UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q/A
AMENDMENT NO. 1

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934 For the quarterly period ended: MARCH 31, 2007

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number: 000-51152

PETROHUNTER ENERGY CORPORATION
(Exact name of registrant as specified in its charter)

MARYLAND 98-0431245
(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

1875 LAWRENCE STREET, SUITE 1400, DENVER, COLORADO 80203
(Address of principal executive offices) (Zip Code)

Registrant's telephone number: (303) 572-8900

NOT APPLICABLE
(Former name, former address and former fiscal year,
if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports
required to be filed by Section 13 or 15(d) of the Securities Exchange
Act of 1934 during the preceding 12 months (or for such shorter period
that the registrant was required to file such reports), and (2) has been
subject to such filing requirements for the past
90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated
filer, an accelerated filer, or a non-accelerated filer. See definition of
"accelerated filer and large accelerated filer" in Rule 12b-2 of the
Exchange Act. (Check one):
Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company
(as defined in Rule 12b-2 of the Exchange Act) Yes No

Indicate the number of shares outstanding of each of the issuer's classes of
common stock, as of the latest practicable date:
222,928,734 SHARES OF COMMON STOCK, \$.001 PAR VALUE, AS OF
MAY 15, 2007

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

EXPLANATORY NOTE

We are filing this Amendment No. 1 to Form 10-Q for the quarterly period ended March 31, 2007, as originally filed with the SEC on May 21, 2007, to restate our financial statements and corresponding financial information for the quarterly period ended March 31, 2007.

We are restating the financial statements and corresponding financial information to correctly reflect the timing of the abandonment of the South Bronco prospect in the Piceance Basin of Colorado. The Form 10-Q for the quarterly period ended March 31, 2007 had previously reported the abandonment and resulting impairment expense had occurred in the three-month period ended March 31, 2007. The abandonment actually occurred in the three-month period ended December 31, 2006. This restatement gives effect to the timing change of the abandonment and the recognition of the impairment expense from the quarterly period ended March 31, 2007 to the quarterly period ended December 31, 2006.

A more complete discussion of this restatement is set forth in Note 1 to the consolidated financial statements included in Part I, Item 1 of this Amendment No. 1. Changes also have been made to Part I, Item 2 -- Management's Discussion and Analysis of Financial Condition and Results of Operations in this Amendment No. 1, as a result of the restatement.

This Amendment No. 1 continues to speak as of the date of the original Form 10-Q for the quarterly period ended March 31, 2007 and we have not updated or amended the disclosures contained herein to reflect events that have occurred since the filing of the Form 10-Q, or modified or updated those disclosures in any way other than as described in the preceding paragraphs. Accordingly, this Amendment No. 1 should be read in conjunction with our filings made with the SEC subsequent to the filing of the original Form 10-Q on May 21, 2007.

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 1 - RESTATEMENT OF CONSOLIDATED FINANCIAL STATEMENTS

In January 2007, the Company determined not to proceed with further evaluation or exploration of its South Bronco project in the Piceance Basin of Colorado. This abandonment and the resulting impairment expense of \$550,790 were originally reflected in the three-month period ended March 31, 2007. The Company subsequently determined the abandonment and impairment expense should have been recorded in the quarterly period ended December 31, 2006. On June 13, 2007, the Company filed an Amended Form 10-Q for the quarterly period ended December 31, 2006 to reflect this timing change. This restatement for the quarterly period ended March 31, 2007 reflects the timing change for the period

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

then ended.

The following table sets forth the net effect of the restatement on the Consolidated Statement of Operations for the three months ended March 31, 2007, and identifies individual line items impacted by the restatement. There is no effect on the Consolidated Statement of Operations for the six months ended March 31, 2007 or for the period from inception, June 20, 2005, through March 31, 2007, or on the Company's Consolidated Balance Sheet or Consolidated Statements of Cash Flows as of and for the six month period ended March 31, 2007.

NOTE 2 - ORGANIZATION AND BASIS OF PRESENTATION

PetroHunter Energy Corporation, formerly known as Digital Ecosystems Corp., ("Digital") was incorporated on February 21, 2002 under the laws of the State of Nevada. On February 10, 2006, Digital entered into a Share Exchange Agreement (the "Agreement") with GSL Energy Corporation ("GSL") and certain shareholders of GSL pursuant to which Digital acquired more than 85% of the issued and outstanding shares of common stock of GSL, in exchange for shares of Digital's common stock. On May 12, 2006, the parties to the Agreement completed the share exchange, and Digital changed its business to the business of GSL. Subsequent to the closing of the Agreement, Digital acquired all the remaining outstanding stock of GSL, and effective August 14, 2006, Digital changed its name from Digital Ecosystems Corp. to PetroHunter Energy Corporation ("PetroHunter").

6

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 2 - ORGANIZATION AND BASIS OF PRESENTATION (CONTINUED)

GSL was incorporated under the laws of the State of Maryland on June 20, 2005 for the purpose of acquiring, exploring and developing oil and gas properties. GSL is considered a development stage company as defined by Statement of Financial Accounting Standards ("SFAS") No. 7,

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

and its principal activities since inception have been raising capital through the sale of common stock and convertible notes and the acquisition of oil and gas properties in the Western United States and Australia. In October 2006, GSL changed its name to PetroHunter Operating Company. On November 8, 2005, GSL formed Paleotechnology, Inc. ("Paleo") as a wholly owned subsidiary for the purpose of exploring and developing new products and processes using by-products of petroleum extraction environments. On September 11, 2006, PetroHunter formed PetroHunter Heavy Oil Ltd. ("Heavy Oil"), as a wholly owned subsidiary for the purpose of holding and developing the Company's heavy oil assets. Effective September 30, 2006, PetroHunter acquired 50% of the outstanding common shares of Sweetpea Corporation Pty Ltd ("Sweetpea"), an Australian corporation; and effective January 1, 2007 acquired the remaining 50%. Sweetpea is the record owner of four exploration permits issued by the Northern Territory of Australia. On October 20, 2006, PetroHunter formed PetroHunter Energy NT Ltd., now known as PetroHunter Australia Ltd. ("PetroHunter Australia"), as a wholly owned subsidiary, for the purpose of holding and developing its assets in Australia. Collectively, PetroHunter and its subsidiaries are referred to herein as the "Company".

As a result of the Agreement, GSL became a wholly owned subsidiary of PetroHunter. Since this transaction resulted in the former shareholders of GSL acquiring control of PetroHunter, for financial reporting purposes the business combination was accounted for as an additional capitalization of PetroHunter (a reverse acquisition with GSL as the accounting acquirer).

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The unaudited financial statements included herein were prepared from the records of the Company in accordance with generally accepted accounting principles in the United States applicable to interim financial statements and reflect all adjustments which are, in the opinion of management, necessary to provide a fair statement of the results of operations and financial position for the interim periods. Such financial statements conform to the presentation reflected in the Company's Form 10-KSB filed with the Securities and Exchange Commission for the year ended September 30, 2006. The current interim period reported herein should be read in conjunction with the Company's Form 10-KSB for the year ended September 30, 2006. The results of operations for the three and six months ended March 31, 2007 are not necessarily indicative of the results that may be expected for the full fiscal year ending September 30, 2007.

7

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

BASIS OF ACCOUNTING

The accompanying financial statements have been prepared on the basis

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

of accounting principles applicable to a going concern, which contemplates the realization of assets and extinguishment of liabilities in the normal course of business. As shown in the accompanying balance sheet the Company has incurred a cumulative net loss of \$32,782,278 for the period from inception (June 20, 2005) to March 31, 2007, has a working capital deficit of \$24,744,260 at March 31, 2007 and has significant capital expenditure commitments. As of March 31, 2007, the Company has received oil and gas revenue from its initial wells, and will require significant additional funding to sustain its operations and satisfy its contractual obligations for its planned oil and gas exploration and development operations. These factors, among others, may indicate that the Company may be unable to continue in existence. The Company's financial statements do not include any adjustments related to the realization of the carrying value of assets or the amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence. The Company's ability to establish itself as a going concern is dependent upon its ability to obtain additional financing, in order to fund its planned operations and ultimately, to achieve profitable operations. Management believes that they can be successful in obtaining equity and/or debt financing which will enable the Company to continue in existence and establish itself as a going concern. The Company has sold approximately \$72.5 million of notes, convertible notes and common stock through March 31, 2007. Subsequent to March 31, 2007 the Company has received an additional \$2,500,000 under a mezzanine financing arrangement, and \$1,500,000 from a private investor pursuant to a loan commitment. (See Notes 9 and 13.) Management believes that the Company will be successful in raising additional funding to have sufficient capital to meet its obligations for its planned operations.

DEVELOPMENT STAGE

The Company is considered a development stage company as defined by Statement of Financial Accounting Standards ("SFAS") No. 7, and its principal activities since inception have been raising capital through the sale of common stock and convertible notes and the acquisition of oil and gas properties in the Western United States and Australia. The Company has commenced initial test production from its first wells in the Piceance Basin of Colorado; however, management does not consider that the Company has commenced principal operations as of March 31, 2007.

BASIS OF PRESENTATION

The accompanying consolidated financial statements include PetroHunter for the three and six months ended March 31, 2007. For the three and six months ended March 31, 2006, the consolidated financial statements are those of GSL. All significant intercompany transactions have been eliminated upon consolidation.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

OIL AND GAS PROPERTIES

The Company utilizes the full cost method of accounting for oil and gas activities. Under this method, subject to a limitation based on estimated value, all costs associated with property acquisition, exploration and development, including costs of unsuccessful exploration, are capitalized within a cost center on a country basis. No gain or loss is recognized upon the sale or abandonment of undeveloped or producing oil and gas properties unless the sale represents a significant portion of oil and gas properties and the gain significantly alters the relationship between capitalized costs and proved oil and gas reserves of the cost center. Depreciation, depletion and amortization of oil and gas properties is computed on the units of production method based on proved reserves. Amortizable costs include estimates of future development costs of proved undeveloped reserves.

Capitalized costs of oil and gas properties may not exceed an amount equal to the present value, discounted at 10%, of the estimated future net cash flows from proved oil and gas reserves plus the cost, or estimated fair market value, if lower, of unproved properties. Should capitalized costs exceed this ceiling, an impairment is recognized. The present value of estimated future net cash flows is computed by applying year end prices of oil and natural gas to estimated future production of proved oil and gas reserves as of year end, less estimated future expenditures to be incurred in developing and producing the proved reserves and assuming continuation of existing economic conditions. As of March 31, 2007, the Company has no proved reserves, has received revenue from testing and production on its initial wells, and all oil and gas property costs are considered to be unevaluated and are recorded at the lower of cost or estimated fair market value.

ASSET RETIREMENT OBLIGATION

The Company applies SFAS 143, "Accounting for Asset Retirement Obligations," which addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This statement requires companies to record the present value of obligations associated with the retirement of tangible long-lived assets in the period in which it is incurred. The liability is capitalized as part of the related long-lived asset's carrying amount. Over time, accretion of the liability is recognized as an operating expense and the capitalized cost is depreciated over the expected useful life of the related asset. Asset retirement obligations ("ARO") relate primarily to the plugging, dismantlement, removal, site reclamation and similar activities of its oil and gas properties.

REVENUE RECOGNITION

The Company recognizes oil and gas revenues from its interests in producing wells as oil and gas is produced and sold from these wells. The Company may have an interest with other producers in certain properties, in which case the Company uses the sales method to account for gas imbalances. Under this method, revenue is recorded on the basis of gas actually sold by the Company. In addition, the Company records revenue for its share of gas sold by other owners that cannot be volumetrically balanced in the future due to insufficient remaining reserves. The Company also reduces revenue for other owners' gas sold

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

by the Company that cannot be volumetrically balanced in the future due to insufficient remaining reserves. The Company's remaining over- and under-produced gas balancing positions will be considered in the Company's proved reserves. The Company has no gas balancing arrangements in place at March 31, 2007. Oil and gas sold is not significantly different from the Company's product entitlement.

9

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

IMPAIRMENT

The Company applies SFAS 144, "Accounting for the Impairment and Disposal of Long-Lived Assets," which requires that long-lived assets to be held and used be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Oil and gas properties accounted for using the full cost method of accounting, the method utilized by the Company, are excluded from this requirement, but will continue to be subject to the ceiling test limitations. The Company's unproved properties are evaluated periodically for the possibility of potential impairment. During the three months ended December 31, 2006, management of the Company determined not to proceed with further evaluation or exploration of its South Bronco project in the Piceance Basin of Colorado and charged to operations an impairment expense of \$550,790. There was no impairment expense recognized for the three-month period ended March 31, 2007.

INCOME TAXES

The Company has adopted the provisions of SFAS 109, "Accounting for Income Taxes." SFAS 109 requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse.

Temporary differences between the time of reporting certain items for financial and tax reporting purposes consist primarily of exploration and development costs on oil and gas properties, and stock based compensation of options granted.

USE OF ESTIMATES

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

The Company's financial statements are based on a number of significant estimates, including oil and gas reserve quantities, which are the basis for the calculation of depreciation, depletion and impairment of oil and gas properties, and timing and costs associated with its retirement obligations.

The oil and gas industry is subject, by its nature, to environmental hazards and clean-up costs. At this time, management knows of no substantial costs from environmental accidents or events for which the Company may be currently liable. In addition, the Company's oil and gas business makes it vulnerable to changes in wellhead prices of crude oil and natural gas. Such prices have been volatile in the past and can be expected to be volatile in the future. By definition, proved reserves are based on current oil and gas prices and estimated reserves. Price declines reduce the estimated quantity of proved reserves and increase annual amortization expense (which is based on proved reserves).

10

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

LOSS PER COMMON SHARE

Basic (loss) per share is based on the weighted average number of common shares outstanding during the period. Diluted (loss) per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Convertible equity instruments such as stock options and convertible debentures are excluded from the computation of diluted loss per share, as the effect of the assumed exercises would be anti-dilutive. The dilutive weighted average number of common shares outstanding excluded potential common shares from stock options and warrants of approximately 48,701,500 for the period ended March 31, 2007.

SHARE BASED COMPENSATION

The Company had followed Accounting Principles Board ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations, through September 30, 2005 which resulted in the accounting for grants of awards to employees at their intrinsic value in the consolidated financial statements. Additionally, the Company has recognized compensation expense in the financial statements for awards granted to non-employees, which must be re-measured each period under the mark-to-market, as required under EITF 96-18, "Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring or in Conjunction with Selling, Goods or Services." The Company previously adopted the provisions of SFAS No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148, "Accounting

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

for Stock-Based Compensation --Transition and Disclosure," through disclosure only.

Effective October 1, 2005, the Company adopted SFAS123(R), "Accounting for Stock-Based Compensation," using the modified prospective method, which results in the provisions of SFAS 123(R) being applied to the consolidated financial statements on a going-forward basis. Prior periods have not been restated. SFAS 123(R) requires companies to recognize share-based payments to employees as compensation expense on a fair value method. Under the fair value recognition provisions of SFAS 123(R), stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the service period, which generally represents the vesting period. The expense recognized over the service period is required to include an estimate of the awards that will be forfeited. Previously, no such forfeitures have occurred. The Company is assuming no forfeitures going forward based on the Company's historical forfeiture experience. The fair value of stock options is calculated using the Black-Scholes option-pricing model.

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

SHARE BASED COMPENSATION (Continued)

As of March 31, 2007, options to purchase an aggregate of 33,295,000 shares of the Company's common stock were outstanding, of which 10,759,000 are exercisable. These options were granted to the Company's officers, directors and consultants in August of 2005 and 2006, and February 2007, generally vesting 20% at grant date and 20% per year on the anniversary of the grant date for the next four years. Each option has an exercise price equal to the fair market value per share of the Company's common stock at the date of grant and each option expires and terminates, if not exercised sooner, five years from the grant date. Stock-based compensation expense of \$2,055,591 and \$3,616,724 before tax, was charged to operations as compensation expense for the three and six months ended March 31, 2007.

CASH AND CASH EQUIVALENTS

For purposes of reporting cash flows, the Company considers as cash equivalents all highly liquid investments with a maturity of three months or less at the time of purchase. Restricted cash at March 31, 2007 consists of certificates of deposit underlying letters of credit for exploration permits, state and local plugging and abandonment bonds and guarantees to vendors.

CONCENTRATION OF CREDIT RISK

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

Financial instruments, which potentially subject the Company to concentrations of credit risk, consist of cash. The Company maintains cash accounts at one financial institution. The Company periodically evaluates the credit worthiness of financial institutions, and maintains cash accounts only in large high quality financial institutions, thereby minimizing exposure for deposits in excess of federally insured amounts. On occasion, the Company may have cash in banks in excess of federally insured amounts. The Company believes that credit risk associated with cash is remote.

FAIR VALUE

The carrying amount reported in the balance sheet for cash, receivables, prepaids, accounts payable and accrued liabilities approximates fair value because of the immediate or short-term maturity of these financial instruments.

Based upon the borrowing rates currently available to the Company for loans with similar terms and average maturities, the fair value of convertible notes approximates their carrying value.

OFF BALANCE SHEET ARRANGEMENTS

The Company has no off balance sheet arrangements.

12

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 4 - AGREEMENT WITH MAB RESOURCES LLC

Effective January 1, 2007, the Company and MAB Resources LLC ("MAB") entered into an Acquisition and Consulting Agreement (the "MAB Consulting Agreement"), as amended, which replaced in its entirety the Management and Development Agreement (the "Development Agreement") entered into July 1, 2005, and materially revised the relationship between MAB and the Company. MAB is a Delaware limited liability company and the largest shareholder of the Company. MAB is in the business of oil and gas exploration and development. Under the terms of the Consulting Agreement:

- o The Company's working interest in all its oil and gas properties doubled (from 50% undivided interest in the properties to 100%);
- o The Company's prior obligation to carry MAB for its 50% portion of the first \$700 million in capital costs was eliminated;
- o The Company's aggregate monthly payments to MAB related to the existing properties were reduced from \$600,000 to (i) \$25,000 for consulting, plus (ii) \$225,000 for payments under a \$13.5 million promissory note as partial consideration for MAB's assignment of its previous undivided 50% working interest in the properties;
- o MAB's 3% overriding royalty was increased to 5% (the "Override"), but the Override does not apply to the Company's Piceance II properties, and does not apply to the extent that the Override would cause the Company's net revenue interest under an oil and

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

- o gas lease to be less than 75%;
- o MAB will receive 7% of the issued and outstanding shares of PetroHunter Australia, as of the date that the Company receives PetroHunter Australia shares in consideration for the Company's assignment of its rights and obligations in the Northern Territory (Australia) permits to PetroHunter Australia.

The MAB Consulting Agreement also provides for the issuance of 50,000,000 shares of the Company's common stock to MAB. MAB has the right and opportunity to receive up to an additional 50,000,000 shares, to be issued over a five-year period in specified numbers of shares that are tied to the Company's performance in booking reserves. The MAB Consulting Agreement, including the monthly payments to MAB, terminates after five years, except MAB's overriding royalty continues for the life of the properties.

The Company has accounted for the acquisition component of the MAB Consulting Agreement in accordance with the purchase accounting provisions of SFAS 141 "Business Combinations." Accordingly, the Company has capitalized as oil and gas properties the \$13,500,000 promissory note and the \$81,000,000 fair market value of the 50,000,000 shares issued to MAB, based on the trading price of the Company's common stock on the trading date immediately preceding the effective date of the transaction. The \$25,000 per month consulting fees are charged to operations as incurred.

Commencing July 1, 2005 and continuing through December 31, 2006, the Company and MAB operated pursuant to the Development Agreement, and a series of individual property agreements (collectively, the "EDAs"). The Development Agreement sets forth: (a) MAB's obligation to assign to the Company a minimum 50% undivided interest in any and all oil and gas assets which MAB acquires from third parties in the future; and (b) MAB's and the Company's long-term relationship regarding the ownership and operation of all jointly-owned properties. Each of the Properties acquired was covered by a property-specific EDA that is consistent with the terms of the Development Agreement.

13

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 5 - OIL AND GAS PROPERTIES

Commencing effective July 1, 2005 and continuing through December 31, 2006, the Company entered into a Management and Development Agreement (the "Development Agreement") and a series of property-specific Exploration and Development Agreements (collectively, the "EDAs") pursuant to the Development Agreement with MAB. Effective January 1, 2007, the Development Agreement and the EDA's were replaced in their entirety by the Consulting Agreement with MAB as discussed in Note 4 above.

The following description of the Company's oil and gas property acquisitions for the period from October 1, 2006 to December 31, 2006

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

is pursuant to the original Development Agreement and related EDA's. All references to the Company's obligations to pay "project development costs" pertaining to the following properties means the specified amount of capital expenditures (for each such property), which were credited against the Company's obligation to carry MAB for MAB's 50% portion of such expenditures.

On November 28, 2006, MAB entered into an agreement with Maralex Resources, Inc. and Adelante Oil & Gas, LLC (collectively, "Maralex") for the acquisition and development of the Jack's Pocket Prospect in Garfield County, Colorado (the "Maralex Agreement"). Under the terms of the Maralex Agreement, an initial payment of \$100,000 was made upon execution and the balance of \$2.9 million cash and issuance of 2,428,100 shares of the Company's common stock was due on January 15, 2007. The Company has recorded the \$2.9 million obligation as a contract payable and the fair market value of the shares to be issued of \$4,127,770, based on the closing price of the Company's common stock as of the date of the Maralex Agreement. Effective January 12, 2007, the Maralex Agreement was amended to extend the payment terms of the cash due through March 15, 2007, and increase the number of shares to be issued by 571,900, to a total of 3,000,000 shares. On January 16, 2007, the Company issued 3,000,000 shares to the sellers and recorded as interest expense, transaction finance costs of \$983,668 representing the market value of the 571,900 incremental shares. On January 17, 2007, the Company made a payment of \$500,000 on the amount due. Effective March 26, 2007, the Maralex Agreement was further amended to increase the amount of cash due under the Agreement by \$200,000 and to amend the payment terms to \$325,000 due on April 20, 2007 and \$2,275,000 due on April 30, 2007. The incremental \$200,000 has been recorded as interest expense in the three months ended March 31, 2007. The Company is currently negotiating to further extend the terms. In the event the Company is not able to reach an agreement to extend the terms, the Company might become subject to a penalty or damages related to its failure to timely meet its obligations.

On November 14, 2006, the Company and Lakes Oil N.L. entered into an agreement (the "Lakes Agreement") under which they will jointly develop Lakes Oil's onshore petroleum prospects (focusing on unconventional gas resources) in the Gippsland and Otway basins in Victoria, Australia. The arrangement is subject to various conditions precedent, including completion of satisfactory due diligence, and the satisfactory processing of certain retention lease applications. Under the Lakes Agreement, the Company or its subsidiary company Sweetpea will initially farm into 33-1/3% of Lakes Oil's permits by spending \$7 million in Lakes Oil's permits. In addition, the Company will subscribe for \$3 million in new shares in Lakes Oil at 1.5 cents (Australian). The Company will also have the right to increase its position in Lakes Oil's permits with two further 16-2/3% farm-in tranches of \$10 million each, exercisable within 12 months and 24 months, respectively, from the date of the first closing under the Agreement (the "Closing"). Under the Lakes Agreement, the Company has the right to participate in the same proportion in any permits which are non-contiguous to existing permits acquired by Lakes within two years from the Closing, and any contiguous permits acquired by Lakes moving forward, and the Company has a first right of refusal in other permits acquired by Lakes within five years from the Closing. The Company is to assume Lakes Oil's position as operator of the permits.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 5 - OIL AND GAS PROPERTIES (CONTINUED)

On December 29, 2006, the Company entered into an agreement ("PSA") with Galaxy Energy Corporation ("Galaxy") and its wholly owned subsidiary, Dolphin Energy Corporation ("Dolphin"), a related party, for the Company to purchase, through its wholly owned subsidiary, PetroHunter Operating Company, all of Galaxy's and Dolphin's oil and gas interests in the Powder River Basin of Wyoming and Montana. The controlling owner of PetroHunter's largest single shareholder (MAB Resources LLC) is Marc A. Bruner. Mr. Bruner is a 14.3% beneficial shareholder of Galaxy and the father of the President and Chief Executive Officer of Galaxy. Dolphin owns an average 86% working interest in 197 oil and gas wells in the Powder River Basin. Twenty-two wells are currently selling gas at an average rate of 850,000 cubic feet a day. The remaining wells are in various stages of dewatering, shut-in waiting on pipeline, or waiting to be completed.

The PSA provides for the Company to pay \$45 million to acquire all of Galaxy's and Dolphin's oil and gas interests in Sheridan, Johnson, Converse and Campbell Counties in Wyoming, and in Big Horn, Custer, Powder River and Rosebud Counties in Montana. The purchase price will be \$20 million in cash and \$25 million in shares of the Company's common stock. Closing of the transaction will be subject to approval by Galaxy's senior lenders, approval in its discretion of all matters by the Company's Board of Directors, including the Company receiving financing on terms acceptable to it, and various other terms and conditions. Closing of the transaction, which was originally scheduled to occur by February 28, 2007, has been extended until May 31, 2007. Either party may terminate the agreement if the closing has not occurred by May 31, 2007. The Company has paid to Galaxy a \$2 million earnest money payment due under the terms of the agreement and has advanced an additional \$243,777 towards operating costs of the assets to be acquired. In the event the sale is not consummated, the amounts advanced to Galaxy will be converted to unsecured notes payable by Galaxy to the Company.

On March 21, 2007, the Company entered into a Partial Assignment of Contract and Guarantee (the "Assignment") with MAB. Pursuant to this Assignment, the Company assigned MAB its right to purchase an undivided 45% interest in oil and gas interests in the Powder River Basin of Wyoming and Montana, which right PetroHunter obtained in the PSA with Galaxy. As consideration for the Assignment, MAB assumed the Company's obligation under the PSA to pay Galaxy \$25 million in PetroHunter common stock. MAB also agreed to indemnify the Company against costs relating to or arising out of the termination or breach of the PSA by Galaxy or Dolphin, and MAB agreed to guarantee the payment of principal and interest due to the Company in the event the PSA does not close.

The Company's exploration projects continue to be evaluated, and management believes that the carrying costs of these projects are recoverable. Should the Company be unsuccessful in its exploration activities, the carrying cost of these prospects will be charged to operations. The Company charged to operations all property development costs incurred to MAB under the related EDA's. None of the Company's projects had production as of the date of acquisition and, as of March 31, 2007, the Company had received revenues from initial testing and

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

production on certain of its projects.

15

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 6 - DUE FROM JOINT INTEREST OWNER

The Company has been in negotiations with an unrelated third party oil and gas operator (the "Third Party") to exchange leasehold interests in certain oil and gas leases in the Piceance Basin of Colorado held by the Company for interests in certain oil and gas leases held by the Third Party in the Piceance Basin. During the six months ended March 31, 2007, the Company had drilled, as operator, seven wells on oil and gas leases which are subject to the above-described negotiations. The Company's record title interest in the leases on which the seven wells were drilled is currently 15.4%. As of March 31, 2007 the Company has recorded only its share of costs in the seven wells, based upon its 15.4% record title interest, as Oil and Gas Properties, and has recorded the 84.6% of costs incurred on behalf of the Third Party, as Due From Joint Interest Owner. At March 31, 2007, this amount totaled \$10,618,987. In the event the negotiations are successfully consummated, the Company's interest in those leases will increase to 100% and the balance Due From Joint Interest Owner will be reclassified to Oil and Gas Properties. In the event the negotiations are not successfully consummated, the Third Party will be obligated to reimburse the Company for all costs incurred for the Third Party's 84.6% working interest. Management believes the transaction will be successfully consummated in the third quarter of fiscal 2007, and that the amounts classified as Due from Joint Interest Owner at March 31, 2007 will subsequently be reclassified to Oil and Gas Properties.

NOTE 7 - ASSET RETIREMENT OBLIGATION

SFAS 143, "Accounting for Asset Retirement Obligations," addresses financial accounting and reporting for obligations associated with the retirement of tangible long-lived assets and the associated asset retirement costs. This statement requires companies to record the present value of obligations associated with the retirement of tangible long-lived assets in the period in which it is incurred. The liability is capitalized as part of the related long-lived asset's carrying amount. Over time, accretion of the liability is recognized as an operating expense and the capitalized cost is depreciated over the expected useful life of the related asset. The Company's asset retirement obligations relate primarily to the plugging, dismantlement, removal, site reclamation and similar activities of its oil and gas properties.

The following table summarizes activity related to the accounting for asset retirement obligations for the six months ended March 31, 2007 and 2006:

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

	2007	2006
	-----	-----
Asset retirement obligations, beginning of period	\$ 522,054	\$ -
Liabilities incurred	15,755	-
Revisions to estimates	(213,825)	-
Liabilities settled	-	-
Accretion expense	2,119	-
	-----	-----
Asset retirement obligations, end of period	\$ 326,103	\$ -
	=====	=====

16

PETROHUNTER ENERGY CORPORATION
 (A DEVELOPMENT STAGE COMPANY)
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 MARCH 31, 2007

NOTE 8 - CONVERTIBLE NOTES

Prior to the merger with GSL on May 12, 2006, Digital entered into five separate loan agreements, aggregating \$400,000, due one year from issuance, commencing October 11, 2006. The loans bear interest at 12% per annum, are unsecured, and are convertible at the option of the lender, at any time during the term of the loan or upon maturity, at a price per share equal to the closing price of the Company's common shares on the OTC.BB market on the day preceding notice from the lender of its intent to convert the loan. As of March 31, 2007, the Company was in default on payment of an aggregate \$350,000 of notes that matured.

In December 2006, PetroHunter Australia, commenced the sale, pursuant to a private placement, of up to \$50,000,000 of convertible notes. As of January 8, 2007, the Company had received proceeds of \$1,530,000 from the offering. In February 2007, the Company terminated the offering, agreeing to refund \$30,000 to four investors, and converting \$1,500,000 from one investor as the initial funding under a Credit and Security Agreement entered into January 9, 2007. (See Note 10.)

NOTE 9 - NOTE PAYABLE - RELATED PARTY

Effective January 1, 2007, in conjunction with the MAB Consulting Agreement, the Company issued a \$13.5 million promissory note (the "MAB Note") as partial consideration for MAB's assignment of its undivided 50% working interest in the oil and gas properties (Note 4). The MAB Note bears interest at a rate equal to LIBOR and requires monthly principal payments of \$225,000 plus interest commencing January 31, 2007. As of March 31, 2007, the outstanding balance of the MAB Note was \$13,050,000 of which \$2,925,000 was currently due.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

NOTE 10 - NOTES PAYABLE

On January 9, 2007, the Company entered into a Credit and Security Agreement (the "Financing") with Global Project Finance AG, a Swiss company, for mezzanine financing in the amount of \$15 million. The Financing provides for an interest rate of 6.75% over prime, and is secured by a first perfected lien on the Company's assets, limited to the specific portion of the assets to which the loan proceeds are applied by the Company. The Company has applied most of the proceeds of this loan to its drilling and development operations in the Piceance Basin, Colorado. The terms of the Financing also provide for the issuance of 1,000,000 warrants of the Company's shares upon execution of the Financing, and an additional 200,000 warrants, for each \$1 million draw down of the credit facility up to \$15 million. The warrants will be exercisable for five years after the date of the Financing. The exercise price of the warrants will be equal to 120% of the weighted average price of the Company's stock for the 30 days immediately prior to each warrant issuance date. The fair value of the warrants was estimated as of each respective issue date under the Black-Scholes pricing model, with the following assumptions: common stock based on market price of at issue date, zero dividends, expected volatility of 69.6% to 71.4%, risk free interest rate of 4.75% and expected life of 2.5 years. The fair value of the debenture warrants of \$1,953,719 was recorded as a discount to the note and is being amortized over the life of the note. During the three months ended March 31, 2007, amortization of discount in the amount of \$140,841 was included in interest expense.

Global Project Finance AG and its controlling shareholder were shareholders of the Company prior to the Financing. The initial draw down of \$1,500,000 was converted from the PetroHunter Australia convertible note offering (see Note 8). As of March 31, 2007, the Company has drawn down \$12,500,000 on the credit facility.

17

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 11 - STOCKHOLDERS' EQUITY

COMMON STOCK

In conjunction with the acquisition of properties under the Maralex Agreement (see Note 5) the Company issued 3,000,000 shares of its common stock as partial consideration for the acquisition.

COMMON STOCK SUBSCRIBED

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

On November 6, 2006, the Company commenced the sale of a maximum \$125,000,000 pursuant to a private placement of units at \$1.50 per unit. Each unit consisted of one share of the Company's common stock and one-half common stock purchase warrant. A whole common stock purchase warrant entitled the purchaser to acquire one share of the Company's common stock at an exercise price of \$1.88 per share through December 31, 2007. In February 2007, the Board of Directors determined that the composition of the units being offered would be restructured, and those investors who had subscribed in the offering would be offered the opportunity to rescind their subscriptions or to participate on the same terms as ultimately defined for the restructured offering. As of March 31, 2007, the Company has received subscriptions for \$3,067,500 for the sale of units pursuant to the private placement, of which \$2,250,000 was from a related party, and has recorded the proceeds and outstanding subscriptions from the offering as "Common Stock Subscribed".

COMMON STOCK ISSUABLE

The Company has agreed to issue its common stock for certain transactions as described below. As of March 31, 2007, the shares have not been issued and the value of the shares, calculated based upon the trading price of the stock on the commitment date, is included in "Common Stock Issuable" as of that date:

- o 50,000,000 shares in connection with the MAB Consulting Agreement (see Note 3) as partial consideration for the acquisition, valued at \$81,000,000;
- o 424,528 shares related to the cash investment of \$300,000 from an unrelated third party, valued at \$450,000;
- o 256,000 shares to a unrelated consultant as partial consideration for finders fees and consulting services related to the Maralex Agreement (see Note 4), valued at \$382,450; and
- o 121,250 shares to an unrelated individual, for commissions on the sale of the Company's convertible debt offering in 2006, valued at \$200,000. This amount represents the settlement of a previous dispute regarding the amount of commission on the debt offering. Accordingly, the \$200,000 has been recorded as finance costs and charged to operations as interest expense in the three months ended March 31, 2007.

STOCK OPTION PLAN

The Company adopted the 2005 Stock Option Plan (the "Plan"), as amended. Under the Plan, stock options may be granted at an exercise price not less than the fair market value of the Company's common stock at the date of grant. Options may be granted to key employees and other persons who contribute to the success of the Company. The Company has reserved 40,000,000 shares of common stock for the plan. At March 31, 2007, options to purchase 6,705,000 shares were available to be granted pursuant to the stock option plan.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

NOTE 11 - STOCKHOLDERS' EQUITY (CONTINUED)

In February 2007, the Company granted 500,000 options to each of two directors. The options were granted at an exercise price of \$1.38 per share and vest 50% at grant and 50% one year from grant. There were no options cancelled, forfeited or exercised during the period ended March 31, 2007. The fair value of options granted during the period, calculated using the Black Scholes option pricing model and under the following assumptions: expected option term, 2.75 years; risk free interest rate, 4.75%; dividend yield, -0- and expected volatility, 70.35%, resulted in a fair value of \$0.66 per share.

WARRANTS

The following stock purchase warrants were outstanding at March 31, 2007:

NUMBER OF SHARES	EXERCISE PRICE	EXPIRY DATE
34,442,500 (1)	\$1.00	2011
3,500,000 (2)	\$1.30-\$2.10	2012

(1) During 2006, the Company issued 35,442,500 stock purchase warrants in conjunction with the unit sale of common stock. The warrants are exercisable for a period of five years from date of issuance at an exercise price of \$1.00 per share.

(2) Pursuant to the Credit and Security Agreement entered into on January 9, 2007 (Note 10) the Company issued 1,000,000 stock purchase warrants upon execution of the Credit Agreement, and an additional 2,500,000 warrants for draws on the facility. The warrants are exercisable for five years from the date of draw. The exercise price of the warrants is 120% of the weighted average price of the Company's stock for the 30 days immediately prior to each warrant issuance date.

NOTE 12 - RELATED PARTY TRANSACTIONS

During the three months ended March 31, 2007, pursuant to the MAB Agreement and the \$13.5 million promissory note issued thereunder (see Note 4), the Company incurred interest expense of \$179,719 and made principal payments of \$450,000. As of March 31, 2007, the Company owed MAB principal and accrued interest of \$13,229,719 under the terms of the promissory note.

During the six months ended March 31, 2007, the Company incurred \$75,000 of consulting fees pursuant to the MAB Agreement and \$1,815,000 in property development costs to MAB under the Development Agreement between MAB and the Company. At March 31, 2007, in addition to the amount due under the promissory note as discussed above, MAB was owed \$779,331 by the Company.

On March 21, 2007, the Company entered into a Partial Assignment of Contract and Guarantee (the "Assignment") with MAB. Pursuant to this Assignment, the Company assigned MAB its right to purchase an undivided 45% interest in oil and gas interests in the Powder River Basin of

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

Wyoming and Montana, which right the Company obtained in the PSA with Galaxy (see Note 5). As consideration for the Assignment, MAB assumed the Company's obligation under the PSA to pay Galaxy \$25 million in PetroHunter common stock. MAB also agreed to indemnify the Company against costs relating to or arising out of the termination or breach of the PSA by Galaxy or Dolphin, and MAB agreed to guarantee the payment of principal and interest due to the Company in the event the PSA does not close.

19

PETROHUNTER ENERGY CORPORATION
(A DEVELOPMENT STAGE COMPANY)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007

NOTE 12 - RELATED PARTY TRANSACTIONS (CONTINUED)

At March 31, 2007, the Company is owed \$73,619 from MAB for oil and gas revenues for its share of initial production earned through December 31, 2006 pursuant to the Development and EDA agreements with MAB.

In June 2006, the Company entered into an Office Sharing Agreement with Falcon Oil & Gas Ltd. ("Falcon") for office space in Denver, Colorado, of which Falcon is the lessee. Under the terms of the agreement, Falcon and the Company share, on an equivalent employee cost basis, all costs related to the office space, including rent, office operating costs, furniture and equipment and any other expenses related to the operations of the corporate offices. The 75% owner of the largest single shareholder of the Company is also the Chief Executive Officer and a Director of Falcon. At March 31, 2007, Falcon owed the Company \$109,952 for Falcon's share of costs incurred pursuant to the agreement.

During the six months ended March 31, 2006, the Company incurred consulting fees related to services provided by its officers in the aggregate amount of \$420,531; and incurred \$1,520,000 in property development costs to MAB under the Development Agreement between MAB and the Company.

NOTE 13 - COMMITMENTS AND CONTINGENCIES

ENVIRONMENTAL

Oil and gas producing activities are subject to extensive environmental laws and regulations. These laws, which are constantly changing, regulate the discharge of materials into the environment and may require the Company to remove or mitigate the environmental effects of the disposal or release of petroleum or chemical substances at various sites. Environmental expenditures are expensed or capitalized depending on their future economic benefit. Expenditures that relate to an existing condition caused by past operations and that have no future economic benefit are expensed. Liabilities for expenditures of a noncapital nature are recorded when environmental assessment and/or remediation is probable, and the costs can be reasonably estimated.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

CONTINGENCIES

The Company may from time to time be involved in various claims, lawsuits, and disputes with third parties, actions involving allegations of discrimination, or breach of contract incidental to the operations of its business. The Company is not currently involved in any such incidental litigation which it believes could have a materially adverse effect on its financial condition or results of operations.

NOTE - 14 - SUBSEQUENT EVENTS

In April 2007, the Company received additional advances of \$2.5 million under the terms of the Credit and Security Agreement (see Note 10); and additional advances from the same lender of \$1.5 million pursuant to another loan agreement presently being negotiated.

20

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our Consolidated Financial Statements and related notes appearing elsewhere in this Form 10-Q.

PetroHunter Energy Corporation ("PetroHunter"), formerly Digital Ecosystems Corp. ("Digital"), through the operations of its wholly owned subsidiary, PetroHunter Operating Company, is a global oil and gas exploration and production company with primary assets consisting of a working interest in oil and gas leases and related interests in various oil and natural gas prospects, including approximately 220,000 net acres in Colorado, Utah and Montana and approximately seven million net acres in the Northern Territory of Australia. The properties are managed and operated in three groups: Heavy Oil, Piceance Basin, and Australia.

PetroHunter Operating Company (formerly GSL Energy Corporation) was formed in June 2005 as a Maryland corporation, and on May 12, 2006 completed a stock exchange by which its stockholders received more than 85% of Digital's outstanding stock (the "Stock Exchange"). The business of PetroHunter Operating Company became the business of Digital. Subsequent to May 2006, Digital acquired all the remaining outstanding stock of PetroHunter Operating Company, and effective August 14, 2006, Digital changed its name from Digital Ecosystems Corp. to PetroHunter Energy Corporation and changed its domicile to Maryland. Digital was incorporated on February 21, 2002 under the laws of the State of Nevada.

In October 2006, GSL Energy Corporation ("GSL") changed its name to PetroHunter Operating Company. On November 8, 2005, GSL formed Paleotechnology, Inc. ("Paleo") as a wholly-owned subsidiary for the purpose of exploring and developing new products and processes using by-products of petroleum extraction environments. On September 11, 2006, PetroHunter formed PetroHunter Heavy Oil Ltd. as a wholly-owned subsidiary for the purpose of holding and developing its heavy oil assets. Effective September 30, 2006, PetroHunter acquired 50% of the outstanding common shares of Sweetpea Corporation Pty Ltd ("Sweetpea"), an Australian corporation; and effective January 1, 2007 acquired the remaining

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

50%. Sweetpea is the record owner of four exploration permits issued by the Northern Territory of Australia. On October 20, 2006, PetroHunter formed PetroHunter Energy NT Ltd., now known as PetroHunter Australia Ltd. ("PetroHunter Australia") for the purpose of holding and developing its assets in Australia. Collectively, PetroHunter and its subsidiaries are referred to herein as the "Company," "we," "us" or "our".

As a result of the Stock Exchange, GSL, now known as PetroHunter Operating Company, became a wholly owned subsidiary of our Company. Since this transaction resulted in the former shareholders of GSL acquiring control of our Company, for financial reporting purposes the business combination was accounted for as an additional capitalization of the Company (a reverse acquisition with GSL as the accounting acquirer). In accounting for this transaction:

- i. GSL was deemed to be the purchaser and parent company for financial reporting purposes. Accordingly, its net assets were included in the consolidated balance sheet at their historical book value; and
- ii. Control of the net assets and business of the Company was acquired effective May 12, 2006 for no consideration.

21

PetroHunter Operating Company is considered a development stage company as defined by Statement of Financial Accounting Standards ("SFAS") No. 7, and its principal activities since inception have been raising capital through the sale of common stock and convertible notes and the acquisition of oil and gas properties in the Western United States and Australia.

MAB RESOURCES LLC

Effective January 1, 2007, we entered into an entered into an Acquisition and Consulting Agreement (the "Consulting Agreement"), as amended, with MAB Resources LLC ("MAB"), which replaced in its entirety the Management and Development Agreement (the "Development Agreement") entered into July 1, 2005, and materially revised our relationship with MAB. MAB is a Delaware limited liability company and our largest shareholder. MAB is in the business of oil and gas exploration and development. Under the terms of the Consulting Agreement:

- o Our working interest in all our oil and gas properties doubled (from 50% undivided interest in the properties to 100%);
- o Our prior obligation to carry MAB for its 50% portion of the first \$700 million in capital costs was eliminated;
- o Our aggregate monthly payments to MAB related to the existing properties were reduced from \$600,000 to (i) \$25,000 for consulting, plus (ii) \$225,000 for payments under a \$13.5 million promissory note as partial consideration for MAB's assignment of its previous undivided 50% working interest in the properties;
- o MAB's 3% overriding royalty was increased to 5% (the "Override"), but the Override does not apply to our Piceance II properties, and does not apply to the extent that the Override would cause our net revenue interest under an oil and gas lease to be less than 75%;
- o MAB will receive 7% of the issued and outstanding shares of PetroHunter Australia, as of the date that we receive PetroHunter Australia shares in consideration for our assignment of our rights and obligations in the Northern

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

Territory (Australia) permits to PetroHunter Australia.

The new agreement also provides for the issuance of 50 million shares of our common stock to MAB. MAB has the right and opportunity to receive up to an additional 50 million shares, to be issued over a five-year period in specified numbers of shares that are tied to our performance in booking reserves. The entire Consulting Agreement, including the monthly payments to MAB, terminates after five years, except MAB's overriding royalty continues for the life of the properties.

The transfer of MAB's working interest for our shares (including the carried interest), the revised override and MAB foregoing monthly capital cost advances, were analyzed by an independent economic evaluator, who, in a report dated April 10, 2007, concluded the transaction was fair to our existing shareholders.

Commencing July 1, 2005 and continuing through December 31, 2006, we and MAB operated pursuant to the Development Agreement, and a series of individual property agreements (collectively, the "EDAs"). The Development Agreement set forth: (a) MAB's obligation to assign to us a minimum 50% undivided interest in any and all oil and gas assets which MAB acquired from third parties in the future; and (b) our long-term relationship with MAB regarding the ownership and operation of all jointly-owned properties. Each of the Properties acquired was covered by a property-specific EDA that was consistent with the terms of the Development Agreement.

22

PROPOSED ACQUISITION OF POWDER RIVER BASIN PROPERTIES

On December 29, 2006, we entered into a Purchase and Sale Agreement (the "PSA") with Galaxy Energy Corporation ("Galaxy") and its wholly owned subsidiary, Dolphin Energy Corporation ("Dolphin"). Pursuant to the PSA, we agreed to purchase all of Galaxy's and Dolphin's oil and gas interests in the Powder River Basin of Wyoming and Montana (the "Powder River Basin Assets").

Marc A. Bruner, who is the controlling owner of our largest shareholder, also is a 14.3% beneficial shareholder of Galaxy. Marc A. Bruner is the father of Marc E. Bruner, the President, Chief Executive Officer and director of Galaxy. Marc E. Bruner is the stepson of Carmen J. Lotito, the Chief Financial Officer and a director of the Company.

The purchase price for Powder River Basin Assets is \$45 million, with \$20 million to be paid in cash and \$25 million to be paid in shares of our common stock.

Closing of the transaction is subject to approval by Galaxy's secured noteholders, approval of all matters in its discretion by our Board of Directors, including the Company obtaining outside financing on terms acceptable to its Board of Directors, and various other terms and conditions. Either party may terminate the agreement if closing has not occurred by May 31, 2007.

In January 2007, we paid to Galaxy a \$2 million earnest money payment due under the terms of the agreement. In the event the closing does not occur for any reason other than a material breach by us, the deposit shall convert into a promissory note (the "Note"), payable to us, and shall be an unsecured subordinated debt of both Galaxy and Dolphin, which is payable only after repayment of Galaxy's and Dolphin's senior indebtedness.

We became the contract operator of the Powder River Basin Assets

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

beginning January 1, 2007. At closing, the operating expenses incurred by us as the contract operator will be credited toward the purchase price, or if closing does not occur, will be added to the principal amount of the Note.

On March 21, 2007, we entered into a Partial Assignment of Contract and Guarantee (the "Assignment") with MAB. Pursuant to this Assignment, we assigned MAB our right to purchase an undivided 45% interest in oil and gas interests in the Powder River Basin Assets, which right we obtained in the PSA with Galaxy. As consideration for the Assignment, MAB assumed our obligation under the PSA to pay Galaxy \$25 million in PetroHunter common stock. MAB also agreed to indemnify us against costs relating to or arising out of the termination or breach of the PSA by Galaxy or Dolphin, and MAB agreed to guarantee the payment of principal and interest due to us in the event the PSA does not close.

23

PRODUCTION AND PRICES

The following table sets forth information regarding net production of oil and natural gas, and certain price and cost information for quarters ended March 31, 2007, December 31, 2006 and the fiscal year ended September 30, 2006. We did not have any production during the comparable periods of the prior year.

	FOR THE QUARTER ENDED MARCH 31, 2007	FOR THE QUARTER ENDED DECEMBER 31, 2006	FOR SE

PRODUCTION DATA:			

Natural gas (Mcf)	495,764	142,229	

Oil (Bbls)	3,485	584	

AVERAGE PRICES:			

Natural gas (per Mcf)	\$5.59	\$5.17	

Oil (per Bbl)	\$54.13	\$58.29	

PRODUCTIVE WELLS

The following table summarizes information at March 31, 2007, relating to the productive wells in which we owned a working interest as of that date. Productive wells consist of producing wells and wells capable of production. Gross wells are the total number of producing wells in which we have an interest, and net wells are the sum of our fractional working interests owned in gross wells.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

LOCATION	GROSS			OIL
	OIL	GAS	TOTAL	
Colorado	--	22	22	--
Utah	--	--	--	--
Montana	2	--	2	2.0
Australia	--	--	--	--
TOTAL	2	22	24	2.0

ACREAGE POSITIONS

As of March 31, 2007, we owned interests in the following developed and undeveloped acreage positions. Undeveloped acreage refers to acreage that has not been placed in producing units.

LOCATION	DEVELOPED		UNDEVELOPED
	GROSS ACRES	NET ACRES	
Colorado	480.0	102.2	25,759.0
Utah	0	0	173,738.0
Montana	80.0	80.0	93,515.0
Australia	0	0	7,000,000.0
TOTAL	560.0	182.2	7,293,012.0

24

SUMMARY OF DEVELOPMENT AND EXPLORATION PROJECTS AND PLAN OF OPERATIONS

The following is an update of our production and exploration areas and significant projects. While actively pursuing specific production and exploration activities in each of the following areas, we continually review additional acquisition opportunities in our core areas that meet our exploration criteria.

HEAVY OIL PROPERTIES

GREAT SALT LAKE, UTAH. We have 173,738 net mineral acres under lease (covered by approximately 78 leases) on two principal properties, the West Rozel

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

Field and Gunnison Wedge prospect in the Great Salt lake of Utah. Careful review of our drilling plan has resulted in planning to drill six vertical wells in the West Rozel Field. The six wells have been sited according to geology and the Utah State drilling regulations. Permits are being prepared for the six wells. Site visit was conducted to meet with the land owner for access to the lake from Little Valley Harbor.

PetroHunter is negotiating an extension to the current acquisition agreement due to delays caused by the previous negotiations between the Utah government and interested parties. These negotiations are complete and this allows for our permitting to be undertaken.

FIDDLER CREEK, MONTANA. We have completed major geologic studies on the 23,795 net acres on four anticlines on the northern portion of the Big Horn Basin, which extends from north central Wyoming into southern Montana. These properties encompass significant portions of Roscoe Dome, Dean Dome, Fiddler Creek and MacKay Domes, which we believe have significant estimated in place oil reserves. These structures are large asymmetric anticlines with proven production from several Cretaceous horizons; i.e., the Upper Greybull Sandstone, the Lower Greybull Sandstone and the Pryor Sandstone. The geology studies have identified locations that appear to have the most potential. The current program is in Fiddler Creek for one re-completion, one vertical well and one horizontal well; Roscoe Dome has two re-completions and one horizontal well; Dean Dome is one re-completion and two vertical wells. As the program proceeds refinements will be made based on results.

PROMISED LAND, MONTANA. We have acquired 49,120 net acres in a resource play evaluating heavy oil reservoirs in Jurassic Swift Formation and lower Cretaceous Bow Island and Sunburst Sandstone reservoirs in north central Montana. The Swift reservoirs were deposited in a shallow marine to estuarine depositional setting. The Swift sandstones are commonly oil saturated in the area, and most well tests report oil shows in the Swift. The reservoirs are up to 60 feet thick and composed of high quality sandstone, averaging about 20 percent porosity and permeabilities range up to one Darcy. The oil gravities range from 10o to 22o API with viscosities of 1500 centipoise to greater than 50,000 centipoise at 125oF. Additional conventional petroleum potential is possible in Devonian Duperow and Nisku formations, and in the Mississippian Madison Formation. We are now evaluating a seismic program to better define locations for an initial drilling program.

We do not have any drilling commitments with respect to this property.

PLAN OF OPERATIONS. We anticipate that, over the next twelve months, we will incur the following costs related to our heavy oil prospects in Montana and Utah:

- o \$5,000,000 to \$7,000,000 to add land in Montana in areas where we have already completed acquisitions;

25

- o \$7,000,000 to \$14,000,000 in connection with the Fiddler Creek project, to include drilling, completion and production facilities; and
- o \$15,000,000 to \$21,000,000 in connection with the Great Salt Lake project, to include project design, project equipment procurement, site infrastructure development and initial drilling.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

PICEANCE BASIN, COLORADO PROPERTIES

BUCKSKIN MESA PROJECT. A 26-square mile 3D seismic survey has been licensed, re-processed, and interpreted to focus initial drilling in areas of thickest pay and enhanced fracturing. We have acquired approximately 20,000 net acres of leasehold in Rio Blanco County, Colorado. We have applied for and received six approved drilling permits to test targets in the Cretaceous Mesa Verde Group. We have drilled and cased our first well at Buckskin mesa, the Anderson 6-16, with a total depth of 10,785 feet. Log analysis indicates a gross pay interval in excess of 3,500 feet, with a net pay of 600 feet. Gas shows during drilling averaged 3,000 units with peaks as high as 20,000 units. We have drilled and cased the Anderson 13-19 to a total depth of 10,835 feet. This well also had gas shows during drilling. Log analysis of the second well indicates net pay of 572 feet. The third well, Lake 16-21, was cased on April 9, 2007 and has net sandstone pay of 590 feet.

PICEANCE II PROJECT. As of March 31, 2007, we had interests in 19 producing wells, 18 wells waiting on completion, and 1 well is being drilled.

Production is from frac-stimulated perforations in stacked sands of the fluvial Williams Fork formation.

On November 28, 2006, we executed a purchase and sale agreement with Maralex Resources, inc. and Adelante oil & Gas, LLC (collectively "Maralex") for the acquisition and development of 2,000 net acres in the Jack's Pocket Prospect in Garfield County, Colorado. Under the terms of the agreement, an initial payment of \$100,000 was made upon execution and the balance of \$2.9 million cash and issuance of 2,428,100 shares of our common stock was due on January 15, 2007. Effective January 12, 2007, the agreement was amended to extend the payment terms of the cash due through March 15, 2007, and increase the shares to be issued to 3 million. These shares have been issued as of January 31, 2007. Effective March 26, 2007, the agreement was further amended to extend the payment terms. We are obligated to drill four wells on these leases during 2007.

The Company has been in negotiations with an unrelated third party oil and gas operator (the "Third Party") to exchange leasehold interests in certain oil and gas leases in the Piceance Basin of Colorado held by the Company for interests in certain oil and gas leases held by the Third Party in the Piceance Basin. During the six months ended March 31, 2007, the Company had drilled, as operator, seven wells on oil and gas leases which are subject to the above described negotiations. The Company's record title interest in the leases on which the seven wells were drilled is currently 15.4%. As of March 31, 2007 the Company has recorded only its share of costs in the seven wells, based upon its 15.4% record title interest, as oil and gas properties, and has recorded the 84.6% of costs incurred on behalf of the Third Party, as Due From Joint Interest Owner. At March 31, 2007 this amount totaled \$10,618,987. In the event the negotiations are successfully consummated the Company's interest in those leases will increase to 100% and the balance Due From Joint Interest Owner will be reclassified to Oil and Gas Properties. In the event the negotiations are not successfully consummated, the Third Party will be obligated to reimburse the Company for all costs incurred for the Third Party's 84.6% working interest. Management believes the transaction will be successfully consummated in the third quarter of fiscal 2007, and that the amounts

classified as Due from Joint Interest Owner at March 31, 2007 will subsequently be reclassified to Oil and Gas Properties.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

PLAN OF OPERATIONS. We expect that the development of our Colorado properties will include: (i) continued drilling of wells in the southern portion of the Piceance Basin, where we expect to complete at least 12 wells for additional gas production, and design and construction of a two-mile low pressure gathering system to connect these wells to market.

Associated with the development of our Colorado properties, we anticipate that, over the next twelve to twenty-four months, we will incur costs of \$8,000,000 to \$32,000,000 to add leasehold in the Piceance II and Buckskin mesa project areas.

AUSTRALIAN PROPERTIES

BEETALOO BASIN. Plans are to begin drilling in the Beetaloo Basin around July 1, 2007. To date, seven drilling locations have been identified based on extensive geological and geophysical analysis. These locations have been cleared through the Northern Land Council, responsible for protecting Native Lands, and permits have been submitted to the Department of Primary Industries, Fisheries and Mines located in Darwin, Northern Territory. Final drilling approval is expected in May. These locations have been staked and will be formally surveyed, also in May. Preparing drilling pads and access lines will commence the last week of May.

Sweetpea has signed a Letter of Intent with Century Resources to provide a drilling rig for the drilling operations. The rig is currently scheduled to begin mobilizing to the Beetaloo Basin on June 15, 2007. In preparation for the drilling program, a drilling yard has been constructed in the permit area. Casing and other necessary materials are being ordered and will arrive before the first of June.

From July through November of 2006, 686 kilometers of new 2D seismic data were acquired throughout the Beetaloo Basin. Additionally, 1000 kilometers of previously acquired 2D seismic data were reprocessed. Along, with the other existing 1500 kilometers of 2D seismic data that have not been reprocessed, geologic structure maps have been generated for the basin. Ongoing work is proceeding to delineate drilling locations beyond the initial seven locations.

The exploration drilling program for 2007 will test several play concepts within the basin. Hydrocarbon potential exists in shallow, conventional structures (in the form of oil), and in deeper unconventional reservoirs, including fractured shales and basin centered gas accumulations. The unconventional plays may be gas and/or oil. All of the exploration wells are planned to reach a total depth in the Bessie Creek Sandstone formation. The deepest penetration is expected to be 3000 meters.

Sweetpea currently controls 7 million contiguous acres in the Beetaloo Basin. Applications for another 1.5 million acres have been submitted to the Territory's Ministry. Sweetpea owns the existing four permits.

GIPPSLAND AND OTWAY BASINS. On November 14, 2006, we entered into an agreement with Lakes Oil N.L. ("Lakes Oil"), under which we will jointly develop Lakes Oil's onshore petroleum prospects (focusing on unconventional gas resources) in the Gippsland and Otway basins in Victoria, Australia. Under an amendment to the original agreement, completion of the agreement is scheduled for June 30, 2007 with PetroHunter, or our subsidiary company, Sweetpea, farming into 33-1/3 of Lakes Oil's permits by spending \$7 million on exploration efforts. In addition, we will subscribe for \$3 million in new shares in Lakes Oil at 1.5 cents (Australian). We also have the right to increase our position in Lakes Oil's

permits with two further 16-2/3% farm-in tranches of \$10 million each, exercisable within 12 months and 24 months, respectively.

Under the agreement, Sweetpea will be the operator of the permits, but has signed a sub operator agreement with Lakes Oil to take advantage of their infrastructure in Victoria.

NORTHWEST SHELF AREA. Effective February 19, 2007, the Commonwealth of Australia granted to Sweetpea an exploration permit in the shallow, offshore waters of Western Australia. The permit, WA-393-P, has a six-year term and encompasses almost 20,000 acres.

PLAN OF OPERATIONS. In Australia we plan to explore and develop portions of the 7,000,000 acres of the project area in the Northern Territory of Australia (Beetaloo Basin). During 2007, we plan to drill a minimum of eight wells in the exploration permit blocks. We anticipate that, over the next twelve months, we will incur \$45,000,000 to \$60,000,000 in costs related to drilling, well completion and a potential delineation seismic program.

Under the agreement with Lakes Oil, we or our subsidiary company, Sweetpea, will initially farm into 33-1/3% of Lakes Oil's permits by spending \$7 million in Lakes Oil's permits. In addition, we will subscribe for \$3 million in new shares in Lakes Oil at 1.5 cents (Australian).

CURRENT FINANCING ACTIVITIES

To fund the planned operations described above and our fixed commitments for operating leases, delay rentals, property development fees and consulting fees and note payments to MAB totaling approximately \$2,700,000 for the fiscal year ended September 30, 2007, we are engaging in financing activities. On November 6, 2006, we commenced an offering of up to \$125,000,000 pursuant to a private placement of units at \$1.50 per unit. Each unit consisted of one share of our common stock and one-half common stock purchase warrant. A whole common stock purchase warrant entitled the purchaser to acquire one share of our common stock at an exercise price of \$1.88 per share through December 31, 2007. As of March 31, 2007, we had received \$3,067,500 from the sale of units pursuant to the private placement. In February 2007, our board of directors determined that the composition of the units being offered would be restructured, and those investors who had subscribed in the offering would be offered the opportunity to rescind their subscriptions or to participate on the same terms as ultimately defined for the restructured offering.

In December 2006, PetroHunter Australia commenced the sale, pursuant to a private placement, of up to \$50,000,000 of convertible notes. As of January 8, 2007, the Company had received proceeds of \$1,530,000 from the offering. In February 2007, PetroHunter Australia terminated the offering, agreeing to refund \$30,000 to four investors, and converting \$1,500,000 from one investor as the initial funding under a Credit and Security Agreement entered into January 9, 2007, as described below.

On January 9, 2007, we entered into a Credit and Security Agreement (the "Financing") with Global Project Finance AG, a Swiss company, for mezzanine financing in the amount of \$15 million. The Financing provides for an interest rate of 6.75% over prime, and is secured by a first perfected lien on the Company's assets, limited to the specific portion of the assets to which the loan proceeds are applied by the Company. We have applied most of the proceeds of this loan to its drilling and development operations in the Piceance Basin,

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

Colorado. The terms of the Financing also provide for the issuance of warrants to purchase 1,000,000 of our common shares upon execution of the Financing, and an additional 200,000 warrants, for each \$1 million draw down of the credit facility up to \$15 million. The warrants will be exercisable for five years after the date of the Financing. The exercise price of the warrants will be equal

28

to 120% of the weighted average price of our stock for the 30 days immediately prior to each warrant issuance date. Global Project Finance AG and its controlling shareholder were shareholders of the Company prior to the Credit Agreement. As April 30, 2007, we had drawn down all \$15,000,000 on the credit facility.

Subsequent to March 31, 2007, we received an additional \$1.5 million advance from Global Project Finance AG, in anticipation of a borrowing facility currently being negotiated. The terms of the borrowing facility have not been finalized as of the date of this report, but are expected to be similar to the terms of the Financing.

LIQUIDITY AND CAPITAL RESOURCES

We had not commenced principal operations or earned significant revenue as of March 31, 2007, and are considered a development stage company. During the period from inception to March 31, 2007, we incurred a cumulative net loss of \$32,782,278 and at that date have a working capital deficit of \$24,744,260. In order to fund our planned exploration and development of oil and gas properties, we will require significant additional funding. We have sold approximately \$72.5 million of notes, convertible notes and common stock from inception through March 31, 2007, and our management believes that we will be successful in raising additional funding to have sufficient capital to meet our obligations for our planned operations for at least the next twelve months.

The Company at March 31, 2007 is vastly different from its existence at March 31, 2006. At March 31, 2006, we had been operating for approximately nine months, had no employees, and had acquired an interest in two properties, West Rozel and Buckskin Mesa, aggregating approximately 12,400 net mineral acres. During the 2006 fiscal year and the first six months of the current fiscal year, we added 16 employees, moved to offices in Denver, Colorado, and acquired an interest in properties aggregating approximately 7,207,000 acres.

We funded the acquisition of these properties and the increased level of activity primarily through the sale of debt and equity securities for cash. We also issued 8,800,000 shares, valued at \$0.50 per share, as partial consideration for the acquisition of oil and properties and as consideration for a finder's fee on an oil and gas prospect. At March 31, 2007, we had a working capital deficit of \$24,744,260 and cash of \$1,702,427. In addition, we will need to raise additional funds for our planned operations and acquisitions.

Prior to the acquisition of PetroHunter Operating Company in May 2006, we entered into five separate loan agreements, aggregating \$400,000, due one year from issuance, commencing October 11, 2006. The loans bear interest at 12% per annum, are unsecured, and are convertible, at the option of the lender at any time during the term of the loan or upon maturity, at a price per share equal to the closing price of our common stock on the OTC Bulletin Board on the day preceding notice from the lender of its intent to convert the loan. As of March 31, 2007, we were in default on payment of an aggregate of \$350,000 of notes.

Edgar Filing: PetroHunter Energy Corp - Form 10-Q/A

CASH USED IN OPERATING ACTIVITIES. Primarily as a result of our net loss of \$9,971,445, we used cash of \$4,963,760 for six months ended March 31, 2007. See "Results of Operations" below for the discussion of our operating expenses. The principal adjustments to reconcile the net loss to net cash used in operating activities were stock based compensation of \$3,616,724, as a result of stock options issued to employees and consultants; depreciation, depletion, amortization, impairment and accretion of \$1,190,097; and common stock issued for financing costs of \$1,440,918. In comparison, we used \$4,531,767 of cash in operations for the six months ended March 31, 2006.

29

CASH USED IN INVESTING ACTIVITIES. We used cash of \$19,038,791 in investing activities during the six months ended March 31, 2007, primarily for our additions to our oil and gas properties of \$5,556,386, costs incurred on behalf of joint interest owners of \$10,618,987, and deposits on oil and gas property acquisitions of \$2,243,777. Depending on the outcome of current negotiations with third party joint interest owners, the amount expended on behalf of the joint interest owner will either be reclassified to additions to oil and gas properties, or will be collected in the form of cash payments from the joint interest owner. We also used \$525,000 for restricted cash, which are certificates of deposit underlying letters of credit for exploration permits, state and local bonds and guarantees to vendors. During the six months ended March 31, 2006, we used \$7,847,782 for additions to oil and gas properties.

We currently anticipate our capital budget will be approximately between \$165 and \$260 million for the period ending December 31, 2007, which we plan to use for a diverse portfolio of development and exploration wells in our core areas of operation. If we are unable to obtain capital through the sale of our securities or a credit facility or otherwise, our ability to execute our development plans could be greatly limited. We may consider selling down a portion of our interests in some of our exploration and development projects to industry partners to generate additional funds to finance our 2007 capital budget.

CASH PROVIDED BY FINANCING ACTIVITIES. Cash provided by financing activities in the six months ended March 31, 2007 consisted of proceeds from promissory notes sold under a Credit and Security Agreement of \$12,500,000 and proceeds from the sale of units in our private placement shares for gross proceeds of \$3,067,500. Total cash provided by financing activities was \$15,073,202, resulting in cash of \$1,702,427 at March 31, 2007.

It is anticipated that the continuation and future development of our business will require additional, substantial, capital expenditures. We believe cash flow from our existing producing wells and wells soon to be connected will provide s
