6- Notes To The Quarterly Information As Of And For The Period Ended At September 30, 2009 And 2008

(In thousands of Brazilian reais, except as otherwise stated)

6.1- Operations

Vale S.A. formerly denominated Companhia Vale do Rio Doce, (Vale, the Company) is a publicly company whose predominant activities are mining, processing and sales of iron ore, pellets, copper concentrate and potash, as well as logistic services, power generation and mineral research and development. In addition, through its direct and indirect subsidiaries and jointly controlled companies, also operates in nickel, copper, precious metals, cobalt (by product), manganese and ferroalloys, kaolin, coal, steel, and aluminum-related products.

6.2- Summary of Significant Accounting Policies and Presentation of Interim Quarterly Information

The unaudited Interim Financial Information have been prepared in conformity with the accounting practices adopted in Brazil, based on Corporate law, (as amended by Law 11.638), Law 11.941, as well as the rules and guidelines issued by Brazilian Securities Commission CVM, which special review were done by our auditors according the rules established by Independent Auditors Institute of Brazil IBRACON, together with Accounting Federal Council CFC. These informations followed the principles, methods and criteria that are uniform to those adopted in the prior year ended December 31, 2008, except with regard to the goodwill amortization, and consequently, should be read in conjunction with our audited consolidated financial statements as of and for the year ended December 31, 2008.

According to CPC 13 First-time adoption of Law 11.638 and Law 11.941, the goodwill on expected future results resulting from the acquisition of other company is no longer amortized as from 2009 and therefore is no longer presented in the line item goodwill amortization in the statement of income. In 3Q08 the amount recorded was R\$ 352,684 (R\$ 1,078,049 in the nine-month period ended in September 30, 2008).

In preparing the interim financial statements it is, required to use estimates to account for certain assets, liabilities, and transactions. Therefore the Company s interim financial statements include various estimates concerning the selection of useful lives of property, plant and equipment, provisions for losses on assets, contingent liabilities, operational provisions and other similar evaluations. Actual results may vary from the estimates.

The rights and obligations in foreign currencies are stated according to prevailing exchange rates at the time of the financial statements, and US\$ 1.00 is equivalent to R\$ 1.7781 on September 30, 2009 (US\$ 1.00 is equivalent to R\$ 1.9143 on September 30, 2008), for monetary items. For non-monetary items stated at cost, applies the exchange rate at the date of the transaction or the average monthly exchange rate, and for non-monetary items stated at fair value applies the exchange rate at the date of determining the value. Rights and obligations in the domestic currency, when applicable, are adjusted for inflation according to contractual terms.

The effects of adjustments required by new accounting practices, recognized and presented entirely in one column in the 2008 annual financial statements, were reclassified in the quarters of 2008 with objective to be comparable with respective information of 2009.

The effects of adjustments in the comparative periods resulting from the adoption of CPC 02 - Effects of changes in exchanges rates and currency translation of financial statements was a decrease in 3Q08 of R\$ 4,680,332 (R\$ 419,807) in parent company reflected in investments in subsidiaries and in the consolidated a decrease in 3Q08 of R\$ 1,341,430 (R\$ 559,715), reflected in investments in subsidiaries and a decrease of R\$ 3,338,902 in the 3Q08 (R\$ 139,908), reflected in financial income.

As supplemental information to the interim financial statements, the Company presents the calculation of income before financial income, results of equity investments, income tax and social contribution, depreciation, amortization and depletion LAJIDA (EBITDA).Although it, does not provide a measure of operating cash flow according to accounting practices adopted in Brazil, it is often used by financial analysts in evaluating business, and the Company s Management uses this indicator to measure operating performance.

The Company has performed and evaluation of subsequent events through October 28, 2009 which is the date of the financial statements.

6.3- Consolidation Principles and Practices

The consolidated interim financial statements reflect the balances of assets, liabilities and shareholders equity as of September 30, 2009 and June 30, 2009 and operations of quarterly periods ended on September 30, 2009, June 30,

2009 and September 30, 2008 of the Parent Company, its direct and indirect subsidiaries and its jointly-controlled companies. Overseas operations are translated into the reporting currency for the Brazilian financial statements in Brazil to record equity investments, full or proportionate consolidation of financial statements.

Table of Contents

Vale's participation in hydroelectric projects is made through consortium agreements under which the Company's share in assets and liabilities of the business is proportional to its share in the generated power. The Company does not have joint responsibility for any liability. Since there is no legal entity related to the project, there are no separate financial statements, income tax return, net income or stockholder's equity. Brazilian legislation clearly provides that there is no separate entity under a consortium agreement. Accordingly, the Company recognizes its proportional share of costs and its undivided share in assets related to hydroelectric projects.

6.4- Acquisitions and Divestments**(a) Mineração Corumbá Reunidas S.A.**

In January 2009, the Company entered into a purchase and sale agreement with Rio Tinto PLC to acquire iron ore assets (Brazil) for US\$750,000. This acquisition was concluded on September 2009 in the amount of R\$ 1,472,971 (including working capital change of the period payment) and was approved by the Administrative Council for Economic Defense - CADE. The difference between the acquisition price and the equity in the amount of R\$ 1,017,934 was, preliminary, allocated as follows: R\$ 788,308 to PP&E based on the difference between the market values of assets and the net book values and R\$ 229,626 to goodwill. All these preliminary allocations were based on internal management research and are subject to revision.

(b) Diamond Coal Ltd.

In March 2009, the Company acquired from Cement Argos the company Diamond Coal Ltd., which owns thermal coal assets in Colombia by R\$ 694,560. The difference between the acquisition price and the equity in the amount of R\$ 474,544 was, preliminary, fully allocated to PP&E based on the difference between the market values of assets and the net book values. All these preliminary allocations were based on internal management research and are subject to revision.

(c) Green Mineral Resources

In February 2009, the acquisition of Green Mineral Resources, company owner of mineral rights of Project Regina (Canada) and Project Colorado (Argentina) from Rio Tinto, was concluded by the amount of R\$ 1,994,695. The difference between the acquisition price and the equity in the amount of R\$ 1,744,589 was, preliminary, fully allocated to PP&E based on the difference between the market values of assets and the net book values. All these preliminary allocations were based on internal management research and are subject to revision.

(d) Other transactions

In September 2009, Vale concluded an agreement with ThyssenKrupp Steel AG to increase its stake in ThyssenKrupp CSA Siderúrgica do Atlântico Ltda. (CSA) to 26.87%, from the current 10% interest, through a capital increase of R\$ 2,532,064. The Company still has to pay R\$ 1,311,950.

In July 2009, Vale signed an agreement which involves the sale of some forest assets, totaling 84,7 thousand including preservation areas and eucalyptus plantation in Maranhão, per R\$ 235 million, registering a gain of R\$ 110,899 (see note 6.25).

In April 2009, the Company sold its remaining interest in Usiminas for R\$ 594,775 obtaining a gain of R\$ 287,814.

In March 2009, 50% of Teal Minerals Incorporated, Joint Venture with African Rainbow Minerals Limited, was acquired by R\$ 138,792. The difference between the acquisition price and the equity in the amount of R\$ 254,095 was, preliminary, fully allocated to PP&E based on the difference between the market values of assets and the net book values. All these preliminary allocations were based on internal management research and are subject to revision.

In February 2008, the Company sold its interests of 4.83% in common shares of Jubilee Mines N.L., held by Vale Inco, by R\$ 231,788 obtaining a gain of R\$ 138,879 (see note 6.25).

Table of Contents**6.5- Cash and Cash Equivalents**

| | Consolidated | | Parent Company | |
|------------------------|---------------------|-------------------|-----------------------|------------------|
| | 09/30/09 | 06/30/09 | 09/30/09 | 06/30/09 |
| Cash and bank accounts | 1,018,756 | 1,056,746 | 31,025 | 51,781 |
| Short-term investment | 14,541,840 | 15,276,111 | 1,146,001 | 1,825,909 |
| | 15,560,596 | 16,332,857 | 1,177,026 | 1,877,690 |

All the above mentioned short term investments are done through the use of low risk fixed income securities, particularly denominated in Brazilian reais indexed to the CDI rate, and others denominated in US dollars comprised of time deposits.

Vale has tax incentives related to its manganese, copper, alumina, aluminium and kaolin operations in the state of Pará, kaolin operation in the state of Amapá and potash in the state of Sergipe. Tax incentives related to manganese comprise partial exemption up to 2013. Tax incentives related to alumina and potash comprise full exemption of income tax on production levels defined up to 2009 and 2013, respectively, while the partial tax exemption of incentives related to aluminum and kaolin expires in 2013. An amount equal to the tax savings shall be recognized in a reserve account in shareholders' equity and may not be paid as dividends.

Vale also has tax incentives related to Goro, in New Caledonia (Goro). These tax incentives include temporary full exemption of income tax during the construction phase of the project and also for a 15-year period beginning in the first year of commercial production, as defined by the applicable law, followed by a 5-year period with 50% of temporary tax incentives. Besides the, Goro Project also qualifies for certain exemptions of indirect taxes such as import tax during the construction phase and during all the commercial life of the project. Some of these tax benefits, including temporary tax incentives, are subject to an earlier phase out in case the project achieves a specified cumulative rate of return. We are subject to taxation on part of the income commencing in the first year in which commercial production is achieved, as defined by the applicable law. To date, we have not recorded any taxable income for New Caledonian tax purposes. The benefits of this legislation are expected to apply with respect to taxes payable once the Goro project is in operation.

Vale is subject to examination by tax authorities for up to five years regarding its operations in Brazil, ten years for Indonesia, and five or six years for operations in Canada, according to the cantonal, except for Newfoundland which has no limit.

Brazilian tax loss carry-forwards have no expiration date though offset is restricted to 30% of annual end quarter taxable income.

| Over 11% (*) | 2,031,483 | 2,031,483 |
| Variable (Perpetual notes) | 152,363 | |
| | 38,918,945 | 12,745,589 |

(*) Includes non-convertible debentures and other Brazilian reais denominated loans where interest is equal to the accumulated variation by CDI and TJLP (Brazilian interbank certificate of deposit and Long-term interest rate) plus spread. For these operations the Company has contracted

derivatives to hedge the Company exposure against the variations of floating debt denominated in reais. The contract value for these operations is R\$ 10,875 million, where R\$ 5,743 million has an original interest rate between 7.1% and 9%, and the remaining amount has real interest rate above 9%. After the derivatives contract, the average cost of these operations is equivalent to 4.64%.

The percentage variations related applied to the debt in each quarter ended were as follows:

| | 09/30/09 | 06/30/09 | 09/30/08 |
|--|-----------------|-----------------|-----------------|
| TJLP Long-Term Interest Rate (effective rate) | 1.6 | 1.6 | 1.5 |
| IGP-M General Price Index Market | (0.4) | (0.3) | 1.6 |
| Devaluation of Real against United States Dollar | 9.8 | 18.6 | 20.0 |

In September, 2009, Vale issued US\$ 1,000 million of 10-year notes through its wholly-owned subsidiary Vale Overseas, fully and unconditionally guaranteed by Vale. The notes due 2019 will bear a coupon of 5 5/8% per year, payable semi-annually, at a price of 99.23% of the principal amount. These notes were priced with a spread of 225 basis points over U.S. Treasuries, resulting in a yield to maturity of 5.7% per year.

On January, 2008 the Company entered into a transaction with Brazilian bank to finance working capital in the amount of R\$ 2,000 millions with final maturity in 2018.

In 2008, Vale entered into agreements with Banco Nacional de Desenvolvimento Econômico e Social (BNDES), the Brazilian National Development Bank with Japanese agencies, granting long-term financials, Japan Bank for International Cooperation (JBIC) and Nippon Export and Investment Insurance (NEXI) for the financing of the mining, logistics and power generation projects to be developed under Vale's investment program for 2008-2012. Until September 30, 2009 the Vale had draw down R\$ 1,145 million under the credit facility granted by BNDES.

Additionally, we have revolving credit lines available under which amounts can be drawn down and repaid at the option of the borrower. At September 30, 2009, the total amount available under revolving credit lines was US\$1,900, of which US\$1,150 was granted to Vale International and the balance to Vale Inco. As of September 30, 2009, neither Vale International nor Vale Inco had drawn any amounts under these facilities.

At September 30, 2009 the outstanding debt was R\$ 38,918,945 (June 30, 2009 R\$ 39,701,114), of which R\$ 295,224 (June 30, 2009 R\$ 351,471) is collateralized by future receivables from certain export sales by the subsidiary CVRD

Overseas Ltd. Loans, R\$1,041,462 (June 30, 2009 R\$532,788) guaranteed by other actual assets. Besides, there are loans in the amount of R\$59,706 (June 30, 2009 R\$89,070) from international lenders guaranteed by Brazilian Federal Government, to which the Company has provided guarantees in the same amount. The remaining long-term debt of R\$37,522,553 (June 30, 2009 R\$38,727,785), of which R\$13,346,726 (June 30, 2009 R\$12,687,035) of fixed rate notes denominated in dollar and R\$24,175,827 (June 30, 2009 R\$26,040,750) of other debts there are no guarantees. Some long-term debt instruments have financial coverage. The main financial coverage relates to certain ratios that must be maintained, such as debt versus EBITDA and interest coverage. The Company is in full compliance with financial coverage required.

Table of Contents**6.15- Contingent Liabilities and Commitments**

The Company and its subsidiaries are parties to labor, civil, tax and other suits and have been contesting these matters both administratively and in court. When applicable, these are backed by judicial deposits. Provisions for losses are estimated and inflation restated by management based on the opinion of the Legal Department and its external legal counsels.

In addition to the provisions recorded, there are other contingent liabilities, split between taxes, labor and civil claims, estimated as possible losses in the amount of R\$ 8,332,128 (R\$ 3,840,486 for the parent Company).

Contingent Liabilities

Provisions for contingencies net of judicial deposits, considered by management and its legal counsel as sufficient to cover probable losses from, are detailed as follows:

| | Consolidated | | Parent Company | |
|---|---------------------|------------------|-----------------------|------------------|
| | 09/30/09 | 06/30/09 | 09/30/09 | 06/30/09 |

I) Tax Contingencies:

The major suits are:

Value-Added Tax on Sales and Services (ICMS) The contingent figures refers to the right of credit and differential rates regarding the transfer of assets between company branches;

Services Tax (ISS) The major claims are related to disputes on the location of tax collection;

Import Duty (II) The provision made is related to the Fiscal classification of equipment imported by merged companies;

Additional Compensation to Harbor Workers (AITP) Amounts regarding the collection of compensation amounts for public harbor workers transferred to private harbor;

Income Tax and Social Contribution It refers essentially to the dispute on tax loss compensation and negative bases of social contribution above the limit of 30% of taxable income and monetary adjustment of assets from merged companies; and

Others Regarding disputes on tax credit compensation and the basis of calculation of Financial Compensation by Exploration of Mineral Resources CFEM.

II) Civil Contingencies:

The civil lawsuits are mainly related to claims made against us by contractors in connection with losses allegedly incurred by them as a result of several economic plans, accidents and return of land.

Table of Contents**III) Labor Contingencies:**

Labor and social security contingencies it refers mainly to claims for (a) payment of time spent traveling from their residences to the work-place, (b) additional health and safety related payments, and (c) disputes about the amount of indemnities paid upon dismissal and one-third extra holiday pay.

Other commitments

(a) In connection with a tax-advantaged lease financing arrangement sponsored by the French Government, Vale provided certain guarantees on behalf of Vale Inco New Caledônia (VINC) pursuant to which it was guaranteed payments due from VINC of up to a maximum amount of US\$ 100 millions (Maximum Amount) in connection with an indemnity. The Company also provided an additional guarantee covering the payments due from VINC of (a) amounts exceeding the Maximum Amount in connection with the indemnity and (b) other amounts payable by VINC under a lease agreement covering certain assets. As at September 30, 2009, such guarantees totaled US\$ 159 millions including the US\$ 100 millions.

During the second quarter two new bank guarantees totaling 43 millions were established by the Company on behalf of VINC in favor of the South Province of New Caledonia in order to guarantee the performance of VINC with respect to certain environmental obligations in relation to the metallurgical plant and the Kwe West residue storage facility.

Sumic Nickel Netherlands B.V., a 21% shareholder of VINC, has a put option to sell to Vale 25%, 50%, or 100% of the shares they own of VINC. The put option can be exercised if the defined cost of the initial nickel-cobalt development project exceeds US\$ 4,2 billions at project rates and an agreement cannot be reached on how to proceed with the project.

The Company provided a guarantee covering certain termination payments due from VINC to the supplier under an electricity supply agreement (ESA) entered into in October 2004 for the VINC project. The amount of the termination payments guaranteed depends upon a number of factors, including whether any termination of the ESA is a result of a default by VINC and the date on which an early termination of the ESA were to occur. If VINC defaults under the ESA prior to the anticipated start date for supply of electricity to the project, the termination payment, which currently is at its maximum, would be 145 millions. Once the supply of electricity under the ESA to the project begins, the guaranteed amounts will decrease over the life of the ESA.

In February 2009, Vale Inco Newfoundland and Labrador Limited (VINL), Vale's subsidiary, entered into a fourth amendment to the Voisey's Bay Development agreement with the Government of Newfoundland and Labrador, Canada, that permitted VINL to ship up to 55,000 metric tonnes of nickel concentrate from the Voisey's Bay area mines. As part of the agreement, VINL agreed to provide the Government of Newfoundland and Labrador financial assurance in the form of letters of credit each in the amount of \$ 16 million Canadian-dollar for each shipment of nickel concentrate shipped out of the province from January 1, 2009 to August 31, 2009. The maximum amount of this financial assurance is \$ 112 millions Canadian-dollar based on seven shipments of nickel concentrate. As at September 30, 2009, all seven of the letters of credit had been issued totaling \$ 112 millions Canadian-dollar.

(b) At the time of our privatization in 1997, the Company issued debentures to its then-existing stockholders, including the Brazilian Government. The terms of the debentures, were set to ensure that the pre-privatization stockholders, including the Brazilian Government would participate in possible future financial benefits that could be obtained from exploiting certain mineral resources.

A total of 388,559,056 Debentures were issued at a par value of R\$ 0.01 (one cent), whose value will be restated in accordance with the variation in the General Market Price Index (IGP-M), as set forth in the Issue Deed.

The debentures holders has the right to receive premiums, paid semesterly, equivalent to a percentage of net revenues from specific mine resources as set forth in the indenture.

In April and in September, 2009, the Company paid interest on debentures in the amount of R\$ 7,879 and R\$ 7,231, respectively.

6.17- Pension Plan

The following information summarizes the costs related to pension plans, which include the allowance for additional pension support and health care plan.

Allowance for additional pension support and health care plan refer to the Company's responsibility to support retirements, pensions and health assistance in connection with the termination of some employees, which occurred between 1987 and 1989.

In the 2008 year-end financial statements, Vale disclosed that it expected to contribute R\$ 837,978 to its defined benefit plans in 2009. As of September 30, 2009, R\$ 454,340 had been contributed. The Company does not expect significant changes in the estimates disclosed in 2008.

Table of Contents**6.18- Long-term Incentive Compensation Plan**

In 2008, with the purpose of introducing a stockholders vision to some of the Company's executives, as well as improving the retention of these executives and reinforcing a sustainable performance culture, the Board of Directors approved a long-term incentive compensation plan, which was implemented with a three-year cycle.

Under the plan, the participants, restricted to certain executives, may elect to allocate part of their annual bonuses to the plan. That portion of the bonus allocated to the plan is in fact used by the executive to purchase Vale's preferred shares through a previously defined financial institution, at market conditions and with no benefit provided by Vale.

The shares purchased by each executive have no restrictions and may, at the participant's discretion, be sold at any time. However, in order to be entitled to the long-term incentive compensation plan to be provided by Vale, the amount of shares initially purchased by the executives on the plan's adoption must be held for a three-year period and the executive must retain their employment relationship with Vale during that period.

By meeting the two conditions described above (keeping the number of shares purchased and remaining a Vale employee over the three-year period), the participant becomes entitled to receive from Vale, at the end of each cycle, a cash payment equivalent to the total amount of the shares held, based on their market quotations. As of September 30, 2009, 1,809,117 shares (1,809,117 shares as of June 30, 2009) were covered by said benefit.

The Company records the cost of this incentive in accordance with the Long-Term Compensation Plan, following the requirements of CVM Resolution 562/2008. The obligations are measured at fair value on each disclosure date, based on market quotations. Settlement costs incurred are recognized during the three-year vesting period.

Additionally, certain executives eligible to the long-term incentive have the opportunity to receive at the end of the three-year cycle an amount equal to the market value of a certain number of shares, based on an evaluation of their career and Vale's performance factor as measured by the indicator of total return to stockholders.

As of September 30, 2009, the amount accrued to support this plan is R\$ 70,633 (R\$ 67,777 as of June 30, 2009), fully recognized in the statement of income.

6.19- Paid-up Capital

Class A preferred shares have the same rights as common shares, except for the right to elect the members of the Board of Directors. They have priority to a minimum annual dividend of 6% on the portion of capital represented by this class of share or 3% on the book net equity value of the share, whichever is greater.

On July 2008, the Company issued 256,926,766 common shares and 164,402,799 preferred shares through a global offering, in Brazil and abroad.

On August 2008, through an additional offering, the Company issued 24,660,419 preferred shares. Following the issue, Vale's capital stock increased by R\$ 19,434,193 with corresponding transaction costs of R\$ 160,771 being recorded as contra entry. As a result, capital is now composed of 3,256,724,482 common shares and 2,108,579,618 preferred shares, totaling R\$ 47,434,193.

As from May, 04 2009, Vale changed the code for negotiation of its ADRs negotiated in New York Stock Exchange (NYSE) from RIO e RIO-P to VALE and VALE-P, respectively.

As of September 30, 2009, the Company's capital is R\$ 47,434,193, corresponding to 5,365,304,100 shares, without par value.

The members of the Board of Directors and the Executive Board together own 157,340 common shares and 1,008,701 preferred shares.

The Board of Directors has the power, without requiring an amendment to the bylaws, to allow the issue of new shares (authorized capital) including through the capitalization of profits and reserves up to the authorized limit of 3,600,000,000 common shares and 7,200,000,000 preferred shares without par value.

Table of Contents**6.20- Funds linked to Future Mandatory Conversion into Shares**

Vale issued mandatory convertible notes, as follows:

| Headings | Date | | Value (In thousands of reais) | | |
|-----------------------|-----------|------------|-------------------------------|----------------|------------|
| | Emission | Expiration | Gross | Net of charges | Cupom |
| Tranches RIO e RIO P. | June/2007 | June/2010 | 3,601 | 3,064 | 5,50% a.a. |

Tranches VALE - 2012

| | | | | | |
|------------------------|-----------|-----------|-------|-------|------------|
| Tranches VALE P - 2012 | July/2009 | July/2012 | 1,858 | 1,523 | 6,75% a.a. |
|------------------------|-----------|-----------|-------|-------|------------|

The notes pay a coupon quarterly and are entitled to an additional remuneration equivalent to the cash distribution paid to ADS holders. These notes were classified as a capital instrument, mainly due to the fact that neither the Company nor the holders have the option to settle the operation, whether fully or partially, with cash, and the conversion is mandatory; consequently, they were recognized as a specific component of shareholders' equity, net of financial charges.

The funds linked to future mandatory conversion, net of charges are equivalent to the maximum of common shares and preferred shares, as follows. All the shares are currently held in treasury (see note 6.21).

| Headings | Maximum amount of action | | Value (In thousands of reais) | |
|-----------------------|--------------------------|------------|-------------------------------|-----------|
| | Common | Preferred | Common | Preferred |
| Tranches RIO e RIO P. | 56,582,040 | 30,295,456 | 2,111 | 953 |

Tranches VALE - 2012

| | | | | |
|------------------------|------------|------------|-----|-------|
| Tranches VALE P - 2012 | 18,415,859 | 47,284,800 | 473 | 1,050 |
|------------------------|------------|------------|-----|-------|

On April 30, 2009 Vale paid additional interests to the holders of mandatory convertible notes from tranches VALE (former, RIO) and VALE P (former, RIO-P), in the amount of R\$ 1.073721 and R\$ 1.274361 per note, respectively.

On October 30, 2009 (subsequent event) Vale will pay additional interests to the holders of mandatory convertible notes from tranches RIO, RIO-P, VALE-2012 and VALE.P-2012 in the amount of R\$ 0.857161, R\$ 1.017334, R\$ 1.236080 and R\$ 1.429662, respectively.

6.21- Treasury Stock

On May 27, 2009, the Board of Directors approved the closing of program to repurchase shares approved on October 16, 2008, covering up to 69,944,380 common shares and up to 169,210,249 preferred shares. At the closing program date 18,415,859 common shares and 47,284,800 preferred shares had been purchased.

As of September 30, 2009, 152,579,803 shares were held in the treasury, totaling R\$ 2,470,698 as follows:

| Class | Shares | | Unit acquisition cost | | | Average quoted market price | |
|-----------|--------------------|--------------------|-----------------------|-------|-------|-----------------------------|----------|
| | Quantity | | Average | Low | High | 09/30/09 | 06/30/09 |
| | 09/30/09 | 06/30/09 | | | | | |
| Preferred | 77,581,904 | 77,625,704 | 23.56 | 21.02 | 27.96 | 32.74 | 31.73 |
| Common | 74,997,899 | 74,997,899 | 37.07 | 23.33 | 31.00 | 37.24 | 36.81 |
| | 152,579,803 | 152,623,603 | | | | | |

6.22- Compensation of Stockholders

On April 30, 2009, the Company paid its stockholders the amount of R\$ 2,734,500 in the form of dividends.

On October 15, 2009 (subsequent period) the Board of Directors approved the payment of the second tranche of the minimum dividend and an additional dividend, totaling R\$ 2,564,850, corresponding to R\$ 0.492036226 per common or preferred share in circulation.

6.24- Financial Instruments Derivatives

Risk Management Policy

Vale has developed its risk management strategy in order to provide an integrated approach of the risks the Company is exposed to. To do that, we evaluate not only the impact of market risk factors in the business results (market risk), but also the risk arising from third party obligations with Vale (credit risk) and those risks inherent in Vale's operational processes (operational risk).

Traditional market risk measures such as VaR (Value at Risk) are not sufficient to evaluate the group exposures once Vale's main goal is to avoid a possible lack of cash to fulfill our future obligations.

The enterprise wide risk management approach, that encompasses all kinds of risk, as well as the relations between the several market risk factors (correlations), aims to assess the impact that such events would bring considering the natural hedges presented in the company's portfolio. Therefore, when assessing the risk associated with Vale's business, one can observe the positive effect due to the mix of products and currencies in Vale's portfolio. This diversification implies in a natural reduction of the overall risk of the company. Any risk mitigation strategy, whenever necessary, will be implemented if it contributes significantly for the reduction on the volatility on Vale's cash flows beyond the levels initially observed and to acceptable levels of risk.

Table of Contents

Vale considers that the effective management of risk is a key objective to support its growth strategy and financial flexibility. The risk reduction on Vale's future cash flow contributes to a better perception of the company's credit quality, improving its ability to access different markets and reducing the financing costs. Therefore, the board of directors has established an enterprise-wide risk management policy and a risk management committee.

The risk management policy determines that Vale should evaluate regularly its cash flow risks as well as risk mitigation strategies. As previously stated, whenever considered necessary, these mitigation strategies should be put in place, will be executed with the objective of reducing the risks regarding the obligations assumed by the Company, both with third parties and its shareholders.

The executive board is responsible for the evaluation and approval of the risk mitigation strategies recommended by the risk management committee. The committee is responsible for overseeing and reviewing our risk management principles and risk management instruments, besides reporting periodically to the executive board regarding the management process and risk monitoring, including the main risks Vale is exposed to and their impact on Vale's cash flow.

The risk management policy and procedures, that complement the risk management governance model, require the diversification of operations and counterparties and prohibit speculative transactions with derivatives.

Besides the risk management governance model, Vale has in place a well defined corporate governance structure with the roles and responsibilities well defined. The recommendation and execution of the derivative transactions are implemented by different and independent areas. It is responsibility of the risk management department to define and propose to the risk management committee market risk mitigation strategies consistent with Vale and its wholly owned subsidiaries corporate strategy. It is responsibility of the finance department the execution of the risk mitigation strategies through the use of derivatives. The independence of the areas guarantees an effective control on these operations.

The monitoring and monthly evaluations of the consolidated risk exposure allow us to evaluate the financial results and the impact on Vale's cash flow, as well as guarantee that the initial goals will be achieved. The fair value measurements of the trades are reported weekly to management.

All derivative trades were recognized in our balance sheet at fair value and their respective gains or losses were recognized in the earnings.

Considering the nature of Vale's business and operations, the main market risk factors which the Company is exposed are:

Interest rates;

Foreign exchange;

Products prices;

Input and other costs.

Fair value computation methodology

Well-known market participants' valuation methodologies were used to compute the fair value of instruments. The financial instruments were evaluated computing their present values considering market curves that impact the instrument on the determination dates. The curves and prices used in the pricing for each group of instruments are detailed in the topic "market curves".

The pricing method considered in the case of European options is the Black & Scholes model, which is widely used among derivatives market participants for the option pricing. In this model, the derivative fair value is a function of the volatility, spot price of the underlying, strike price, risk free rate and maturity. In the case of options where the financial result is a function of the average of the underlying price for a certain period of the time, called Asian options, we use the Turnbull & Wakeman model, also widely used to price this type of instrument. Besides the parameters used on the Black & Scholes model it is considered in this model the price averaging period.

In the case of swaps, the receiving leg and the paying leg present values are estimated discounting their cash flows using the interest rate of the currency they are denominated. The difference between the present values of the

receiving leg and paying leg of the swap is the fair value.

The computation method for the swaps linked to TJLP follows the description enclosed in CETIP's formula book, which includes the TJLP forward curve definition. Therefore, TJLP is computed using the inflation target, published by Banco Central do Brasil, based on IPCA (Extended National Consumer Price Index) plus the Brazilian credit spread, which comprehends an international real interest rate and a Brazilian credit risk component, that is computed using the credit risk for the government bonds, for the medium and long term perspective.

The pricing for the commodities future settlement contracts (buy or sell) is computed using forward curves for each commodity. Normally, these curves are collected in the exchanges where these commodities are traded, among them, London Metals Exchange (LME) and COMEX (Commodities Exchange) or market price providers. When there is no price for a specific date, we use interpolations between the available periods.

Table of Contents**Value at Risk computation methodology**

The Value at Risk of the positions was measured using historical simulation approach. Different market risk factors that impact the prices of the derivatives included in our portfolio were identified and a two year sample of its historical daily returns was gathered.

The current positions of Vale's derivatives were used to simulate their returns based on sample data and built a non parametric return distribution and consequently the value at risk for the portfolio considering one business day time horizon. The value at risk of the portfolio considers a 95% confidence level.

Sensitivity Analysis

In the topic sensitivity analysis we present sensitivity analysis tables for all outstanding positions as of September 30th 2009. The scenarios defined for these analyses were:

Scenario I: expected considers the market curves as of September 30 2009;

Scenario II: unfavorable change of 25% considers a shock of 25% in the market curves used for the pricing in the expected scenario, negatively impacting the fair value of Vale's derivatives positions;

Scenario III: favorable change of 25% considers a shock of 25% in the market curves used for the pricing in the expected scenario, positively impacting the fair value of Vale's derivatives positions;

Scenario IV: unfavorable change of 50% considers a shock of 50% in the market curves used for the pricing in the expected scenario, negatively impacting the fair value of Vale's derivatives positions;

Scenario V: favorable change of 50% considers a shock of 50% in the market curves used for the pricing in the expected scenario, positively impacting the fair value of Vale's derivatives positions;

Contracts subjected to margin calls

Vale has contracts subject to margin calls only for part of copper and nickel trades executed by its wholly-owned subsidiary Vale Inco Ltd. The total amount deposited in cash in September 2009 was not relevant.

Main positions definitions:**Protection program for the Real denominated debt indexed to CDI**

CDI vs. USD fixed rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows from debt instruments denominated in Brazilian Reais linked to CDI to U.S. Dollars. In those swaps, Vale pays fixed rates in U.S. Dollars and receives payments linked to CDI.

CDI vs. USD floating rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows from debt instruments denominated in Brazilian *Reais* linked to CDI to U.S. Dollars. In those swaps, Vale pays floating rates in U.S. Dollars (Libor - London Interbank Offered Rate) and receives payments linked to CDI.

Those instruments were used to convert the cash flows from debentures issued in 2006 with a nominal value of R\$ 5.5 billion, from the NCE (Credit Export Notes) issued in 2008 with nominal value of R\$ 2 billion and also from property and services acquisition financing realized in 2006 and 2007 with nominal value of R\$ 1 billion.

Protection program for the Real denominated debt indexed to TJLP

TJLP vs. USD fixed rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows of the loans with Banco Nacional de Desenvolvimento Econômico e Social (BNDES) from TJLP to U.S. Dollars. In those swaps, Vale pays fixed rates in U.S. Dollars and receives payments linked to TJLP.

TJLP vs. USD floating rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to convert the cash flows of the loans with BNDES from TJLP to U.S. Dollars. In those swaps, Vale pays floating rates in U.S. Dollars and receives payments linked to TJLP.

Foreign Exchange cash flow hedge

Brazilian *Real* fixed rate vs. USD fixed rate swap In order to reduce the cash flow volatility, Vale entered into swap transactions to mitigate the foreign exchange exposure that arises from the currency mismatch between the revenues denominated in U.S. Dollars and the disbursements and investments denominated in Brazilian *Reais*.

Table of Contents**Protection program for the Euro denominated floating rate debt**

Euro floating rate vs. USD floating rate swap In order to reduce the cash flow volatility, Vale entered into a swap transaction to convert the cash flows from loans in Euros linked to Euribor to U.S. Dollars linked to Libor. This trade was used to convert the cash flow of a debt in Euros, with a notional amount of 19.1 million, issued in 2003 by Vale. In this trade, Vale receives floating rates in Euros (Euribor) and pays floating rates in U.S. Dollars (Libor).

Protection program for the USD floating rate debt

USD floating rate vs. USD fixed rate swap In order to reduce the cash flow volatility, Vale Inco Ltd., Vale's wholly-owned subsidiary, entered into a swap to convert U.S. Dollar floating rate debt into U.S. Dollar fixed rate debt. Vale Inco used this instrument to convert the cash flow of a debt issued in 2004 with notional amount of USD 200 million. In this trade, Vale pays fixed rates in U.S. Dollars and receives floating rates in U.S. Dollars (Libor).

Foreign Exchange protection program for Coal Fixed Price Sales In order to reduce the cash flow volatility associated with a fixed price coal contract, Vale used Australian Dollar forward purchase in order to equalize production cost and revenues currencies.

Aluminum Strategic cash flow protection program In order to protect our cash flow for 2009 and 2010, Vale entered into hedging transactions where we set fixed prices for part of Vale revenues for these periods.

Nickel Strategic cash flow protection program In order to protect our cash flow for 2009 and 2010, Vale entered into hedging transactions where we set fixed prices for part of Vale revenues for these periods.

Nickel Fixed Price Program In order to maintain the exposure to Nickel price fluctuations, we entered into derivatives to convert to floating prices all contracts with clients that required a fixed price. These trades aim to guarantee that the prices of these operations would be the same of the average prices negotiated in LME in the date the product is delivered to the client. It normally involves buying Nickel forwards (Over-the-Counter) or futures (exchange negotiated). Those operations are usually reverted before the maturity in order to match the settlement dates of the commercial contracts in which the prices are fixed. This program was discontinued for sales in 2009 due to the decision to protect our cash flow this year.

Nickel Purchase Protection Program In order to reduce the cash flow volatility and eliminate the mismatch between the pricing of the purchased nickel (concentrate, cathode, sinter and others) and the pricing of the final product sold to our clients, hedging transactions were implemented. The items purchased are raw materials utilized to produce refined Nickel. The trades are usually implemented by the sale of nickel forward or future contracts at LME or over-the-counter operations.

Protection program of Natural Gas Program In order to minimize the impact of the input price volatility in the company's costs, natural gas derivative trades were implemented. These transactions are usually implemented through the purchase of future and forward contracts.

Copper Scrap Purchase Protection Program In order to reduce cash flow volatility and eliminate the quotation period mismatch between the pricing period of copper scrap purchase and the pricing period of final products sale to the clients, hedging transactions were implemented. The copper scrap is combined with other raw materials or inputs from Vale Inco Ltd., Vale's wholly-owned subsidiary, to produce copper to the final costumers. In this case, trades are usually implemented by the sale of forwards or futures at LME or Over-the-Counter trades.

Bunker Oil Purchase Protection Program In order to reduce the impact of bunker oil price fluctuation on Vale's freight hiring and consequently reducing the company's cash flow volatility, bunker oil derivatives were implemented. These transactions are usually executed through forward purchases and swaps.

Maritime Freight Hiring Protection Program In order to reduce the impact of maritime freight price fluctuation hired to support CIF and CFR sales and consequently reduce the company's cash flow volatility, freight derivatives (FFA - Forward Freight Agreement) were implemented. These transactions are usually executed through forward purchases.

Embedded Derivatives

Energy purchase energy purchase agreement between Albras, Vale's controlled subsidiary, and Eletronorte. The contract has a clause that defines that a premium can be charged if aluminum prices trades in the range

from US\$ 1,450/t until US\$ 2,773/t. This clause is considered an embedded derivative.

Raw material and intermediate products purchase Nickel concentrate and raw materials purchase agreements of Vale Inco Ltd, Vale's wholly-owned subsidiary, in which there are provisions based on nickel and copper future prices behavior. These provisions are considered embedded derivatives.

Table of Contents

Foreign exchange and interest rate risk

Company's cash flow is subjected to volatility of several different currencies against the U.S. Dollar. While most of our product prices are indexed to US dollars, most of our costs, disbursements and investments are indexed to currencies other than the U.S. Dollar, mainly Brazilian Reais and Canadian dollars.

In order to reduce company's potential cash flow volatility arising from currency mismatch we use derivative instruments. The derivative portfolio implemented to comply with this objective consists, basically, of interest rate swaps to convert floating cash flows in Brazilian Reais to fix or floating U.S. Dollars cash flows, without any leverage.

Vale has also an exposure to interest rates risks over loans and financings. The U.S. Dollars floating rate debt in the portfolio consists mainly of loans including export pre-payments, commercial banks and multilateral organizations loans. In general, the U.S. Dollar floating rate debt is mainly subject to changes in the Libor. To mitigate the impact of the interest rate volatility on the cash flow, Vale takes advantage of natural hedges allowed by the positive correlation of metal prices and U.S. Dollar floating rates. When natural hedges are not present, Vale enters into financial instruments to obtain the same effect.

The Real denominated debt subject to floating interest rates are debentures, Banco Nacional de Desenvolvimento Econômico e Social (BNDES) loans and property and services acquisition financing in the Brazilian market. These Brazilian reais debts are mainly linked to CDI and TJLP.

On September 30th, 2009, the total amount and interests of Brazilian Real denominated debt converted through swaps into US Dollars was US\$ 6.1 billion, with an average cost in dollars of 4.64% after the swaps transactions were implemented and maturity between November 2010 and December 2027, with semi-annual interest payments^a.

These swap transactions have settlement dates and values similar to the interest and principal payment dates, taking into account the liquidity restrictions of the market. At each settlement date, the results on the swap transactions partially offset the impact of the foreign exchange rate in our obligations, contributing to stabilize the cash disbursements in U.S. Dollars for the interest and/or principal payment of our Brazilian Real denominated debt.

In the event of an appreciation (depreciation) of the Brazilian Real against the U.S. Dollar, the negative (positive) impact on Vale debt service (interest and/or principal payment) measured in U.S. Dollars will be almost totally offset by a positive (negative) effect from the swap transaction, regardless of the U.S. dollar / Brazilian Real exchange rate on the payment date.

On the third quarter of 2009, Vale paid in Brazilian Reais an interest amount equivalent to R\$ 134 million related to the Real denominated debt that were converted into U.S. Dollars through the use of swap transactions. However, the company has received R\$ 57 million on the settlement of the swaps, offsetting the U.S. Dollar / Brazilian Real exchange rate variation impact in Vale debt service.

The tables below show September 30th 2009 derivative positions for Vale and controlled companies with the following information: notional amount, initial cost, fair value, value at risk, gains or losses in the period and fair value for the remaining years of the operations per each group of instruments.

Commodities prices, input and costs risk

Vale is also exposed to several market risks associated to global commodities price volatilities.

Nowadays, derivatives transactions included in the portfolio related to commodities prices, input and costs include nickel, copper, natural gas, bunker oil and maritime freight (FFA) derivatives, all of them with the same purpose of mitigating the company's cash flow volatility.

Aluminum Strategic cash flow protection program

In order to protect the cash flow in 2009 and 2010, Vale entered into protection transactions for these periods.

Nickel Fixed Price Sales Program

Vale Inco Ltd. has a long position on future contracts in the London Metal Exchange (LME), with the purpose of maintaining its exposure to nickel price variation, regarding the fact that, in some cases, the commodity is sold at a fixed price to some customers. These positions were discontinued due to the decision of protecting the cash flow for this year.

Nickel Purchase Protection Program

Vale Inco Ltd. has also short positions on the futures market in the LME, in order to minimize the risk of mismatch between the pricing on the costs of intermediate products and finished goods.

Table of Contents**Credit risk on financial trades and financial institutions ratings**

Derivatives transactions are executed with financial institutions that we consider to have a very good credit quality. The exposure limits to financial institutions are proposed annually for the Executive Risk Committee and approved by the Executive Board. The financial institutions credit risk tracking is performed making use of a credit risk valuation methodology which considers, among other information, published ratings provided by international rating agencies. In the table below, we present the ratings in foreign currency published by Moody's and S&P agencies for the financial institutions that we had outstanding trades as of September 30, 2009.

| Parent Company | Vale's Counterparty | Moody's* | S&P* |
|-------------------------------|---|----------|------|
| JP Morgan Chase & Co** | JP Morgan Chase Bank | Aa3 | A+ |

7- Report of the Independent Accountants on Limited Review

(A free translation of the original in Portuguese)

Report of Independent Accountants on the Limited Review

To the Board of Directors and Stockholders

Vale S.A.

- 1 We have carried out a limited review of the Quarterly Information ITR (individual and consolidated) of Vale S.A. (formerly denominated Companhia Vale do Rio Doce) and its subsidiaries, for the quarter ended September 30, 2009, comprising the balance sheets and the statements of operations, changes in stockholders equity, cash flows and value added, the report of performance and notes, prepared under the responsibility of the Company's management.
- 2 Our review was carried out in accordance with specific standards established by the Instituto of Independent Auditors of Brazil (Instituto de Auditores Independentes do Brasil IBRACON), in conjunction with the Federal Accounting Council (Conselho Federal de Contabilidade CFC), and mainly comprised: (a) inquiries of and discussions with management responsible for the accounting, financial and operating areas of the Company with regard to the main criteria adopted for the preparation of the quarterly information and (b) a review of the relevant information and of the subsequent events which have, or could have, significant effects on the financial position and operations of the Company and its subsidiaries.
- 3 Based on our limited review, we are not aware of any significant adjustments which should be made to the quarterly information referred to above for it to be in accordance with the accounting practices adopted in Brazil, as required by the regulations of the Brazilian Securities Commission (Comissão de Valores Mobiliários CVM) specifically applicable to the preparation of quarterly information.

Table of Contents

Vale S.A.

- 4 The Quarterly Information (ITR) mentioned in the first paragraph also includes comparative accounting information for the results for the quarter ended September 30, 2008, obtained from the corresponding Quarterly Information (ITR) for that quarter. The limited review of the Quarterly Information ITR for the quarter ended September 30, 2008 was conducted by other independent auditors, who issued their report, dated October 23, 2008 including (i) division of responsibilities paragraphs regarding the review of financial information of certain investees of Vale S.A. and (ii) qualification of lack of review of financial information from certain investees of Vale S.A.
- 5 As mentioned in Note 6.2, due to changes in the accounting practices adopted in Brazil in 2008, the statements of income, of changes in stockholders equity, of cash flows and value added relating to the quarters ended September 30, 2008, presented for comparative purposes, were adjusted in relation to those originally disclosed and are being revised, as prescribed by NPC 12 -Accounting Practices, Changes in Accounting Estimates and Correction of Errors (Práticas Contábeis, Mudanças nas Estimativas Contábeis e Correção de Erros), as approved by the CVM Deliberation number 506/06, in order to enable comparability of the periods presented. In connection with our review of the quarterly information relating to the quarter ended September 30, 2009, we also reviewed the adjustments arising from the changes in accounting practices disclosed in Note 6.2. We are not aware that those adjustments are inadequate or have not been appropriately recognized, taking into consideration all material aspects. We have been engaged solely to review the adjustments described in Note 6.2 and not to review and neither to apply any other form of procedure on the quarterly information for the quarter ended September 30, 2008, and, therefore, we do not express any form of conclusion on those quarterly information.

(a) Includes direct and indirect participation.

Additional information of the main operational investee companies is available on the Vale website www.vale.com, investor relations

Table of Contents**B- ADDITIONAL INFORMATION****9- CASH GENERATION (TO REVIEW)**

Consolidated operating cash generation measured by EBITDA (earnings before financial results, equity in subsidiaries, income taxes, depreciation, amortization and depletion, increased by dividends received) was R\$ 14,940,927 as of September 30, 2009 against R\$ 28,463,242 as of September 30, 2008, representing a decrease of 47.5%.

EBITDA is not a BR GAAP measure and does not represent the expected cash flow for the reporting periods and, therefore, should not be considered as an alternative measure to net income (loss), as an indicator of operating performance or as an alternative to cash flow as a liquidity source.

Vale definition of EBITDA may not be comparable with EBITDA as defined by other companies.

Table of Contents**10- Management's Discussion and Analysis of the Operational Performance in September 30, 2009 (to review)**

In analyzing this information, some general aspects should be considered, as follows:

On September 30, 2009, about 97% of consolidated gross revenue and 35% of consolidated total costs are linked to currencies other than Brazilian reais. Consequently, the exchange rate fluctuations have a significant impact on net income.

The average dollar rate increased 1.12% between periods (R\$ 1.8198 as of September 30, 2009 against R\$ 1.7996 as of September 30, 2008) and the final rate decreased 7.11% (R\$ 1.7781 as of September 30, 2009 against R\$ 1.9143 as of September 30, 2008).

The Consolidated Trade Balance performance was as follows:

| | In US\$ million | | | | |
|---------|---------------------|--------------|--------------|--------------|---------------|
| | Quarter (Unaudited) | | | Accumulated | |

(*)

Includes sales of providing services to subsidiaries of control shared in the amounts of R\$ 4,854, R\$ 3,421, R\$ 10,439, R\$ 12,626 and R\$ 43,039, referring to the 3Q09, 2Q09, 3Q08, 09/30/09 e 09/30/08, respectively.

(**) The Vale carried through its railroad system of 6,441, 7,304, 7,198, 18,817 and 20,192 millions of TKUs of general cargo and 3,329, 1,866, 2,762, 8,483 and 7,857 millions of TKUs of iron ore for third parties in 3Q09, 2Q09, 3Q08, 09/30/09 e 09/30/08, respectively.

The fall of 31.1% in the Sales, from R\$ 54,820,199 on September 30, 2008 to R\$ 37,764,456 on September 30, 2009 is due primarily to the reduction of price and volumes sold.

| | 65% | 35% | | | | | |

The 14.7% decrease in cost of products and services (R\$ 24,044,743 as of September 30, 2008 against R\$ 20,520,692 on September 30, 2009) was due to reduction in volume sold and efforts to reduce cost, partially offset by exchange rate variation.

10.1.3- Selling and administrative expenses

The Selling expenses decreased 16.57%, from R\$ 372,391 as of September 30, 2008 to R\$ 310,691 as of September 30, 2009, due to idle capacity occurred in 2009, impacting at reduction of doubtful debt provision and freight expenses and royalties, while administrative expenses decreased 11.45%, from R\$ 1,529,548 at September 30, 2008 to R\$ 1,354,462 on September 30, 2009, due to the efforts by the Company.

10.1.4- Research and development

Research and development expenses increased 6.5%, from R\$ 1,353,132 as of September 30, 2008 to R\$ 1,441,254 as of September 30, 2009, reflecting Vale's plan to diversify and expand the production, mainly in the gas sector and energy.

10.1.5- Other operating expenses/revenues (net)

Other operating expenses increased 85.26%, from R\$ 1,223,485 as September 30, 2008 to R\$ 2,266,572 on September 30, 2009, basically due to expenses incurred as a consequence of the financial crisis: idle capacity, shutdown of plants and employee termination costs. The effect of this expenses was partially offset by revenues from taxes recovery.

10.1.6- Net financial results

Net financial results varied R\$ 3,905,825 (R\$ 2,411,943 as of September 30, 2009 against R\$ 1,633,790 as of September 30, 2008), reflecting the effects of the depreciation of US dollar against Brazilian Reais on debt.

10.1.7- Income tax and social contribution

Income and social contribution tax expenses presented an expense of R\$ 6,131,291 as of September 30, 2009 compared to R\$ 3,129,701 as of September 30, 2008, mainly due to a decrease in taxable income and the shareholders remuneration paid integrally in form of dividends, without using benefit of interest on shareholders equity.

Table of Contents**10.2- Management's Discussion and Analysis of the Operational Performance of Parent Company****10.2.1- Sales revenues**

The 15.8% decrease in revenue (R\$ 20,939,169 as of September 30, 2009 against R\$ 24,878,808 as of September 30, 2008) was derived from the appreciation of US dollar against Brazilian reais, partially compensated by the fall of selling volumes.

10.2.2- Cost of products and services

Cost of products and services sold as of September 30, 2009 was R\$ 9,676,484, against R\$ 11,967,244 as of September 30, 2008, representing a 19.1% decrease. The main factor is the decrease in volume sold.

10.2.3- Gross margin

Gross margin increased from 49.4% as of September 30, 2008 to 52.4% as of September 30, 2009, mainly due to US dollar valuation against Brazilian real and the price adjustment.

10.2.4- Equity results

Equity in subsidiaries decreased by R\$ 16,828,634 from R\$ 12,757,543 as of September 30, 2008 to -R\$ 4,071,091 as of September 30, 2009 mainly due to the reduction of operational results of affiliates for the period and high depreciation of dollar in the second quarter of 2009.

10.2.5- Selling and administrative expenses

The selling expenses decreased 94.78%, by R\$ 23,101 as of September 30, 2008 to R\$ 1,206 as of September 30, 2009, due primarily to reduction of doubtful debt provision, while administrative expenses decreased by 7.51% from R\$ 919,791 as of September 30, 2008 to R\$ 832,643 as of September 30, 2009.

10.2.6- Research and development

Research and development increased by 24.92%, from R\$ 753,146 as of September 30, 2008 to R\$ 940,844 as of September 30, 2009, reflecting Vale's plan to diversify and expand the production, mainly in the gas sector and energy.

10.2.7- Other operating expenses/ income, net

Other operating expenses increased by R\$ 314,071, from expense of R\$ 327,013 as of September 30, 2008 to expense of R\$ 641,084 as of September 30, 2009, basically due to expenses incurred as a consequence of the financial crisis: idle capacity, shutdown of plants and employee termination costs. The effect of this expenses was partially offset by revenues from taxes recovery.

10.2.8- Net financial results

Net financial results changed R\$ 12,255,301 (R\$ 3,060,094 as of September 30, 2008 against R\$ 9,195,207 as of September 30, 2009) basically due to the appreciation of US dollar against Brazilian Real on related party debt.

10.2.9- Income tax and social contribution

Income tax and social contribution revenue totaled R\$ 639,505 as of September 30, 2008 compared to an expense of R\$ 6,157,173 as of September 30, 2009, mainly due to a increase in taxable income and the remuneration integrally paid in the form of dividends without the usage of benefit of interest on shareholders' equity.
