**CRUISING AT HIGH SPEED
Performance of CVRD in 2005**

Rio de Janeiro, March 6, 2006 – Companhia Vale do Rio Doce (CVRD) has ended 2005 with record operational and financial results for the third year running.

Despite the strong cost pressures, due to the cyclical rise in input prices and the appreciation of the Brazilian Real against the US dollar, CVRD set several new performance records for the year. Production maximization – made possible by the conclusion of various projects, the fact that most of its units were operating at full capacity, as well as the productivity gains achieved, together with the high prices due to the excess global demand for ores and metals – all enabled CVRD to produce an excellent performance.

New records set in 2005

Sales:

iron ore and pellets, 252.189 million tons

bauxite, 5.600 million tons

alumina, 1.738 million tons

primary aluminum, 498,000 tons

kaolin, 1.218 million tons

Railroad general cargo transported for clients, 28.4 billion net ton kilometers (ntk).

Cargo handled for clients in CVRD ports, 30.5 million tons.

Gross revenues of R\$ 35.4 billion.

Consolidated exports of US\$ 7.021 billion, up 26.9% compared to 2004.

Net exports (exports less imports) of US\$ 6.339 billion, 37.3% higher than the figure reported in 2004. CVRD's contribution to Brazil's trade surplus continued to be extremely significant, being responsible for 14.1% of the record trade surplus of US\$ 44.8 billion last year. This results consolidates CVRD as the largest Brazilian net exporter.

Operating profit, as measured by EBIT (earnings before interest and tax) of R\$ 14.5 billion.

The financial and operational information contained in this press release, except where otherwise indicated, was consolidated in accordance with Brazilian generally accepted accounting principles (Brazilian GAAP). According to the criteria of Brazilian GAAP, those companies in which CVRD has effective control, or shared control as defined by shareholders agreement, are included in the consolidated figures. In the instances where CVRD has effective control, the consolidation is carried out on a 100% basis and the difference between this amount and the percentage of CVRD's equity stake in the subsidiary is discounted at the minority shareholding line. CVRD's main subsidiaries are Caemi, Alunorte, Albras, RDM, RDME, RDMN, Urucum Mineração, Docenave, Ferrovia Centro-Atlântica (FCA), Rio Doce Europa, Itaco, CVRD Overseas and Rio Doce International Finance. For companies in which control is shared, the consolidated figures are proportional to the equity stake held by CVRD in each company. The main companies in which CVRD has shared control are MRN, Valesul, Kbrasco, Nibrasco, Hispanobras, Itabrasco, GIIC and Samarco and CSI.

Table of Contents

BR GAAP

EBIT margin of 42.8%.

Cash generation, as measured by EBITDA (earnings before interest, tax, depreciation and amortization) of R\$ 16.7 billion.

Net earnings of R\$ 10.4 billion, corresponding to R\$ 9.07 per share.

Return on equity (ROE) of 43.4%.

Investments carried out in 2005 of US\$ 4.2 billion¹ US\$ 2.6 billion on organic growth, US\$ 757 million on maintaining existing operations and US\$ 800 million on acquisitions.

CVRD has successfully continued to implement its long-term strategy, making the most of opportunities offered by the economic cycle to invest with the discipline required to grow in a profitable manner and generate significant value for its shareholders.

In the last five years, CVRD has invested US\$ 10.5 billion, establishing itself as the private-sector company that most invest in Brazil, having commissioned 14 large projects in the areas of iron ore, pellets, manganese alloys, bauxite, alumina, copper, potash, electric power and logistics.

In 2006, CVRD plans to invest US\$ 4.626 billion, 77% in organic growth.

At the moment, 24 projects are being implemented and there are several others under studies.

Due to its policy of investing with a high return, the total return of CVRD shareholders in the period 2001-2005 reached to an annual average of 41.7%.

Alongside the private benefits which remunerate the investment effort of its thousands of shareholders, this process produces a series of benefits for Brazilian society. Thus, in the period 2001-2005, direct jobs provided by CVRD grew at an average annual rate of 17.1% CVRD will be offering 137,000 new jobs in 2006 its net exports contributed with US\$ 20 billion to the Brazil's trade surplus and its railroads transported 127 billion ntk for customers, making new businesses possible in agriculture and industry, as well as contributing to a veritable rebirth of the national railway equipment industry.

The projects developed by CVRD routinely contain initiatives dedicated to improving the degree of welfare in the communities where they are carried out, involving investment in physical infrastructure and education, in this way creating opportunities for social and economic mobility for local inhabitants.

One of the most serious challenges for a growing company is reconciling the financing of its investments with the shareholder dividends aspirations and at the same time preserving of a healthy balance sheet. CVRD has managed to simultaneously meet all these objectives.

In addition to significant investments, CVRD distributed R\$ 11.4 billion in dividends and interest on shareholders equity in the period 2001-2005. The amount distributed in 2005, of R\$ 3.1 billion, equivalent to R\$ 2.68 per share, constituted another record achieved this year.

Debt leverage, as measured by the ratio of total debt to adjusted EBITDA, according to the generally accepted accounting principles in the United States (US GAAP), at the end 2005 reached the lowest level in the past few years, of 0.77.

1 Calculated according to generally accepted accounting principles in the United States (US GAAP) and based on the amounts paid out.

Table of Contents**BR GAAP**

CVRD's financial soundness was duly recognized by being granted investment grade status by the world's three largest rating agencies.

The reduction in the cost of capital, influenced by this recognition, is very important to the extent that it helps CVRD invest significant funds, generating jobs, income and exports for Brazil.

BUSINESS OUTLOOK

With a solid outlook, the global economy is expanding at slightly more than 4% per year, with the developed countries the US, the 15 of Europe, and Japan growing at 3%, and the emerging market economies of Asia, Latin America and Eastern Europe at 6%.

The expansion is becoming more balanced between the different regions of the world, which until recently was believed to be possible only through considerable depreciation of the US dollar. However, this has been made possible by the restructuring of some important economies without requiring expansion of exchange rates volatility. The main implication of this re-balancing is reduction of the risk of a significant slowdown in the global economy as a result of an eventual recession the US economy.

The Japanese economy is returning to normality with the end of deflation and widespread over-capacity, and the significant decrease in non-performing bank loans. For the first time since 1996 bank credit is showing positive growth rates. Prices of commercial property have begun to rise after 14 years of decline, and industrial production is expanding firmly.

The behavior of GDP is becoming less dependent on exports, and the strong rise in the Nikkei-225, of 40% in 2005, translates investors' optimism on the future of Japanese economy. The long restructuring process has enabled companies to capitalize, investing and hiring again, giving a new dynamic to domestic demand.

In Germany, the largest economy in Europe, corporate restructuring has contributed to an increase in productivity, profits and investments. In the short term this generates a negative impact on consumer spending, which tends to reverse as expansion of investments continues. The IFO business climate indicator rose to its highest level since 1994, with positive expectation on the part of both industry and retailers, the latter already anticipating future improvement in consumer spending.

As in Japan, the German economy is beginning to show less dependence on external demand, and, in 2006, for the first time in many years, domestic demand is likely to be the main source of growth of real GDP.

Table of Contents

BR GAAP

In the US, the low growth of the economy in the fourth quarter of 2005, the weakest since the last quarter of 2002, was due to the effect of several shocks suffered over the July-September period of last year, which have now been absorbed, thus seen as a temporary volatility.

China grew 9.9% in 2005 and is expected to maintain the same rate of expansion this year. Domestic demand is strengthening with the expansion of public investments in infrastructure, which are being accelerated in the first year of the execution of the new five-year plan, and with the return of significant spending on real estate construction in medium-sized cities, characterizing a new cycle of investments.

In Brazil, the obtainment of several primary fiscal surpluses and the austerity in monetary policy contributed to promote a more stable environment, favoring economic growth. Besides that, higher exports and the good liquidity in the global financial markets contributed to generate significant improvement in the balance of payments, reducing its vulnerability. Consequently, a better performance of the economy is expected for 2006.

The world's industrial production indicators point to a solid and more balanced expansion in the coming quarters. In particular, the performance of orders and the relation between this variable and inventories are behaving in a very stable manner.

Thus the global scenario provides grounds for continuation of strong demand for mining and metals.

Reasonably large imbalances persist between global demand and supply for iron ore and alumina which, in spite of the additional capacity being put into operation in the coming months and the projects currently in progress, are not likely to be eliminated in the short-term.

It is estimated that the seaborne iron ore market reached 675 million tons in 2005, with China importing 275 million tons, representing an increase of 32% over 2004. In January 2006 China's seasonally adjusted imports were another all time record, which demonstrates continuity of the demand pressure in the iron ore market.

In one more production record, CVRD produced 240.4 million tons of iron ore in 2005. In 2006 the Company expects to increase its iron ore production to 264 million tons, to meet expansion in demand from its clients.

The spot iron ore market continues to be highly active and with prices higher than those for long-term contracts, reflecting the global excess of demand. Purchasers in this market have to face difficulties such as lower quality, price volatility and uncertain shipment frequencies, which harm their competitiveness and make their cash flows unstable.

The growth of the global fleet of capesize vessels, and the expansion of capacity of ports in countries such as Brazil, Australia and China, have caused a decline in the prices of freight in the spot market. This reduction, which comparing the April 2005 peak with today's prices is as much as US\$ 15 per ton for the Brazil-China route, results in an important fall in the cost of iron ore for the steelmakers who contract maritime freight in this market.

In the alumina spot market, prices are now over US\$ 600/ton, about 25% of the prices quoted for aluminum on the London Metal Exchange, reflecting increase in global scarcity. Stage 4 of Alunorte, CVRD's alumina refinery, started up at the end of January this year, and Stage 5 will begin operating in March, thus adding

Table of Contents

1.9 million tons/year to present capacity. In 2005, CVRD produced 2.6 million tons.

Simultaneously to the expansion of demand there are several types of limitations – much higher costs and supply restrictions of equipment and engineering services, greater relative scarcity of mineral reserves of good quality and substantial size, the need for logistics infrastructure, and the delay in obtaining environmental licenses – all these raise difficulties and a more lagged response of supply to increases in prices of ores and metals.

Systematic operation at full capacity increases the probability of production downtime. Given the restrictions on the supply of replacement parts and inventories at a historically low level, the impact of production problems on prices tends to be magnified. This has been important, for example, in the copper market, imposing an upward bias on prices. Particularly for metals, the growing flow of financial resources into investment funds in commodities, resulting from the allocation of part of the pension funds money to this class of assets, has now begun to constitute a new source of demand, pressuring prices.

Influenced by profound cuts in global production in the second half of 2005, the manganese alloys prices are now recovering slightly, especially high carbon manganese ferro alloys (FeHcMn), in which we saw relatively higher cuts in production between 2004 and 2005. CVRD has kept about one-third of its alloys production capacity idle.

The Brazilian agricultural crop is forecast to be 9.3% larger this year than last year, when it was harmed by drought in the southern region of the country. This reversal will have a positive impact on the performance of CVRD´s sales of potash and logistics services.

RELEVANT EVENTS

Absorption of the shares of Caemi

On January 26, 2006, the Board of Directors of CVRD approved the merger of all the preferred shares of Caemi Mineração e Metalurgia S.A. (Caemi) outstanding into CVRD. Non-controlling shareholders of Caemi will receive 0.04115 preferred PNA shares issued by CVRD for each preferred share they hold in Caemi. The exchange ratio reflects the performance of the prices of the preferred shares of CVRD and Caemi on the São Paulo Stock Exchange (Bovespa) during the 90 days period ending on January 23, 2006.

The necessary steps for carrying out the merger are being taken, and expected to be concluded at the end of March. CVRD is owner of 100% of the common shares and 40.06% of the preferred shares of Caemi, or 60.23% of its total capital. After the conclusion of the transaction CVRD will own all the shares of Caemi.

Maintaining the focus on organic growth

On January 26, 2006 CVRD´s Board of Directors approved a capital expenditure budget in the amount of US\$ 4.626 billion, the highest in its history. In 2006, US\$ 3.558 billion will be invested in organic growth, made up of US\$ 3.067 billion in greenfield and brownfield projects, and US\$ 491 million in research and

Table of Contents

BR GAAP

development. The remaining US\$ 1.068 billion will be allocated to stay in business expenditures. The ferrous minerals business will receive 46% of the total capital expenditure; 17% will be allocated to the aluminum business, 17% to the logistics services area, and 9% to non-ferrous minerals.

More details can be obtained on www.cvrd.com.br, Investor Relations section, under *press releases*.

Minimum dividend for 2006 of US\$ 1.3 billion

The Executive Board of CVRD will submit to the Board of Directors a proposal for payment of minimum dividend to shareholders of US\$ 1.3 billion in 2006. Taking into account the issue of new CVRD preferred (PNA) shares to be carried out upon completion of the merger of the shares of Caemi, if this is approved by the Company's shareholders, the dividend per outstanding share, common or preferred, will be US\$ 1.069367781.

Issue and repurchase of debt securities

In January 2006 CVRD issued US\$ 1 billion in 10-year bonds with 6.25% annual coupon and yield to investors of 6.254% per year (CVRD 2016). The spread over US treasuries with similar maturity was 190 basis points (bp), contrasting with the spread of 288 bp on the issue of CVRD 2013, with 10-year tenor and coupon of 9.0% per year, in August 2003.

The CVRD 2016 bond received rating BBB from Standard & Poor's and Baa3 from Moody's.

In parallel to this issue, CVRD repurchased approximately US\$ 176 million of the principal of the CVRD 2013.

The basis of these transactions was the focus of CVRD's financial policy on minimization of cost of capital.

Conclusion of the acquisition of Canico

In the last quarter of 2005 CVRD acquired 99.2% of Canico Resources Corp., for approximately US\$ 800 million. In February 2006 the acquisition of all the shares of Canico was completed, and they were withdrawn from trading on the Toronto Stock Exchange.

Canico was the owner of the Onça Puma laterite nickel project in the Brazilian state of Pará, which will be developed by CVRD, simultaneously with the Vermelho nickel project.

Ceará Steel project

In December 2005 CVRD announced that it will have a 9% stake in Ceará Steel, a steel project in the state of Ceará, Brazil, whose nominal capacity will be 1.5 million tons per year of steel slabs.

CVRD's investment will be US\$ 25 million, and the project has start-up planned for 2009. CVRD will supply 2.5 million tons of pellets annually to Ceará Steel, which will use it as raw material for 100% of the mill's needs.

Table of Contents

BR GAAP

The investment in the Ceará Steel project is part of CVRD's strategy of promoting the consumption of iron ore through minority stakes in steel projects located in Brazil.

First shipment of coal

In January the first shipment of Yongcheng anthracite coal, of 40,000 tons, arrived in Brazil from Henan Longyu Energy Resources Co. Ltd., joint venture between CVRD and Chinese companies, located in China.

This event is an important milestone in CVRD's strategy to become a player in the global coal market.

Sale of stake in Nova Era Silicon

In February, CVRD sold its entire stake in Nova Era Silicon (NES), 49% of the total capital, to JFE Steel Corporation, for US\$ 14 million.

This divestment is consistent with CVRD's strategic guideline for the manganese business, of focusing on manganese ore and manganese ferro alloys production through wholly owned subsidiaries.

Sale of stake in the Foz do Chapecó hydroelectric power plant

Also in February, CVRD sold its 40% stake in the consortium formed to build and operate the Foz do Chapecó hydroelectric power plant, for R\$ 9 million.

A NEW PLATEAU OF REVENUES

In 2005, CVRD's gross revenues exceeded the R\$ 35 billion barrier, totaling R\$ 35.350 billion, the highest in CVRD's history, and 21.8% higher than that obtained in 2004.

The increase in the sales price of CVRD's products contributed with R\$ 10.691 billion to the rise in gross revenues, while the increase in volume sold was responsible for R\$ 466 million.

On the other hand, the appreciation of the Brazilian Real in relation to the US dollar in 2005, of 20.2%, had a negative impact on CVRD's gross revenue of R\$ 4.827 billion. About 87% of CVRD's gross revenues are denominated and/or indexed to the US dollar.

Sales of ferrous minerals accounted for 70.3% of CVRD's total sales in 2005, while sales of products in the aluminum chain accounted for 10.9%, logistics services 9.3%, non-ferrous minerals 4.9% and steel products, 4.3%.

Revenues from sales to China grown from R\$ 3.079 billion in 2004 to R\$ 5.154 billion in 2005. However, CVRD continues to enjoy broad geographical diversification in its sales.

The Americas are the main sales destination, accounting for 37.1%, with the Brazilian market responsible for 22.8% of total revenues and the US, for 7.5%. This was followed by Asia, which in 2005 for the first time produced more steel than all the other regions in the world, with 29.2%, exceeding sales in Europe, which accounted for 27.3% of CVRD's gross sales.

CVRD's gross revenues in 4Q05 amounted to R\$ 9.204 billion, 18.2% higher than that reported in 4Q04.

COST PRESSURES AND THE EFFORTS TO OVERCOME THEM

In 2005, CVRD's cost of goods sold (COGS) amounted to R\$ 16.311 billion, an increase of 15.5%, or R\$ 2.188 billion, compared to 2004.

In 4Q05, CVRD's COGS totaled R\$ 4.407 billion, up 14.9% on 4Q04.

CVRD, as in the case of other mining and metals companies, is suffering from a general cost pressures arising from the economic cycle manifested by the increase in the price of equipment, spare parts, steel, energy, raw materials and services.

Expenditure on outsourced services, the principal item in COGS, which contributed R\$ 3.406 billion to the cost of goods sold, was up by R\$ 932 million compared to the previous year, mainly due to higher expenditure on railfreight

as a result of both the growth in the volume transported, as well as the increase in tariffs. Also impacting this line was higher expenditure on the waste removal, as well as maintenance services.

Table of Contents

BR GAAP

Outsourced services contributed R\$ 255 million to the raise in COGS between 4Q04 and 4Q05.

Expenditure on material increased by R\$ 780 million, amounting to R\$ 3.105 billion, being substantially influenced by the higher prices of spare parts, such as conveyor belts and tires.

In 4Q05, this item amounted to R\$ 777 million, compared to R\$ 674 million in 4Q04.

As a consequence of the amplification in CVRD's asset base, which had increased from R\$ 15.7 billion at the end of 2002, to R\$ 31.7 billion at the end 2005, the cost of depreciation and exhaustion for the year amounted to R\$ 1.468 billion, up R\$ 277 million in relation to 2004.

The cost of depreciation and exhaustion in 4Q05 was R\$ 393 million.

Expenditure on fuel oil, gas and electric power, of R\$ 3.241 billion, was R\$ 391 million higher than that observed in 2004. This rise in expenditure was due to the expansion of CVRD activities, as well as the price increases seen in these inputs. The average price of fuel oil for CVRD was up 21.2%, contributing significantly to this rise in expenditure.

In 2005, CVRD's electric power consumption increased by 5.3%, totaling 17.619 GWh, of which 38% was spent on the production of aluminum, and 8.9% on ferro-alloy operations.

In 4Q05, fuel oil, gas and electricity expenses were R\$ 881 million, R\$ 59 higher than the amount spent in 4Q04.

Expenditure on the purchase of products was down R\$ 281 million, dropping from R\$ 2.520 billion in 2004, to R\$ 2.239 billion in 2005, principally due to the sale of CVRD's stake in CST, concluded at the end of 2004. The effect of the appreciation in the Brazilian Real against the US dollar on purchases carried out by companies located outside Brazil also had a favorable effect, reducing the value of these purchases in Brazilian Reais.

In 4Q05, costs in this area amounted to R\$ 594 million.

In 2005, operational expenses totaled R\$ 3.126 billion, in line with the amount seen in 2004, of R\$ 3.115 billion. In 4Q05, CVRD's operational expenses totaled R\$ 850 million.

Sales expenses of R\$ 340 million, were R\$ 72 million less than in 2004. Administrative expenses, of R\$ 1.280 billion, saw an increase of 13.8% on the previous year, basically due to higher expenditure on publicity and advertising, the hiring of consultancy services and the 6.5% salary increase for employees in July 2005.

In 4Q05, sales expenses totaled R\$ 54 million, while administrative expenses amounted to R\$ 382 million.

Expenditure on research and development (R&D) increased by 52.7% compared to 2004, amounting to R\$ 672 million. This increase was due to the execution of a strategy of focusing on organic growth, which necessarily implies increasing investment in mineral exploration and feasibility studies for the development of mineral deposits in various countries.

Investment in R&D is essential for the sustaining of CVRD's profitable growth over the long term. In the context of a global and multi-commodity program,

Table of Contents

BR GAAP

investments have been carried out in 11 countries, covering all the world's continents in a diversified mineral portfolio, involving coal, copper, nickel, manganese, potash, phosphates, bauxite and iron ore.

Expenditure on research and development in 4Q05 was R\$ 209 million, R\$ 25 million higher than that in 4Q04.

Other operational expenses amounted to R\$ 834 million, down R\$ 304 million in relation to the previous year. This reduction was basically because of the provisions for ICMS losses, as well as the end of the amortization of the goodwill involved in the acquisition of Samitri in 2000, which contributed R\$ 183 million in 2004. In 4Q05, these expenses were R\$ 205 million.

In energy, CVRD has stakes in five hydroelectric power plants under operation, and the take from these 1,278 GWh in 2005 makes a reduction in its costs possible. In 2005, the economy reached via energy self-generation as opposed to acquiring energy through long-term contracts is estimated at R\$ 110 million. Purchases of electricity have been made in auctions, obtaining in 2005 prices per MWh in average R\$ 29 lower than those on long-term contracts. Such alternatives clearly has limitations, but contributes to reduction of the average cost of this input.

In the refining of bauxite into alumina, a co-generation electricity plant is due to come on stream in the middle of this year, which will have a direct impact on electricity cost, expected to reduce them by approximately R\$ 66 million from 2007 onwards.

In addition, various studies are currently ongoing, aiming to restructure CVRD's energy matrix and to adopt energy conservation measures, with the purpose of minimizing costs.

Demurrage expenses - the fines paid for delays in ship loading at CVRD's maritime terminals - amounted to R\$ 48 million in 4Q05 and R\$ 186 million in 2005, down by 60.0% on 4Q04, and 24.1% on 2004, respectively, despite the increase in shipping volumes.

The procedures put into practice for the optimizing of iron ore shipping logistics have already started to show the first positive results. For example, in December CVRD obtained a dispatch bonus at the Ponta da Madeira maritime terminal, for the loading of ships ahead of the time limit stipulated.

Demurrage costs are tending to converge to a level that is considerably lower than that seen in the last two years. For 2006, it is expected that the demurrage cost per ton shipped from CVRD's maritime terminals will be US\$ 0.22 per ton, which would represent less than half the fines paid in 2004, of US\$ 0.45 per ton.

CVRD's programs of excellence, which include the maintenance and operation of its mines and the carrying out of investment projects, will have the consequence of reducing costs and achieving productivity gains over the next few years.

In 2005, CVRD's gross margin amounted to 52.0%, 330 basis points (bp) higher than that reported in 2004, of 48.7%. The margin obtained in 4Q05 amounted to 50.6%, compared to 48.0% in 4Q04.

OPERATING PROFIT: A NEW RECORD

CVRD's excellent operational performance in 2005 was evidenced by the obtaining of a record operating profit, of R\$ 14.556 billion, R\$ 4.250 billion higher than that achieved in 2004. EBIT in 2005 was basically influenced by the increase of R\$ 6.449 billion in net revenues, partially offset by a raise of R\$ 2.188 billion in COGS.

CVRD's EBIT in 4Q05 amounted to R\$ 3.659 billion, 44.5% above that reported in 4Q04.

EBIT margin in 2005 was 42.8%, 540 bp higher than that reported in 2004, of 37.4%.

In 4Q05, EBIT margin was 41.0%, compared to 34.3% in the same quarter in 2004.

CASH GENERATION RECORD

Cash generation, as measured by EBITDA, in 2005 amounted to R\$ 16.701 billion, constituting a new record for CVRD, being R\$ 4.452 billion higher than the previous year. EBITDA reported in 2005 was 3.3 times that reported in 2001, of R\$ 5.128 billion, attesting to the enlargement in the dimensions of CVRD's activities.

The raise seen in EBITDA between 2004 and 2005 was basically the result of a higher EBIT, R\$ 4.250 billion, and the increased depreciation of R\$ 300 million. In 2005, CVRD received dividends from non-consolidated companies of R\$ 151 million, compared to R\$ 66 million in 2004.

Ferrous mineral operations accounted for 81.3% of EBITDA in 2005, products in the aluminum chain, 8.7%, logistic services, 7.3%, non-ferrous mineral operations, 2.6%, steel, 1.8% and others, represented by expenditure on research and development, negative in 1.6%.

In 4Q05, EBITDA was R\$ 4.200 billion, compared to R\$ 3.003 billion in 4Q04.

FINANCIAL RESULT

In 2005, CVRD's net financial result amounted to a negative R\$1.276 billion, representing an improvement of R\$724 million on that obtained in 2004. This improvement was due to the favorable movement of three components within this account: financial revenues, finance expenses and monetary variation.

Financial expenses amounted to R\$1.579 billion, while financial revenues totaled R\$339 million. The net result in monetary variation in 2005 was a loss of R\$36 million.

In 4Q05, CVRD's net finance result amounted to a negative R\$764 million, compared to a negative R\$271 million in the same quarter a year earlier. Financial expenses totaled R\$527 million, financial revenues, R\$103 million and monetary variation, a negative R\$340 million.

EQUITY INCOME RESULT

CVRD's equity income result increased by R\$113 million, rising from R\$156 million in 2004 to R\$269 million in 2005. The main contributions to this result were from the steel sector – an increase of R\$70 million – and the stake in Henan Longyu Energy Resources Ltd, the Chinese producer of anthracite coal, R\$23 million.

In 4Q05, CVRD's equity income result was R\$105 million.

RECORD NET EARNINGS: R\$10.4 BILLION

In 2005, CVRD's net earnings amounted to R\$10.443 billion, corresponding to R\$9.07 per share. Compared to the net earnings in 2004, of R\$6.460 billion, CVRD's results were up 61.7% in 2005.

In addition to its substantial size, being the largest profit achieved in CVRD's history, it is also worth pointing out the high earnings quality. This is because CVRD is investing record amounts, while at the same time enlarging its base for future profitability.

Table of Contents

BR GAAP

In 2005, CVRD received R\$298 million from the sale of Caemi's stake in QCM, while in 2004, CVRD got R\$551 million from the sale of its stake in CST.

The provisions made for the payment of income tax and social contribution, totaling R\$2.368 billion in 2005, compared to R\$1.810 billion in 2004.

In the final quarter of 2005, CVRD reported net earnings of R\$2.637 billion, compared to R\$1.527 billion in the same quarter a year earlier. CVRD made a provision of R\$153 million for the payment of income tax and social contribution in the quarter.

CONCILIATING CAPEX, DIVIDENDS AND FINANCIAL STRENGTH

One of the greatest challenges for a company that is growing is to conciliate financing of capital expenditure, distribution of dividends and maintenance of a level of financial health that will ensure good risk perception by the capital markets.

CVRD's strong cash generation has enabled it to finance its growth initiatives, allowing the projects to be assessed and approved in accordance with their merit. At the same time, it has been possible to make a good distribution of dividends to shareholders. In the last five years investments and dividends paid totaled approximately US\$15 billion. Simultaneously there was a strengthening of the balance sheet.

Breaking paradigms, CVRD obtained the Investment Grade rating in 2005 from three of the most respected rating agencies in the world: Standard & Poor's (BBB), Moody's (Baa3) and Dominion (BBB low).

Leverage and interest coverage indicators improved considerably in 2005, evidencing CVRD's financial strength. Total debt, according to the generally accepted accounting principles in the United States (US GAAP), on December 31, 2005 was US\$5.010 billion, an increase of US\$922 million from the debt of US\$4.088 billion at December 31, 2004.

Gross debt/adjusted EBITDA fell from 1.10x on December 31, 2004 to 0.77x on December 31, 2005. Total debt/enterprise value fell from 11.8% to 10.1%. Interest coverage, measured by adjusted EBITDA/interest paid, increased, from 12.41x at the end of 2004 to 25.95x at the end of 2005.

Net debt at the end of 2005 was US\$3.969 billion, with a cash position of US\$1.041 billion. Besides its cash holding, CVRD has the potential for additional liquidity provided by committed bank credit lines in the amount of US\$750 million.

The average debt maturity on December 31, 2005 was 7.89 years, compared to 6.83 years at the end of 2004. 60% of the debt was at floating rates and 40% at fixed rates. Because prices of aluminum and copper both vary in the same direction as the Libor rate, there is a natural hedge against oscillations in floating interest rates.

The Company's debt management policy aims to reduce its refinancing costs and risks. In this context, the development of liquid markets for its bonds and maintaining of a dynamic posture in relation to management of liabilities are very important.

Table of Contents**BR GAAP**

In October 2005 CVRD again issued bonds, due in 2034 and 8.25% annual coupon, totaling US\$300 million. This increased the amount maturing in that year to US\$800 million, providing good liquidity conditions for investors, helping to increase the bonds' attractiveness.

In January 2006 the CVRD 2016 bond was issued, with 10-year tenor, 6.250% annual coupon and yield to investors of 6.254% per year, for a total of US\$1.0 billion, its cost already reflecting the improvement of risk perception expressed by the award of Investment Grade rating. Since its issuance, CVRD 2016 has risen in value, with the yield to maturity converging gradually towards 6.0%.

Over the period from 4Q04 to the beginning of 2006, CVRD repurchased debt with higher interest rates and lower duration in the amount of US\$600 million. For example, more recently, and simultaneously with the issue of CVRD 2016, the Company bought US\$176 million of the CVRD 2013 bond, with coupon of 9.000% per year.

BUSINESS PERFORMANCE***Ferrous minerals***

The strong growth in global demand for iron ore and pellets, together with CVRD's expansion of its production due to the conclusion of a number of projects and productivity gains achieved has enabled CVRD to obtain a series of successive sales volume records. Total shipments of these products in 2005 of 252.189 million tons, up 8.9% on 2004, thus constituted another new record.

Sales in 4Q05, of 67.611 million tons, set a new quarterly record.

In 2005, sales of iron ore amounted to 213.338 million tons, up 11.9% compared to 2004. Pellet sales, of 38.851 million tons, were in line with sales in 2004.

Compared to 2004, CVRD increased its purchases of iron ore from small mining companies located in the so-called Iron Quadrangle, in the state of Minas Gerais, by 3.2%, acquiring 16.430 million tons to complement its production and meet the growing demand from its clients.

In 2005, China bought 56.530 million tons of iron ore from CVRD, 22.4% of total sales volume. Japan absorbed 25.250 million tons, representing 10.0% of sales, Germany acquired 24.555 million tons representing 9.7%, followed by France with 4.7%, South Korea with 4.2% and Italy with 3.9%. Sales to the steel industry and pig iron producers in Brazil amounted to 45.644 million tons, 18.1% of total shipments.

Shipments made in 4Q05 constituted another quarterly record, when 67.611 million tons, being 56.007 million tons of iron ore and 11.604 million tons of pellets. Sales of pellets in 4Q05 increased by 32.3% compared to 3Q05, when only 8.774 million

Table of Contents**BR GAAP**

tons were sold, due to issues associated with hurricane Katrina and the rescheduling of shipments.

In contrast to those for other metals and mining products, the market for ferro-manganese alloys is seeing an excess of supply, due to the exaggerated response by producers encouraged by the rise in prices which resulted in production expansion of 18.6% in 2004. Thus, 2005 was characterized by a reduction in alloy prices, begun in the last quarter, and by cuts in production, implemented since 2Q05. Manganese ore, whose main use is in the manufacture of alloys, suffered from the negative effect of price movements, by a time-lag of approximately six months.

In 2005, 907,000 tons of manganese was sold, 9.2% down on that sold in 2004, of 999,000 tons. Sales of ferro-alloys totaled 547,000 tons, in line with the previous year.

In 4Q05, manganese sales amounted to 244,000 tons, down 24.5% on the same period in 2004, which saw a quarterly sales record of 320,000 tons. At the end of 2004 demand for manganese benefited from the significant expansion in alloy production. In 4Q05, sales of ferro-alloys amounted to 124,000 tons.

Revenues from ferrous minerals – iron ore, pellets, manganese and ferro-alloys – in 2005 was R\$24.856 billion, up 41.0% compared to 2004, when revenues was R\$17.631 billion.

Gross revenues generated by iron ore shipments totaled R\$16.693 billion, while revenues from pellet sales amounted to R\$6.675 billion. Revenues in 2005, corresponding to 66.1% of the total reported by CVRD, were 50.2% higher than those reported in 2004, basically due to the increase in the price of products sold. Revenues obtained through the pelletization services provided by the pellet plants located in the port of Tubarão, amounted to R\$71 million.

Gross revenues generated by the sales of manganese amounted to R\$214 million, 20.2% higher than the figure in the previous year, of R\$178 million. Gross revenues from the sale of ferro-alloys amounted to R\$1.274 billion, 33.1% lower than the revenues obtained in 2004, due to the drop in the price of this product. Shipments of manganese and ferro-alloys accounted for 4.2% of CVRD's total gross revenues in 2005.

Operating profit from the area of ferrous minerals division – iron ore, pellets, manganese ore and ferro-alloys amounted to R\$12.548 billion, 81.5% higher than the EBIT reported in the previous year, of R\$6.914 billion, mainly due to iron ore and pellet price increases in 2005 which more than compensated for the increased costs arising from metals and mining price cycle. In addition, 2004 saw the amortization of the goodwill associated with the acquisition of Samitri.

EBITDA generated from ferrous minerals business amounted to R\$13.582 billion, or 81.3% of CVRD's total cash generation in 2005, up 70.9% on the amount reported in 2004, of R\$7.947 billion.

SALES VOLUME – IRON ORE AND PELLETS

	4Q04	3Q05	4Q05	2004	%	thousand tons

Aluminum

The strong growth in Chinese consumption of alumina, resulting in the importing of 7 million tons in 2005, contributed to increasing the imbalance between global demand and supply, causing spot prices to continue their upward trend. The prices of primary aluminum, which did not accompany the upward cycle in metal prices so sharply, fluctuated substantially during the year, falling to a level of US\$1,700 per ton in July, but finally reaching their highest level in the last 16 years in December, of approximately US\$2,300 per ton.

In 2005, CVRD sold 5.600 million tons of bauxite, a record volume, up 3.2% compared to previous year. In 4Q05, bauxite sales totaled 1.544 million tons.

Alumina sales in 2005 amounted to 1.738 million tons, up 3.6% on the previous year. Alumina sales in 4Q05 totaled 403,000 tons.

As most of CVRD's sales are associated with long-term contracts, the price increases in the market are not entirely reflected in its average sales price. Nonetheless, as new contracts are entered into, so the higher alumina prices will reflect a higher percentage of the aluminum price quoted on the London Metal Exchange - LME.

Sales of primary aluminum in 2005 amounted to 498,000 tons, compared to 477,000 tons in 2004. This was possible due to the implementation of operational improvements at the Barcarena plant, which enabled production capacity to be expanded. Primary aluminum shipments in 4Q05 totaled 131,000 tons.

Gross revenues from the sale of products in the aluminum chain totaled R\$3.857 billion, 10.9% of CVRD's total revenues in 2005, but down 4.9% on the revenues from this source obtained in 2004, of R\$4.056 billion, due to the appreciation in the Brazilian Real against the US dollar.

Operating profit generated from products in the aluminum chain totaled R\$1.225 billion, 30.1% lower than that obtained in 2004, of R\$1.753 billion, basically due to the increase in costs and expenses which were impacted by the appreciation in the Brazilian Real against the US dollar, the price of electric power and price increases in various inputs, such as caustic soda, calcining oil, and coke.

EBITDA was R\$1.446 billion, 8.7% of CVRD's total EBITDA in 2005, but this figure was 26.4% lower than the EBITDA obtained in 2004, of R\$1.965 billion.

Table of Contents**BR GAAP*****Non-ferrous minerals***

Global demand for potash experienced a growth slowdown in the second half of 2005, due to a reduction in consumption in some Asian countries as well as in Brazil, due to harvest problems. In the case of Brazil, a strong recovery is predicted in grain harvests in 2006, particularly for soybean, which is likely to provoke a recovery in demand for CVRD's potash products.

The conclusion of the production capacity expansion project at Taquari-Vassouras to 850,000 tons will enable sales to be increased in 2006.

Potash sales totaled 640,000 tons in 2005, up 10,000 tons on the previous year. Gross revenues from potash sales amounted to R\$359 million.

In 4Q05, CVRD sold 176,000 tons of potash, up 6.7% on 4Q04.

In 2005, kaolin shipments totaled 1.218 million tons, in line with the volume sold in the previous year.

Gross revenues from kaolin sales amounted to R\$428 million, down 8.5% on that obtained in 2004, basically due to the appreciation in the Brazilian Real.

In the 4Q05, kaolin sales amounted to 355,000 tons, compared to 311,000 tons 4Q04.

In the first full year of operation of the Sossego mine, CVRD sold 398,000 tons of copper concentrate, compared to 269,000 tons in 2004, when the mine operated for seven months. Gross revenues totaled R\$937 million, also reflecting the increase in copper prices seen in 2005.

In 4Q05, sales of copper concentrate amounted to 112,000 tons, compared to 139,000 tons in 4Q04. The reduction seen between these two quarters was because of operational problems to do with copper extraction and processing.

In 2005, gross revenues from the sale of non-ferrous minerals – copper, potash and kaolin – was R\$1.725 billion, accounting for 4.9% of CVRD total gross revenues.

The relatively small size of CVRD's non-ferrous mineral operations imposes a certain volatility on its operating results, given its sensitivity to fluctuations in product prices and inputs, as well as the Brazilian Real/US dollar exchange rate.

EBIT generated by non-ferrous mineral operations totaled R\$273 million, 21.3% higher than that seen in 2004, basically because of the operation of the Sossego copper mine for twelve months in 2005, compared to just seven months in 2004.

EBITDA amounted to R\$427 million, accounting for 2.6% of CVRD's total cash generation in 2005.

SALES VOLUME ORES AND METALS

	thousand tons

Aluminum	119	122	131	477	498

Table of Contents**BR GAAP****Logistics services**

In 2005, CVRD's railroads – Carajas (EFC), Vitoria a Minas (EFVM) and Centro-Atlantica (FCA) – transported 28.379 billion ntk of general cargo, in line with the previous year, when 28.214 billion ntk were transported. The main cargoes transported were inputs and products for the steel industry, 44.2% of the total; agricultural products, 37.8%, and building materials and forestry products, 8.0%.

In 4Q05, CVRD's railroads transported 6.373 billion ntk.

The interruption in the rapid growth in railroad transport seen in the last few years – an average of 8% between 2001 and 2004 – was caused by the 3.9% drop in Brazilian steel production in 2005, the shrinkage in the agricultural harvest and the change in the profile of freight transported, with a reduction in the handling of petrochemical products. Even so, CVRD increased its market share in the transport of soybean for export, from 16% to 18%, and from 7% to 9% in the transport of fertilizers. The handling of petrochemicals is being replaced by containers, having seen the start of, for example, the transport of electronic goods.

Security in the railroad operation is a very important issue in CVRD business strategy. In this sense, the number of accidents at CVRD railroads – EFVM, EFC and FCA – has been continuously decreasing.

ACCIDENTS ON RAILROADS

	Accidents per million of trains km		
	EFC	EFVM	FCA
2001	12	34	86
2002	9	23	68
2003	11	20	61
2004	5	13	45
2005	5	9	29

CVRD's ports and maritime terminals handled 30.530 million tons, an increase of 6.4% on 2004. In 2005 the ninth grain warehouse entered into service at Terminal de Produtores Diversos (TPD), in the port of Tubarão and the fourth silo at the Ponta da Madeira maritime terminal. The amount shipped by CVRD's ports and maritime terminals in the 4Q05 was 7.622 million tons.

Logistics services generated gross revenues of R\$ 3.291 billion, 9.3% of CVRD's total gross revenues, 8.8% higher than that obtained in 2004, of R\$ 3.025 billion. General cargo carried by CVRD railroads contributed with revenues of R\$ 2.405 billion, port services, R\$ 490 million and coastal shipping and port support services, R\$ 396 million.

EBIT from logistics services, of R\$ 665 million, was in line with that seen in the previous year, of R\$ 630 million.

EBITDA generated by logistics services amounted to R\$ 1.217 billion, 7.3% of CVRD's total for 2005, in line with 2004, figure of R\$ 1.234 billion.

Ports (thousand tons)	6,910	8,315	7,622	28,697	30,530

Table of Contents**BR GAAP****Steel**

Revenues generated by CVRD's equity stakes in the steel industry in 2005 amounted to R\$ 1.509 billion, 4.3% of CVRD's gross revenues, lower than that obtained in 2004 due to the sale of CVRD's stake in CST. EBIT amounted to R\$ 117 million and EBITDA, R\$ 298 million.

CONFERENCE CALL AND WEBCAST

CVRD will hold its conference call and webcast on Wednesday, March 08, at 12:00 pm Rio de Janeiro time, 10:00 am Eastern Standard Time and 3:00 pm UK time. Instructions for participation are on the website www.cvrd.com.br, *Investor Relations* section. A recording of the call and webcast will be available on the website for 90 days following March 08.

SELECTED FINANCIAL INDICATORS FOR THE MAIN NON-CONSOLIDATED COMPANIES

Selected financial indicators for the principal non-consolidated companies are available in CVRD's quarterly financial statements, on its website www.cvrd.com.br, in the *Investor Relations* section.

This communication may include declarations which represent the expectations of the Company's Management about future results or events. All such declarations, when based on future expectations and not on historical facts, involve various risks and uncertainties. The Company cannot guarantee that such declarations turn out to be correct. Such risks and uncertainties include factors relative to the Brazilian economy and capital markets, which are volatile and may be affected by developments in other countries; factors relative to the iron ore business and its dependence on the steel industry, which is cyclical in nature; and factors relative to the high degree of competitiveness in industries in which CVRD operates. To obtain additional information on factors which could cause results to be different from those estimated by the Company, please consult the reports filed with the Comissão de Valores Mobiliários (CVM Brazilian stock exchange regulatory authority) and the U.S. Securities and Exchange Commission (SEC), including the most recent Annual Report (CVRD Form 20F).

Table of Contents

(A free translation of the original in Portuguese relating to the Financial Statements prepared in accordance with the requirements of Accounting, Practices Generally Accepted in Brazil)

7 Notes to the Financial Statements at December 31, 2005 and 2004

Expressed In millions of *reais*

7.1 Operations

Companhia Vale do Rio Doce is a publicly traded corporation whose predominant activities are mining, processing and sale of iron ore, pellets, copper and potash, as well as logistic services, power generation and mineral research and development. In addition, through its direct and indirect subsidiaries and jointly-controlled companies, CVRD operates in iron ore and pellets, manganese and ferroalloys, kaolin, steel, aluminum-related products and logistics.

7.2 Presentation of Financial Statements

The financial statements have been prepared in conformity with accounting practices adopted in Brazil, based on corporate legislation, as well as the rules and guidelines issued by the Comissão de Valores Mobiliários CVM (Brazilian Securities Commission) and Instituto dos Auditores Independentes do Brasil IBRACON (Brazilian Independent Auditors Institute). The quarter financial information to 12/31/05, 09/30/05 and 12/31/04 are unaudited but reviewed by the auditors in accordance to specific rules applied to a review of quarterly information.

7.3 Accounting Pronouncements Recently-issued by Comissão de Valores Mobiliários

- (a) On October 3rd, 2005 CVM issued Deliberation N° 488, which approved IBRACON Pronouncement NPC 27 on the presentation and disclosure of Financial Statements, whose effectiveness was extended to years ending after 12/31/2005 through Deliberation N° 496 dated 01/03/06; and
- (b) On the same date CVM issued Deliberation N° 489, which approved IBRACON Pronouncement NPC 22 on provisions, liabilities, contingent liabilities and contingent assets.

CVRD has followed substantially the instructions referred to in the Deliberations and does not expect any significant change when they are finally implemented.

7.4 Principles and Practices of Consolidation

- (a) The consolidated financial statements show the balances of assets and liabilities on December 31, 2005 and 2004 and the operations of the Parent Company, its direct and indirect subsidiaries and its jointly-controlled companies for the years then ended;
- (b) Intercompany balances and the Parent Company's investments in its direct and indirect subsidiaries and jointly-controlled companies were eliminated in the consolidation. Minority interests are shown separately on the balance sheet and statement of income;
- (c) In the case of investments in companies in which the control is shared with other stockholders, the components of assets and liabilities and revenues and expenses are included in the consolidated financial statements in proportion to the participation of the Parent Company in the capital of each investee; and
- (d) The principal figures of the subsidiaries and jointly-controlled companies included in the consolidation are presented in Attachment I.

7.5- Significant Accounting Policies

- (a) The Company adopts the accrual basis of accounting;
- (b) Assets and liabilities that are realizable or due more than twelve months after the financial statements date are classified as non-current;
- (c) Marketable securities, classified as cash and cash equivalents are represented by less than 90 days applications and are stated at cost plus accrued income earned to the financial statements date;

- (d) Inventories are stated at average purchase or production cost, and imports in transit at the cost of each item, not exceeding market or realizable value;
- (e) Assets and liabilities in foreign currencies are translated at exchange rates in effect at the financial statements date, and those in local currency, when applicable, are restated based on contractual indices;

CVRD

9

Table of Contents

- (f) Amounts given in advance to Centrais Elétricas do Norte do Brasil S.A. Eletronorte due to long term contract to supply of energy, are classified as Advances to energy suppliers , in long-term receivables;
- (g) Investments in subsidiaries, jointly-controlled companies and affiliated companies are accounted for by the equity method, based on the stockholders equity of the investees, and when applicable increased/decreased by goodwill and negative goodwill to be amortized and provision for losses. Other investments are recorded at cost, less provision for losses when applicable. At consolidated the exchange rate effect over stockholders equity from investees abroad are classified as monetary and exchange rate variation included as financial result, net;
- (h) Property, plant and equipment, including interest incurred during the construction period of large-scale projects, are recorded at historical cost (increased by monetary restatement up to 1995) and depreciated on the straight-line method, based on the useful lives of the assets. Depletion of mineral reserves is based on the ratio between effective production and estimated capacity;
- (i) Research and development costs are incurred as operational expenses until the proof of its economical feasibility to exploit commercially a mine. After this proof, the costs are capitalized as part of the costs of building and constructing of mine;
- (j) During the development of a mine, stripping costs registered are capitalized as part of the depreciable cost of building and developing the mine. Post-production stripping costs are recorded as cost of sales;
- (k) Pre-operating costs except for financial charges capitalized as mentioned in (h) above, are deferred and amortized over a period of 10 years. The deferred charges (consolidated) refer basically to copper projects and expansion of Alunorte and Albras;
- (l) CVRD follows the accounting practices laid down by to Deliberation CVM 371/00 related to the recognition of liabilities and results from actuarial valuation of employees pension plan; and
- (m) The financial statements of the Parent Company reflect the Board of Directors proposal for appropriation of the net income for the year, for the approval of the Annual General Meeting.

7.6- Independent Auditors Policy

The policy concerning independent accountants in relation to non-audit services is based on the maintenance of their independence. According to best practices of corporate governance, all services rendered by independent auditors are pre-approved by the Fiscal Council. During 2005, the amount of non-audit services paid was less than 5% compared to the total fees paid to independent auditors.

7.7- Major Acquisitions and Divestments

- (a) In November and December 2005, CVRD acquired 93.0% and 6.2% of the voting capital of Canico Resource Corp. (Canico) for R\$ 1,656 and R\$ 112, respectively. Canico is a Public Traded Canadian based junior company, whose principal asset is the participation in Mineração Onça Puma, a pre-operational mineral exploitation company focused on the development of the nickel laterite project.

In February, 2006, CVRD concluded the acquisition of the outstanding common shares of Canico, acquiring the remaining voting capital of Canico, 0.8% of its total capital for R\$ 14. CVRD owns 100% of Canico and will dilist it;

- (b) In July 2005, CVRD subsidiary Caemi sold the remaining QCM preferred shares to Dofasco Inc. (Dofasco) for R\$ 298. The accounting value of the investment had previously been completely written-off and therefore all proceeds were recorded as gain; and

(c) In 2004, CVRD sold the total participation in Companhia Siderúrgica de Tubarão (CST), accounting for a gain of R\$ 541.

Results on sale of assets		(298)	(85)	(298)	(551)		(541)
	2,893	3,443	2,260	13,270	8,274	6,234	3,442
Income tax and social contribution at combined tax rates	34%	34%	34%	34%	34%	34%	34%
Federal income tax and social contribution at statutory rates	(984)	(1,171)	(768)	(4,512)	(2,813)	(2,120)	(1,170)
Adjustments to net income which modify the effect on the results for the year:							
. Income tax benefit from interest on stockholders' equity	150	116	151	701	577	701	568
. Fiscal incentives	5	134	25	250	152	110	41
. Interest on stockholders' equity received						(11)	(48)
. Results of overseas companies not taxed (bilateral international agreements)	833	105	175	1,239	464		
. Amortized negative goodwill taxed			(99)		(99)		(99)
. Temporary difference due to capital loss non-deductible			(176)		(176)		(176)
. Reduced incentive aliquot	28	38	(7)	116	62		
			105		105		

. Reversal of provision for losses							
. Others	(185)	14	(167)	(162)	(82)	63	(1)
Income tax and social contribution	(153)	(764)	(761)	(2,368)	(1,810)	(1,257)	(885)

The deferred assets and liabilities for income tax and social contribution arising from tax losses, negative social contribution bases and temporary differences are recognized from an accounting standpoint considering an analysis of likely future results, based on economic and financial projections prepared based on internal assumptions and macroeconomic, commercial and fiscal scenarios which could change in the future.

These temporary differences will be realized upon the occurrence of the corresponding taxable events, expected to be as follows:

Years	Net amount of credits	
	Consolidated	Parent company
2006	428	334
2007	289	135
2008	268	135
2009	130	4
2010	124	22
2011	77	23
2012	76	23
2013	23	23
2014	23	23
2015	33	33
	1,471	755

In addition to the credits recorded, the Company has a lawsuit claiming an additional 51.8% monetary restatement for tax purposes applied to the months of January and February 1989 (Plano Verão monetary plan). A favorable ruling has already been obtained for compensation of credits corresponding to 42.7% instead of the 51.8% requested (however, not yet utilized). The amount of these credits covered by the ruling totals approximately R\$ 309 and the accounting effects have not yet been recognized in the financial statements.

The company has also a lawsuit claiming the application of PIS and COFINS over other revenues during the effectiveness of article 3° of Law 9718/98 had validity. In November 2005, the Supreme Court (STF) considered not constitutional the referred prevision of the law. The recoverable value in case CVRD wins the case is R\$ 458, not yet recognized in the financial statements.

There is no direct relation between the net income of the Company and the income tax and social contribution. Therefore, the projection for the use of tax credits should not be taken as an indication of the company future net income.

The Company has certain tax incentives related to iron ore and manganese operations in Carajás, bauxite in Oriximiná, potash in Rosario do Catete, alumina and aluminum operations in Barcarena and kaolin operations in Ipixuna and Mazagão. The incentives related to iron ore comprise full income tax exemption on defined production levels up to 2005 and for manganese partial exemption up to 2013. The incentive relating to alumina and potash comprise full income tax exemption on defined production levels which expire in 2009 and 2013, respectively,

CVRD

14

Table of Contents

while the partial exemption incentives related to aluminum and kaolin expire in 2013 and bauxite in 2008. An amount equal to the tax saving must be appropriated to a reserve account within stockholders' equity and may not be distributed to the stockholders.

(e) On October 5, 2005, the subsidiary Vale Overseas Limited launched a US\$ 300 million notes issue maturing in 2034. The notes carry a coupon of 7.65% p.a. The notes form a single series with the US\$ 500 million notes issued on January 2004 and 8.25% coupon.

7.17- Contingent Liabilities

At the financial statements dates the contingent liabilities of the Company were:

(a) Provisions for contingencies and judicial deposits (booked under long-term liabilities and long-term assets, respectively), considered by management and its legal counsel as sufficient to cover losses from any type of lawsuit, were as follows:

	Judicial deposits			Consolidated Provisions for contingencies			Parent Company Provisions for contingencies		
	2005	2004	2005	2004	2005	2004	2005	2004	
Tax contingencies	1,064	1,175	2,054	1,435	576	750	1,686	1,001	
Labor and social security claims	338	293	549	606	249	227	423	501	
Civil claims	257	197	508	547	190	156	364	434	
Other	8	15	72	16	15	14	30	17	
Total	1,667	1,680	3,183	2,604	1,030	1,147	2,503	1,953	

The Company is party to labor, civil, tax and other suits and has been contesting these matters both administratively and in court. When applicable, these are backed by judicial deposits. Provisions for losses are estimated and restated monetarily by management based on the opinions of the legal department and outside counsel.

Tax contingencies relate principally to a legal action taken by the Company claiming aspects of legislation of tax income and PIS and COFINS and other actions relating to value-added tax (ICMS).

Labor-related actions principally comprise employee claims in connection with disputes about the amount of indemnities paid upon dismissal and the one-third extra holiday pay.

Civil actions principally relate to claims made against the Company by contractors in connection with losses alleged to have been incurred as a result of various past government economic plans.

Edgar Filing: Companhia Vale do Rio Doce - Form 6-K

In addition to the contingencies for which we have made provisions we have possible losses totaling R\$ 2,466 (R\$ 1,643 parent company) at December 31, 2005, based on the advice of our legal counsel, no provision is maintained.

(b) Guarantees given to jointly-controlled companies are as follows:

Affiliate or Joint Venture	Amount of guarantee		Denominated currency	Purpose	Final maturity	Counter guarantees
	2005	2004				
SAMARCO	11	17	US\$	Debt guarantee IFC	2008	None
VALESUL	1	1	R\$	Debt guarantee BNDES	2007	None

The Company does not expect such guarantees to be executed and therefore no provisions for losses have been made. CVRD does not charge Valesul for granting these guarantees.

CVRD

19

Table of Contents

- (c) Upon privatization of the Company in 1997, the Brazilian government stipulated the issuance of non-convertible debentures (Debentures) to the stockholders of record, including the federal government. The maturity dates of these Debentures were established to guarantee that pre-privatization stockholders, including the federal government, would share any future benefits from mineral resources held by the Company and its subsidiary and affiliated companies that were not evaluated at the time of setting the minimum price of CVRD shares at the privatization auction occurred on 1997.

A total of 388,559,056 Debentures were issued at a par value of R\$ 0.01 (one cent), whose value is to be restated in accordance with the variation in the General Market Price Index (IGP-M), as set forth in the Issue Deed.

On October 4, 2002, the Comissão de Valores Mobiliários – CVM (Brazilian Securities Commission) approved the Company’s registration request, for public trading of the Debentures. As from October 28, 2002, the Debentures can be traded on the secondary market.

The debenture holders are entitled to receive semi-annual payments equivalent to a percentage of the net revenue deriving from determined mineral resources owned in May 1997 and included in the Issue Deed.

According to the Debenture Issue Deed, the amount of the premium must include interest up to the month prior to that of effective payment, plus 1% in the month in which the funds are made available to the debenture holder. Pursuant to this Deed, the payment date shall take place each semester in March and September.

Based on estimates of the operational start-up of copper projects, CVRD began calculating the premium referring to these minerals rights. Considering the iron ore sale, the Company estimates that the threshold for payment will be reached in approximately 2030 and 2020 for the Southern and Northern systems, respectively. Regarding other minerals, such as bauxite and nickel, the forecast for exploitation is for the second half of the decade, and according to the criteria established in the Deed, payment will be due on the net sales revenue in the fourth year after the date of first commercialization. The obligation to make payments to the debenture holders will cease when the pertinent mineral resources are exhausted.

In 2005 we made available payment related to debentures in the amount of R\$ 12.

- (d) CVRD is compromised by a contract of take-or-pay to buy approximately 33,733 thousand metric tons of bauxite from Mineração Rio do Norte S. A. – MRN by a price calculated on the quoted aluminum London Metal Exchange LME.

Based on the market price of US\$ 23.01 (R\$ 53.86) per metric ton, in December 31, 2005, this represents an amount of R\$ 1,817 million, as follows:

2006	339
2007	339
2008	339
2009	339
2010	339
2011 onward	122
	1,817

7.18- Environmental and Site Reclamation and Restoration Costs

Expenditures relating to ongoing compliance with environmental regulations are charged to production costs or capitalized as incurred. The Company manages its environmental policies according to the specifications of ISO 14,001 and maintains ongoing programs to minimize the environmental impact of its mining operations as well as to reduce the costs that will be incurred upon termination of activities at each mine. In 2005, the provision for environmental liabilities amounted to R\$ 526 (R\$ 354 in 2004), which was accounted for in Provision for environmental liabilities in long-term liabilities. The Company adopts the concepts of the Accounting for Asset Retirement Obligations, as follows:

Costs for mine closure are recorded as part of the cost of these assets and a corresponding provision is made for such future expenditure;

The estimated costs are accounted for at the present value of the obligations, discounted using a risk free rate; and

The estimated costs are reviewed annually and changes in the present value are adjusted in the recorded values of the assets and liabilities.

CVRD

20

Table of Contents**7.19- Pension Plan Valia**

The Fundação Vale do Rio Doce de Seguridade Social Valia is a private non-profit supplementary social security entity, legally separate from CVRD, founded in 1973 to provide supplementary social security benefits to the employees of the Company, its subsidiaries, affiliated companies and others that participate or may in the future participate in plans administered by the Foundation.

The Company and several of its subsidiaries and affiliated companies are sponsors of Valia, in the following benefit plans:

(a) Benefit Plan**Defined Benefit Plan BD**

This is a pure defined benefit plan, now being phased out, instituted in 1973 upon establishment of Valia. This plan has been closed to new members and is maintained only for existing retired participants and their beneficiaries and a few residual active participants.

Mixed-Benefit Plan Vale Mais

This is a mixed plan, which provides programmable retirement income benefits of the defined contribution type, independent of government social security. It also includes a deferred severance benefit (vesting), as well as risk benefits: retirement for disability, death benefits and sick-leave assistance. This new plan has more modern, transparent and flexible rules that make it more attractive for employees and more economical for the sponsors.

Vale Mais was established in May 2000 and nearly 98.7% of the active employees migrated to this new plan.

The contributions of the sponsors are as follows:

Ordinary contribution Destined to accumulate the resources necessary to grant income benefits, sponsor contributions match participant contributions, up to 9% of their participation salaries, which may not exceed ten plan reference units (R\$ 1,810.41 in December 2005).

Extraordinary contribution This can be made at any time, at the discretion of the sponsors.

Normal contribution To fund the risk plan and administrative expenses, fixed by the actuary based on actuarial appraisals.

Special contribution Destined to cover any special commitment that may arise.

The results of the actuarial evaluation are as follows:

Fair value of assets development

	2005	2004
Fair value of assets at the beginning of the year	5,516	4,728
Actual return on assets	1,289	1,078
Contribution from sponsor	54	45
Benefits paid in the year	(353)	(335)
Fair value of assets at the end of the year	6,506	5,516

Evolution of present value of obligation

	2005	2004
--	-------------	-------------

Edgar Filing: Companhia Vale do Rio Doce - Form 6-K

Present value of obligations at the beginning of the year	3,983	4,131
Cost of current service	5	4
Cost of interest	510	484
Benefits paid in the year	(353)	(335)
Hypotheses change	25	(357)
Loss on liabilities	4	56
Present value of obligations at the end of the year	4,174	3,983

CVRD

21

Table of Contents**Conciliation of assets and liabilities recognized in the balance sheet**

	2005	2004
Present value of totally or partially covered actuarial obligations	(4,174)	(3,983)
Fair value of assets	6,506	5,516
Net gains not recognized on the balance sheet	(1,795)	(1,297)
Actuarial assets/liabilities to be recorded in the balance sheet	(*) 537	(*) 236

(*) The Company has not recorded the actuarial asset on its balance sheet, since there is no clear evidence as to its realization, as established by item 4.9 of NPC 26.

(b) Investment target and composition of plan assets

The fair asset value of these plans is R\$ 6,506 and R\$ 6,516 at the end of 2005 and 2004, respectively. The assets allocations for the Company pension plan at the end of 2005 and 2004 and the target allocation for 2006, by asset category are as follows:

Asset category	Percentage of plan assets at December 31,		
	Target allocation for 2006 (unaudited)	2005	2004
Equity securities	27%	30%	29%
Real state	6%	5%	6%
Loans	4%	4%	3%
Fixed income	63%	61%	62%
Total	100%	100%	100%

The fixed income allocation target of 63% was established in order to match the asset with the benefit payments. The proposal for 2006 is to re-establish the investments in inflation-indexed funds up to 35%. The remaining investments in fixed income will be used for the payment of short-term plan benefits.

The target of 27% for equity securities reflects the expected appreciation of the Brazilian stock markets as well as the Brazilian interest rates.

(c) Actuarial liability**Complementary Value and Health Insurance Plan**

Refers to the responsibility CVRD has to complement the retirements, pensions and health assistance related to the incentive to the disconnecting of some employees occurred between 1987 e 1989.

The results of the actuarial evaluation of this liability are as follows:

Change of fair value of assets (*)

	Complementary Plan	
	2005	2004
Fair value of assets at the beginning of the year	76	58
Actual return on assets	26	7

Contribution from sponsor	102	64
Benefits paid in the year	(58)	(53)
Fair value of assets at the end of the year	146	76

(*) Does not apply to fair value of assets to health plan.

(e) Actuarial and economic hypotheses

All calculation includes future projections in relation to certain parameters, for example: salaries, interest, inflation, benefits from social security, mortality, invalidity and others. No actuarial results can be analyzed without knowledge of the scenarios utilized in the evaluation.

The actuarial economic hypotheses were considering the long-term to their maturity, and must be analyzed from this point of view. They not necessarily are realizable in the short-term.

The evaluation was based on the following economic hypotheses:

Economic assumptions	2005	2004
- Discount rate	13.4% p.a. (nominal)	13.4% p.a. (nominal)
- Expected return on plan assets	13.4% p.a. (nominal)	13.4% p.a. (nominal)
- Nominal growth index of medical costs	9.2% p.a.	9.2% p.a.
- Future salary increases	8.15% p.a. until 47 years	6.91% until 47 years
- Growth in social security benefits and limits	5.0% p.a.	5.0% p.a.
- Inflation	5.0% p.a.	5.0% p.a.

All assumptions were revised during 2005.

Table of Contents**7.20- Paid-up Capital**

At the Ordinary General Meeting of 04/27/05, the Company's capital was increased to R\$ 14 billion through capitalization of part of the expansion reserve in the amount of R\$ 6,700.

On August 18, 2004 the Extraordinary General Stockholders' Meeting approved the forward stock split. Each share, common and preferred, is represented by three shares. After the split the Company's capital comprises 1,165,677,165, of which 749,949,429 common shares and 415,727,736 class A preferred shares.

Preferred shares have the same rights as common shares, except for the right to elect the members of the Board of Directors. They have priority to a minimum annual dividend of 6% on the portion of capital represented by this class of share or 3% of the book net equity value of the share, whichever is greater.

On December 31, 2005 the Company's capital is held as follows:

Stockholders	Common	%	Preferred	%	Number of shares	
					Total	%
Valepar S.A.	392,147,133	52			392,147,133	34

Total	749,949,429	100	415,727,736	100	1,165,677,165	100

The members of the Board of Directors and Executive Board together own 43,761 common shares and 261,187 preferred shares.

7.21- American Depositary Receipts (ADR) Program

On June 2000, the Company obtained a registration from the United States Securities and Exchange Commission (SEC), for its preferred shares to be traded on the New York Stock Exchange (NYSE). On March 21, 2002, in connection with the sale of shares held by the BNDES and Brazilian Government, the common shares began to be traded on the NYSE. Each ADR represents 1 (one) preferred Class A or common share, traded under the codes RIOPR and RIO, respectively.

Since 09/07/04 each ADR was also split in 3 (three). In this way the proportion of 1 (one) ADR to each common or preferred share was maintained.

7.22- Treasury Stock

The Board of Directors, under the terms of Subparagraph XV of Article 13 of the Bylaws and based on Article 30 of Law 6404/76 and CVM Instructions 10 of 02/14/80 and 268 of 11/13/97, approved the acquisition by the Company of its own shares to be held in treasury for later sale or cancellation.

In 2005, the Company had acquired 14,145,510 common shares and 11,458 preferred shares, which are held in treasury in the amount of R\$ 131. In 2005, 493 preferred shares were in treasury and were changed for Samitri's shares, a merged company. The 14,145,510 common shares guarantee a loan of the subsidiary Alunorte.

Table of Contents**7.23- Remuneration of Stockholders**

Briefly, the total remuneration paid stockholders in 2005 was as follows:

Deliberation	Payment	Fiscal year	R\$
04/14/2005 Interest on stockholders equity	4/30/2005	2004	(c)1,279
04/14/2005 Interest on stockholders equity	4/30/2005	2005	1
10/13/2005 Interest on stockholders equity	10/29/2005	2005	782
10/13/2005 Dividends	10/29/2005	2005	1,028
Total paid in 2005			(b)3,090
Complementary remuneration for 2005 proposed			(a)2,750
Remunerations fiscal year 2005 (a + b - c)			4,561

The remuneration to stockholders proposed for 2005 was calculated as follows:

Net income for the year	10,443
Fiscal incentive reserve	(83)
Legal reserve	(522)
Realization of unrealized income reserve	109
Adjusted net income	9,947
Mandatory dividend amount 25% (R\$2.15 per outstanding share)	2,487
Statutory dividend on preferred shares (3% of net equity, R\$0.61 per outstanding share)	253
Statutory dividend on preferred shares (6% of paid-up capital, R\$0.72 per outstanding share)	300
Dividends/ Interest on stockholders 'equity (R\$3.96 per outstanding share)	4,561

Pursuant to Ruling No. 207/96 of the Brazilian Securities Commission (CVM), the Company decided, as required by tax regulations, to account for interest on stockholders equity under the heading of Financial expenses and to reverse the same amount in a specific account. This, however, does not appear in the financial statements because it had no effect on the final net income, except for the tax impact recorded as Income tax and social contribution .

Proposed Appropriations of the Net Income for the Year**Funds provided:**

Net income for the year	10,443
Realization of unrealized income reserve (*)	109
	10,552

Funds used:

Legal reserve (5%)	522
--------------------	-----

Expansion/investment reserve	5,386
Fiscal incentives reserve	83
Interim interest on stockholders' equity	783
Interim dividends	1,028
Additional remuneration proposed	2,750
	10,552

(*) The realization is based on the dividends received, write-off or disposal of investments and depreciation, write-off and disposal of property, plant and equipment.

7.25- Financial Instruments Derivatives

The main market risks the Company faces are related to interest rates, exchange rates and commodities prices. CVRD has a policy of managing risks through the use of derivative instruments.

The Company's risk management follows policies and guidelines reviewed and approved by the Company's executive management (Board of Directors and Executive Board). These policies and guidelines prohibit speculative trading and short selling and require diversification of transactions and counterparties. The policy of the Company is to settle all

contracts financially without physical delivery of the products. The credit limits and creditworthiness of counterparties are also reviewed periodically and are defined according to the rules approved by the Company's management. The results of hedging are recognized monthly in the financial results.

Interest Rate Risk

Interest rate risk derives from floating-rate debt, mainly from trade finance operations. The portion of floating-rate debt denominated in foreign currency is mainly subject to fluctuations in the LIBOR – London Interbank Offered Rate. The portion of floating-rate debt expressed in *reais* refers basically to the Brazilian long-term interest rate TJLP, established by the Brazilian Central Bank. Since May 1998, CVRD has been using derivatives to limit its exposure to fluctuations in the LIBOR.

The interest rate derivatives portfolio consists mainly of instruments contracted to limit exposure to interest rate fluctuations, establishing upper and lower limits. Some operations are subject to knockout provisions which, if triggered, eliminate the protection contracted.

Exchange Rate Risk

Exchange rate risk arises from foreign currency debts. On the other hand, a substantial part of the Company's revenues are denominated or indexed in U.S. dollars, while the majority of costs are in *reais*. This provides a natural hedge against possible devaluation of the Brazilian currency. Events of this nature have an immediate negative impact on foreign currency debt, offset by the positive effect on future cash flows.

The Company adopts a strategy of monitoring market fluctuations and, if necessary, carrying out derivatives operations to cover risks related to these variations.

The portion of debt denominated in euros and yens (main components of basket of currencies) is protected by derivatives to cover risks of exchange rate movements of these currencies.

CVRD

27

Table of Contents**Commodities Price Risk**

The prices of iron ore, the Company's main product, are set in annual negotiations between producers and consumers and are notably stable over time. The Company does not enter into derivatives operations to hedge iron ore price exposure.

The Company uses hedge instruments to manage its exposure to changes in the price of gold, aluminum and alumina. These derivatives operations allow establishment of a minimum profit level for future output. The Company actively manages its open positions, with the results reported monthly to senior management to allow adjustment of targets and strategies in response to market conditions.

The unrealized gain or loss represents the present value of payable or receivable if all operations had been settled on the dates disclosed, as follows:

Table of Contents**7.27- Concessions and Leases****(a) Railroad Companies**

The Company and some of its group companies entered into agreements with the Brazilian government, through the Ministry of Transport, for concession, exploitation and development of public rail cargo transport services and for lease of the assets destined for rendering these services.

The concessions periods are, by railroad:

Railroad	End of concession period
Vitória-Minas (direct) (*)	June 2027
Carajás (direct) (*)	June 2027
Malha Centro-Leste (indirect via FCA)	August 2026
Malha Sudoeste (indirect via MRS)	December 2026

(*) Concessions with no disbursement

The concessions will expire upon one of the following events: termination of the contractual term, cancellation, forfeiture, rescission, annulment and bankruptcy or extinction of the concessionaire.

Concessions and leasing from controlled companies are accounting treated as operating leasing and present the following characteristics:

	FCA	MRS
1) Total installments	112	83
2) Frequency of payment	Quarterly IGP-DI	Quarterly IGP-DI
3) Update index	FGV	FGV
4) Total installment paid	30	34
5) Installment current value		
Concession	\$ 1	\$ 2
Leasing	\$ 28	\$ 40

(b) Ports

The Company owns specialized port terminals as listed below:

Terminal (*)	Localization	End of concession period
Tubarão Terminal	Vitória - ES	2020
Praia Mole Terminal	Vitória - ES	2020

Capim Branco I	February 2006	48.42
Capim Branco II	2007	48.42
Estreito	2009	30.00
Foz do Chapecó (*)		40.00

(*) In 02/10/06 CVRD celebrated with Furnas Centrais Elétricas (Furnas) a contract to sell the interest of 40% in the consortium to build and operate the hydroelectric plant Foz do Chapecó for R\$ 9.

7.28- Effects on the Statements if Price-Level Restatement were Applied (unaudited)

The main difference between the financial statements prepared according to statutory accounting practices and those according to the price-level restatement method is due to the recognition, in the latter, of the net monetary restatement of permanent assets and stockholders' equity.

The Balance Sheet and the Statement of Income by monetary restatement, at December 31, 2005 price levels (indexed by the IGP-M of Fundação Getúlio Vargas) is as follows:

7.29- Insurance**Operational Risks**

CVRD has an extensive risk management program that provides coverage and protection for all its assets as well as against possible losses from production interruptions, through *All Risks* policy. This program includes on-site inspection and training carried out by the various risk committees constituted by the Company, its subsidiaries and associated companies. The Company tries to harmonize risks in all areas and provide single and uniform treatment, and also seeking coverage in the domestic and international markets at levels compatible with an enterprise the size of CVRD.

Insurance

In order to provide the best instruments for more efficient risk management and to seek alternatives due to the crisis in the international insurance market, CVRD in 2002 established a captive reinsurer. This entity was created for the purpose of improving risk management and to provide a more efficient instrument for negotiation and market penetration, serving exclusively to underwrite the risks of the companies of the Group, in Brazil and abroad. Besides this, intensified action by the risk committees is being undertaken to accomplish technical recommendation from insurance and reinsurance market during annual inspections and are aligned with the group investments.

7.30- Profit Sharing Plan

The employee profit sharing plan is linked to financial-economic results as measured by indicators such as operational cash flow and by the meeting of performance targets for each unit and individual performance.

7.31- Subsequent Events

CVRD issues US\$ 1.0 billion of 10-year notes

On January, 2006 CVRD 's wholly owned Finance subsidiary Vale Overseas Limited issued US\$ 1 billion 10-year 6.250% notes, payable semi-annually due 2016, at a price of 99.97 % of the principal amount.

CVRD 's tender offer

On January 2006 CVRD 's wholly owned Finance subsidiary Vale Overseas Limited concluded a tender offer US\$ 300 million 9.000% Guaranteed Notes due 2013.

CVRD

Table of Contents

Merger of Caemi

On January, 2006, shareholders of Valepar S.A. (Valepar), the controlling shareholder of CVRD, to be issued by CVRD, approved a proposal of CVRD senior management to exchange all outstanding preferred shares of Caemi. The Board of Directors ratified the proposal. All 1,558,963,806 of outstanding Caemi preferred shares (according to Article 4, paragraph 2 of 6.404/76) will be changed to preferred shares to be issued by CVRD.

Each non-controlling Caemi shareholder will receive 0.04115 preferred shares of CVRD for each Caemi preferred share. This exchange ratio reflects the stock market price behavior of both shares over the last 90 days.

CVRD currently owns 100% of Caemi's common shares and 40.06% of Caemi's preferred shares, for a total of 60.23% of its total capital. After the completion of the stock merger, CVRD will own all Caemi shares.

Capex Budget

On January, 2006, the Board of Directors of CVRD approved the capex budget for 2006 in the amount of R\$ 11.8 billion (US\$ 4.6 billion).

9- Report of the Independent Accountants

(A free translation of the original opinion in Portuguese expressed on Financial Statements prepared in accordance with the accounting principles prescribed by Brazilian Corporate Law)

To the Board of Directors and Stockholders of
Companhia Vale do Rio Doce
Rio de Janeiro RJ

1- We have audited the accompanying balance sheets of Companhia Vale do Rio Doce, holding company and consolidated, as of December 31, 2005 and 2004, and the related statements of income, changes in stockholders equity, and changes in financial position for the years then ended, prepared under the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. The audits of the financial statements for the years ended December 31, 2005 and 2004 of certain subsidiaries, jointly-owned and associated companies, mentioned in note 7.14, accounted for by the equity method, were carried out by other independent auditors and our opinion, in regard to these investments as of December 31, 2005 in the amount of R\$7,386 million and as of December 31, 2004, in the amount of R\$6,749 million and the earnings therefrom for the years ended December 31, 2005 and 2004 in the amounts of R\$4,058 million and R\$2,231 million, respectively, is based solely on the reports of these other auditors.

2- Our audits were conducted in accordance with auditing standards generally accepted in Brazil and included: (a) planning of the audit, considering the materiality of the amounts presented, the volume of transactions and the Company's and its investees accounting and internal control systems; (b) examining, on a test basis, the evidence supporting the amounts and disclosures in the financial statements; and (c) the evaluation of the accounting practices followed and significant estimates made by management, as well as the presentation of the financial statements taken as a whole.

3- In our opinion, based on our audits and on the reports of the other auditors, the financial statements referred to in paragraph 1 present fairly, in all material respects, the financial position of Companhia Vale do Rio Doce, holding company and consolidated, as of December 31, 2005 and 2004, the results of its operations, the changes in its stockholders' equity and the changes in its financial position for the years then ended, in conformity with accounting practices adopted in Brazil.

4- Our audits were conducted for the purpose of forming an opinion on the basic financial statements referred to in the paragraph 1, taken as a whole. The statements of cash flows (holding company and consolidated) and value added (holding company and consolidated) are presented for purposes of additional information and are not a required part of the basic financial statements. This information has been subjected to the auditing procedures described in paragraph 2 and, in our opinion, is fairly presented in all material respects in relation to the financial statements taken as a whole.

Table of Contents**B Additional Information****12 - Management's Discussion and Analysis of the Operating Results for the Year Ended December 31, 2005 and Supplemental Information**

According to corporate governance best practices and with the objective of increasing the transparency of operations, CVRD presents additional information which was reviewed by independent auditors.

As a result of the analysis some general aspects must be considered, as follows:

About 87% of the consolidated gross revenue and 28% of consolidated total cost for 2005 are linked to the U.S. dollar. Consequently, fluctuations in the exchange rate variation between the two currencies have a significant impact on the operating results.

Approximately 86% of consolidated short-term and long-term loans for 2005 are denominated in U.S. dollars. As a result, exchange rate fluctuations have a significant impact on the financial expenses and income.

The average Dollar rate fell 16.8% between periods (R\$ 2.4341 in 2005 against R\$ 2.9257 in 2004), partially offset by price increases, and the end rate fell 11.8% (R\$ 2.3407 in 2005 against R\$ 2.6544 in 2004).

In 2005, iron ore prices increased by 71.5% and pellets prices increased by 86.4%.

The consolidated Trade Balance was:

	Consolidated (in US\$ million)				
	4Q/05	Quarter (Unaudited)			Accumulated
		3Q/05	4Q/04	2005	2004
Exports	2,011	1,723	1,364	7,021	5,534

(*) Includes revenues derived from services provided to pelletizing joint ventures in the amounts of R\$ 19, R\$ 19, R\$ 20, R\$ 71 and R\$ 77 referring to the 4Q/05, 3Q/05, 4Q/04, 2005 and 2004, respectively.

(**) The company carried through its railroad system 6,373, 8,242, 6,806, 28,379 and 28,214 million of TKUs of general cargo and 2,332, 2,226, 2,565, 9,146 and 10,057 million of TKUs of iron ore for third parties in 4Q/05, 3Q/05, 4Q/04, 2005 and 2004, respectively.

CVRD

38

Table of Contents

The 22% gross revenue increase, from R\$ 29,020 to R\$ 35,350 was due to:

Reference price increase of 71.5% to iron ore and 86.4% to pellets;

Increase of copper prices;

Increase of railroad and port services prices; and

Increase of iron ore and copper volumes sold (copper started its operations in June, 2004 compared with a whole year of trading in 2005).

The above effects were partially offset by:

The devaluation of the average dollar compared with the real was 17%;

CST sale in the second half of 2004; and

Decrease in ferroalloys prices (due to increase of offer began by the end of 2004) and the decline of manganese volume sold.

	72%	28%											

The 15% increase (R\$ 2,188) in the cost of products and services (R\$ 16,311 in 2005 against R\$ 14,123 in 2004) is due to increase in sales volumes and changes in the prices of materials, oil, energy and services which comprise production cost during the period.

CVRD

39

Table of Contents**12.1.3 Selling expenses**

Selling expenses decreased by 17.5%, from R\$ 412 in 2004 to R\$ 340 in 2005, basically due to sale of CST in the second half of 2004 and less commission on sales.

12.1.4 Administrative expenses

Administrative expenses increased by 13.8%, from R\$ 1,125 in 2004 to R\$ 1,280 in 2005, basically due to personnel agreements and expenses with technical consulting services and groundwork.

12.1.5 Research and development

Research and development increased by 52.7%, from R\$ 440 in 2004 to R\$ 672 in 2005, reflecting 0 expansion plan to diversify production and expansion of production to attend world demand.

12.1.6 Other operating expenses

Other operating expenses decreased by R\$ 116, from R\$ 955 in 2004 to R\$ 834 in 2005, basically due to less need of provision for loss with ICMS credits.

12.1.7 Net Financial Results

The net financial result had an impact of R\$ 724 (expense of R\$ 1,276 in 2005 compared to expense of R\$ 2,000 in 2004) due to exchange rate variation effect of the Real against the dollar over the foreign debt, the reduction of financial expenses due to decrease of average debt and amount increase of revenues due to increase of rates over marketable securities abroad.

12.1.8 Income Tax and Social Contribution

Income tax and social contribution reflect an expense of R\$ 2,368 in 2005 compared with an expense of R\$ 1,810 in 2004, mainly caused by increase of taxable income.

12.1.9 Cash generation

The operating cash generation measured by EBITDA (earnings before financial results, results of equity investments, interest, income tax and depreciation, amortization and depletion more dividends received) was R\$ 16,701 in 2005, against R\$ 12,249 in 2004, an increase of 36,3%.

Segment and geographical information

The business areas of the Company are, at present, organized as:

Ferrous comprises iron ore mining and pellet production, as well as the Northern and Southern transportation systems, including railroads, ports and terminals, as they pertain to mining operations. Manganese mining and ferroalloys are also included in this segment.

Non-ferrous comprises the production of non-ferrous minerals.

Logistics comprises transportation systems as they pertain to the operation of ships, ports and railroads for third-party cargos.

Holdings divided into the following sub-groups:

Aluminum comprises aluminum trading activities, alumina refining and investments in joint ventures and affiliates engaged in bauxite mining and aluminum metal smelting.

Steel comprises investments in joint ventures and affiliates engaged in steel.

Others comprises investments in joint ventures and affiliates engaged in other businesses.

Table of Contents**12.2 Comments on the Parent Company Results****12.2.1 Gross Revenue**

The 31% increase in gross revenue (R\$ 18,098 in 2005 against R\$ 13,785 in 2004) is the result of the 10% increase in sales of iron ore and pellets and 7% increase in volume of port services and also for the increase of prices of both items. Additionally the revenues of the period include the sale of copper began in June 2004. This effect was compensated in part by the average appreciation the real against the United States Dollar by 17% incident in revenues of the Company.

12.2.2 Cost of Products and Services

Cost of products and services sold in 2005 was R\$ 9,603 in 2005 against R\$ 7,147 in 2004 representing a 34.4% increase. The main factors are the start of the trading of copper (since 2004), higher volumes sold of products in general, contracts readjustments and the increase of assets reflecting increase of expenses related to depreciation.

12.2.3 Gross Margin

The gross margin was reduced by 1.6% (43.8% in 2005 against 45.4% in 2004) mainly due to exchange rate variation loss from revenues, as described above, and the increase of unit cost for production of iron ore, copper and potash during 2005.

12.2.4 Results of Shareholdings by Business Area

The numbers below do not necessarily reflect the individual results of each company, but rather the amounts effectively applicable to the business area.

Business Area	2005	Accumulated	
		2004	Δ%
Ferrous Minerals			
Iron ore	4,560	1,168	290
Pellets	1,063	498	113
Manganese and ferroalloys	30	572	(95)
Non-Ferrous Minerals	(28)	(4)	600
Logistics	231	166	39
Holdings			
Steel	480	802	(40)
Aluminum	582	728	(20)
Others	(43)	17	353
Gain on investments accounted for by the equity method	6,875	3,947	74
Provision for losses	(308)	(79)	(290)
Amortization of goodwill	(223)	(252)	12
Exchange variation in Stockholders' Equity of companies abroad	(878)	(365)	141
Results of equity investments	5,466	3,251	68

Results of equity investments are strongly affected by the exchange rate variation over debt, which had a positive impact due to the appreciation of the Real against the Dollar in the year of 2005 of 11.8% in comparison with an 8.1% during the year of 2004. This effect is partially offset by the negative exchange rate variation from investments abroad.

Operationally, volumes and average selling prices increased in all businesses areas, except for ferroalloys, for which quantities and average sales price services were reduced. The decrease in steel is mainly due to the sale of CST and in the aluminum area, is due to higher production costs of bauxite and energy.

The negative result of equity in others refers to expenses with subsidiaries of mineral extraction in Africa, South America and Oceania.

12.2.5 Selling expenses

Selling expenses decreased by 88.0%, from R\$ 25 in 2004 to R\$ 3 in 2005, basically due to less commission on sales.

CVRD

44

Table of Contents

12.2.6 Administrative expenses

Administrative expenses increased by 29.0%, from R\$ 531 in 2004 to R\$ 685 in 2005, basically due to personnel agreement and expenses with technical consulting services and groundwork.

12.2.7 Research and development

Research and development increased by 18.9%, from R\$ 349 in 2004 to R\$ 415 in 2005, reflecting CVRD expansion plan to diversify production and expansion of production to attend world demand.

12.2.8 Other operating expenses

Other operating expenses decreased by R\$ 313, from R\$ 548 in 2004 to R\$ 235 in 2005, basically due to diminish of need of provision for loss with ICMS credits and contingences.

12.2.9 Net Financial Results

The net financial result on 2005 had an impact of R\$ 833 (income of R\$ 81 on 2005 compared to expense of R\$ 752 on 2004) due to exchange rate variation effect of the Real against the dollar over the foreign debt.

12.2.9 Income Tax and Social Contribution

Income tax and social contribution reflect an expense of R\$ 1,257 on 2005 compared with an expense of R\$ 885 on 2004, mainly caused by increase of taxable income.
