Filed Pursuant to Rule 424(b)(3)  
Registration Statement No. 333-166191

**PROSPECTUS  
ENERGY FOCUS, INC.**

4,470,000 Shares of Common Stock

This prospectus relates to the sale of up to 4,470,000 shares of our common stock by Lincoln Park Capital Fund, LLC ( LPC ), Chicago, Illinois. LPC is sometimes referred to in this prospectus as the selling shareholder. The prices at which LPC may sell the shares will be determined by the prevailing market price for the shares or in negotiated transactions. We will not receive proceeds from the sale of our shares by LPC.

Our common stock is registered under Section 12(g) of the Securities Exchange Act of 1934 and quoted on the NASDAQ Global Market under the symbol EFOI. On May 28, 2010, the last reported sale price for our common stock as reported on the NASDAQ Global Market was \$1.10 per share. The shares of common stock offered pursuant to this prospectus have been approved for listing on the NASDAQ Global Market.

**Investing in our common stock involves certain risks. See Risk Factors beginning on page 3 for a discussion of these risks.**

The selling shareholder is an underwriter within the meaning of the Securities Act of 1933, as amended.

On March 17, 2010, we entered into a Purchase Agreement with LPC covering the sale or issuance to it of up to 4,590,000 shares of our common stock. On that date, of the 21,250,304 outstanding shares of our common stock, non-affiliates held 14,376,212 shares and affiliates held 6,874,092 shares. At the last reported sale price of our common stock on March 16, 2010 of \$1.28 per share, the market value of the shares held by non-affiliates was \$18,401,551. At that per share price, the market value of the 4,590,000 shares issuable under the Purchase Agreement would be \$5,875,200, which number of shares and market value are equal to 31.93% of the number and market value of the shares held by non-affiliates on March 17, 2010.

This prospectus is part of a registration statement on Form S-3 that we filed with the Securities and Exchange Commission. During the twelve calendar month period prior to and ending on the date of this prospectus, we have not offered or sold any shares of common stock pursuant to General Instruction I.B.6. of Form S-3 other than the shares covered by this prospectus.

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined that this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

The date of this prospectus is June 1, 2010.

**PROSPECTUS SUMMARY**

This prospectus provides you with a general description of the common stock being offered. You should read this prospectus, including all documents incorporated herein by reference, together with additional information described under the heading **Where You Can Find More Information**.

The registration statement that contains this prospectus, including the exhibits to the registration statement, contains additional information about us and the securities being offered under this prospectus. You should read the registration statement and the accompanying exhibits for further information. The registration statement and exhibits can be read and are available to the public over the Internet at the SEC's website at <http://www.sec.gov> as described under the heading **Where You Can Find More Information**.

**Business**

We are a Delaware corporation. Our principal executive offices are located at 32000 Aurora Road, Solon, Ohio 44139. Our telephone number is 440.715.1300. The address of our website is [www.efoi.com](http://www.efoi.com). Information on our website is not part of this prospectus.

We design, develop, manufacture, and market energy-efficient lighting products, and we are a leading provider of turnkey energy-efficient lighting solutions in the governmental and public sector market, general commercial market, and the pool market. Our lighting technology offers significant energy savings, heat dissipation and maintenance cost benefits over conventional lighting for multiple applications.

During 2009 and early 2010, we completed the initial phase of our new business strategy to provide turnkey solutions, which use, but are not limited to, our patented and proprietary technology. Our solutions include light-emitting diode, ceramic metal halide, fiber optic, high-intensity discharge, and other high energy-efficient lighting technologies. Typical savings related to our technology approximates 80% in electricity costs, while providing full-spectrum light closely simulating daylight colors. Our strategy also incorporates continued investment into the research of new and emerging energy sources including, but not limited to, solar energy.

Our long-term strategy is to penetrate the \$100 billion existing building lighting market by providing turnkey lighting solutions. We will continue to focus on markets where the benefits of our lighting solutions offerings, combined with our technology, are most compelling. These markets include: schools, universities, hospitals, office buildings, parking garages, supermarkets, museums, cold storage facilities, and manufacturing environments.

**Table of Contents**

**LPC Transaction and the Offering**

On March 17, 2010, we executed a Purchase Agreement (the "Purchase Agreement") and a registration rights agreement with Lincoln Park Capital Fund, LLC ("LPC"), Chicago, Illinois, pursuant to which LPC agreed to purchase 350,000 shares of our common stock, together with warrants ("Warrants") to purchase 350,000 shares at an exercise price of \$1.20 per share, for total consideration of \$375,000. The Warrants were to have a term of five (5) years and were not to be exercisable until six (6) months after they were issued. LPC also agreed to purchase up to an additional 3,650,000 shares of our common stock at our option as described below. We issued 120,000 shares of our stock to LPC as consideration for entering into the Purchase Agreement, which shares are not included in this offering.

On May 10, 2010, we and LPC amended Section 2(i) of the Purchase Agreement solely to make clear that all of the shares that we may issue to LPC under the Agreement cannot exceed 19.99% of our outstanding shares without shareholder approval as required by Nasdaq Rule 5635(d). As used in this prospectus, the term Purchase Agreement refers to the original Agreement as modified by the May 10, 2010 amendment to it.

Pursuant to the registration rights agreement, we filed a registration statement that included a preliminary prospectus with the Securities and Exchange Commission (the "SEC"). The prospectus covered the 4,000,000 shares that may be sold to LPC under the Purchase Agreement, an additional 120,000 shares that we would issue pro rata as LPC purchases up to the 4,000,000 shares, as directed by us, and 350,000 shares that would be issued upon exercise of the Warrants, which Warrants were not to be exercisable until six (6) months from the date of issuance. We did not have the right to commence any sales of our shares to LPC until the SEC had declared effective the registration statement of which that prospectus was a part.

The SEC declared effective the registration statement on May 28, 2010. On May 28, 2010, LPC purchased and we issued 350,000 shares of common stock (together with 10,500 pro rata commitment shares in connection with such purchase) and on June 1, 2010 we issued to LPC the Warrants to purchase 350,000 shares of common stock, for total consideration of \$375,000. The Warrants first become exercisable on December 1, 2010 and expire on December 1, 2015.

Over approximately the next 25 months we have the right to direct LPC to purchase up to 20,000 shares of our common stock as often as every five (5) business days. We can suspend purchases or accelerate the number of shares to be purchased at any time. No sales of shares may occur below \$1.00 per share. The purchase prices of the shares will be based on the market prices of our shares at the time of sale as computed under the Purchase Agreement without any fixed discount. We may at any time in our sole discretion terminate the Purchase Agreement without fee, penalty, or cost upon five (5) business days notice.

**Table of Contents**

As of April 30, 2010, there were 21,370,304 shares outstanding, including 14,496,212 shares held by non-affiliates, but excluding the 4,470,000 shares offered by LPC pursuant to this prospectus, which we have not issued. We are offering 4,470,000 shares hereby, consisting of 4,000,000 shares that we may sell to LPC pursuant to the Purchase Agreement, 120,000 shares issuable pro rata as the 4,000,000 shares are purchased by LPC, and 350,000 shares issuable to LPC upon its exercise of the Warrants which Warrants are not exercisable until December 1, 2010. If all of the 4,470,000 shares offered by LPC hereby were issued and outstanding as of the date hereof, such shares would represent 17.30% of the total common stock outstanding or 23.57% of the non-affiliates shares outstanding, as adjusted, as of the date hereof. The number of shares ultimately offered for sale by LPC is dependent upon the number of shares that we sell and issue to LPC under the Purchase Agreement, including shares that we issue upon exercise of the Warrants.

**Securities Offered**

Common stock to be offered by the selling shareholder	4,470,000 shares consisting of:  4,120,000 shares issuable to LPC under Purchase Agreement; and  350,000 shares issuable to LPC under the Warrants.
Common stock outstanding prior to this offering	21,370,304 shares
Use of Proceeds	We will receive no proceeds from the sale of shares of common stock in this offering. If we sell 4,000,000 shares of our common stock to LPC under the Purchase Agreement and LPC exercises its warrant to purchase 350,000 shares in full, however, we will receive at least \$4,445,000 in proceeds from those sales. Any proceeds that we receive from sales to LPC under the Purchase Agreement will be used to fund our working capital needs and our new business strategy. See Use of Proceeds.
NASDAQ Global Market symbol	EFOI

**RISK FACTORS**

You should carefully consider the risks described below before purchasing our common stock. Our most significant risks and uncertainties are described below. They are not the only risks that we face, however. If any of the following risks actually occur, our business,

**Table of Contents**

financial condition, or results or operations could be materially, adversely affected, the price of our common stock could decline, and you may lose all or part of your investment therein. You should acquire shares of our common stock only if you can afford to lose your entire investment.

**Risks Associated with Our Business.**

***We have a history of operating losses and may incur losses in the future.***

We have experienced net losses of \$11,015,000 and \$14,448,000 for the years ended December 31, 2009 and 2008, respectively. As of December 31, 2009, we had an accumulated deficit of \$60,343,000. Although management believes that we have addressed many of the legacy issues that have historically burdened our financial performance, we still face challenges in order to reach profitability. In order for us to attain profitability and growth, we will need to successfully address these challenges, including the continuation of cost reductions throughout our organization, execution of our marketing and sales plans for our new turnkey energy-efficient lighting solutions business, continued evaluation and divestiture of non-core business product lines, and continued improvements in our supply chain performance. Although we are optimistic about reaching profitability, there is a risk that our business may not be as successful as we envision or that we will never be profitable.

Our independent public accounting firm has added an explanatory paragraph to their audit opinion issued in connection with the financial statements in our 2009 Annual Report on Form 10-K raising substantial doubt as to our ability to continue as a going concern. This opinion stems from our historically poor operating performance, the on-going global economic crisis, and our historical inability to generate sufficient cash flow to meet obligations and sustain operations without obtaining additional external financing. Although we are optimistic about obtaining the funding necessary for us to continue as a going concern, by generating sufficient cash flow internally and/or by obtaining additional external financing, there can be no assurances that this objective will be successful. Our financial statements do not include any adjustments that might result from the outcome of this uncertainty.

***We will require additional financing to sustain our operations currently and in the near future, and also may require it for the foreseeable future. Without it, we may not be able to continue operations.***

As indicated in the previous risk factor, we have a history of operating losses and a large accumulated deficit. We currently do not have sufficient internal financial resources to fund our operations. We therefore need additional funds from external sources to continue our operations.

We are currently aggressively pursuing the following external funding sources:

obtain financing and/or grants available through federal, state, and/or local governmental agencies,

**Table of Contents**

obtain financing from various financial institutions,  
obtain financing from non-traditional investment capital organizations,

potential sale or divestiture of one or more operating units, and

obtain funding from the sale of our common stock or other equity instruments.

Obtaining financing through the above-mentioned mechanisms contains risks, including:

government stimulus and/or grant money is not allocated to us despite our focus on the design, development, and manufacturing of energy-efficient lighting systems,

loans or other debt instruments may have terms and/or conditions, such as interest rates, restrictive covenants, and control or revocation provisions, which are not acceptable to management or our Board of Directors,

the current global economic crisis combined with our current financial condition may prevent us from being able to obtain any debt financing,

financing may not be available for parties interested in pursuing the acquisition of one or more of our operating units, and

additional equity financing may not be available to us in the current economic environment and could lead to further dilution of shareholder value for current shareholders of record.

Under our Purchase Agreement with LPC, we may direct LPC to purchase up to 4,000,000 shares of our common stock over a 25-month period. However, LPC shall not have the right nor the obligation to purchase any shares of our common stock on any business day that the market price of our common stock is less than \$1.00. Assuming a purchase price of \$1.10 per share, which was the closing sale price of our common stock on May 28, 2010, the purchase by LPC of the full 4,000,000 shares under the Purchase Agreement, and the exercise by LPC of its warrant to purchase 350,000 shares in full at \$1.20 per share, proceeds to us would be \$4,820,000.

The extent to which we rely on LPC as a source of funding will depend on a number of factors, including the prevailing market price of our common stock and the extent to which we are able to secure working capital from other external sources, such as through the sale of our products. Specifically, LPC shall not have the right nor the obligation to purchase any shares of our common stock on any business days on which the market price of our common stock is less than \$1.00. If obtaining sufficient funding from LPC were to prove unavailable or prohibitively dilutive and if we are unable to sell enough of our products, we will need to secure another source of funding in order to satisfy our working capital needs. Even if we sell all 4,000,000 shares under the Purchase Agreement to LPC, we may still need additional capital to fully implement our business, operating and development plans. Should the financing we require to sustain our working capital needs be unavailable or prohibitively expensive when we require it, the consequences could be a material adverse effect on our business, operating results, financial condition and prospects.

**Table of Contents**

***Downturns in general economic conditions and construction trends could continue to materially and adversely affect our business.***

Downturns in general economic and market conditions, both nationally and internationally, could have a material adverse effect on our business. In most areas, sales of new and existing homes have slowed and there has been a continued downturn in the housing market, as well as adverse changes in employment levels, job growth, consumer confidence and interest rates, in addition to an oversupply of commercial and residential buildings for sale. In our legacy businesses, sales of our lighting products depend significantly upon the level of new building construction, which are affected by housing market trends, interest rates and the weather. Sales of our pool and spa lighting products depend substantially upon the level of new pool construction, which is also affected by housing market and construction trends. In addition, due to the seasonality of construction, sales of swimming pool and lighting products, and thus our revenue and income, have tended to be significantly lower in the first quarter of each year. Our future results of operations may experience substantial fluctuations from period to period as a consequence of these factors, and such conditions and other factors affecting capital spending may affect the timing of orders. An economic downturn coupled with a decline in our net sales could adversely affect our ability to meet our working capital requirements, support our capital requirements and growth objectives, or could otherwise adversely affect our business financial condition, and results of operations. As a result, any general or market-specific economic downturns, particularly those affecting new building construction and renovation, or that cause end-users to reduce or delay their purchases of lighting products, services, or retrofit activities, would have a material adverse effect on our business, cash flows, financial condition, and results of operations.

***We have significant international sales and are subject to risks associated with operating in international markets.***

For the years ending December 31, 2009 and 2008, net sales of our products outside of the United States represented approximately 36.5% and 35.6%, respectively, of our total net sales from continuing operations. We generally provide technical expertise and limited marketing support, while our independent international distributors generally provide sales staff, local marketing, and product services. We believe our international distributors are better able to service international markets due to their understanding of local market conditions and best business practices. International business operations are subject to inherent risks, including, among others:

unexpected changes in regulatory requirements, tariffs and other trade barriers or restrictions,

longer accounts receivable payment cycles and the difficulty of enforcing contracts and collecting receivables through certain foreign legal systems,

difficulties in managing and staffing international operations,

potentially adverse tax consequences,

the burdens of compliance with a wide variety of foreign laws,

**Table of Contents**

import and export license requirements and restrictions of the United States and each other country in which we operate,

exposure to different legal standards and reduced protection for intellectual property rights in some countries,

currency fluctuations and restrictions,

political, social and economic instability, including war and the threat of war, acts of terrorism, pandemics, boycotts, curtailment of trade or other business restrictions,

periodic foreign economic downturns, and

sales variability as a result of transacting our foreign sales in United States dollars.

***If we are unable to respond effectively as new lighting technologies and market trends emerge, our competitive position and our ability to generate revenue and profits may be harmed.***

To be successful, we will need to keep pace with rapid changes in light-emitting diode ( LED ) and fiber optics lighting technology, changing customer requirements, new product introductions by competitors and evolving industry standards, any of which could render our existing products obsolete if we fail to respond in a timely manner. Development of new products incorporating advanced technology is a complex process subject to numerous uncertainties. We have previously experienced, and could in the future, experience delays in introduction of new products. If effective new sources of light other than LED and fiber optics are discovered, our current products and technologies could become less competitive or obsolete. If others develop innovative proprietary lighting technology that is superior to ours, or if we fail to accurately anticipate technology and market trends, respond on a timely basis with our own development of new products and enhancements to existing products, and achieve broad market acceptance of these products and enhancements, our competitive position may be harmed and we may not achieve sufficient growth in our net sales to attain or sustain profitability.

***If we are not able to compete effectively against companies with greater resources, our prospects for future success will be jeopardized.***

The lighting industry is highly competitive. In the high performance lighting markets in which we sell our advanced lighting systems, our products compete with lighting products utilizing traditional lighting technology provided by many vendors. Additionally, in the advanced lighting markets in which we have primarily competed to date, competition has largely been fragmented among a number of small manufacturers. However, some of our competitors, particularly those that offer traditional lighting products, are larger companies with greater resources to devote to research and development, manufacturing and marketing.

Moreover, in the general lighting market, we expect to encounter competition from an even greater number of companies. Our

## **Table of Contents**

competitors are expected to include the large, established companies in the general lighting industry, such as General Electric, Osram Sylvania and Royal Philips Electronics. Each of these competitors has undertaken initiatives to develop LED technology. These companies have global marketing capabilities and substantially greater resources to devote to research and development and other aspects of the development, manufacture and marketing of LED lighting products than we possess. We may also face competition from traditional lighting fixture companies, such as Acuity Brands Lighting, Cooper Lighting, Hubbell Lighting, Lithonia Lighting, and Royal Philips Electronics. The relatively low barriers to entry into the lighting industry and the limited proprietary nature of many lighting products also permit new competitors to enter the industry easily.

In each of our markets, we also anticipate the possibility that LED manufacturers, including those that currently supply us with LEDs, may seek to compete with us. Our competitors' lighting technologies and products may be more readily accepted by customers than our products. Additionally, to the extent that competition in our markets intensifies, we may be required to reduce our prices in order to remain competitive. If we do not compete effectively, or if we reduce our prices without making commensurate reductions in our costs, our net sales and profitability, and our future prospects for success, may be harmed.

***We have made strategic acquisitions in the past and intend to do so in the future, which may adversely affect our operating results, financial condition, and existing business.***

We seek to grow through strategic acquisitions in order to transition our company into a nationwide, turnkey, energy-efficient lighting systems solutions company. On December 31, 2009, we acquired Stones River Companies, LLC ( SRC ), and we anticipate making additional acquisitions in the future. The success of our acquisition strategy will depend on, among other things:

- the availability of suitable candidates,

- competition from other companies for the purchase of available candidates,

- our ability to value those candidates accurately and negotiate favorable terms for those acquisitions,

- the availability of funds to finance acquisitions,

- the ability to establish new informational, operational and financial systems to meet the needs of our business,

- the ability to achieve anticipated synergies, including with respect to complementary products or services, and

- the availability of management resources to oversee the integration and operation of the acquired businesses.

If we are not successful in integrating acquired businesses and completing acquisitions in the future, we may be required to reevaluate our acquisition strategy. We also may incur substantial expenses and devote significant management time and resources to completing these acquisitions. Furthermore, acquired businesses may fail to meet our performance expectations. If we do not achieve the anticipated benefits of

**Table of Contents**

an acquisition as rapidly as expected, or at all, investors or analysts may not perceive the same benefits of the acquisition as we do. If these risks materialize, our performance and stock price could be materially affected.

***Our inability to successfully integrate businesses we acquire could have adverse consequences on our business.***

Acquisitions may result in greater administrative burdens and operating costs and, to the extent financed with debt, additional interest costs. We cannot assure you that we will be able to manage or integrate acquired companies or businesses successfully. The process of integrating acquired businesses, including the recent acquisition of SRC, may be disruptive to our business and may cause an interruption of or a loss of momentum in, our business as a result of the following factors, among others:

loss of key employees or customers,

possible inconsistencies in standards, controls, procedures and policies among the combined companies and the need to implement company-wide financial, accounting, information and other systems,

failure to maintain the quality of services that the companies have historically provided,

coordinating sales, distribution, and marketing functions,

the need to coordinate geographically diverse organizations, and

the diversion of management's attention from our day-to-day business as a result of the need to deal with any disruptions and difficulties and the need to add management resources to do so.

These disruptions and difficulties, if they occur, may cause us to fail to realize the cost savings, revenue enhancements and other benefits that we may expect from such acquisitions and may cause material adverse short- and long-term effects on our operating results and financial condition.

***If we are unable to obtain and adequately protect our intellectual property rights, our ability to commercialize our products could be substantially limited.***

We consider our technology and processes proprietary. If we are not able to adequately protect or enforce the proprietary aspects of our technology, competitors may utilize our proprietary technology and our business, financial condition and results of operations could be adversely affected. We protect our technology through a combination of patent, copyright, trademark and trade secret laws, employee and third-party nondisclosure agreements and similar means. Despite our efforts, other parties may attempt to disclose, obtain or use our technologies. Our competitors may also be able to independently develop products that are substantially equivalent or superior to our products or slightly modify our patents. In addition, the laws of some foreign countries do not protect our proprietary rights as fully as do the laws of the United States. As a result, we may not be able to protect our proprietary rights adequately in the United States or abroad.

## Table of Contents

As of December 31, 2009 and March 31, 2010, our intellectual property portfolio consisted of 68 and 69, respectively, issued United States and foreign patents, various pending United States patent applications, and various pending Patent Cooperation Treaty patent applications filed with the World Intellectual Property Organization that serves as the basis of national patent filings in countries of interest. A total of fifteen applications are pending. Because our patent position involves complex legal, scientific, and factual questions, the issuance, scope, validity and enforceability of our patents cannot be predicted with certainty. Our issued patents may be invalidated or their enforceability challenged, and they may not provide us with competitive advantages against others with similar products and technology. Furthermore, others may independently develop similar products or technology or duplicate or design around any technologies that we have developed.

We may receive notices that claim we have infringed upon the intellectual property of others. Even if these claims are not valid, they could subject us to significant costs. We have engaged in litigation and litigation may be necessary in the future to enforce our intellectual property rights or to determine the validity and scope of the proprietary rights of others. Litigation may also be necessary to defend against claims of infringement or invalidity by others. An adverse outcome in litigation or any similar proceedings could subject us to significant liabilities to third parties, require us to license disputed rights from others or require us to cease marketing or using certain products or technologies. We may not be able to obtain any licenses on acceptable terms, if at all. We also may have to indemnify certain customers if it is determined that we have infringed upon or misappropriated another party's intellectual property.

Any of these results could adversely affect our business, financial condition and results of operations. In addition, the cost of addressing any intellectual property litigation claim, both in legal fees and expenses, and the diversion of management resources, regardless of whether the claim is valid, could be significant and could materially harm our business, financial condition and results of operations.

***If critical components that we currently purchase from a small number of third-party suppliers become unavailable or third-party manufacturers otherwise experience delays, we may incur delays in shipment, which would damage our business.***

We depend on others to manufacture a significant portion of the component parts incorporated into our products. We purchase our component parts from third-party manufacturers that serve the advanced lighting systems market and believe that alternative sources of supply are readily available for most component parts. However, consolidation in the lighting industry could result in one or more current suppliers being acquired by a competitor, rendering us unable to continue purchasing necessary amounts of key components at competitive prices.

In an effort to reduce manufacturing costs, we have outsourced the production of certain parts and components as well as finished goods in our product lines to a number of overseas suppliers. We expect to outsource all of the production for selected products.

## **Table of Contents**

While we believe alternative sources for the production of these products are available, we have selected these particular manufacturers based on their ability to consistently produce these products per our specifications ensuring the best quality product at the most cost effective price. We depend on our suppliers to satisfy performance and quality specifications and to dedicate sufficient production capacity within scheduled delivery times. Although we maintain contracts with selected suppliers, we may be vulnerable to unanticipated price increases and product shortages. Accordingly, the loss of all or one of these suppliers or delays in obtaining shipments could have a material adverse effect on our operations until such time as an alternative supplier could be found. We may be subject to various import duties applicable to materials manufactured in foreign countries and, in addition, may be affected by various other import and export restrictions, as well as other considerations or developments impacting upon international trade, including economic or political instability, shipping delays, and product quotas. These international trade factors will, under certain circumstances, have an impact both on the cost of components, which will, in turn, have an impact on the cost to us of the manufactured product, and the wholesale and retail prices of its products.

***If the companies to which we outsource the manufacture of our products fail to meet our requirements for quality, quantity and timeliness, our revenue and reputation in the marketplace could be harmed.***

We outsource a significant portion of the manufacture and assembly of our products and we expect to outsource all of the production of many of our products. We currently depend on a small number of contract manufacturers to manufacture our products at plants in various locations throughout the world, primarily in the United States, Mexico, China, and Taiwan. These manufacturers supply most of the necessary raw materials and provide all necessary facilities and labor to manufacture our products. We currently do not have long-term contracts with some of these manufacturers. If these companies were to terminate their arrangements with us without adequate notice, or fail to provide the required capacity and quality on a timely basis, we would be unable to manufacture and ship our lighting products until replacement manufacturing services could be obtained. To qualify a new contract manufacturer, familiarize it with our products, quality standards and other requirements, and commence volume production is a costly and time-consuming process. If it became necessary to do so, we may not be able to establish alternative manufacturing relationships on acceptable terms.

Our reliance on contract manufacturers involves certain additional risks, including the following:

lack of direct control over production capacity and delivery schedules,

lack of direct control over quality assurance, manufacturing yields and production costs,

risk of loss of inventory while in transit from China, Mexico, India, Japan, and Taiwan, and

risks associated with international commerce, particularly with China, Mexico, India, Japan, and Taiwan, including unexpected

**Table of Contents**

changes in legal and regulatory requirements, changes in tariffs and trade policies, risks associated with the protection of intellectual property and political and economic instability.

Any interruption in our ability to manufacture and distribute products could result in delays in shipment, lost sales, reductions in revenue and damage to our reputation in the market, all of which would adversely affect our business.

***We depend on independent distributors and sales representatives for a substantial portion of our net sales, and the failure to manage successfully our relationships with these third parties, or the termination of these relationships, could cause our net sales to decline and harm our business.***

We rely significantly on indirect sales channels to market and sell our products. Most of our products are sold through third-party independent distributors and sales representatives. In addition, these parties provide technical sales support to end-users. Our current agreements within these sales channels are non-exclusive with regard to lighting products in general, but exclusive with respect to LED lighting and fiber optic products. We anticipate that any such agreements we enter into in the future will be on similar terms. Furthermore, our agreements are generally short-term, and can be cancelled by these sales channels without significant financial consequence. We cannot control how these sales channels perform and cannot be certain that we or end-users will be satisfied by their performance. If these distributors and sales representatives significantly change their terms with us, or change their historical pattern of ordering products from us, there could be a significant impact on our net sales and profits.

***Our products could contain defects or they may be installed or operated incorrectly, which could reduce sales of those products or result in claims against us.***

Despite product testing, defects have been found and may be found in our existing or future products. This could result in, among other things, a delay in the recognition or loss of net sales, loss of market share or failure to achieve market acceptance. These defects could cause us to incur significant warranty, support and repair costs, divert the attention of our engineering personnel from our product development efforts and harm our relationship with our customers. The occurrence of these problems could result in the delay or loss of market acceptance of our lighting products and would likely harm our business. Some of our products use line voltages (such as 120 or 240 AC), or are designed for installation in environments such as swimming pools and spas, which involve enhanced risk of electrical shock, injury or death in the event of a short circuit or other malfunction. Defects, integration issues or other performance problems in our lighting products could result in personal injury or financial or other damages to end-users or could damage market acceptance of our products. Our customers and end-users could also seek damages from us for their losses. A product liability claim brought against us, even if unsuccessful, would likely be time consuming and costly to defend.

***If we are unable to attract or retain qualified personnel, our business and product development efforts could be harmed.***

## **Table of Contents**

To a large extent, our future success will depend on the continued contributions of certain employees, such as our current Chief Executive Officer, Chief Financial Officer, Chief Operating Officer, President, and Chief Technical Officer. These and other key employees would be difficult to replace. Our future success will also depend on our ability to attract and retain qualified technical, sales, marketing and management personnel, for whom competition is very intense. The loss of, or failure to attract, hire, and retain, any such persons could delay product development cycles, disrupt our operations, or otherwise harm our business or results of operations. We have been successful in hiring experienced energy solutions salespeople from leading firms in the industry but if these individuals are not successful in achieving our expectations, and then planned sales may not occur and the anticipated net sales may not be realized.

***A significant portion of our business is dependent upon the existence of government funding, which may not be available in the future and could result in a significant reduction in sales and could cause significant harm to our business.***

Over the last three years, approximately 40.7% of our research and development efforts have been supported directly by government funding. In 2009, approximately 70.5% of our research and development funding came from government sources and was contracted for short periods, usually one to two years. Further, a significant portion of net sales generated by SRC are derived from state government funding and supported by federal government funding. If government funding is reduced or eliminated, there is no guarantee that we would be able to continue to fund our activities in these areas at their current levels, if at all. If we are unable to maintain our access to government funding in these areas, there could be a significant impact on our net sales and profits.

***We believe that certification and compliance issues are critical to adoption of our lighting systems, and failure to obtain such certification or compliance would harm our business.***

We are required to comply with certain legal requirements governing the materials in our products. Although we are not aware of any efforts to amend any existing legal requirements or implement new legal requirements in a manner with which we cannot comply, our net sales might be adversely affected if such an amendment or implementation were to occur.

Moreover, although not legally required to do so, we strive to obtain certification for substantially all our products. In the United States, we seek, and to date have obtained, certification on substantially all of our products from Underwriters Laboratories or Intertek. Where appropriate in jurisdictions outside the United States and Europe, we seek to obtain other similar national or regional certifications for our products. Although we believe that our broad knowledge and experience with electrical codes and safety standards have facilitated certification approvals, we cannot ensure that we will be able to obtain any such certifications for our new products or that, if certification standards are amended, that we will be able to maintain such certifications for our existing products. Moreover, although we are not aware of any effort to

**Table of Contents**

amend any existing certification standard or implement a new certification standard in a manner that would render us unable to maintain certification for our existing products or obtain ratification for new products, our net sales might be adversely affected if such an amendment or implementation were to occur.

***We must comply with regulatory requirements regarding internal control over financial reporting, corporate governance and public disclosure, which will cause us to incur significant costs and our failure to comply with these requirements could cause our stock price to decline.***

Section 404 of the Sarbanes-Oxley Act of 2002 requires that we annually evaluate and report on our systems of internal controls. These rules and regulations have increased our legal and compliance costs and made certain activities more time-consuming and costly. In the future, there may be material weaknesses in our internal controls that would be required to be reported in future Annual Reports on Form 10-K and/or Quarterly Reports on Form 10-Q. A negative reaction by the equity markets to the reporting of a material weakness could cause our stock price to decline. In addition, if we acquire a company with weak internal controls, it will take time to improve the internal controls of the acquired company to a satisfactory level of operating effectiveness. Any failure to improve an acquired company's financial systems could result in delays or inaccuracies in reporting financial information.

***We may be subject to legal claims against us or claims by us which could have a significant impact on our resulting financial performance.***

At any given time, we may be subject to litigation, the disposition of which may have an adverse affect upon our business, financial condition, or results of operation.

**Risks Associated with an Investment in our Common Stock.**

***The market price of our common stock may be adversely affected by market volatility.***

The market price of our common stock has been and is expected to continue to be highly volatile. A number of factors may have significant impact on the market price of our stock, including announcements of technological innovations by us or other companies, regulatory matters, new or existing products or procedures, concerns about our financial position, operating results, litigation, government regulation, developments or disputes relating to agreements, patents or proprietary rights. In addition, potential dilutive effects of future sales of shares of common stock by shareholders and by the Company, including by LPC pursuant to this prospectus, and subsequent sales of common stock by the holders of warrants and options, could have an adverse effect on the market price of our shares.

***The sale of our common stock to LPC may cause dilution and the sale of the shares of common stock acquired by LPC could cause the price of our common stock to decline.***

## **Table of Contents**

In connection with entering into the LPC Purchase Agreement, we authorized the sale to LPC of up to 4,350,000 shares of our common stock and the issuance to LPC of an additional 240,000 shares. The number of shares ultimately offered for sale by LPC under this prospectus is dependent upon the number of shares purchased or acquired by LPC under the Agreement. The purchase price for the common stock to be sold and/or issued to LPC pursuant to the Agreement will fluctuate based on the price of our common stock.

On May 28, 2010 we sold 350,000 shares of our common stock to LPC (and we issued to LPC 10,500 pro rata commitment shares in connection with the sale), and on June 1, 2010 we issued to LPC the Warrants to purchase 350,000 shares, at an exercise price of \$1.20 per share, for a total consideration of \$375,000. Earlier, when we entered into the Purchase Agreement we issued to LPC 120,000 shares. It is anticipated that we will sell or issue to LPC up to 3,759,500 more shares over a period of up to 25 months from the date of this prospectus. The Warrants for 350,000 shares issued to LPC have an exercise term of five years, but are not exercisable until December 1, 2010. Depending upon market liquidity at the time, a sale of shares to LPC at any given time could cause the trading price of our common stock to decline. We can elect to direct purchases in our sole discretion but no sales may occur if the price of our common stock is below \$1.00. Therefore, LPC may ultimately purchase or receive all, some, or none of the 4,120,000 shares of common stock not yet issued under the Agreement with LPC. After it has acquired such shares, it may sell all, some, or none of those shares. Therefore, sales to LPC by us under the Agreement may result in substantial dilution to the interests of other holders of our common stock.

The sale of a substantial number of shares of our common stock under the LPC Agreement, or anticipation of such sales, could make it more difficult for us to sell equity or equity-related securities in the future at a time and at a price that we might otherwise wish to effect sales. However, we have the right to suspend and therefore control the timing and amount of any sales of our shares to LPC and the Agreement may be terminated by us at any time at our discretion without any cost to us.

### ***We have not been in compliance with the continued listing requirements of the NASDAQ Global Market.***

From time to time during the fourth quarter of 2009 and early in the first quarter of 2010, we did not meet the NASDAQ Global Market ( NASDAQ ) continued listing requirements that call for the maintenance of a minimum bid price of our common stock of \$1.00 per share and minimum shareholder equity of \$10,000,000. We received formal notices of non-compliance from NASDAQ. Although we regained compliance with NASDAQ continued listing requirements on those occasions, there has been a continuing risk that we could again become non-compliant with the listing requirements. In this regard, our shareholders equity as of the end of the first quarter fell below the minimum shareholder equity requirement. On May 18, 2010, we received a notification from NASDAQ that we have fallen out of compliance, that we have until July 2, 2010 to submit a plan to regain compliance, and if our plan is acceptable, an additional 135 days to evidence compliance. We are currently preparing a remedial plan. If the minimum bid price of our common stock should fall below \$1.00 for an extended period of time

**Table of Contents**

in the future, we will be required to take remedial action on it as well. If we are unable to maintain the minimum listing price of our common stock, or regain and maintain minimum shareholders equity, and if our common stock becomes subject to being delisted from trading on the NASDAQ Global Market, we could transfer trading in our common stock to the NASDAQ Capital Market or other exchange which could potentially result in a loss of trading liquidity.

***We could issue additional common stock apart from the LPC transaction, which might dilute the book value of our common stock.***

Our Board of Directors has the authority, without action or vote of our shareholders, to issue all or a part of our authorized but unissued shares. Such stock issuances could be made at a price that reflects a discount or a premium from the then-current trading price of our common stock. In addition, in order to raise capital or acquire businesses in the future, including future lighting retrofit businesses, we may need to issue securities or promissory notes that are convertible or exchangeable for shares of our common stock. These issuances would dilute shareholders' percentage ownership interest, which would have the effect of reducing influence on matters on which our shareholders vote, and might dilute the book value of our common stock. Shareholders may incur additional dilution if holders of stock options, whether currently outstanding or subsequently granted, exercise those options, or if warrant holders exercise warrants purchasing shares of our common stock. If an insufficient amount of authorized, but unissued, shares of common stock exists to issue in connection with a subsequent equity financing or acquisition transactions, we may be required to call a special meeting of our shareholders to authorize additional shares before undertaking, or as a condition to completing a financing or acquisition transaction.

We have asked our shareholders to increase our authorized shares of common stock from 30,000,000 to 60,000,000 at our Annual Meeting to be held on June 16, 2010.

***We may need to request our shareholders to authorize additional shares of common stock in connection with subsequent equity finance or acquisition transactions.***

We are authorized to issue 30,000,000 shares of common stock, of which approximately 21,370,304 shares are issued and outstanding as of April 30, 2010. An additional 7,310,000 shares have been reserved for issuance upon exercise of stock options and warrants outstanding and under our Purchase Agreement with LPC. If we require additional shares of common stock in connection with a subsequent equity financing or acquisition transaction, we may be required to call a special meeting of our shareholders to authorize additional shares before undertaking or as a condition to completing an offering or transaction. We cannot be assured that our shareholders would authorize an increase in the number of shares of our common stock.

***Shares eligible for future sale may adversely affect the market for our common stock.***

**Table of Contents**

As of December 31, 2009, we had a significant number of convertible or derivative securities outstanding, including: (i) 1,721,000 shares of common stock issuable upon exercise of outstanding stock options at a weighted average exercise price of \$3.63 per share, and (ii) 4,438,000 shares of common stock issuable upon exercise of our outstanding warrants at a weighted average exercise price of \$2.84 per share. If or when these securities are exercised into shares of our common stock, the number of our shares of common stock outstanding will increase. Increases in our outstanding shares, and any sales of shares, could have an adverse affect on the trading activity and market price of our common stock.

In addition, from time to time, certain of our shareholders may be eligible to sell all, or a portion of, their shares of common stock by means of ordinary brokerage transactions in the open market pursuant to Rule 144, promulgated under the Securities Act of 1933, or under effective resale prospectuses. Any substantial sale of our common stock pursuant to Rule 144 or any resale prospectus may have an adverse affect on the market price of our securities.

***As a thinly-traded stock, large sales can place negative pressure on our common stock price.***

Our common stock, despite certain increases of trading volume from time to time, experiences periods when it could be considered thinly-traded. Financing or acquisition transactions resulting in a large number of newly issued shares that become immediately tradable, or other events that cause current shareholders to sell shares, could place negative pressure on the trading price of our stock. In addition, the lack of a robust secondary market may require a shareholder who desires to sell a large number of shares to sell those shares in increments over time in order to mitigate any adverse impact of the sales on the market price of our common stock.

***Our executive officers, directors, and affiliates maintain the ability to substantially influence all matters submitted to shareholders for approval.***

As March 31, 2010, our executive officers, directors, and affiliates owned shares representing approximately 32.17% of our outstanding common stock. Our current executive officers, directors, and affiliates therefore have and will continue to have substantial influence over the outcome of corporate actions requiring shareholder approval, including the election of directors, a merger, consolidation, or sale of all or substantially all of our assets, or any other significant corporate transactions, as well as over our management and affairs. This concentration of ownership may delay or prevent a change of control of us at a premium price if these shareholders oppose it, even if it would benefit our other shareholders.

***Provisions in our charter documents and our Rights Agreement may prevent or frustrate attempts by our shareholders to change our management and hinder efforts to acquire a controlling interest in us.***

**Table of Contents**

Provisions of our corporate charter and bylaws, and of our Rights Agreement dated as of October 25, 2006 with Mellon Shareowner Services, as amended, may discourage, delay, or prevent a merger, acquisition, or other change in control that shareholders may consider favorable, including transactions in which you might otherwise receive premium for your shares. These provisions may also prevent or frustrate attempts by our shareholders to replace or remove our management. These provisions include:

limitation on the removal of directors;

advanced notice requirements for shareholder proposals and nominations;

the inability of shareholders to act by written consent or to call a special meeting;

the ability of our board of directors to designate the terms of and issue new series of preferred stock without shareholder approval; and

the poison pill contained in our Rights Agreement.

*Because the risk factors referred to above, as well as other risks not mentioned above, could cause actual results or outcomes to differ materially from those expressed in any forward-looking statements made by us, you should not place undue reliance on any such forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made or reflect the occurrence of unanticipated events. New factors emerge from time to time, and it is not possible for us to predict which ones will arise. In addition, we cannot assess the impact of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements.*

**SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This prospectus contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Such forward-looking statements include statements regarding, among other things, (a) our projected sales and profitability, (b) our growth strategies, (c) anticipated trends in our industry, (d) our future financing plans, and (e) our anticipated needs for working capital. Forward-looking statements, which involve assumptions and describe our future plans, strategies, and expectations, are generally identifiable by use of the words may, will, should, expect, anticipate, estimate, intend, or project or the negative of these words or other variations on these words or comparable terminology. This information may involve known and unknown risks, uncertainties, and other factors that may cause our actual results, performance, or achievements to be materially different from the future results, performance, or achievements expressed or implied by any forward-looking statements.

**Table of Contents**

These statements may be found under Management's Discussion and Analysis of Financial Condition and Results of Operations and Business in our 2009 Annual Report on Form 10-K, as well as in this prospectus generally. Actual events or results may differ materially from those discussed in forward-looking statements as a result of various factors, including, without limitation, the risks outlined under Risk Factors and matters described in this prospectus generally. In light of these risks and uncertainties, there can be no assurance that the forward-looking statements contained in this prospectus will in fact occur. In addition to the information expressly required to be included in this prospectus, we provide such further material information, if any, as may be necessary to make the required statements, in light of the circumstances under which they are made, not misleading.

**USE OF PROCEEDS**

This prospectus relates to shares of our common stock that may be offered and sold from time to time by the selling shareholder. We will receive no proceeds from the sale of shares of common stock in this offering. However, we may receive proceeds from the sale of up to 4,350,000 shares to LPC under the Purchase Agreement, including 350,000 shares covered by the Warrant issuable to LPC under the Agreement. Any proceeds from LPC that we receive under the Agreement will be used for working capital and general corporate purposes, including the implementation of our new business strategy.

**THE TRANSACTION**

On March 17, 2010, we executed a Purchase Agreement and a registration rights agreement with LPC, pursuant to which LPC agreed to purchase 350,000 shares of our common stock, together with warrants ( Warrants ) to purchase 350,000 shares at an exercise price of \$1.20 per share, for total consideration of \$375,000. The Warrants were to have a term of five (5) years and were not be exercisable until six (6) months after they were issued. LPC also agreed to purchase up to an additional 3,650,000 shares of our common stock at our option as described below. We issued 120,000 shares of our stock to LPC as consideration for entering into the Agreement, which shares are not included in this offering.

On May 10, 2010, we and LPC amended Section 2(i) of the Purchase Agreement solely to make clear that all of the shares that we may issue to LPC under the Agreement cannot exceed 19.99% of our outstanding shares without shareholder approval as required by Nasdaq Rule 5635(d). As used in this prospectus, the term Purchase Agreement refers to the original Agreement as modified by the May 10, 2010 amendment to it.

Pursuant to the registration rights agreement, we filed a registration statement that included a preliminary prospectus with the Securities and Exchange Commission (the SEC ). The prospectus covered the 4,000,000 shares that may be sold to LPC under the Purchase Agreement, an additional 120,000 shares that we would issue pro rata as LPC purchases up to the 4,000,000 shares, as directed by us, and 350,000 shares that

**Table of Contents**

would be issued upon exercise of the Warrants, which Warrants were not to be exercisable for six (6) months from the date of issuance, for a total of 4,470,000 shares. We did not have the right to commence any sales of our shares to LPC until the SEC had declared effective the registration statement of which that prospectus was a part.

The SEC declared effective the registration statement on May 28, 2010. On May 28, 2010, LPC purchased and we issued to LPC 350,000 shares of common stock (together with 10,500 pro rata commitment shares in connection with such purchase) and on June 1, 2010 we issued to LPC the Warrants to purchase 350,000 shares of common stock, for total consideration of \$375,000. The Warrants first become exercisable December 1, 2010 and expire on December 1, 2015.

Over approximately the next 25 months we have the right to direct LPC to purchase up to 20,000 shares of our common stock as often as every five (5) business days. We can suspend purchases or accelerate the number of shares to be purchased at any time. No sales of shares may occur below \$1.00 per share. The purchase prices of the shares will be based on the market prices of our shares at the time of sale as computed under the Purchase Agreement without any fixed discount. We may at any time in our sole discretion terminate the Purchase Agreement without fee, penalty, or cost upon five (5) business days notice. Upon entering into the Purchase Agreement with LPC, we issued 120,000 shares as a commitment fee, which shares are not part of this offering and which shares we have no obligation to register. We may issue up to an additional 120,000 shares pro rata as LPC purchases the 4,000,000 shares, as directed by us.

As of April 30, 2010, there were 21,370,304 shares outstanding, including 14,496,212 shares held by non-affiliates, but excluding the 4,470,000 shares offered by LPC pursuant to this prospectus, which we have not issued. We are offering 4,470,000 shares hereby, consisting of 4,000,000 shares that we may sell to LPC pursuant to the Purchase Agreement, 120,000 shares issuable pro rata as the 4,000,000 shares are purchased by LPC, and 350,000 shares issuable to LPC upon its exercise of the Warrants which Warrants are not exercisable until December 1, 2010. If all of the 4,470,000 shares offered by LPC hereby were issued and outstanding as of the date hereof, such shares would represent 17.30% of the total common stock outstanding, or 23.57% of the non-affiliates' shares outstanding, as adjusted, as of the date hereof. The number of shares ultimately offered for sale by LPC is dependent upon the number of shares that we sell and issue to LPC under the Purchase Agreement, including shares that we issue upon exercise of the Warrants.

**Purchase of Shares Under the Purchase Agreement**

We have the right to direct LPC to purchase up to 3,650,000 shares of our common stock, which shares will be purchased in increments of 5,000 to up to 20,000 shares as determined by us, as often as every five business (5) days, as directed by us during the 25-month term of the Purchase Agreement. Any such purchases shall be completed within five (5) business days of our direction to LPC.

**Table of Contents**

We have the right to terminate the Agreement with LPC at any time, as described below. We have the right at our discretion to suspend purchases at any time and to direct LPC to again make purchases at our discretion.

In addition to regular purchases of 5,000 to 20,000 shares as often as every five (5) business days, purchases may be accelerated by us by directing LPC to purchase up to an additional 10,000 shares of our common stock (an Accelerated Purchase. ). We can direct LPC to make multiple Accelerated Purchases from time to time and at our sole discretion, so long as at least two (2) business days have passed since the most recent Accelerated Purchase was completed. Any such Accelerated Purchases must be completed within five (5) business days of our direction to LPC. LPC shall also purchase up to an equivalent number of shares under any regular purchase or Accelerated Purchase within five (5) business days of any such purchase. LPC may therefore be purchasing approximately 80,000 shares every five (5) business days, depending on the number of shares we direct LPC to purchase.

**Purchase Price**

The purchase price per share is equal to the lesser of:

the lowest sale price of our common stock on the purchase date; or

the average of the three (3) lowest closing sale prices of our common stock during the ten (10) consecutive business days prior to the date of a purchase by LPC.

The purchase price will be equitably adjusted for any reorganization, recapitalization, non-cash dividend, stock split, or other similar transaction occurring during the business days used to compute the purchase price.

**Minimum Purchase Price**

Under the Purchase Agreement, we have set a minimum purchase price ( floor price ) of \$1.00. LPC shall not have the right nor the obligation to purchase any shares of our common stock in the event that the purchase price would be less the floor price. Specifically, LPC shall not have the right or the obligation to purchase shares of our common stock on any business day that the market price of our common stock is below the floor price.

**Events of Default**

Generally, LPC may terminate the Purchase Agreement without any liability or payment to the Company upon the occurrence of any of the following events of default:

the effectiveness of the registration statement of which this prospectus is a part lapses for any reason, including without limitation the

**Table of Contents**

issuance of a stop order, or is unavailable to LPC for sale of our common stock offered hereby, and such lapse or unavailability continues for a period of ten (10) consecutive business days or for more than an aggregate of thirty (30) business days in any 365-day period;

the suspension by our principal market of our common stock from trading for a period of three (3) consecutive business days;

the de-listing of our common stock from our principal market, provided our common stock is not immediately thereafter trading on the NASDAQ OTC Bulletin Board Market, the NASDAQ Capital Market, the New York Stock Exchange or the NYSE AMEX;

the transfer agent's failure for five (5) business days to issue to LPC shares of our common stock which LPC is entitled to under the Purchase Agreement;

any material breach of the representations or warranties or covenants contained in the Purchase Agreement or any related agreements which has or which could have a material adverse effect on us, subject to a cure period of five (5) business days;

any participation or threatened participation in insolvency or bankruptcy proceedings by or against us; or

a material adverse change in our business.

**Our Termination Rights**

We have the unconditional right at any time for any reason to give notice to LPC terminating the Purchase Agreement without any cost to us.

**No Short-Selling or Hedging by LPC**

LPC has agreed that neither it nor any of its affiliates shall engage in any direct or indirect short-selling or hedging of our common stock during any time prior to the termination of the Purchase Agreement.

**Effect of Performance of the Purchase Agreement on Our Shareholders**

All 4,470,000 shares registered in this offering are expected to be freely tradable. It is anticipated that shares registered in this offering will be sold over a period of up to 25 months from the date of this prospectus, except perhaps for the 350,000 shares covered by the Warrants. The sale by LPC of a significant amount of shares registered in this offering at any given time could cause the market price of our common stock to decline and to be highly volatile. LPC may ultimately purchase all, some or none of the 4,470,000 shares of common stock not yet issued but registered in this offering. After it has acquired such shares, it may sell all, some or none of such shares. Therefore, sales to LPC by us under

**Table of Contents**

the Purchase Agreement may result in substantial dilution to the interests of other holders of our common stock. However, we have the right to control the timing and amount of any sales of our shares to LPC and the Agreement may be terminated by us at any time at our discretion without any cost to us.

In connection with entering into the Purchase Agreement, we authorized the sale to LPC of up to 4,000,000 shares of our common stock, exclusive of the 350,000 Warrant shares that are not exercisable until December 1, 2010 and the 240,000 commitment shares of which up to 120,000 are part of this offering. We will sell no more than 4,000,000 shares to LPC under the Purchase Agreement, exclusive of the up to 240,000 shares issuable to LPC as the commitment fee and of the 350,000 shares covered by the Warrants, all of which are included in this offering. We have the right to terminate the Agreement without any payment or liability to LPC at any time, including in the event that all 4,000,000 shares are sold to LPC under the Purchase Agreement. The number of shares ultimately offered for sale by LPC under this prospectus is dependent upon the number of shares purchased by LPC under the Agreement. The following table sets forth the amount of proceeds we would receive from LPC from the sale of shares at varying purchase prices:

<b>Assumed Average Purchase Price</b>	<b>Number of Shares to Issued if Full Purchase</b>	<b>Percentage of Outstanding Shares be After Giving Effect to the Issuance to LPC<sup>(1)</sup></b>	<b>Proceeds from the Sale of Shares to LPC Under the Purchase Agreement</b>
\$1.00 <sup>(2)</sup>	4,000,000	15.77%	\$ 4,000,000
\$1.10 <sup>(3)</sup>	4,000,000	15.77%	\$ 4,400,000
\$1.25	4,000,000	15.77%	\$ 5,000,000
\$1.50	4,000,000	15.77%	\$ 6,000,000
\$1.75	4,000,000	15.77%	\$ 7,000,000
\$2.00	4,000,000	15.77%	\$ 8,000,000
\$2.25	4,000,000	15.77%	\$ 9,000,000

- (1) The denominator is equal to the sum of
- (a) 21,370,304 shares, which is the number of shares outstanding as of April 30, 2010 and which includes the 120,000 shares previously issued to LPC, which shares are not a part of this offering, and
- (b) the number of shares set forth in the adjacent column

to the left. The numerator is the number of shares issuable under the Purchase Agreement at the corresponding assumed purchase price set forth in the adjacent column to the left.

- (2) Under the Purchase Agreement, the company may not sell and LPC cannot purchase any shares in the event the price of our stock is below \$1.00
- (3) Closing sale price of our shares on May 28, 2010.

**Table of Contents****THE SELLING SHAREHOLDER**

The following table presents information about the selling shareholder. Neither the selling shareholder nor any of its affiliates has held a position or office, or had any other material relationship, with us.

<b>Selling Shareholder</b>	<b>Shares Beneficially Owned Before Offering</b>	<b>Percentage of Outstanding Shares Beneficially Owned Before Offering</b>	<b>Shares to be Sold in the Offering Assuming the Company Issues the Maximum Number of Shares Under the Purchase Agreement</b>	<b>Percentage of Outstanding Shares Beneficially Owned After Offering</b>
Lincoln Park Capital Fund, LLC (1)	120,000(2)	0.56%(1)	4,470,000	0.47%(1)

(1) Josh Scheinfeld and Jonathan Cope, the principals of LPC, are deemed to be beneficial owners of all of the shares of common stock owned by LPC.

Messrs. Scheinfeld and Cope have shared voting and disposition power over the shares being offered under this prospectus.

(2) 120,000 shares of our common stock have been previously acquired by LPC under the Purchase Agreement, consisting of shares we issued to LPC as a commitment fee, which shares are not part of this offering.

**PLAN OF DISTRIBUTION**

The common stock offered by this prospectus is being offered by Lincoln Park Capital Fund, LLC, the selling shareholder. The common stock may be sold or distributed from time to time by the selling stockholder directly to one or more purchasers or through brokers, dealers, or underwriters who may act solely as agents at market prices prevailing at the time of sale, at prices related to the prevailing market prices, at negotiated prices, or at fixed prices, which may be changed. The sale of the common stock offered by this prospectus may be effected in one or more of the following methods:

ordinary brokers transactions;

transactions involving cross or block trades;

through brokers, dealers, or underwriters who may act solely as agents;

at the market into an existing market for the common stock;

in other ways not involving market makers or established business markets, including direct sales to purchasers or sales effected through agents;

in privately negotiated transactions; or

**Table of Contents**

any combination of the foregoing.

In order to comply with the securities laws of certain states, if applicable, the shares may be sold only through registered or licensed brokers or dealers. In addition, in certain states, the shares may not be sold unless they have been registered or qualified for sale in the state or an exemption from the registration or qualification requirement is available and complied with.

Brokers, dealers, underwriters, or agents participating in the distribution of the shares as agents may receive compensation in the form of commissions, discounts, or concessions from the selling shareholder and/or purchasers of the common stock for whom the broker-dealers may act as agent. The compensation paid to a particular broker-dealer may be less than or in excess of customary commissions.

LPC is an underwriter within the meaning of the Securities Act.

Neither we nor LPC can presently estimate the amount of compensation that any agent will receive. We know of no existing arrangements between LPC, any other shareholder, broker, dealer, underwriter, or agent relating to the sale or distribution of the shares offered by this prospectus. At the time a particular offer of shares is made, a prospectus supplement, if required, will be distributed that will set forth the names of any agents, underwriters, or dealers and any compensation from the selling shareholder, and any other required information.

We will pay all of the expenses incident to the registration, offering, and sale of the shares to the public other than commissions or discounts of underwriters, broker-dealers, or agents. We have also agreed to indemnify LPC and related persons against specified liabilities, including liabilities under the Securities Act.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to our directors, officers, and controlling persons, we have been advised that in the opinion of the SEC this indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

LPC and its affiliates have agreed not to engage in any direct or indirect short selling or hedging of our common stock during the term of the Purchase Agreement.

We have advised LPC that while it is engaged in a distribution of the shares included in this prospectus, it is required to comply with Regulation M promulgated under the Securities Exchange Act of 1934, as amended. With certain exceptions, Regulation M precludes the selling shareholder, any affiliated purchasers, and any broker-dealer or other person who participates in the distribution from bidding for or purchasing, or attempting to induce any person to bid for or purchase, any security which is the subject of the distribution until the entire distribution is complete. Regulation M also prohibits any bids or purchases made in order to stabilize the price of a security in connection with

**Table of Contents**

the distribution of that security. All of the foregoing may affect the marketability of the shares offered hereby this prospectus.

This offering will terminate on the date that all shares offered by this prospectus have been sold by LPC.

**LEGAL MATTERS**

The validity of the common stock offered in this prospectus has been passed upon for us by Cowden & Humphrey Co. LPA, 4600 Euclid Avenue, Suite 400, Cleveland, Ohio 44103-3748.

**EXPERTS**

The financial statements, as of and for the years ended December 31, 2009 incorporated by reference in this prospectus and Registration Statement have been audited by Plante & Moran, PLLC, an independent registered public accounting firm, as stated in their report incorporated herein by reference, and are incorporated in reliance upon such report and upon the authority of such firm as experts in accounting and auditing.

The financial statements and schedule as of December 31, 2008 and for the years ended December 31, 2008 and 2007, before the effects of the retrospective adjustments for the discontinued operations discussed in Note 4 and the retrospective adjustments for the change in the composition of reportable segments discussed in Note 13 (not separately incorporated by reference in this Prospectus and elsewhere in the registration statement), have been audited by Grant Thornton LLP, independent registered public accountants, as indicated in their report with respect thereto and are included herein in reliance upon the authority of said firm as experts in accounting and auditing.

**WHERE YOU CAN FIND MORE INFORMATION**

This prospectus is part of a registration statement on Form S-3 that we filed with the SEC. This prospectus does not contain all of the information included in the registration statement. For further information about us and our securities, you should refer to the registration statement and the exhibits filed with the registration statement.

We are subject to the information requirements of the Securities Exchange Act of 1934 and file annual, quarterly and current reports, proxy statements and other information with the SEC. You can read our SEC filings, including the registration statement, over the internet at the SEC's website at [www.sec.gov](http://www.sec.gov) or through our website at [www.efoi.com](http://www.efoi.com). Information contained on our website is not considered to be a part of, nor incorporated by reference in, this prospectus. You may also read and copy any document we file with the SEC at its Public Reference Room at 100 F Street, NE, Washington, D.C. 20549.

**Table of Contents**

You may also obtain copies of the documents at prescribed rates by writing to the Public Reference Room of the SEC at 100 F Street, NE, Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the operation of the Public Reference Room.

**INFORMATION INCORPORATED BY REFERENCE**

The SEC allows us to incorporate by reference the information that we file with it, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be an important part of this prospectus. Later information that we file with the SEC will automatically update and supersede this information. We incorporate by reference the documents listed below, and any future filing we make with the SEC under Sections 13(a), 13(c), 14, or 15(d) of the Securities Exchange Act of 1934 prior to the termination of the offering. The documents that we incorporate by reference are:

- (a) Our annual report on Form 10-K for our fiscal year ended December 31, 2009, SEC File No. 000-24230.
- (b) Our quarterly report on Form 10-Q for our fiscal quarter ended March 31, 2010, SEC File No. 000-24230.
- (c) Our current reports on Form 8-K, SEC File No. 000-24230, filed with the SEC on January 5, 2010, January 7, 2010, January 28, 2012, March 3, 2010, March 19, 2010, April 7, 2010, May 10, 2010, May 18, 2010, and May 24, 2010.
- (d) Our definitive proxy statement on Schedule 14A for our annual meeting of shareholders, SEC File No. 000-24230, filed with the SEC on April 30, 2010.
- (e) A description of our Common Stock, Preferred Stock, and Series A Participating Preferred Stock Purchase Rights contained in our current report on Form 8-K, SEC File No. 000-24230, and any amendment or report filed for the purpose of updating that description filed subsequent to the date of this prospectus and prior to the termination of this offering.

You may request a copy of these filings, at no cost, by writing or telephoning us at the following address: Energy Focus, Inc., 32000 Aurora Road, Solon, Ohio 44139; telephone number 440.715.1300.

You should rely only on the information incorporated by reference or provided in this prospectus or any supplement. We have not authorized anyone else to provide you with different information. We will not make offers to sell these shares in any state where the offer is not permitted. You should not assume that the information in this prospectus or any supplement is accurate as of any date other than the date on the front of those documents.
