(1) Adjusted EBITDA does not represent cash flow from operations, as defined by U.S. generally accepted accounting principles, and is not calculated in the same way by all companies. We define adjusted EBITDA as operating profit (loss) before certain unusual items, as identified below, plus depreciation and amortization. You should not consider adjusted EBITDA as a substitute for net income, as an indicator of our operating performance or cash flow, or as a measure of liquidity.

EBITDA before adjustments, or operating profit (loss) plus depreciation and amortization, was \$17.2 million. In determining adjusted EBITDA, NMHG included \$0.6 million related to idling the Danville, Illinois assembly facilities of NMHG and \$0.8 million of other non-cash charges to reduce asset values.

(2) As of March 31, 2002, our backlog of unfilled orders placed with our manufacturing and assembly operations for new lift trucks was approximately 16,300 units, or \$292.4 million, of which substantially all is expected to be filled during fiscal 2002. This compares to a backlog of 15,100 units, or \$265.3 million, as of December 31, 2001. This increase in backlog is a result of improved product demand and economic recovery.

Edgar Filing: NACCO INDUSTRIES INC - Form 8-K

- (3) NMHG paid a dividend of \$15.0 million to NACCO.
- (4) As of March 31, 2002, includes \$265.0 million of debt outstanding under our existing credit facility and classified as a current liability in accordance with U.S. generally accepted accounting principles.
