MERCHANTS GROUP INC
Form 10-Q/A
March 29, 2006

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
Form 10-Q/A
Amendment No. 1

þ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended June 30, 2005
or

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from _________ to _________.
Commission File Number 1-9640

MERCHANTS GROUP, INC.
(Exact name of registrant as specified in its charter)
Delaware
(State or other jurisdiction of incorporation or organization)
16-1280763
(I.R.S. Employer Identification No.)
250 Main Street, Buffalo, New York
(Address of principal executive offices)
14202
(Zip Code)
716-849-3333
(Registrant s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o Accelerated filer o Non-accelerated filer þ

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes o No þ

Indicate the number of shares outstanding of each of the issuer s classes of common stock, as of the latest practicable date (August 8, 2005): **2,114,152 shares of Common Stock.**

MERCHANTS GROUP, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Subsequent Event

The consolidated financial statements have been amended for the following:

Where applicable, the amounts of related party transactions with the Company s affiliate have been disclosed on the face of the financial statements.

Historically the Company included in its Consolidated Balance Sheet within Other Liabilities, the net present value of the aggregate amount of its contingent liability related to claims settled by the purchase of structured settlements. A corresponding asset was included in Other Assets for the same amount. In such transactions, the Company purchases annuities for claimants from life insurance carriers. The Company believed that in all instances in which a structured settlement was purchased, it remained contingently liable to its claimant if the life insurance company were to default on payment of the structured settlement. Many of the Company s structured settlements include Uniform Qualified Assignments. In 2006, the Company received guidance from its legal counsel that such Uniform Qualified Assignments relieve the Company of any contingent liability for which the Assignment is properly executed. The Company included a liability in its Consolidated Balance Sheets as of June 30, 2005 and December 31, 2004 for all instances where structured settlements were purchased, including those where the Company received a Uniform Qualified Assignment. Other Liabilities and Other Assets included structured settlements with Uniform Qualified Assignments of $4,745,000 at June 30, 2005 and December 31, 2004. The Company s Consolidated Balance Sheets at June 30, 2005 and December 31, 2004 have been adjusted to reflect this overstatement. This adjustment had no effect on the Company s net income, stockholders equity or cash flows.

2. Principles of Consolidation and Basis of Presentation

The consolidated balance sheet as of June 30, 2005 and the related consolidated statements of operations and comprehensive income for the three and six month periods ended June 30, 2005 and 2004, and changes in stockholders equity and cash flows for the six months ended June 30, 2005 and 2004, respectively, the (Financial Statements) are unaudited. In the opinion of management, the interim financial statements reflect all adjustments necessary for a fair presentation of financial position and results of operations. Such adjustments consist only of normal recurring items. Interim results are not necessarily indicative of results for a full year.

The consolidated financial statements include the accounts of Merchants Group, Inc. (the Company), its wholly-owned subsidiary, Merchants Insurance Company of New Hampshire, Inc. (MNH), and M.F.C. of New York, Inc., an inactive premium finance company which is a wholly-owned subsidiary of MNH. The accompanying consolidated financial statements should be read in conjunction with the following notes and the Notes to Consolidated Financial Statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2004.

Table of Contents

The consolidated financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) which differ in some respects from those followed in reports to insurance regulatory authorities. All significant intercompany balances and transactions have been eliminated.

3. Related Party Transactions

The Company and MNH operate and manage their business in conjunction with Merchants Mutual Insurance Company (Mutual) under a services agreement (the Services Agreement) which became effective on January 1, 2003. At June 30, 2005 Mutual owned 12.1% of the Company s issued and outstanding common stock. The Company and MNH do not have any operating assets or employees. Under the Services Agreement, Mutual provides the Company and MNH with the facilities, management and personnel required to operate their day-to-day business. The Services Agreement covers substantially the same services previously provided under a management agreement amongst the Company, MNH and Mutual from 1986 to 2002. The Services Agreement provides for negotiated fees (subject to periodic adjustment) for administrative, underwriting, claims and investment management services.

As of January 1, 2003 MNH and Mutual entered into a reinsurance pooling agreement (the Reinsurance Pooling Agreement) that provides for the pooling, or sharing, of the insurance business traditionally written by Mutual and MNH. The Reinsurance Pooling Agreement applies to premiums earned and losses incurred on or after its effective date.

The Financial Statements include supplemental disclosure of affiliate balances, which represent the effects of the Services Agreement and the Reinsurance Pooling Agreement. In certain instances, particularly for Net losses and loss adjustment expenses, the affiliate amount may exceed the amount presented in the line item, because of changes in estimates (particularly reserves for Losses and LAE) prior to the effective date of the Reinsurance Pooling Agreement. The terms of these agreements are more fully described under the heading Administration in Part I, Item 1, Business, in the Company s Annual Report on Form 10-K for the year ended December 31, 2004. In accordance with the terms of the Services Agreement in June 2005 the Company and MNH issued notice to Mutual to terminate the Investment and Cash Management Services Annex of the Services Agreement as of June 30, 2006. The Company and MNH intend to solicit bids, including possibly from Mutual, for the management of their investment portfolios after the effective date of termination.

Table of Contents

4. Earnings Per Share

Basic and diluted earnings per share were computed by dividing net income by the weighted average number of shares of common stock outstanding during each period. For diluted earnings per share, the weighted average number of shares outstanding was increased by the assumed exercise of options for each period. The effect on the number of shares outstanding assumes the proceeds to the Company from exercise were used to purchase shares of the Company s common stock at its average market value per share during the period. The number of options assumed to be exercised and the incremental effect on average shares outstanding for purposes of calculating diluted earnings per share are shown below:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2005	2004	2005	2004
Options assumed exercised	31,500	31,500	31,500	31,500
Incremental shares outstanding	5,022	5,260	4,988	5,043

Table of Contents

5. Reserve for Loss and Loss Adjustment Expenses

The following table presents the liability for reserves for loss and loss adjustment expenses separated into case reserves, reserves for losses incurred but not reported (IBNR) and reserves for loss adjustment expense (LAE) by major product:

	June 30, 2005	December 31, 2004
Case reserves:		
PPA liability	$ 7,788	$ 10,099
Homeowners	2,101	2,098
Commercial auto liability	6,556	7,677
Workers compensation	15,516	15,697
Commercial package	13,705	13,795
General liability	676	750
Other	180	243
Total case reserves	46,522	50,359
IBNR:		
PPA liability	5,102	6,197
Homeowners	148	257
Commercial auto liability	5,253	6,154
Workers compensation	8,118	9,884
Commercial package	15,976	14,467
General liability	1,598	1,107
Other	(301)	(223)
Total IBNR	35,894	37,843
Reserve for LAE:		
PPA liability	2,416	2,973
Homeowners	575	640
Commercial auto liability	1,668	1,852
Workers compensation	2,184	2,125
Commercial package	12,712	13,712
General liability	3,115	3,145
Other	109	136
Total reserve for LAE	22,779	24,583
Subtotal	105,195	112,785
Reinsurance recoverables	15,236	15,630
Reserve for losses and LAE	$ 120,431	$ 128,415

Included in the reserve for losses and LAE at June 30, 2005 was $12,437,000 of reserves for accident years 1995 and prior. Reserves related to workers compensation comprised $8,791,000 of this amount at June 30, 2005. The following table presents workers compensation claim count and paid loss data for accident years older than ten years as of each date:

12

Table of Contents

	For the six months June 30, 2005	For the year ended December 31, 2004
	(dollars in thousands)	
Number of claims pending, beginning of period	51	44
Number of claims reported		
Number of claims settled or dismissed	(8)	(2)
Number of claims pending, end of period	43	42
Losses paid ($000 s)	$ 271	$ 388
Loss settlement expenses paid ($000 s)	$ 25	$ 25

The workers compensation claims consist primarily of reserves for the estimated cost of lifetime medical care for injured claimants. In developing the reserves for such claimants, the Company estimates the nature, frequency and duration of future medical treatments and pharmaceutical usage, in some instances for the lifetime of the claimant. Periodic reevaluation of these factors, based on new information on the claimant or changes in medical procedures, devices or pharmaceuticals, may result in changes in estimates for individual claims that are significant to the Company.

Table of Contents

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations for the Six Months Ended June 30, 2005 As Compared to the Six Months Ended June 30, 2004

The following discussion should be considered in light of the statements under the heading Safe Harbor Statement under the Securities Litigation Reform Act of 1995, at the end of this Item. All capitalized terms used in this Item that are not defined in this Item have the meanings given to them in Notes to Consolidated Financial Statements contained in Item 1 of this Form 10-Q, which is incorporated herein by reference.

Results of operations for the six months ended June 30, 2005 and 2004 reflect the effects of the Services Agreement and the Reinsurance Pooling Agreement among the Company and its wholly-owned insurance subsidiary, Merchants Insurance Company of New Hampshire, Inc. (MNH), and Merchants Mutual Insurance Company (Mutual), effective January 1, 2003. The Services Agreement calls for Mutual to provide underwriting, administrative, claims and investment services to the Company and MNH. The Reinsurance Pooling Agreement provides for the pooling, or sharing, of insurance business traditionally written by Mutual and MNH on or after the effective date. MNH s share of pooled (combined Mutual and MNH) premiums earned and losses and loss adjustment expenses (LAE) for 2005 in accordance with the Reinsurance Pooling Agreement is 30%. MNH s share of pooled premiums earned and losses and LAE was 35% in 2004. The Reinsurance Pooling Agreement pertains to premiums earned and incurred losses and LAE. Pursuant to the terms of the Reinsurance Pooling Agreement, MNH s share of pooled premiums earned will be 25% in 2006 and 2007, though not to exceed $42,500,000 and $37,500,000 in net premiums written, respectively.

Total combined Mutual and MNH or group-wide direct premiums written (DWP) for the six months ended June 30, 2005 were $100,538,000, an increase of $3,172,000 from $97,366,000 in 2004. The Company s pro-forma share of combined direct premiums written in 2005, in accordance with the Reinsurance Pooling Agreement, was $30,161,000 compared to $34,077,000 in 2004. The table below shows a comparison of direct premiums written by major category in 2005 and 2004:

	Group-wide DWP Six months ended June 30,			MNH Pro-forma Share Six months ended June 30,		
	2005	2004	Change	2005	2004	Change
Major Category	(000 s omitted)			(000 s omitted)		
				(30%)*	(35%)*	
Voluntary Personal Lines	$ 19,505	$ 25,927	(25%)	$ 5,852	$ 9,074	(36%)
Voluntary Commercial Lines	67,414	59,469	13%	20,224	20,814	(3%)
Umbrella Program	12,011	10,138	18%	3,603	3,548	2%
Involuntary	1,608	1,832	(12%)	482	641	(25%)
Total Direct Written Premiums	$ 100,538	$ 97,366	3%	$ 30,161	$ 34,077	(11%)

* Pooling Percentages

14

The 25% (or $6,422,000) decrease in group-wide voluntary personal lines direct premiums written resulted from a 36% (or $6,453,000) decrease in private passenger automobile (PPA) direct premiums written. The decrease in PPA direct premiums written is the result of the companies decision, implemented in 2002, not to write new policies in certain jurisdictions. In addition, the approval by the New Jersey Department of Banking and Insurance of the companies request to withdraw from the New Jersey PPA market was effective in June 2003 and provided for the non-renewal of New Jersey PPA policies beginning in June 2004 and completed in May 2005. As a result, voluntary PPA policies in force at June 30, 2005 were 16,444, a decrease of 33%, from 24,640 at June 30, 2004.

The monoline commercial umbrella program (the Umbrella Program) resulted in $12,011,000 of direct premiums written in the first six months of 2005 compared to $10,138,000 in the first six months of 2004. The Umbrella Program is marketed exclusively through one independent agent and approximately 95% of the premiums and losses related to Umbrella Program Policies are reinsured with an A rated national reinsurer through a quota share reinsurance treaty.

Group-wide voluntary commercial lines direct premiums written increased $7,945,000, or 13%, to $67,414,000 for the six months ended June 30, 2005, from $59,469,000 for the six months ended June 30, 2004. This increase resulted from period to period increases in every group wide commercial line of business. The average premium per group-wide, non-Umbrella Program commercial lines policy increased 5% from the year earlier period. Total non-Umbrella commercial lines policies in force at June 30, 2005 were 35,197, an increase of 10% from 31,907 at June 30, 2004.

Group-wide involuntary direct premiums written decreased $224,000 or 12%. Direct premiums written related to the New York Automobile Insurance Plan (NYAIP) comprised approximately 68% of group-wide involuntary direct premiums written in the six months ended June 30, 2005. The NYAIP provides coverage for individuals who are unable to obtain auto insurance in the voluntary market. Assignments from the NYAIP vary depending upon a company s PPA market share and the size of the NYAIP. Direct premiums written related to policies assigned from the NYAIP increased 10% to $1,089,000 for the six months ended June 30, 2005 from $994,000 for the six months ended June 30, 2004. This increase in involuntary direct premiums written related to the NYAIP was more than offset by decreases in other, non-NYAIPdirect premiums written primarily related to New Jersey PPA. The Company is unable to predict the volume of future assignments from the NYAIP.

Group-wide pooled net premiums written for 2005 were $83,809,000, an increase of $1,338,000, or 2% from $82,471,000 for the six months ended June 30, 2004. This increase in group-wide net premiums written is due to the increase in group wide direct premiums written. The Company s share of 2005 pooled net premiums written was $20,987,000, a decrease of $3,739,000, or 15%, from $24,726,000 in 2004. The decrease in the Company s share of net premiums written resulted primarily from the Company s decreased percentage participation in the Reinsurance Pooling Agreement for 2005 as compared to 2004.

Total revenues for the six months ended June 30, 2005 were $28,838,000, a decrease of $4,347,000 or 13% from $33,185,000 for the six months ended June 30, 2004.

Table of Contents

The Company s share of pooled net premiums earned in accordance with the Reinsurance Pooling Agreement for the six months ended June 30, 2005 was $24,744,000, compared to $28,433,000 for the six months ended June 30, 2004. This $3,689,000, or 13%, decrease in net premiums earned resulted primarily from the five percentage point decrease in the Company s participation in the Reinsurance Pooling Agreement.

Net investment income was $3,844,000 for the six months ended June 30, 2005, a decrease of 4% from $4,019,000 for the six months ended June 30, 2004, primarily due to a 6% decrease in average invested assets resulting from declining net premiums written.

Net losses and LAE were $11,911,000 for the six months ended June 30, 2005, a decrease of $7,330,000, or 38%, from $19,241,000 for the six months ended June 30, 2004. The decrease in net losses and LAE was due to the 13% decrease in net premiums earned and a 19.6 percentage point decrease in the loss and LAE ratio to 48.1% for the six months ended June 30, 2005 from 67.7% for the six months ended June 30, 2004.

The 19.6 percentage point decrease in the loss and LAE ratio was due to a 6.3 percentage point decrease in the loss and LAE ratio for the current accident year to 59.8% in 2005 from 66.1% in 2004 and to a $2,879,000 decrease in the Company s estimate of losses and LAE occurring in prior accident years, compared to a $436,000 increase in the estimate of losses and LAE occurring in prior accident years recorded in 2004.

The 6.3 percentage point decrease in the loss and LAE ratio for the current accident year primarily resulted from:

An improvement from 71.9% to 59.0% in the accident year direct loss and ALAE ratio in the Company s PPA prodct primarily due to increased fraud prevention, detection and prosecution efforts resulting from certain legislative changes in New York State. PPA is one of the Company s larger products and represents approximately 25% of the Company s net earned premiums. The decrease in the PPA loss and LAE ratio decreased the Company s overall loss and LAE ratio by approximately 2.2 percentage points.

Mild weather in the Company s operating territory during the first 6 months of 2005 contributed to significant decreases in claim frequency (reported claims per earned policy) in the Company s homeowners and commercial property products. The homeowners claim frequency decreased to 4.5% in 2005 from 5.7% in 2004 and the commercial property claim frequency decreased to 11.5% in 2005 from 12.8% in 2004.

The $2,879,000 decrease in the estimate of losses and LAE occurring in prior accident years in the first six months of 2005, reduced the loss and LAE ratio by 11.6 percentage points. During the first six months of 2004, the $436,000 increase in the estimate of losses and LAE occurring in prior accident years increased the loss and LAE ratio in 2004 by 1.5 percentage points. The reserve development for each product and for each accident year during 2005 was within the range of reasonably likely reserves by product as of December 31, 2004. It is not appropriate to project future increases or decreases in the estimate of losses and LAE for prior accident years from past experience. See Critical Accounting Policies and Estimates for a further discussion of the Company s Reserves for Losses and LAE. The following table documents the

Table of Contents

changes in the estimate of losses and LAE related to prior accident years recorded in 2005 for the Company s primary products:

Accident Year	Home-owners	PPA Liability	Commercial Auto Liability	Workers' Compen-sation	Commercial Package	General Liability	All Other	Total
	Increases (decreases) (in thousands)							
2001 and prior	$ 134	$ 71	$ (560)	$ (1,499)	$ 725	$ 610	$ 304	$ (215)
2002	109	(13)	(116)	(155)	727	(93)	7	466
2003	123	(344)	(99)	50	(183)	38	(98)	(513)
2004	(303)	(1,052)	(645)	95	(195)	247	(452)	(2,305)
Total	$ 63	$ (1,338)	$ (1,420)	$ (1,509)	$ 1,074	$ 802	$ (239)	$ (2,567)

The Company experienced favorable loss development during 2005 in its automobile liability products (both personal and commercial) amounting to $1,697,000 relating to accident year 2004. This favorable development in incurred losses pertained to the Company s automobile liability case reserves, primarily in New York State and is consistent with increased fraud prevention, detection and prosecution efforts stemming from certain legislative changes in New York State. Furthermore, the Company believes that changes to underwriting guidelines implemented in 2002 reduced the prevalence of commercial auto policies likely to generate severe losses. The Company believes that sufficient time has passed without the emergence of severe losses at the same rate as in prior years, and has reduced the average expected loss on the 2004 accident year.

The Company experienced favorable loss development during 2005 in its workers compensation product amounting to $1,499,000 relating to accident years 2001 and prior in states other than New York. This favorable development resulted from lower than expected emergence of paid losses and incurred losses that has become evident in 2005. The Company made no significant changes to its procedures for processing or reserving its claims during 2005, and attributes the changes to its prior year reserves to the inherent uncertainty in estimating ultimate costs in circumstances that involve the complex and changing conditions. The Company believes that the decrease in loss estimates for its workers compensation business is consistent with changes initiated by the Company in 2001 to reduce the concentration in its workers compensation policy portfolio of classes of risk that are subject to high severity losses. Those underwriting changes have continued through 2005. The Company believes that it took several years for the absence of severe losses to become apparent, as the severity of such losses, if they were to occur, typically do not become apparent for several years.

The Company s reduction in its estimate of losses and LAE related to prior accident years represented 2% of the recorded reserve for losses and LAE at December 31, 2004.

The Company made no changes to the key assumptions used in evaluating the adequacy of its reserves for losses and LAE during the first six months of 2005. A reasonable possibility exists in any year that relatively minor fluctuations in the estimate of reserves for losses and LAE may have a significant impact on the Company s net income. This is due primarily to the size of the Company s reserves for losses and LAE ($120,431,000 at June 30, 2005) relative to its net income.

The ratio of amortization of deferred policy acquisition costs and other underwriting expenses to net premiums earned increased to 43.6% for the six months ended June 30, 2005 from 38.2% for the six months ended June 30, 2004. Amortization of deferred acquisition costs decreased $964,000 or 13% compared to the year earlier period. Other underwriting expenses as a percentage of net premiums earned increased by 5.4 percentage points due to an increase in retrospective commissions related to the Reinsurance Pooling Agreement, which provides for retrospective commission income or expense based on actual cumulative experience of the pooled business compared to a target loss and LAE ratio of 74%. The commission is owed to Mutual based on a decrease during the first six months of 2005 in the estimated cumulative loss and LAE ratio on the pooled business since the inception of the Reinsurance Pooling Agreement which includes favorable experience for the first six months of the 2005 accident year. Retrospective commission expense totaled $1,863,000 (7.5 percentage points of the expense ratio) for the six months ended June 30, 2005 compared to $749,000 (2.6 percentage points of the expense ratio) for the six months ended June 30, 2004. The Company is reducing its reliance on the traditional business by reducing its percentage participation in the Reinsurance Pooling Agreement and by seeking alternative opportunities in which to invest its capital. To the extent that the Company does not invest in such alternative opportunities, fixed expenses will become a greater percentage of net premiums earned in future periods. Commissions (other than retrospective commissions under the Reinsurance Pooling Agreement), premium taxes and other state assessments that vary directly with the Company s premium volume represented 19.7% of net premiums earned in the six month period ended June 30, 2005 compared to 19.2% of net premiums earned in the six months ended June 30, 2004.

The Company s effective income tax rate for the six months ended June 30, 2005 and 2004 was 28.8% and 24.2%, respectively. These rates were calculated based upon the Company s estimate of its effective income tax rate for all of 2005 and 2004 as applicable. In 2005, the effective income tax rate differed from the federal statutory rate of 34% due to non-taxable income, primarily tax-exempt income from fixed maturity investments. In 2004, the effective income tax rate differed from the federal statutory rate of 34% due to non-taxable income, primarily tax-exempt income and to an adjustment to prior years taxes and the reversal of certain excess tax reserves related to uncertain tax positions.

Table of Contents

Results of Operations for the Three Months Ended June 30, 2005 As Compared to the Three Months Ended June 30, 2004

Total combined Mutual and MNH direct premiums written (DWP) for the three months ended June 30, 2005 were $55,251,000, an increase of $2,986,000 from $52,265,000 in 2004. The Company s pro-forma share of combined direct premiums written in 2005, in accordance with the Reinsurance Pooling Agreement, was $16,575,000 compared to $18,293,000 in 2004. The table below shows a comparison of direct premiums written by major category in 2005 and 2004:

	Group-wide DWP Three months ended March 31,			MNH Pro-forma Share Three months ended March 31,		
	2005	2004	Change	2005	2004	Change
Major Category	(000 s omitted)			(000 s omitted)		
				(30%)*	(35%)*	
Voluntary Personal Lines	$ 10,294	$ 13,371	(23%)	$ 3,088	$ 4,680	(34%)
Voluntary Commercial Lines	37,247	32,608	14%	11,174	11,413	(2%)
Umbrella Program	6,795	5,339	27%	2,039	1,869	9%
Involuntary	915	947	(3%)	274	331	(17%)
Total Direct Written Premiums	$ 55,251	$ 52,265	6%	$ 16,575	$ 18,293	(9%)

* Pooling Percentages

The 23% (or $3,077,000) decrease in group-wide voluntary personal lines direct premiums written resulted from a 34% (or $3,097,000) decrease in private passenger automobile (PPA) direct premiums written. The decrease in PPA direct premiums written is the result of the companies decision, implemented in 2002, not to write new policies in certain jurisdictions. In addition, the approval by the New Jersey Department of Banking and Insurance of the companies request to withdraw from the New Jersey PPA market was effective in June 2003 and provided for non-renewal of New Jersey PPA policies beginning in June 2004 and completed in May 2005.

Group-wide voluntary commercial lines direct premiums written increased $4,639,000, or 14%, to $37,247,000 for the three months ended June 30, 2005, from $32,608,000 for the three months ended June 30, 2004. This increase resulted from period to period increases in every group-wide commercial line of business.

Group-wide pooled net premiums written for the three months added June 30, 2005 were $46,940,000, an increase of $2,379,000, or 5% from $44,561,000 for the three months ended June 30, 2004. This increase in group-wide net premiums written is due to the increase in group wide direct premiums written. The Company s share of 2005 pooled net premiums written was $14,082,000, a decrease of $1,514,000, or 10%, from $15,596,000 in 2004. The decrease in the Company s share of net premiums written resulted primarily from the Company s decreased percentage participation in the Reinsurance Pooling Agreement for 2005 as compared to 2004.

Total revenues for the three months ended June 30, 2005 were $14,789,000, a decrease of $1,730,000 or 10% from $16,519,000 for the three months ended June 30, 2004.

Table of Contents

The Company s share of pooled net premiums earned in accordance with the Reinsurance Pooling Agreement for the three months ended June 30, 2005 was $12,767,000, compared to $14,364,000 for the three months ended June 30, 2004. This $1,597,000, or 11%, decrease in net premiums earned resulted primarily from the five percentage point decrease in the Company s participation in the Reinsurance Pooling Agreement.

Net investment income was $1,908,000 for the three months ended June 30, 2005, a decrease of 3% from $1,965,000 for the three months ended June 30, 2004, primarily due to a 6% decrease in average invested assets resulting from declining net premiums written.

Net losses and LAE were $4,617,000 for the three months ended June 30, 2005, a decrease of $4,535,000, or 50%, from $9,152,000 for the three months ended June 30, 2004. The decrease in net losses and LAE was due to the 11% decrease in net premiums earned and a 27.5 percentage point decrease in the loss and LAE ratio to 36.2% for the three months ended June 30, 2005 from 63.7% for the three months ended June 30, 2004. This 27.5 percentage point decrease in the loss and LAE ratio was due to an 2.9 percentage point decrease in the 2005 accident year loss and LAE ratio to 58.6% for the second quarter of 2005 from 61.5% for the comparable period in 2004 and to a $2,864,000 decrease in the Company s estimate of losses and LAE related to prior accident years, compared to a $323,000 decrease in the estimate of losses and LAE related to prior accident years recorded in 2004.

To enhance the statistical credibility of the Company s data, the Company performs its loss and LAE analysis for each new accident year on a year-to-date basis as of the end of each quarter of that year. As a result, the accident year loss and LAE ratio for each quarter is the difference between the current quarter year-to-date estimate and the prior quarter year-to-date estimate. Absent a significant individual loss or a loss-causing event (such as a storm) the Company cannot determine whether the quarter-to-quarter change is due to new losses occurring during the current quarter, or changes in estimates for losses occurring in prior quarters. Accordingly, differences in current accident year quarterly loss and LAE ratios may not be indicative of improvement or deterioration in the Company s business. The Company did not experience any significant weather-related events or significantly large claims in the second quarters of 2005 or 2004 that would explain the decrease in the 2005 accident year loss and LAE ratio. As discussed earlier in this Item, through the second quarter of 2005 the year-to-date accident year loss and LAE ratio for 2005 is 59.8%, 6.3 percentage points lower than the year-to-date accident year loss and LAE ratio for the 2004 accident year evaluated as of June 30, 2004.

The Company recorded a $2,864,000 decrease in the estimate of losses and LAE related to prior accident years in the second quarter of 2005, which reduced the second quarter 2005 loss and LAE ratio by 22.4 percentage points. The reasons for this decrease are discussed in the Results of Operations for the Six Months Ended June 30, 2005 As Compared to the Six Months Ended June 30, 2004 appearing earlier in this Item. During the second quarter of 2004, the Company recorded a $323,000 decrease to its estimate of losses and LAE which decreased the losses and LAE ratio in the second quarter of 2004 by 2.2 percentage points.

The ratio of amortization of deferred policy acquisition costs and other underwriting expenses to net premiums earned increased to 44.2% for the three months ended June 30, 2005 from 37.7% for the three months ended June 30, 2004. Amortization of deferred acquisition costs decreased $420,000 or 11%

Table of Contents

compared to the year earlier period. Other underwriting expenses as a percentage of net premiums earned increased by 6.6 percentage points due to an increase in retrospective commissions related to the Reinsurance Pooling Agreement. The commission is owed to Mutual based on a decrease during the second quarter of 2005 in the estimated cumulative loss and LAE ratio on the pooled business since the inception of the Reinsurance Pooling Agreement. Retrospective commission expense totaled $1,007,000 (7.9 percentage points of the expense ratio) for the three months ended June 30, 2005 compared to $405,000 (2.8 percentage points of the expense ratio) for the three months ended June 30, 2004. Commissions (other than retrospective commissions under the Reinsurance Pooling Agreement), premium taxes and other state assessments that vary directly with the Company s premium volume represented 19.1% of net premiums earned in the three month period ended June 30, 2005 compared to 19.6% of net premiums earned in the three months ended June 30, 2004.

The Company s effective income tax rate for the three months ended June 30, 2005 and 2004 was 29.9% and 20.8%, respectively. These rates were calculated based upon the Company s estimate of its effective income tax rate for all of 2005. In 2005, the effective income tax rate differed from the federal statutory rate of 34% due to non-taxable income, primarily tax-exempt income from fixed maturity investments. In 2004, the effective income tax rate differed from the federal statutory rate of 34% due to non-taxable income, primarily tax-exempt income and to an adjustment to prior years taxes and the reversal of certain excess tax reserves related to uncertain tax positions.

Critical Accounting Policies

Reserve for Losses and LAE

The Reserve for Losses and LAE is an estimate of the ultimate cost of settling all losses incurred and unpaid, including those losses not yet reported to the Company, and is stated net of reinsurance. The amount of loss reserves for reported claims is based upon a case-by-case evaluation of the circumstances pertaining to the claim and the policy provisions relating to the loss. Reserves for claims that have occurred but have not been reported (IBNR) to the Company and for the costs of settling or adjusting claims are determined using commonly accepted actuarial techniques based on historical information for each of the Company s products, adjusted for current conditions.

The Company s primary assumption when determining its reserves is that past experience, adjusted for the effect of current developments and trends, is relevant in predicting future events. When establishing its loss reserves, the Company analyzes historical data and estimates the impact of various loss development factors such as the historical loss experience of the Company and of the industry, the mix of products sold, trends in claim frequency and severity, the Company s claim processing procedures, changes in legislation, judicial decisions, legal developments, including the prevalence of litigation in the areas served by the Company, and changes in general economic conditions including inflation.

Management determines the amount of reserves for losses and LAE to be recorded based upon analyses prepared by the Company s internal and external actuaries and management s assessment of a reasonable amount of reserves. The reasonable estimate is determined after considering the estimates produced using a variety of actuarial techniques for each of the Company s products. The following is a summary of the methods used:

Table of Contents

Paid Loss Development

The paid loss development method is based on the assumption that past rates of claims payments are indicative of future rates of claims payments. An advantage of this method is that paid losses contain no case reserve estimates. Additionally, paid losses are not as greatly influenced by changes in claims reserving practices as are incurred losses. Estimates can be distorted if changes in claims handling practices or procedures cause an acceleration or deceleration in claims payments. Furthermore, paid loss development may produce biased estimates for long-tailed products where paid loss development factors are large at early evaluation points.

Incurred Loss Development

The incurred loss development method is based on the assumption that the past relative adequacy of case reserves is consistent with the current relative adequacy of case reserves. Because incurred losses include payments and case reserves, a larger volume of data is considered in the estimate of ultimate losses. As a result, incurred loss data patterns may be less erratic than paid loss data patterns, particularly for coverages on which claims are reported relatively quickly but have a long payout pattern. Because this method assumes that the relative adequacy of case reserves has been consistent, changes in claims handling procedures or the occurrence or absence of large losses may cause estimates to be erratic.

Bornhuetter-Ferguson with Premium and Paid Loss

The Bornhuetter-Ferguson (BF) with premium and paid loss method is a combination of the paid loss development method and an expected loss ratio assumption. The expected loss ratios are modified to the extent actual loss payments differ from payments expected based on the selected paid loss development pattern. This method avoids possible distortions resulting from a large development factor being applied to a small base of paid losses in order to estimate ultimate losses. This method will react slowly if actual ultimate losses differ substantially from losses inherent in the expected loss ratio.

Bornhuetter-Ferguson with Premium and Incurred Loss

The Bornhuetter-Ferguson (BF) with premium and incurred loss method is a combination of the incurred loss development method and an expected loss ratio assumption. The expected loss ratios are modified to the extent actual incurred losses differ from expected incurred losses based on the selected incurred loss development pattern. This method avoids possible distortions resulting from a large development factor being applied to a small base of incurred losses in order to estimate ultimate loss. This method will react slowly if actual ultimate losses differ substantially from losses inherent in the expected loss ratio.

Ultimate Claims and Average Loss

This method multiplies the estimated number of ultimate claims by a selected ultimate average loss for each accident year to produce ultimate loss estimates. If loss development methods produce

Table of Contents

erratic or unreliable estimates, this method can provide more stable estimates, consistent with recent loss history. This method may produce erratic results if there has been a change in the way claims are counted or in the mix of types of loss. The occurrence or absence of large losses can also distort the average loss estimate.

Allocated loss adjustment expenses (ALAE) are estimated separately from losses because ALAE payment patterns differ from loss payment patterns. The company employs the following methods to estimate ALAE reserves.

Paid ALAE Development

This method is analogous to the paid loss development method except paid ALAE is developed instead of paid losses. Paid ALAE patterns often are more stable than paid loss patterns. However, paid ALAE typically develop more slowly than paid losses, resulting in a large leveraging impact on less mature accident years.

Bornhuetter-Ferguson with Ultimate Loss and Paid ALAE

The Bornhuetter-Ferguson (BF) with ultimate loss and paid ALAE method is a combination of the paid ALAE development method and an expected ratio of ultimate ALAE to ultimate loss. The expected ALAE to loss ratios are modified to the extent paid ALAE differ from expected based on the selected paid ALAE development pattern. This method avoids possible distortions resulting from a large development factor being applied to a small base of paid ALAE in order to estimate ultimate ALAE. This is a useful method for estimating ultimate ALAE for less mature accident years.

Estimated ultimate losses and LAE and the resulting reserve for losses and LAE are determined based on the results of the methods described above along with the following considerations:

How results of methods based on paid losses compare to methods based on incurred losses.

How results of paid and incurred development methods compare to results of paid and incurred BF methods.

Whether diagnostic tests cause management to favor the results of one or more methods over the results of other methods. Such tests include:

closed claim to reported claim ratios

average case reserves per open claim

paid loss per closed claim

paid loss to incurred loss ratios

the reasonableness of ultimate loss & ALAE ratios and ultimate severities

management s consideration of other factors such as premium and loss trends, large loss experience, legislative and judicial changes and changes in underwriting guidelines and practices.

Table of Contents

To the extent these considerations result in changes to the Company s estimates of reserves for losses and LAE related to prior accident years, the Company recognizes such changes in the accounting period in which the change becomes known.

As stated previously, the above methods assume that past experience adjusted for the effects of current developments and trends is an appropriate basis for predicting future events. As a result of a number of factors, it is possible that ultimate actual payments for losses and LAE will differ from amounts contemplated in recorded reserves. A range of reasonably likely reserves by product as of June 30, 2005, net of reinsurance recoverables, developed by the Company s actuaries based on a variety of generally accepted actuarial methods is shown in the table below. Generally the low and the high values in the range represent reasonable minimum and maximum amounts of these actuarial indications using the methods described above.

	Range of Net Loss & LAE Reserves ($000 s)		
Products	Low	Recorded	High
Personal Auto	$ 13,121	$ 15,293	$ 17,311
Homeowners	$ 2,245	$ 2,824	$ 3,442
Commercial Auto	$ 10,233	$ 13,465	$ 17,208
Workers Compensation	$ 21,507	$ 25,818	$ 30,336
Commercial General Liability	$ 35,483	$ 44,278	$ 55,569
Commercial Property	$ 2,095	$ 3,504	$ 5,049
Other	$ 12	$ 13	$ 18
All Products	$ 94,992	$ 105,195	$ 115,926

Because the reserve estimates by product are independent of each other it is highly unlikely that the low estimate or the high estimate for each product will occur at the same time. Accordingly, the low and the high estimates for All Products shown above are greater than the sum of the low estimates and less than the sum of the high estimates resulting in a narrower range.

Despite the many factors considered in the reserving process, it is reasonably possible that actual payments for losses & LAE will differ from those contemplated in the Company s reserves. Such fluctuations could have a significant impact on the Company s net income.

Deferred Policy Acquisition Costs

Policy acquisition costs, such as commissions (net of reinsurance commissions), premiums taxes and certain other underwriting expenses which vary directly with premium volume, are deferred and amortized over the terms of the related insurance policies. Deferred policy acquisition costs are evaluated on an aggregate basis at least annually, to determine if recorded amounts exceed estimated recoverable amounts after allowing for anticipated investment income. Premium deficiencies if any, are recorded as amortization of deferred policy acquisition costs. Actual amounts may vary from the Company s estimates.

Table of Contents

Investments

Fixed maturity investments are classified as available for sale and are carried at fair value. Net unrealized holding gains or losses, net of taxes, are shown as accumulated other comprehensive income. Investment income is recognized when earned, and gains and losses are recognized when investments are sold and in instances when a decline in the fair value of a security is determined to be other-than-temporary.

The Company s investment committee, comprised of the Chief Operating Officer, the Chief Investment Officer and the Chief Financial Officer, meets monthly and monitors the Company s investment portfolio for declines in value that are other-than-temporary. This assessment requires significant judgment. The investment committee considers the nature of the investment, the severity and length of the decline in fair value, events specific to the issuer including valuation modeling, overall market conditions, and the Company s intent and ability to retain the investment for a period of time sufficient to allow for any anticipated recovery in market value. When a decline in the fair value of a security is determined to be other-than-temporary, the Company adjusts the cost basis of that security to fair value. A charge to earnings is recorded as a loss. Future increases in fair value and future decreases in fair value if not other-than-temporary, are included in other comprehensive income.

Liquidity and Capital Resources

In developing its investment strategy the Company determines a level of cash and short-term investments which, when combined with expected cash flow, is estimated to be adequate to meet expected cash obligations. Due to declining written premiums however, the Company s operating activities have resulted in a use of cash each year since 2001. The Company s decreasing participation percentage in the pooled business over the remaining years of the Reinsurance Pooling Agreement will likely result in continued negative cash flows from operations. Net cash used in operations during the six months ended June 30, 2005 was $1,589,000. The Company believes that careful management of the relationship between assets and liabilities will minimize the likelihood that investment portfolio sales will be necessary to fund insurance operations, and that the effect of any such sales, if any, on the Company s stockholders equity will not be material.

The Company s objectives with respect to its investment portfolio include maximizing total return within investment guidelines while protecting policyholders surplus and maintaining flexibility. The Company relies on premiums as a major source of cash, and therefore liquidity. Cash flows from the Company s investment portfolio, in the form of interest or principal payments as well as from the maturity of fixed income investments, are an additional source of liquidity.

The Company designates newly acquired fixed maturity investments as available for sale and carries these investments at fair value. Unrealized gains and losses related to these investments are recorded as accumulated other comprehensive income (loss) within stockholders equity. At June 30, 2005, the Company recorded $731,000 of unrealized losses, net of taxes, associated with its investments as accumulated other comprehensive loss in its Consolidated Balance Sheet.

At June 30, 2005, the Company s portfolio of fixed maturity investments represented 92.1% of invested assets. Management believes that this level of fixed maturity investments is consistent with the Company s

liquidity needs because it anticipates that cash receipts from net premiums written, investment income and maturing securities will enable the Company to satisfy its cash obligations. Furthermore, a portion of the Company s fixed maturity investments are invested in mortgage-backed and other asset-backed securities which, in addition to interest income, provide monthly paydowns of bond principal.

At June 30, 2005, $106,818,000, or 59.7%, of the Company s fixed maturity portfolio was invested in mortgage-backed and other asset-backed securities. The Company invests in a variety of collateralized mortgage obligation (CMO) products but has not invested in the derivative type of CMO products such as interest only, principal only or inverse floating rate securities. All of the Company s CMO investments have a secondary market and their effect on the Company s liquidity does not differ from that of other fixed maturity investments.

At June 30, 2005 $4,144,000, or 2%, of the Company s investment portfolio was invested in non-investment grade securities compared to $2,150,000, or 1%, at December 31, 2004.

The Company has arranged for a $2,000,000 unsecured credit facility from a bank. Any borrowings under this facility are payable on demand and carry an interest rate which can be fixed or variable and is negotiated at the time of each advance. This facility is available for general working capital purposes and for repurchases of the Company s common stock. At June 30, 2005 no amount was outstanding on this loan.

As a holding company, the Company is dependent on cash dividends from MNH to meet its obligations and to pay any cash dividends. MNH is subject to New Hampshire insurance laws which place certain restrictions on its ability to pay dividends without the prior approval of state regulatory authorities. These restrictions limit dividends to those that, when added to all other dividends paid within the preceding twelve months, would not exceed 10% of the insurer s statutory policyholders surplus as of the preceding December 31st. The maximum amount of dividends that MNH could pay during any twelve month period ending in 2005 without the prior approval of the New Hampshire Insurance Commissioner is $6,171,000. MNH paid $1,200,000 and $800,000 of dividends to the Company in August 2004 and February 2005, respectively. On July 28, 2005 MNH declared a dividend payable to the Company for $1,200,000 on August 19, 2005. The Company paid cash dividends to its common stockholders of $.10 per share in the first six months of 2005 amounting to $424,000. On July 28, 2005 the Company declared a quarterly cash dividend of $.10 per share payable on September 2, 2005 to shareholders of record as of the close of business on August 18, 2005.

Under the Services Agreement, Mutual has provided services and facilities for MNH to conduct its insurance business. The balance in the payable to or receivable from affiliate account represents the amount owing to or owed by Mutual by or to the Company for the difference between premiums collected and payments made for losses, commissions (including retrospective commissions), employees, services and facilities by Mutual on behalf of MNH.

Regulatory guidelines suggest that the ratio of a property-casualty insurer s annual net premiums written to its statutory surplus should not exceed 3 to 1. MNH has consistently followed a business strategy that would allow it to meet this 3 to 1 regulatory guideline. For the first six months of 2005, MNH s ratio of net premiums written to statutory surplus, annualized for a full year, was .6 to 1.

Table of Contents

Relationship with Mutual

The Company s and MNH s business and day-to-day operations are closely aligned with those of Mutual. This is the result of a combination of factors. Mutual has had a historical ownership interest in the Company and MNH. Prior to November 1986 MNH was a wholly-owned subsidiary of Mutual. Following the Company s initial public offering in November 1986 and until a secondary stock offering in July 1993 the Company was a majority-owned subsidiary of Mutual. Mutual currently owns 12.1% of the Company s common stock. Under the Services Agreement, Mutual provides the Company and MNH with all facilities and personnel to operate their business. All of the officers of the Company or MNH are employees of Mutual whose services are provided to, and paid for by, the Company and MNH through the Services Agreement. Also, the operation of MNH s insurance business, which offers substantially the same lines of insurance as Mutual through the same independent insurance agents, creates a very close relationship among the Companies. By reducing its percentage under the Reinsurance Pooling Agreement, the Company is making capital available for other opportunities in an effort to increase return on shareholders equity and maximize shareholder value. The Company announced on February 2, 2005 that it retained Philo Smith Capital Corporation to explore strategic alternatives for its long-term development, and that initiative continues. In accordance with the Services Agreement, in June of 2005 the Company and MNH notified Mutual that they will terminate the Cash Management Services Annex to the Services Agreement as of June 30, 2006. The Company and MNH intend to solicit bids, including possibly from Mutual, for the management of their investment portfolios after the effective date of the termination.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995:

With the exception of historical information, the matters and statements discussed, made or incorporated by reference in this Quarterly Report on Form 10-Q constitute forward-looking statements and are discussed, made or incorporated by reference, as the case may be, pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements include, without limitation, statements relating to the Company s plans, strategies, objectives, expectations and intentions. Words such as believes, forecasts, intends, possible, expects, anticipates, estimates, or plans and similar expressions are intended to identify forward lookin statements. Such forward-looking statements involve certain assumptions, risks and uncertainties that include, but are not limited to, those associated with factors affecting the property-casualty insurance industry generally, including price competition, the Company s dependence on state insurance departments for approval of rate increases; size and frequency of claims, escalating damage awards, natural disasters, fluctuations in interest rates and general business conditions; the Company s dependence on investment income; the geographic concentration of the Company s business in the northeastern United States and in particular in New York, New Hampshire, New Jersey, Rhode Island, Pennsylvania and Massachusetts; the adequacy of the Company s loss reserves; the Company s dependence on the general reinsurance market; government regulation of the insurance industry; exposure to environmental claims; dependence of the Company on its relationship with Mutual; and the other risks and uncertainties discussed or indicated in all documents filed by the Company with the Securities and Exchange Commission.

Table of Contents

There may be other risks and uncertainties that we have not identified that may affect whether our forward-looking statements will prove accurate. New factors may emerge from time to time that cause our business not to develop as we predict, and it is not possible for us to predict all of them. You should not place undue reliance on forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made and, except as required by law, the Company undertakes no obligation to update any forward-looking statement to reflect events or other circumstances after the date on which it is made or to reflect the occurrence of anticipated or unanticipated events or circumstances.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Market risk represents the potential for loss due to changes in the fair value of financial instruments. The market risk related to the Company s financial instruments primarily relates to its investment portfolio. The value of the Company s investment portfolio of $194,278,000 at June 30, 2005 is subject to changes in interest rates and to a lesser extent on credit quality. Further, certain mortgage-backed and asset-backed securities are exposed to accelerated prepayment risk generally caused by interest rate movements. If interest rates were to decline, mortgage holders would be more likely to refinance existing mortgages at lower rates. Acceleration of future repayments could adversely affect future investment income, if reinvestment of the accelerated receipts was made in lower yielding securities.

The following table provides information related to the Company s fixed maturity investments at June 30, 2005. The table presents cash flows of principal amounts and related weighted average interest rates by expected maturity dates. The cash flows are based upon the maturity date or, in the case of mortgage-backed and asset-backed securities, expected payment patterns. Actual cash flows could differ from those shown in the table.

Table of Contents

Fixed Maturities
Expected Cash Flows of Principal Amounts ($in 000 s):

	2005	2006	2007	2008	2009	There-after	TOTAL Amor-tized Cost	TOTAL Esti-mated Market Value
Available for Sale								
U.S. Treasury securities and obligations of U.S. Government corporations and agencies	$ 2,010	$ 0	$ 0	$ 3,005	$ 0	$ 0	$ 5,015	$ 4,976
Average interest rate	4.4%	0.0%	0.0%	3.2%	0.0%	0.0%		
Obligations of states and political subdivisions	3,784	9,466	3,867	15,467	8,231	4,150	44,965	44,645
Average interest rate	3.4%	3.4%	4.3%	3.9%	4.5%	4.9%		
Corporate securities	7,024	998	0	3,241	7,078	4,330	22,671	22,499
Average interest rate	4.0%	3.2%	0.0%	3.7%	4.9%	7.0%		
Mortgage & asset backed securities	13,409	24,834	19,889	13,499	6,338	28,819	106,788	106,818
Average interest rate	4.8%	4.8%	4.8%	4.9%	5.0%	5.1%		
Total	$ 26,227	$ 35,298	$ 23,756	$ 35,212	$ 21,647	$ 37,299	$ 179,439	$ 178,938

The discussion and the estimated amounts referred to above include forward-looking statements of market risk which involve certain assumptions as to market interest rates and the credit quality of the fixed maturity investments. Actual future market conditions may differ materially from such assumptions. Accordingly, the forward-looking statements should not be considered projections of future events by the Company.

Item 4. Controls and Procedures

The Company s chief executive officer and chief financial officer, after evaluating the effectiveness of the Company s disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities

Exchange Act of 1934) as of the end of the period covered by this report, concluded that the Company s disclosure controls and procedures were designed to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms.

There was no change in the Company s internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rules 13a-15 or 15d-15 under the Securities Exchange Act of 1934 that occurred during the Company s last fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company s internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

None.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3. Defaults Upon Senior Securities.

None.

Item 4. Submission of Matters to a Vote of Security Holders

On May 4, 2005 the Company held its annual meeting of stockholders. During the meeting Andrew A. Alberti and Frank J. Colantuono were re-elected Directors of the Company for three year terms to expire at the annual meeting in 2008. Brent D. Baird, Thomas E. Kahn, Henry P. Semmelhack and Robert M. Zak are Directors of the Company whose terms of office as Director continue beyond the date of the meeting. Mr. Semmelhack s and Mr. Zak s terms expire in 2006 and Mr. Baird s and Mr. Kahn s terms expire in 2007.

A summary of stockholder voting with respect to the election of Directors is as follows:

	Election of Andrew A. Alberti	Election of Frank J. Colantuono
For	1,882,841	1,883,478
Withheld	21,039	20,402

Item 5. Other Information.
