Note: Total indebtedness (including A/R Securitization Program), net of cash is provided by the Company as an additional measure of the Company s leverage. Generally accepted accounting principles require that this financing facility be presented off-balance sheet. As management internally evaluates the A/R Securitization Facility as an additional form of indebtedness, management believes it is helpful to provide the readers of its financial statements an evaluation of its total indebtedness from all sources of financing. Cash and cash equivalents are deducted from this total to determine total indebtedness (including A/R Securitization Program), net of cash. This amount represents the Company s net obligation due under all of its financing facilities.

Note: Free cash flow (excluding the effects of A/R Securitization Program) is provided by the Company as an additional liquidity measure. Generally accepted accounting principles require that changes in this facility be reflected within operating cash flows in the Company s consolidated statement of cash flows. As management internally evaluates the A/R Securitization Facility as an additional form of liquidity, management believes it is helpful to provide the readers of its financial statements with the cash flow from operating activities other than those related to the A/R Securitization Facility. Capital expenditures are deducted from this adjusted operating cash flow amount to determine free cash flow (excluding effects of A/R Securitization Program). This amount represents excess funds available to management to service all of its financing needs (including needs of its A/R Securitization Program) and other investing needs.
