Trustees:

I am writing on behalf of Karpus Investment Management (KIM), a registered investment adviser. As of January 18, 2008, we represented beneficial ownership of 12,111,086 shares of the MFS Intermediate Income Trust (MIN), which represents 10.4 percent of outstanding shares. We have been accumulating shares for investment purposes since September 20, 1990. I would like to begin by commending the Trustees for adopting an 8.5 percent level distribution policy in October of 2007. We support these programs as an effective means of narrowing a fund's discount to net asset value. The Board's actions reflect their commitment to address a persistently wide discount to net asset value. Unfortunately, in conjunction with this distribution policy modification, the Trustees also approved several changes to the Trust's investment strategy that "may increase its investments in higher yielding investment-grade securities, including illiquid securities . . . (these securities) may entail greater risk and increase portfolio volatility." We believe that by approving changes to the Fund's investment strategy that would increase the risk of the portfolio, the Board mitigated some of the positive effects of the level distribution policy. There are very few closed-end taxable bond funds with a AAA average credit quality rating and, to my knowledge, MIN is the only intermediate duration fund with a AAA credit quality. These characteristics are what initially attracted us to become investors in the Fund. MIN's uniqueness, in our opinion, created demand and the proposed changes in investment strategy will make MIN very similar to many other taxable bond closed-end funds. Furthermore, we believe that fund management should never change investment policy or strategy without a clear mandate from a super majority of shareholders. As you may recall, we expressed similar concerns with regard to changes in MGF's investment strategy on May 2, 2007. I was surprised that MIN's discount has not narrowed more significantly and this change in investment strategy is the only factor I could attribute to the lack of market reaction to the level distribution policy. As very long-term shareholders and the largest shareholder of the Fund, I strongly urge the Trustees to either reverse these changes or find another means of narrowing the Fund's discount to net asset value. If the approved changes are implemented, we hope that they will be moderate and judicious. We believe that the Trustees are engaged in trying to narrow the Fund's discount but we are very concerned about increasing portfolio risk and destroying the uniqueness of MIN's investment strategy. We will certainly hold the Trustees' accountable for any net asset under performance that may be attributed to this investment strategy change in the future. As always, I appreciate the Board's time and attention. Feel free to contact me at (585) 586-4680 (ext. 235) or e-mail me at cody@karpus.com.

Sincerely,
