of the Internal Revenue Code if the Savings Bank itself pays a cash dividend in excess of earnings and profits, or liquidates. The Act also provides for the recapture of deductions arising from the "applicable excess reserve" defined as the total amount of reserve over the base year reserve. The Savings Bank's total reserve exceeds the base year reserve and deferred taxes have been provided for this excess.

Note 12 - Benefit Plans

Directors' Retirement Plan

The Savings Bank has a Directors' Retirement Plan, which provides that any director meeting specified age and service requirements may retire and continue to be paid. This plan is unfunded.

The following table sets forth the accumulated benefit obligation, the changes in plan's projected benefit obligation and the plan's funded status as of and for the years ended June 30, 2012 and 2011:

	2012	2011
	(Dollars in thousands)	
Accumulated benefit obligation – ending	\$ 1,255	\$ 1,032
Projected benefit obligation – beginning	\$ 1,150	\$ 1,045
Service cost	28	29
Interest cost	65	56
Actuarial loss	109	32
Benefit payments	(12)	(12)
Projected benefit obligation – ending	\$ 1,340	\$ 1,150
Plan assets at fair value – beginning	\$ —	\$ —
Employer contribution	12	12
Benefit payments	(12)	(12)
Plan assets at fair value – ending	\$ —	\$ —
Funded status at end of year (included in other liabilities)	\$ 1,340	\$ 1,150
Assumptions:		
Discount rate	4.25%	5.75%
Rate of compensation increase	3.00%	3.00%

Note 12 - Benefit Plans (Continued)

Directors' Retirement Plan (Continued)

Net periodic pension cost for the years ended June 30, 2012 and 2011 included the following:

	2012			2011
	(Dollars in thousands)			
Service cost	\$28			\$29
Interest cost	65			56
Amortization of unrecognized loss	15			10
Amortization of unrecognized past service liability	11			11
Net periodic pension cost	\$119			\$106
Assumptions:				
Discount rate	5.75	%	5.50	%
Rate of compensation	3.00	%	3.00	%

For the year ended June 30, 2013 the Savings Bank expects to contribute \$68,000 to the plan.

Estimated future benefit payments for the years ending June 30, which reflect expected future service, as appropriate, are as follows (in thousands):

2013	\$68
2014	76
2015	83
2016	105
2017	110
2018 – 2022	627

As of June 30, 2012 and 2011, unrecognized past service liabilities and actuarial losses aggregating \$298,000 and \$216,000, respectively, were included, net of income taxes of \$119,000 and \$87,000, respectively, in accumulated other comprehensive loss. Approximately \$45,000 of this amount is expected to be recognized as a component of net periodic plan cost during the year ending June 30, 2013.

Note 12 - Benefit Plans (Continued)

Executive Incentive Retirement Plan

The Savings Bank has an unfunded, non-qualified executive incentive retirement plan covering all eligible executives. The plan provides for either a lump sum payment or equal annual installments for a period of fifteen years commencing on the first day of the calendar month following the termination of employment due to retirement, resignation, disability or death. The amount payable is based on the vested balance of the executive's accumulated awards plus interest. The annual awards are based upon the executive's base salary in effect at the beginning of the plan year and the Savings Bank's net income for the prior fiscal year. The percentage vested is based on the sum of the executive's age and years of service.

The following table sets forth the accumulated benefit obligation, changes in plan's projected benefit obligation and the plan's funded status as of and for the years ended June 30, 2012 and 2011:

	2012	2011
	(Dollars in thousands)	
Accumulated benefit obligation - ending	\$ 472	\$ 492
Projected benefit obligation – beginning	\$ 492	\$ 334
Service cost	40	39
Interest cost	27	12
Actuarial loss (gain)	(69)	107
Benefits paid	(18)	—
Projected benefit obligation and funded status – ending (included in other liabilities)	\$ 472	\$ 492
Assumption:		
Discount rate	4.25%	5.75%

Net periodic pension cost for the years ended June 30, 2012 and 2011, included the following:

	2012	2011
	(Dollars in thousands)	
Service cost	\$ 40	\$ 39
Interest cost	27	12
Amortization of unrecognized gain	(2)	(19)
Net periodic pension cost	\$ 65	\$ 32
Assumption:		
Discount rate	5.75%	5.50%

Note 12 - Benefit Plans (Continued)

Executive Incentive Retirement Plan (Continued)

For the year ending June 30, 2013, the Savings Bank expects to contribute \$22,000 to the plan.

Estimated future benefit payments for the years ending June 30, which reflect expected future service, as appropriate, are as follows (in thousands):

2013	\$22
2014	23
2015	30
2016	35
2017	36
2018 – 2022	216

As of June 30, 2012 and 2011, actuarial gains of \$128,000 and \$61,000, respectively, were included, net of income taxes of \$50,000 and \$24,000, respectively, in accumulated other comprehensive loss. Approximately \$15,000 of this amount is expected to be recognized as a component of net periodic plan cost during the year ending June 30, 2013.

401(k) Savings and Profit Sharing Plan

The Savings Bank sponsors a savings and profit sharing plan, pursuant to Section 401(k) of the Internal Revenue Code (“IRC”), for all eligible employees. The plan has a profit sharing component paid annually by the Savings Bank of 3% of each eligible employee’s compensation. Employees may also elect to defer up to 80% of their compensation, subject to IRC limitations. The Savings Bank will match 50% of the first 6% of the employee’s salary deferral up to a maximum of 3% of each employee’s compensation. The Plan expense amounted to approximately \$96,000 and \$117,000 for the years ended June 30, 2012 and 2011, respectively.

Employee Stock Ownership Plan

Effective upon completion of the Company’s initial public stock offering, the Savings Bank established an Employee Stock Ownership Plan (“ESOP”) for all eligible employees who complete a twelve-month period of employment with the Savings Bank, have attained the age of 21 and have completed at least 1,000 hours of service in a plan year. The ESOP used \$2,023,420 in proceeds from a term loan obtained from the Company to purchase 202,342 shares of Company common stock. The term loan principal is payable over 48 equal quarterly installments through December 31, 2018. The interest rate on the term loan is 8.25%. Each quarter, the Savings Bank intends to make discretionary contributions to the ESOP, which will be equal to principal and interest payments required on the term loan. The ESOP may further pay down the loan with dividends paid, if any, on the Company common stock owned by the ESOP.

Shares purchased with the loan proceeds provide collateral for the term loan and are held in a suspense account for future allocations among participants. Base compensation is the basis for allocation to participants of contributions to the ESOP and shares released from the suspense account, as described by the Plan, in the year of allocation.

Note 12 - Benefit Plans (Continued)

ESOP shares pledged as collateral were initially recorded as unallocated ESOP shares in the consolidated statement of financial condition. On a monthly basis, 1,405 shares are allocated and compensation expense is recorded equal to the number of allocated shares multiplied by the monthly average fair value price of the Company's common stock and the allocated shares become outstanding for basic earnings per common share computations. The difference between the fair value of shares and the cost of the shares allocated by the ESOP is recorded as an adjustment to paid-in capital. ESOP compensation expense was approximately \$91,000 and \$106,000 for the years ended June 30, 2012 and 2011, respectively.

ESOP shares at June 30 are summarized as follows:

	2012	2011
Allocated shares - beginning	75,879	59,017
Shares allocated during the year	16,862	16,862
Allocated shares - ending	92,741	75,879
 Total ESOP Shares	 202,342	 202,342
 Fair value of unallocated shares	 \$ 615,957	 \$ 725,898

Stock-Based Compensation

The Company maintains the MSB Financial Corp. 2008 Stock Compensation and Incentive Plan (the "2008 Plan"). Under this plan, the Company may grant options to purchase up to 275,410 shares of Company's common stock. At June 30, 2012, there were no shares remaining for future option grants under the plan.

On May 9, 2008, options to purchase 275,410 shares of common stock at an exercise price of \$10.75 per share were awarded and will expire no later than ten years following the grant date. The options granted vest over a five-year service period, with 20% of the awards vesting on each anniversary date of grant. The fair value of the options granted, as computed using the Black-Scholes option-pricing model, was determined to be \$2.99 per option on the date of grant based upon the following underlying assumptions: a risk-free interest rate, expected option life, expected stock price volatility, and dividend yield of 3.33%, 6.5 years, 24.23%, and 1.11%, respectively.

The risk-free interest rate was based on the U.S. Treasury yield at the option grant date for securities with a term matching the expected life of the options granted. The expected life was calculated using the "simplified" method provided for under Staff Accounting Bulletin No. 110 as the Company has no prior option experience to draw upon. Expected volatility was calculated based upon the actual price history of the Company's common stock up until the date of the option grants. The dividend yield was calculated based upon the most recent annualized cash dividend declared by the Company and the market value of the Company's common stock at the grant date.

Management recognizes compensation expense for the fair value of the options, which have graded vesting, on a straight-line basis over the requisite service period of the awards. In each of the fiscal years ended June 30, 2012 and 2011, \$164,000 and \$165,000, respectively, in stock option expense was recorded along with income tax benefits of \$23,000.

Note 12 - Benefit Plans (Continued)

A summary of stock options for the years ended June 30, 2012 and 2011 was as follows:

	Options	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Outstanding at June 30, 2011	275,410	10.75	6.8 years	\$ —
Outstanding at June 30, 2012	275,410	10.75	5.8 years	—
Exercisable at June 30, 2012	229,508	10.75	5.8 years	—

Shares issued upon the exercise of stock options are planned to be issued from treasury stock. Unrecognized compensation expense relating to the 45,902 non-vested options at June 30, 2012 is \$137,000 over a weighted average period of 0.9 years.

On November 9, 2009, Company's stockholders approved an amendment to the 2008 Plan to increase the number of shares of the Company's common stock authorized for issuance under the 2008 Plan from 275,410 to 385,574, with such additional shares to be available for awards in the form of restricted stock awards. On November 24, 2009, the Company purchased 110,164 shares of its common stock at a purchase price of \$932,000, which amount, was charged to paid-in capital. On December 14, 2009, the Board of Directors granted 110,164 shares of restricted stock to certain employees and directors. The restricted stock awards are to be vested over a five year period and expensed accordingly based on the fair value at the date of grant. For each of the fiscal years ended June 30, 2012 and 2011, the Company recognized approximately \$180,000 in stock-based compensation expense related to restricted stock awards along with an income tax benefit of \$72,000. Unrecognized compensation expense relating to unvested restricted stock awards outstanding at June 30, 2012 is \$441,000. This amount will be recognized over a weighted average period of 2.5 years.

The following is a summary of the activity related to the Company's restricted stock awards for the year ended June 30, 2012:

	Restricted Stock	Weighted Average Grant Date Fair Value
Unvested at June 30, 2011	88,136	\$ 8.15
Vested	(22,032)	8.15
Unvested at June 30, 2012	66,104	\$ 8.15

Note 13 - Transactions with Officers and Directors

The Savings Bank has had, and may be expected to have in the future, banking transactions in the ordinary course of business with its officers, directors, their immediate families, and affiliated companies (commonly referred to as related parties), on the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with others with the exception that all directors and executive officers are offered a 50 basis point reduction for consumer loans or primary residence mortgage loans. These persons were indebted to the Savings Bank for loans totaling \$9,259,000 and \$10,782,000 at June 30, 2012 and 2011, respectively. During the year ended June 30, 2012, \$1,264,000 of new loans and \$2,787,000 of repayments were made.

Note 14 - Regulatory Capital

The Savings Bank is subject to various regulatory capital requirements administered by Federal and State banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Savings Bank must meet specific capital guidelines that involve quantitative measures of the Savings Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Savings Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weighting, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Savings Bank to maintain minimum amounts and ratios (set forth in the table below) of tangible, core and risk-based capital as defined in the regulations. Management believes, as of June 30, 2012 and 2011, that the Savings Bank met all capital adequacy requirements to which it is subject.

As of June 30, 2012, the most recent notification from the regulators categorized the Savings Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Savings Bank must maintain minimum core, Tier 1 risk-based and total risk-based ratios as set forth in the table. There are no conditions or events since that notification that management believes have changed the institution's category.

Note 14 - Regulatory Capital (Continued)

The following table present a reconciliation of GAAP capital and regulatory capital and information as to the Savings Bank's capital levels at the dates presented:

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
(Dollars in thousands)						
June 30, 2012:						
Tangible	\$ 34,675	9.97 %	\$ 5,216	>1.50%	N/A	N/A
Core (leverage)	34,675	9.97	13,909	>4.00	17,386	> 5.00%
Tier 1 risk-based	34,675	15.64	8,869	>4.00	13,304	> 6.00
Total risk-based	37,451	16.89	17,738	>8.00	22,173	>10.00
June 30, 2011:						
Tangible	\$ 33,796	9.68 %	\$ 5,238	>1.50%	N/A	N/A
Core (leverage)	33,796	9.68	13,968	>4.00	17,460	> 5.00%
Tier 1 risk-based	33,796	15.16	8,920	>4.00	13,380	> 6.00
Total risk-based	36,006	16.15	17,840	>8.00	22,299	>10.00

Note 15 - Commitments and Contingencies

The Savings Bank is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and letters of credit. Such commitments involve, to varying degrees, elements of credit, and interest rate risk in excess of the amount recognized in the statements of financial condition.

The Savings Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and letters of credit is represented by the contractual amount of those instruments. The Savings Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Note 15 - Commitments and Contingencies (Continued)

At June 30, 2012 and 2011, the following financial instruments were outstanding whose contract amounts represent credit risk:

	2012	(In thousands)	2011
Commitments to grant loans	\$ 2,740		\$ 1,036
Unfunded commitments under lines of credit	21,766		24,328
Standby letters of credit	327		324
	\$ 24,833		\$ 25,688

At June 30, 2012, the commitments to grant loans included \$770,000 of fixed rate mortgage loans with interest rates ranging from 3.375% to 5.25%; an adjustable rate mortgage of \$180,000 with an initial rate of 3.00% adjusting to 5.00% after 10 years and \$1,790,000 of variable rate construction loans based on the Wall Street Journal Prime Rate + 1.00%, with a floor rate of 5.00%. Of the unfunded commitments under lines of credit at June 30, 2012, \$17,668,000 was available under the Savings Bank's home equity lending program, \$551,000 was available under the overdraft protection lending program and \$3,547,000 was available under commercial lines of credit. Amounts outstanding under these unfunded lines have interest rates ranging from 1.00% below prime rate to 4.00% over the prime rate.

At June 30, 2011, the commitments to grant loans included \$636,000 of fixed rate mortgage loans all at an interest rate of 5.00% and \$400,000 of variable rate construction loans with initial interest rates of prime (as reported in the Wall Street Journal) +1.00% or 4.25%. Of the unfunded commitments under lines of credit at June 30, 2011, \$19,092,000 was available under the Savings Bank's home equity lending program, \$543,000 was available under the overdraft protection lending program, and \$4,693,000 was available under commercial lines of credit. Amounts outstanding under these programs had interest rates ranging from 1.00% below the prime rate to 4.00% over the prime rate.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Savings Bank evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Savings Bank upon extension of credit, is based on management's credit evaluation. Collateral held varies but primarily includes residential and income-producing commercial real estate properties.

Standby letters of credit are conditional commitments issued by the Savings Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending other loan commitments. The Savings Bank requires collateral supporting these letters of credit when deemed necessary. Management believes that the proceeds obtained through a liquidation of such collateral would be sufficient to cover the maximum potential amount of future payments required under the corresponding guarantees. The fair values of these obligations were immaterial as of June 30, 2012 and 2011.

Note 16 - Fair Value Measurements

The Company uses fair value measurements to record fair value adjustments to certain assets and to determined fair value disclosures.

FASB ASC Topic 820, Fair Market Value Disclosures (“ASC 820”), defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transactions involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are (i) independent, (ii) knowledgeable, (iii) able to transact and (iv) willing to transact.

ASC 820 requires the use of valuation techniques that are consistent with the market approach, the income approach and/or the cost approach. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets and liabilities. The income approach uses valuation techniques to convert future amounts, such as cash flows or earnings, to a single present amount on a discounted basis. The cost approach is based on the amount that currently would be required to replace the service capacity of an asset (replacement cost). Valuation techniques should be consistently applied. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity’s own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. In that regard, ASC 820 establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

- Level 1 Inputs – Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.
- Level 2 Inputs – Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These might include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (such as interest rates, volatilities, prepayment speeds, credit risks, etc.) or inputs that are derived principally from or corroborated by market data by correlation or other means.
- Level 3 Inputs – Unobservable inputs for determining the fair values of assets or liabilities that reflect an entity’s own assumptions about the assumptions that market participants would use in pricing the assets or liabilities.

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below. An asset’s or liability’s level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon internally developed models that primarily use, as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial

F-41

Note 16 - Fair Value Measurements (Continued)

instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company's valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

The following table summarizes financial assets measured at fair value on a recurring basis as of June 30, 2012 and 2011, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	June 30, 2012			Total Fair Value
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	
	(In thousands)			
Trading securities	\$52	\$—	\$—	\$52

	June 30, 2011			Total Fair Value
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	
	(In thousands)			
Trading securities	\$60	\$—	\$—	\$60

Securities classified as trading securities are reported at fair value utilizing Level 1 inputs. For these securities, the Company arrives at the fair value based upon the quoted market price at the close of business on the last business day on, or prior to, the statement of financial condition date.

Assets and Liabilities Measured at Fair Value on a Non-Recurring Basis

Certain financial and non-financial assets are measured at fair value on a non-recurring basis; that is, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment).

The following table summarizes those assets measured at fair value on a non-recurring basis as of June 30, 2012 and 2011:

	June 30, 2012			Total Fair Value
	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	
	(In thousands)			
Impaired loans	\$—	\$—	\$10,683	\$10,683

Edgar Filing: MSB FINANCIAL CORP. - Form 10-K

	Level 1 Inputs	June 30, 2011		Total Fair Value
		Level 2 Inputs	Level 3 Inputs	
Impaired loans	\$—	\$—	\$2,918	\$2,918

F-42

Note 16 - Fair Value Measurements (Continued)

For Level 3 input assets measured at fair value on non-recurring basis as of June 30, 2012, the significant unobservable inputs used in fair value measurements were as follows:

	Fair Value Estimate	Valuation Techniques	Unobservable Input	Range (Weighted Average)
(Dollars in thousands)				
Impaired loans	\$ 7,870	Appraisal of collateral	Appraisal adjustments Liquidation expense	0% to - 19.5% (-6.5%) -4.6% to -28.2% (-8.1%)

An impaired loan is measured for impairment at the time the loan is identified as impaired. Loans are considered impaired when based on current information and events it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement. The Company's impaired loans are generally collateral dependent and, as such, are carried at the lower of cost or estimated fair value less estimated selling costs. Fair values are estimated through current appraisals and adjusted as necessary to reflect current market conditions and as such are classified as Level 3.

Other real estate is carried at the lower of cost or fair value less estimated selling costs. The fair value of other real estate is determined based upon independent third-party appraisals of the properties. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. As of June 30, 2012 and 2011, there was no further impairment of the other real estate owned below the cost basis established at the time the other real owned was originally recognized. Accordingly, the table above does not include other real estate owned.

Disclosure about Fair Value of Financial Instruments

The fair value of a financial instrument is defined above. Significant estimates were used for the purposes of disclosing fair values. Estimated fair values have been determined using the best available data and estimation methodology suitable for each category of financial instruments. However, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective reporting dates, and have not been reevaluated or updated for purposes of these consolidated financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported.

The following information should not be interpreted as an estimate of the fair value of the entire Company since a fair value calculation is only provided for a limited portion of the Company's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company's disclosures and those of other companies may not be meaningful.

Note 16 - Fair Value Measurements (Continued)

The following presents the carrying amount and the fair value as of June 30, 2012 and June 30, 2011, and placement in the fair value hierarchy as of June 30, 2012, of the Company's financial instruments which are carried on the consolidated statement of financial condition at cost and are not measured or recorded at fair value on a recurring basis. This table excludes financial instruments for which carrying amount approximates fair value, which includes cash and cash equivalents, Federal Home Loan Bank stock, accrued interest receivable, interest and non-interest bearing demand, savings and club deposits, and accrued interest payable.

	Carrying Amount (In thousands)	Estimated Fair Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
As of June 30, 2012					
Financial assets:					
Securities held to maturity	\$50,706	\$51,540	\$—	\$51,540	\$—
Loans receivable (1)	240,520	245,055	—	—	245,055
Financial liabilities:					
Certificate of deposits	119,656	122,135	—	122,135	—
Advances from Federal Home Loan Bank of New York	20,000	22,455	—	22,455	—
As of June 30, 2011					
Financial assets:					
Securities held to maturity	41,693	41,602			
Loans receivable (1)	253,251	259,165			
Financial liabilities:					
Certificate of deposits	122,064	124,696			
Advances from Federal Home Loan Bank of New York	20,000	19,917			

(1) Includes impaired loans measured at fair value on a non-recurring basis as discussed above.

Methods and assumptions used to estimate fair values of financial assets and liabilities previously disclosed are as follows:

Cash and Cash Equivalents

For cash and cash equivalents, the carrying amount is a reasonable estimate of fair value.

Securities Held to Maturity

The fair value for securities held to maturity is based on quoted market prices, where available. If quoted market prices are not available, fair value is estimated using quoted market prices for similar securities.

Loans Receivable

The fair value of loans is based upon a multitude of sources, including assumed current market rates by category and the Bank's current offering rates. Both fixed and variable rate loan fair values are derived at using a discounted cash flow methodology. For variable rate loans, repricing terms, including next reprice date, reprice frequency and reprice rate are factored into the discounted cash flow formula.

Federal Home Loan Bank Stock

The carrying amount of Federal Home Loan Bank of New York stock approximates fair value since the Company is generally able to redeem this stock at par.

F-44

Note 16 - Fair Value Measurements (Continued)

Accrued Interest Receivable and Payable

The carrying amounts of accrued interest receivable and payable approximate fair value due to the short term nature of these instruments.

Deposits

Fair values for demand deposits, savings accounts and club accounts are, by definition, equal to the amount payable on demand at the reporting date. Fair values of fixed-maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on similar instruments with similar maturities.

Advances from Federal Home Loan Bank of New York

Fair values of advances are estimated using discounted cash flow analyses, based on rates currently available to the Company for advances from the Federal Home Loan Bank of New York with similar terms and remaining maturities.

Off-Balance Sheet Financial Instruments

Fair values of commitments to extend credit are estimated using the fees currently charged to enter into similar agreement, into account market interest rates, the remaining terms, and the present credit worthiness of the counterparties. As of June 30, 2012 and 2011, the fair value of the commitments to extend credit was not considered to be material.

Note 19 – Recent Accounting Pronouncements

In April 2011, the FASB issued ASU 2011-02 to clarify the accounting principles applied to loan modifications, as defined by FASB ASC Subtopic 310-40, Receivables – Troubled Debt Restructurings by Creditors. The Update clarified guidance on a creditor’s evaluation of whether or not a concession has been granted, with an emphasis on evaluating all aspects of the modification rather than a focus on specific criteria, such as the effective interest rate test, to determine a concession. The Update provides guidance on specific types of modifications such as changes in the interest rate of the borrowing, and insignificant delays in payments, as well as guidance on the creditor’s evaluation of whether or not a debtor is experiencing financial difficulties. For public entities, the amendments in the Update were effective for the first interim or annual periods beginning on or after June 15, 2011, and were to be applied retrospectively to the beginning of the annual period of adoption. The Company adopted the provisions of ASU 2011-02 effective July 1, 2011. See Note 5 to the consolidated financial statements for the enhanced disclosures required by ASU 2011-02.

In May 2011, the FASB issued ASU 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in US GAAP and International Financial Reporting Standards (“IFRS”) which amends FASB ASC Topic 820, Fair Value Measurements, to bring U.S. GAAP for fair value measurements in line with International Accounting Standards. The ASU clarifies existing guidance for items such as: the application of the highest and best use concept to non-financial assets and liabilities; the application of fair value measurement to financial instruments classified in a reporting entity’s stockholder’s equity; and disclosure requirements regarding quantitative information about unobservable inputs used in the fair value measurements of level 3 assets. The ASU also creates an exception to

Topic 820 for entities which carry financial instruments within a portfolio or group, under

F-48

Note 19 – Recent Accounting Pronouncements (Continued)

which the entity is now permitted to base the price used for fair valuation upon a price that would be received to sell the net asset position or transfer a net liability position in an orderly transaction. The ASU also allows for the application of premiums and discounts in a fair value measurement if the financial instrument is categorized in level 2 or 3 of the fair value hierarchy. Lastly, the ASU contains new disclosure requirements regarding fair value amounts categorized as level 3 in the fair value hierarchy such as: disclosure of the valuation process used; effects of and relationships between unobservable inputs; usage of nonfinancial assets for purposes other than their highest and best use when that is the basis of the disclosed fair value; and categorization by level of items disclosed at fair value, but not measured at fair value for financial statement purposes. The Company adopted the provisions of ASU 2011-04 effective January 1, 2012. There was no impact to amounts recognized and no significant impact to amounts disclosed in the consolidated financial statements from the adoption of this update. See Note 16 to the consolidated financial statements for the enhanced disclosures required by ASU 2011-04.

In June 2011, the FASB issued ASU 2011-05, Presentation of Comprehensive Income which amends FASB ASC Topic 220, Comprehensive Income, to facilitate the continued alignment of U.S. GAAP with International Accounting Standards. The ASU prohibits the presentation of the components of comprehensive income in the statement of stockholder's equity. Reporting entities are allowed to present either: a statement of comprehensive income, which reports both net income and other comprehensive income; or separate, but consecutive, statements of net income and other comprehensive income. Under previous GAAP, all three presentations were acceptable. Regardless of the presentation selected, the reporting entity is required to present all reclassifications between other comprehensive and net income on the face of the new statement or statements. ASU 2011-12 (see below) is effective for interim and annual periods ending after December 15, 2011 for public companies. The implementation of the provisions outlined in ASU 2011-05 did not have a significant effect on the Company's financial statements.

In December, 2011, the FASB issued ASU 2011-12, Deferral of the Effective Date to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update 2011-05. In response to stakeholder concerns regarding the operational ramifications of the presentation of these reclassifications for current and previous years, the FASB has deferred the implementation date of this provision to allow time for further consideration. The requirement in ASU 2011-05, Presentation of Comprehensive Income, for the presentation of a combined statement of comprehensive income or separate, but consecutive, statements of net income and other comprehensive income is still effective for fiscal years, and interim periods within those years, beginning after December 15, 2011 for public companies.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized as of September 28, 2012.
