Item 7.01. Regulation FD Disclosure.

On September 6, 2005 Terayon Communication Systems, Inc. (Terayon) announced that its DM 6400 Network CherryPicker® digital video networking platform supports the MPEG-4/AVC format and is the first product to enable standards-based digital program insertion and splicing of programming in the MPEG-4/AVC format. Terayon is demonstrating the world's first ad insertion and real-time splicing of MPEG-4/AVC video streams at the IBC Conference (stand 8.510), September 8-13, 2005 in Amsterdam

On September 7, 2005 Terayon announced that Terayon and INVIDI Technologies Corporation have jointly developed an innovative new Localization on Demand architecture that integrates local advertising asset management and back office systems with the advertising insertion platform itself.

On September 8, 2005 Terayon announced that it is demonstrating the industry's first advertising insertion and splicing of programming in the MPEG-4/AVC format, along with other advanced capabilities of its digital video and home access solutions, at its stand at the International Broadcasting Conference (IBC) 2005, September 8-13.
