Form 10-KSB

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2006

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-26721

AUSTRALIAN OIL & GAS CORPORATION

(Name of small business issuer in its charter)

Delaware

84-1379164

(State or other jurisdiction of incorporation or organization)

(I.R.S. Employer Identification No.)

2480 North Tolemac Way, Prescott, Arizona

86305

(Address of principal executive offices)

(Zip Code)

Issuer's telephone number (928) 778 1450

Website: www.ausoil.com

Securities registered under Section 12(b) of the Exchange Act: None

Securities registered under Section 12(g) of the Exchange Act:

Title of each class

Name of each exchange on which registered

common stock - \$0.001 par value

None

Check whether the issuer is not required to file pursuant to section 13 or 15(d) of the Exchange Act.

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filings requirements for the past 90 days. Yes No

Check if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-B contained in this form, and no disclosure will be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendment to this Form 10-KSB.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

State issuer's revenues for its most recent fiscal year. \$28,680.

As of December 31, 2006, the market value of the voting and non-voting common equity held by non-affiliates of the registrant was approximately \$1,390,053.

Check whether the issuer has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Exchange Act after the distribution of securities under a plan confirmed by a court. Yes [X] No []

At December 31, 2006, 33,900,531 shares of common stock were outstanding.

Forward Looking Statements

References in this report to "the Company", "we", "us", "AOGC", or "our" are intended to refer to Australian Oil & Gas Corporation. This annual report contains certain statements that may be deemed forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the U.S. Securities Exchange Act of 1934, as amended (Exchange Act). Readers of this annual report are cautioned that such forward-looking statements are not guarantees of future performance and that actual results, developments and business decisions may differ from those envisaged by such forward-looking statements.

All statements, other than statements of historical facts, so included in this annual report that address activities, events or developments that the Company intends, expects, projects, believes or anticipates will or may occur in the future, including, without limitation: statements regarding the Company's business strategy, plans and objectives and statements expressing beliefs and expectations regarding the ability of the Company to successfully raise the additional capital necessary to meet its obligations, the ability of the Company to secure the permits, licences and leases necessary to facilitate anticipated drilling activities and the ability of the Company to attract additional working interest owners to participate in the exploration and development of oil and gas reserves, are forward-looking statements within the meaning of the Securities Act and the Exchange Act. These forward-looking statements are and will be based on management's then-current views and assumptions regarding future events.

PART I

ITEM 1. DESCRIPTION OF BUSINESS

Business Development

Australian Oil & Gas Corporation, a Delaware corporation formed on 6th August 2003, is an energy company that explores for natural gas, crude oil and natural gas liquids. Exploration interests are focused in offshore Western Australia and offshore Northern Territory of Australia. Our common stock, par value \$0.001 per share, has been traded on the OTC BB since 2003. Through our website www.ausoil.com you can access electronic copies of AOGC's corporate governance (including our Code of Conduct) and documents that AOGC files with Securities and Exchange Commission (SEC), including our annual reports on Form 10-KSB, quarterly reports on Form 10-QSB, and current reports on Form 8-K, as well as any amendments to these reports. Included in our annual and quarterly reports are the certifications of our chief executive officer and our chief financial officer that are required by applicable laws and regulations. Access to these electronic filings is available as soon as practical after filing with the SEC.

We hold interests in many of our properties through our 100% owned subsidiaries; Alpha Oil & Natural Gas Pty Ltd, Nations Natural Gas Pty Ltd,

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Gascorp, Inc and Nations LNG, Inc. Properties referred to in this document may be held by those subsidiaries. We treat all operations as one line of business.

AOGC's goal is to grow a profitable oil and gas company for the long-term benefit of our shareholders. Our strategy is to build a portfolio of core exploration acreage which provide growth opportunities through grass-roots exploration activity, including the acquisition of seismic surveys and subsequent drilling.

2

When acquisition opportunities are identified, small operational and technical teams participate in the evaluation process, enabling our Company to move quickly to execute exploration strategies. Over time we plan to build a team that will have the technical knowledge and sense of urgency to maximize value. Our local knowledge of Australian producing basins and our proactive culture provide a potential platform for growth through our strategy of acreage acquisition, prospect development and farmout. An integral part of our plan is to actively evaluate our assets to determine whether farmout or sales of these assets might provide opportunities to reduce commitments, to spread risk and to redeploy our capital resources, so as to constantly rebalance our portfolio and generate new prospects.

We regard Australia as an immature oil and gas country, with particular prospectivity for natural gas, so that our exploration strategy provides the potential exposure to larger gas/liquids targets which may ultimately establish significant production and reserves through successful drilling. Our technological experts are encouraged to develop strategies for rapid and cost-effective acquisition, processing and interpretation of seismic data, enabling our technical teams to analyse large swaths of acreage, to acquire new seismic data and to generate drilling prospects.

Industry experts project declines in natural gas production from traditional sources and significant increases in U.S. and Asian natural gas demand over the next 20 years. Experts expect that LNG sourced natural gas will provide a significantly larger share of the natural gas market. We target potential natural gas supply sources suitable for LNG processing and export, subject to successful exploration and exploiting of our exploration acreage.

We believe that we are now well positioned to pursue these oil and natural gas exploration objectives for the following:

- o Our success in acquiring gas prospective acreage is expected to provide opportunities to farmout and joint venture with other established oil and gas companies as well as the possibility to joint venture with them in additional exploratory prospects;
- o We possess a significant exploration acreage portfolio in the Browse Basin and Bonaparte Basin region offshore Australia (see "Oil and Gas Interests and Description of Property" below); o We are intent on building a broad-based team with significant experience in the use of structural geology, augmented by 3D seismic technology, and in drilling prospects.
- o We own or have rights to an extensive seismic database, including 6,500 km² of new 2D seismic and some 3,500 km² of 3D seismic data, on substantially all of our acreage;
- o We are conducting intensive evaluations of our acreage and are in the process of identifying exploration prospects, some of which are high-risk, high-potential, gas prospects.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

We have focused on the Bonaparte Basin and Browse Basin region because:

- o We have developed significant expertise and have an extensive database of information about the geology and geophysics of this region;

3

- o We believe there are significant reserves in this region that have not yet been discovered; and
- o The construction of infrastructure for efficiently developing, producing, transporting and processing natural gas has been initiated in the region.

Description of Business

The Company seeks oil and gas exploration opportunities in offshore waters within the territorial boundaries of Australia. Once acquired, our strategy is to carry out preliminary geological assessments, including the acquisition of pre-existing data, the formulation and undertaking of appropriate seismic programs and ultimately the drilling of wells to determining whether any viable resource may exist.

To gain control of offshore exploration areas in Australia, a Petroleum Exploration Permit ("Permit") must be granted by the Designated Authority, acting pursuant to the Petroleum (Submerged Lands) Act of the Commonwealth of Australia ("the Act"). A Permit provides rights to the holder to undertake exploration, including seismic surveys and drilling, in the defined area of a Permit. A Permit is granted for an initial six year period. Under the terms of a Permit, the exploration work program nominated for the first three years must be met. The Permit holder may withdraw from the Permit after the third permit year, or at the end of any subsequent Permit year, provided that all the exploration work obligations up to the date of withdrawal have been met.

It should be noted that (provided all work commitments are carried out) Australian petroleum exploration permits may be renewed for two further 5-year terms, upon relinquishment of 50% of the area of a permit at the end of the first 6-year term, and again at the end of the second 5-year permit term. Any Retention Lease or Production License is excluded from the calculation of the area to be relinquished. Permits therefore, have a potential 16-year life, subject to these requirements.

The holder of a Permit may not construct any installation in the Permit or abandon, suspend or complete any well without the written approval of the Designated Authority. A Permit requires the holder to comply with the Act, the regulations and all directions made there under and to carry out operations with adequate measures for the protection of the environment and to carry insurance as directed by the Designated Authority. A Permit incurs a modest yearly rental figure.

A Permit is granted by the Designated Authority following a competitive tender program, based on the best work program offered. The experience of the directors and the technical and financial resources of the applicant is taken into consideration before a decision is made. The Company considers that it satisfies the Designated Authority's requirements and believes that in the future it will be able to secure acreage. We have already acquired interests in a number of Permits (See Item 2 - Description of Property). Our President, Mr. Ernest Geoffrey Albers, has a track record in successfully bidding for exploration permits, and of subsequently progressing through farmout and exploration with major international companies.

For the most part, major companies have dominated the offshore exploration industry in Australia. More recently, new and independent international operators have become increasingly active. The Company is encouraged by this increased activity and by the diversity of geological concepts being developed.

Increasing availability of sophisticated off-the-shelf technologies from service companies and of expert technical advice from consultants, all aided by the latest computing power, allow companies such as ours to make a fully-fledged entry into this environment. There is a worldwide pool of rig operators, seismic service companies and technical consultants upon which we can draw for products and specialist expertise, allowing us to participate and meet our goals at the highest level.

A significant element of our strategy includes the acquisition and control of strategic areas which have potential to be farmed-out/or developed in conjunction with major industry players: it being recognised that the Company lacks the resources to fully explore and develop areas on its own behalf. The funding of our programs by others in return for a percentage interest in our exploration permits is a vital part of our strategy and not only spreads risk but, importantly, conserves our capital.

As a development stage enterprise, the Company has relied and continues to rely on infusions of cash for working capital purposes through the advances of Great Missenden Holdings Pty Ltd, an affiliated company associated with our President, Mr.E.G. Albers. When we require further funds for our programs, it is our intention that the additional funds would be raised in a manner deemed most expedient by the Board of Directors at the time, taking into account budgets, interest of industry in co-participation in our programs and share market conditions. It is our intention to meet our funding obligations by either partial sale of our interests or farm-out, the latter course of action being a vital part of managements overall strategy. It is also part of our plan that funds could be raised by further issues of stock. Should funds be required for appraisal or development purposes we would, in addition, look to project loan finance.

Oil and Gas Interests

On July 6, 2004, our wholly owned subsidiary, Gascorp, Inc (Gascorp), with other affiliated joint venturers, was granted by the Australian Government, a petroleum exploration permit, AC/P33, for an initial 6-year term, effective from June 25, 2004. In order to resolve and simplify potential administrative complications, the interest held by Gascorp, Inc has been transferred to our 100% owned Australian incorporated subsidiary, Alpha Oil & Natural Gas Pty Ltd (Alpha). Prior to the transfer, Gascorp agreed to farmout 5% of its 20% interest in the permit to National Gas Australia Pty Ltd (NGA) (leaving Gascorp with a 15% net interest, in return for NGA agreeing to incur the cost of the Oliver seismic survey of some 124 km²). Currently, Alpha holds a 15% interest in the permit, in joint venture with its affiliates; National Gas Australia Pty Ltd (25%) Natural Gas Corporation Pty Ltd (30%) and Auralandia N.L. (30%), the designated Operator.

On April 12, 2006, we completed the acquisition of Alpha. The acquisition of Alpha, entered into on July 1, 2004, was made in order to acquire a 20% interest in the Browse Joint Venture, being permits, WA-332-P, WA-333-P, WA-341-P and WA-342-P. After we entered into this agreement to acquire Alpha, and prior to the agreement between being finalized, Alpha (with the approval of AOGC) sold its 20% interest in WA-341-P for an amount in excess of book value.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

The settlement funds have been received by Alpha and, since April 12 2006 have been incorporated in funds available to AOGC through its wholly owned subsidiary, Alpha.

5

On April 12, 2006, we completed of the acquisition of Nations Natural Gas Pty Ltd (Nations). The acquisition of Nations, entered into on September 10, 2004, was made in order to acquire a 30% interest in the four permits of the National Gas Consortium, being permits, NT/P62, NT/P63, NT/P64 and NT/P65 ("Timor Sea Permits"), located in the Australian sector of the Timor Sea, offshore from the Northern Territory. Nations has subsequently agreed to farmout 6% of its 30% interest in the Timor Sea Permits to National Gas Australia Pty Ltd (NGA) (leaving Nations with a net 24% interest) in return for the funding of Nations 30% share of each of the now completed Sunshine and Kurrajong 2D seismic surveys of approximately 4,200 line km in aggregate.

On October 13, 2005, the Designated Authority granted to AOGC a petroleum exploration permit NT/P70, an offshore area adjacent to the Northern Territory of Australia for an initial 6-year term, effective from October 10, 2005. AOGC subsequently agreed to farmout 20% of its 100% interest in NT/P70 to NGA in return for the seismic operations carried out and funded by NGA in relation to the 795 km Crocodile 2D seismic survey which has been acquired in the NT/P70 permit.

On October 18, 2005, the Designated Authority for the offshore area adjacent to the Territory of Ashmore and Cartier Islands (an Australian Territory), granted our wholly owned subsidiary, Gascorp Inc., together with its affiliated joint venturers, NGC and Auralandia, petroleum exploration permit AC/P35. In order to resolve and simplify potential administrative complications, the interest held by Gascorp, Inc was transferred to our 100% owned Australian incorporated subsidiary, Alpha. Following farmout of obligations, Alpha now holds a 15% interest in the permit, in joint venture with its affiliates; National Gas Australia Pty Ltd (25%), Natural Gas Corporation Pty Ltd (30%) and Auralandia N.L. (30%), the designated Operator.

On April 7, 2006, the Designated Authority the Territory of Ashmore and Cartier Islands, granted our wholly owned subsidiary, Gascorp Inc., together with its affiliated joint venturers, NGC and Auralandia, petroleum exploration permit AC/P39. In order to resolve and simplify potential administrative complication, the interest held by Gascorp, Inc was transferred to our 100% owned Australian incorporated subsidiary, Alpha. Following farmout of obligations, Alpha holds a 15% interest in the permit, in joint venture with its affiliates; National Gas Australia Pty Ltd (25%), Natural Gas Corporation Pty Ltd (30%) and Auralandia N.L. (30%), the designated Operator.

On August 8, 2006, our wholly owned subsidiary, Nations Natural Gas Pty Ltd (Nations), together with its affiliated joint venturers, National Gas Australia Pty Ltd and Australian Natural Gas Pty Ltd, was granted petroleum exploration permits NT/P71 and NT/P72 for an initial 6-year term. Nations now holds a 24% interest in the permits following the farmout of 6% of its interest to NGA in return for the funding of Nations 30% share of the completed 3,291 km Kurrajong 2D survey. The new permits are held by the National Gas Consortium, which holds the contiguous NT/P62, NT/P63 and NT/P64 permits.

6

Subsequent to the date of this report, on March 27, 2007, we were advised of the grant to our wholly owned subsidiary, Alpha Oil & Natural Gas Pty Ltd, of

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

petroleum exploration permit NT/P73 for an initial 6-year term. Alpha holds a 100% interest in the permit, subject to an overriding royalty interest of 1% in favour of third parties. NT/P73 is adjacent to NT/P70.

See Item 2 "Description of Properties" of this report for more information concerning our intentions and activities with respect to our oil and gas interests.

Reserve Estimates

The Company has no oil and gas reserves at the present time.

Production

The Company has had no oil and gas production to date.

Productive Wells and Acreage

The Company has no productive wells or productive acreage at the present time.

Underdeveloped Acreage

See Item 2 "Description of Properties".

Drilling Activity

We have no immediate plans to engage in any exploratory oil or gas drilling. However, should we and our joint venturers be sufficiently encouraged by the results of our seismic and other work to date, and if additional financing can be obtained, we may engage in well drilling, depending upon the cost of the well drilling, the terms of any participation, joint venture or similar arrangements, which may influence the funding of such drilling.

Current Activities and Plans

Our current activities relate solely to our intention to become an active participant in oil and gas exploration in the offshore areas of Australia, as described above. (See also Item 2 - "Description of Properties").

Competitive Factors

The acquisition of oil and gas interests is highly competitive. We anticipate that we will continue to encounter strong competition from many established companies with greater financial, personnel and informational resources. Competition from such companies, together with rising prices of oil and gas, may escalate the cost of acquiring properties beyond the range of prices we can afford. Even if valuable oil and gas deposits are discovered on our properties, their marketability will depend on numerous factors, including available equipment and personnel for which there is strong demand, and other competing supplies of oil and gas.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Environmental Compliance and Risk

Since the Company is engaged in the natural resources industry, environmental regulation has a significant impact upon our operations and may necessitate significant capital outlays, which, in turn, may materially affect the earning power of the Company. Certain operations in the exploratory and production phase of oil and gas exploration are potentially hazardous to the environment. Exploratory drilling in natural areas are sources of significant environmental regulation; and reclamation requirements, must be satisfied. Further, if recovery methods are utilized which involve the construction of a plant or similar hardware to implement the recovery system, the environmental impact of such a system must be disclosed in an Environmental Impact Statement; and compliance could adversely affect future operations and revenues. Although we do not have immediate plans to be the operator on any oil and gas drilling operations, others who may drill and operate such properties will face possible environmental regulations, which could affect our liabilities. Should we operate, then we would directly be responsible for environmental and project management, and liability in the event of mishap.

Employees

As of December 31, 2006, we employed four persons, namely the three directors, and one other person, each on a part time basis. Additionally, we retain consultant geologists and other geo-scientists on a contract or fee basis, as and when their services are required.

ITEM 2. DESCRIPTION OF PROPERTY

Our U.S. office, located at 2480 North Tolemac Way, Prescott, Arizona, has nominal square footage and the rent is no more than a nominal amount per month. We also have the use of more extensive premises in Australia at Level 25, 500 Collins Street, Melbourne, Victoria, Australia from which our Australian subsidiaries carry on business. The Australian office space is taken on a non-exclusive basis, with no rent payable, but the usage of the premises is included in the charges Setright Oil & Gas Pty Ltd., (an affiliate of the Company by virtue of common management, ownership and control) makes in respect to the administration of the Company.

Following implementation of our acquisition strategy we now hold interests in 14 Petroleum Exploration Permits granted by the Commonwealth of Australia. With one exception, they are held in joint venture with other parties.

Vulcan Joint Venture

Our wholly owned subsidiary, Alpha Oil & Natural Gas Pty Ltd, following farmout of seismic commitments to NGA, (see below) now holds a 15% interest in the permits, AC/P33, AC/P35 and AC/P39 in joint venture with its affiliates; NGA (25%), Natural Gas Corporation Pty Ltd (NGC) (30%) and Auralandia N.L. (Auralandia) (30%), the designated Operator. The permits are within the territory of Ashmore and Cartier Islands, an Australian offshore territory.

Geologically, AC/P33, AC/P35 and AC/P39 are located on the eastern margin of the Vulcan Sub-basin; one of a number of proven petroliferous sub-basins which together comprise the North West Shelf hydrocarbon province of Australia.

AC/P33 (granted July 6, 2004) includes the undeveloped Oliver oil and gas accumulation, drilled by the now plugged and abandoned Oliver-1 well. AC/P33

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

comprises five graticular blocks, totaling approximately 400 km² (98,800 acres). In the first three years of the initial 6-year term of permit AC/P33, the joint venture participants have obtained a range of existing reports and open file seismic data and have mapped, interpreted and revised analyses and concepts for the area. The joint venture has carried out enhancement of existing seismic data around the Oliver feature, and has examined various techniques for the potential use to provide direct hydrocarbon indicators. As a result of the farmout to NGA, the joint venture has acquired 124 km² (acres) of new high quality enhanced parameter 3D seismic survey, known as the Oliver 3D Seismic Survey. The survey was conducted over the Oliver feature and part of its extension to the east. Should the joint venture so decide, it can elect to enter the second three years of the initial permit and drill one exploration well and perform further interpretational work. Active geological and geophysical evaluation of the permit continues including processing of the Oliver Seismic Survey and reprocessing of part of the immediately adjacent Onnia 3D Seismic Survey in the vicinity of the Oliver-1 well.

AC/P35 (granted October 18, 2005) is located immediately to the north of AC/P33. It comprises 46 graticular blocks, totaling approximately 3,410 km² (842,645 acres). There have been five wells drilled in the area, with two having oil and gas indications, all of which were plugged and abandoned. In the first three years of the initial 6-year term of the AC/P35 permit, we plan to obtain a range of pertinent existing reports and open file seismic data. In the third year, we presently plan to shoot 250 km² of 3D seismic survey. Should we so decide, we can elect to enter the second three years of the initial permit term and drill one exploration well and perform further interpretational work. Geological evaluation of the permit is continuing, including the reprocessing of approximately 1,750 km² of previously acquired 3D seismic over AC/P35.

AC/P39 (granted April 7, 2006) is located 600 km west of Darwin, immediately to the east of AC/P33 and AC/P35. It comprises 11 graticular blocks, totalling approximately 920 km² (2,273 acres). AC/P39 lies within 100 km of existing petroleum production facilities and along the eastern elevated flank of the Vulcan Sub-basin, a broad, deep and proven hydrocarbon-generative basin. There have been five wells drilled in the area, with two having oil and gas indications. In the first three years of the initial 6-year term of the AC/P39 permit, we plan to obtain a range of existing reports and open file seismic data. In the third year, we plan to drill one exploration well. Geological evaluation of the permit is continuing, including the re-processing of approximately 920 km² of previously acquired 3D seismic over AC/P39.

Gascorp, Inc. on May 15, 2006 agreed to farmout 5% of its 20% interest in each of the Vulcan Joint Venture Permits to National Gas Australia Pty Ltd (leaving Gascorp with a 15% interest) in return for the acquisition and funding of Gascorp's 20% share of the new Oliver 3D seismic survey of approximately 124 km² and the funding of the reprocessing of approximately 2,800 km² of existing 3D data. The cost of the Company's share of the Oliver survey has been met entirely by National Gas Australia Pty Ltd.

Browse Joint Venture

On April 12, 2006, we completed the acquisition of Alpha, a transaction entered into in July 1, 2004. The acquisition of Alpha was made in order to acquire a 20% interest in the Browse Joint Venture, being permits, WA-332-P, WA-333-P, WA-341-P and WA-342-P. The shareholders of Alpha on August 29, 2006 have received 2,000,002 shares of common stock in AOGC and were paid AUD\$100,000, (See also Item 12) as follows:

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

VENDOR	NO. OF SHARES IN ALPHA	NO. OF SHARES IN AOGC	\$
Natural Gas Corporation Pty Ltd	100,000	250,000	12,500
Batavia Oil & Gas Pty Ltd	100,000	250,000	12,500
National Oil & Gas Pty Ltd	500,000	1,250,002	62,500
Australis Finance Pty Ltd	100,000	250,000	12,500
	-----	-----	-----
TOTAL	800,000	2,000,002	100,000
	=====	=====	=====

Following the entering into of the transaction on July 1, 2004, but prior to the agreement between being finalized, Alpha (with the approval of AOGC) sold its 20% interest in WA-341-P to a third party for an amount in excess of book value. The settlement funds were received by Alpha and since April 12, 2006, have been incorporated in funds available to AOGC, through its new wholly owned subsidiary, Alpha.

The now remaining Permits of the Browse Joint Venture WA-332-P, WA-333-P and WA-342P are contiguous and are located in the offshore Browse Basin, a part of the North West Shelf of Australia. They cover a total area of 9,460 km² (2,336,620 acres).

The Browse Basin region is a proven major hydrocarbon area and it forms a part of the extensive series of continental margin sedimentary basins that, together, comprise the North West Shelf hydrocarbon province of Australia. The Browse Basin has been host to a series of major gas, gas condensate and oil discoveries which began with the 1971 discovery at Scott Reef-1. The Browse Basin is currently the focus for two proposals to establish new LNG export facilities; one by Woodside Energy Ltd in relation to the Scott Reef/Brecknock complex and the other by Inpex Corporation in relation to the Ichthys complex. The Browse Joint Venture permits are presently lightly explored. There is one well on the boundary of WA-332-P (Prudhoe-1), one well in WA-333-P (Rob Roy-1), and a total of fourteen wells in WA-342-P, mostly associated with the undeveloped Cornea oil and gas accumulation.

During the year the Browse Joint Venture completed the shooting of the Braveheart seismic survey of approximately 1,949 line km of new 2D seismic survey over these Browse Joint venture permits

In the first three year term of the Permits, the Browse Joint Venture committed to obtain available open file reports and basic 2D and 3D seismic data acquired by earlier efforts of previous explorers. This included approximately 1,100 km² of high quality 3D seismic known as the Cornea 3D survey which is held by the Browse Joint Venture. Approximately 1,000 km² of this 3D data set is being reprocessed. The data sets will be integrated with the acquisition and processing of the recent 1949 line km Braveheart 2D seismic survey to infill the existing grid of data, with lead specific coverage. Should the Browse Joint Venture so decide, it can elect to enter a second three year permit term and in which it has indicated it will drill one well in each permit. Active geological and geophysical evaluation of all of the Browse Joint Venture Permits is continuing, with special studies having been carried out in respect to the undeveloped Cornea oil and gas accumulation.

National Gas Consortium

On April 12, 2006, we completed of the acquisition of Nations Natural Gas Pty Ltd (Nations). The acquisition of Nations was entered into on September 10,

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

2004 and made in order to acquire an interest in the initial four permits of the National Gas Consortium, being permits, NT/P62, NT/P63, NT/P64 and NT/P65 ("Timor Sea Permits"), located in the Australian sector of the Timor Sea, offshore from the Northern Territory. The shareholders of Nations on August 29, 2006 have received 2,100,001 shares of common stock in AOGC and AUD\$50,000 as consideration for Nations (See Item 12) as follows:

Vendors of Nations and Allocation of Consideration

VENDOR	NO. OF SHARES IN ALPHA	NO. OF SHARES IN AOGC	\$
Ernest Geoffrey Albers	300,001	315,001	7,500

	=====	=====	=====

The Timor Sea covers a huge area underlain by sedimentary basins with potential for new hydrocarbon discoveries. The region has a long history of exploration activity and discovery and has now become the focus for domestic and international petroleum exploration and development activities. There have been numerous oil and wet gas discoveries to the north west in the region of the permits, including the Laminaria, Corallina and Bayu-Undan fields. The giant gas fields of Greater Sunrise, Evans Shoal, Caldita and Barossa are to the north and east of the permits.

On August 8, 2006, our wholly owned subsidiary, Nations, together with the other joint venturers in the National Gas Consortium were granted petroleum exploration permits NT/P71 and NT/P72 for an initial 6-year term. Nations now hold a net 24% interest in these permits, following the farmout of seismic commitments (see below). The new permits, which are located in the Australian sector of the Timor Sea, are held by the National Gas Consortium, which holds the contiguous NT/P62, NT/P63 and NT/P64 permits to the immediate west.

The new Permits cover a total area of approximately 17,380 km² (4,294,772 acres). The National Gas Consortium now holds six permits aggregating approximately 32,255 km² (7,970,533 acres) including the new permits NT/P71 and NT/P72 and the four permits already held, namely, NT/P62, NT/P63, NT/P64 and NT/P65.

The Timor Sea is a major emerging province, with a developing emphasis in gas processing for the export market. Discoveries made over the past few years are expected to lead to the area providing substantial gas production and revenue, through value-added gas projects covering a wide spectrum of gas to liquids processes and technologies.

11

The Company on June 15, 2006, agreed to farmout 6% of its 30% interest in each of the Timor Sea Permits to National Gas Australia Pty Ltd (leaving Nations with a net 24% interest) in return for the acquisition and funding of Nations 30% share of the new Sunshine and Kurrajong 2D seismic survey of approximately 4,200 km. The cost of the Company's share of the Sunshine and Kurrajong surveys has been met entirely by National Gas Australia Pty Ltd.

Eastern Bonaparte Basin

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

NT/P70 Joint Venture

On October 10, 2005, the Australian Government granted a petroleum exploration permit, NT/P70, for an initial 6-year term. The Company initially held a 100% interest in the permit and now holds an 80% interest as the result of farmout (see below).

NT/P70 covers an area of 7,370 km² (1,821,200 acres) and is located in the eastern Timor Sea, about 300 km north of Darwin, and 250 km northeast of the proposed Darwin to Bayu-Undan gas pipeline. The Greater Sunrise, Evans Shoal, Barossa and Caldita gas accumulations are located to the west and southwest of the NT/P70 permit area.

AOGC agreed on June 15, 2006, to farmout 20% of its 100% interest in NT/P70 to National Gas Australia Pty Ltd in return for the acquisition and funding by NGA of the new 800 line km Crocodile 2D seismic survey, subsequently acquired in the NT/P70 permit.

The permit has been designated as a "frontier area" by the Australian Government attracting an exploration incentive which allows immediate uplift to 150% tax deductibility on Australian Petroleum Resource Rent Tax ("PRRT") which is only payable provided certain levels of return from production are achieved.

We have obtained a range of pertinent existing reports and open file seismic data and, with this data, have mapped, interpreted and revised analyses and concepts for the area. We presently plan to shoot 300 km² of 3D seismic survey, following interpretation of the 800 line km Crocodile 2D seismic survey acquired during the year. Should we so decide, we can elect to enter the second three years of the initial permit term and drill one exploration well and perform further interpretational work. There have been no wells drilled in the permit.

NT/P73

On March 27, 2007, the Australian Government granted to our subsidiary, Alpha, a petroleum exploration permit, NT/P73, for an initial 6-year term. The Company holds a 100% interest in the permit. NT/P73 is located to the immediate south west of NT/P70 and covers an area of 6,815 km² (1,683,300 acres). The Barossa and Caldita gas accumulations are located to the west of the NT/P73 permit area.

In the first three years of the initial 6-year term of the NT/P73 permit we plan to obtain existing reports and open file seismic data and, with this data, to map, interpret and revise analyses and concepts for the area. We presently plan to shoot 2,000 line km of 2D in the third year of the permit. Should we so decide, we can elect to enter the second three years of the initial permit term and drill one exploration well and perform further interpretational work. There have been no wells drilled in the permit area.

12

ITEM 3. LEGAL PROCEEDINGS

None

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

The initial Annual Meeting of Stockholders was held on July 28, 2006. Since certain members of the Board of Directors owned an aggregate of more than 50% of the outstanding voting shares of the Company, a quorum was available for the

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

meeting without the Company incurring the expense of soliciting proxies. Stockholders holding an aggregate of 16,000,000 shares attended the meeting. E. Geoffrey Albers, William Ray Hill and Mark Anthony Muzzin were elected as the three members of the Board of Directors, each to hold office until the next annual meeting of stockholders and until their successors are elected and qualified. The vote for each director nominee was 16,000,000 shares in favour, no shares against and no shares abstaining. No other actions were brought before the Meeting.

PART II

ITEM 5. MARKET FOR COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND SMALL BUSINESS ISSUER PURCHASERS OF EQUITY SECURITIES

Market Information

Our common stock is not traded on an exchange but is quoted on the OTC Bulletin Board under the trading symbol "AOGC." The prices set forth below reflect the quarterly high and low bid prices for shares of common stock for the past two years. These quotations reflect inter-dealer prices, without retail markup, markdown or commission, and may not represent actual transactions.

Period	High Sale or Bid	Low Sale or Bid
1st Quarter 2005	\$0.20	\$0.05
2nd Quarter 2005	\$0.11	\$0.07
3rd Quarter 2005	\$0.18	\$0.09
4th Quarter 2005	\$0.20	\$0.08
1st Quarter 2006	\$0.16	\$0.08
2nd Quarter 2006	\$0.18	\$0.10
3rd Quarter 2006	\$0.17	\$0.10
4th Quarter 2006	\$0.13	\$0.10

As at December 31, 2006, there were 4 market makers in our common stock.

As at December 31, 2006, there were approximately 212 holders of record of our common stock.

The Company has not paid any cash dividends on its common stock and does not anticipate paying cash dividends in the foreseeable future. We intend to retain any earnings to finance the growth of the business. There can be no assurance that we will ever pay cash dividends.

13

Recent Sales of Unregistered Securities

During the past three years, without registering the securities under the Securities Act of 1933, the Company has issued following securities:

On December 22, 2005, 2,500,000 shares of Common Stock were issued to Mr EG Albers under the terms of his employment contract pursuant to Section 4(2) of the Securities Act, filed as an exhibit to the 2005 Form 10-KSB.

On April 12, 2006, 2,000,002 shares of Common Stock were issued to acquire all the remaining shares of Alpha Oil & Natural Gas Pty Ltd pursuant to Regulation S under the Securities Act, as described below. The recipients of such shares were:

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Vendors of Alpha and Allocation of Consideration

	=====	=====	=====

On January 31, 2007, 2,000,000 shares of common stock were issued to Mr EG Albers under the terms of his employment contract pursuant to Section 4(2) of the Securities Act, filed as Exhibit 10.7 to this 2006 Form 10-KSB.

On April 12, 2006, the Company completed the acquisitions of each of Nations Natural Gas Pty Ltd (Nations) and Alpha Oil & Natural Gas Pty Ltd (Alpha), both companies incorporated in Australia. A director of AOGC, Mr. EG Albers, is a director and or shareholder of each of the vendors of shares in Nations and Alpha. The acquisitions were entered into on September 10, 2004 and July 1, 2004, respectively.

The purchase of Nations was made in order to acquire a 30% interest in the four permits of the National Gas Consortium, being permits NT/P62, NT/P63, NT/P64 and NT/P65. The shareholders of Nations have received 2,100,001 shares of common stock in AOGC and have received AUD\$50,000 as consideration for Nations.

The purchase of Alpha was made in order to acquire a 20% interest in the Browse Joint Venture, being permits, WA-332-P, WA-333-P, WA-341-P and WA-342-P. The shareholders of Alpha have received 2,000,002 shares of common stock in AOGC and the payment of AUD\$100,000. Prior to the agreement being finalised, Alpha (with the approval of AOGC) sold its 20% interest in WA-341-P to a third party for an amount substantially in excess of book value. The settlement funds have been received by Alpha and are incorporated in settlement funds available to AOGC through its new wholly owned subsidiary, Alpha.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

All acquirers of the above unregistered securities confirmed to AOGC by representation and warranty that they understood that the Shares to be issued to them had not been, and would not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), or under any U.S. state securities laws, and that they were being issued pursuant to a "safe harbor" exemption from registration contained in Regulation S promulgated under the Securities Act based, in part, upon the representations and warranties of each recipient.

Each recipient also represented and warranted that it had such knowledge and experience in financial and business matters that it was capable of evaluating the merits and risks of an investment in the Purchaser, and was an "Accredited Investor" as defined in Regulation D promulgated under the Securities Act and each recipient represented and warranted that it was not a "U.S. Person" (as that term is defined in Rule 902 of Regulation S under the Securities Act); and was not acquiring the Shares for the account or benefit of any U.S. Person and has not pre-arranged any resale of any of the Shares with any buyer located in the United States or otherwise with a U.S. Person; and had not offered the Shares in the United States, and at all material times the recipients were located outside the United States.

Furthermore, the stock certificate delivered by the Company to each recipient was imprinted with a legend in the following form:

"The shares represented by this certificate have not been registered under the Securities Act of 1933, as amended (the "Securities Act") and have been issued pursuant to an exemption from registration under Regulation S promulgated under the Securities Act. Such shares are "restricted securities" as defined in Rule 144 promulgated under the Securities Act and may not be offered for sale, sold, delivered after sale, transferred, pledged, or hypothecated except: (i) in accordance with the provisions of Regulation S under the Securities Act; (ii) pursuant to registration under the securities Act; or (iii) pursuant to an opinion of counsel reasonable satisfactory to Australian Oil & Gas Corporation that such shares may be transferred without registration under the Securities Act. Hedging transactions involving the shares represented by this certificate may not be conducted unless in compliance with the Securities Act."

The recipients agreed, inter alia, that AOGC may refuse to register any transfer of the shares that is not made in accordance with the provisions of Regulation S, pursuant to registration under the Securities Act, or pursuant to an available exemption from registration under the Securities Act.

15

It was said that each recipient may make, or cause to be made, any resales of the Shares pursuant to one of the following methods:

(i) "offshore transactions" (as such term is defined in Regulation S) pursuant to the resale safe harbor of Rule 904 of Regulation S adopted under the Securities Act;

(ii) Rule 144 promulgated under the Securities Act; or

(iii) any other available exemption under the Securities Act; provided that the Company shall first furnish the recipient with a written opinion reasonably satisfactory to the Company in form and substance from counsel reasonably satisfactory to the Company by reason of experience to the effect that the recipient may transfer such shares as desired without registration under the Securities Act (each such resale described (i)-(iv), a "Permitted Resale" and collectively, the "Permitted Resales"). Any such Permitted Resales shall be made in offshore transactions or in transactions in the United States on the Over-the

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Counter Bulletin Board (OTC-BB) or otherwise."

Share Repurchase Program

The Company does not maintain any stock repurchase program involving purchases of the Company's common stock by or on behalf of the Company that would require disclosure under Item 703 of the Regulation S-B.

ITEM 6. PLAN OF OPERATION

RISK FACTORS

The business operations of the Company are subject to risks, which may impact adversely on its future performance. These risks may adversely affect the value of our assets and this may affect the value of our common stock.

The following are some of the important factors that could affect our financial performance or could cause actual results to differ materially from estimates contained in our forward-looking statements. The important factors are not exclusive.

Our future performance is difficult to evaluate because we have a limited operating history and do not own or have development plans for any oil or natural gas properties.

We began operations in August 2003 and have a limited operating and financial history. As a result, there is little historical financial and operating information available to help you evaluate our performance or an investment in our common stock.

Potential conflicts of interest may cause us to enter into less favorable agreements than we might have obtained from third parties.

16

Some of our directors are also directors or executive officers of other oil and natural gas companies, which may from time to time compete with us for farm-ins, working interest partners, or property acquisitions. We also may seek to negotiate farm-in agreements or working interest agreements with companies whose boards of directors include individuals who are directors or executive officers of our company. Under Delaware law, a director that has an interest in a contract or proposed contract or agreement shall disclose his interest in such contract or agreement and shall refrain from voting on any matter in respect of such contract or agreement. Nevertheless, we may enter into agreements with such other companies that are not as favorable as that which we might have obtained from unrelated third parties.

We will require additional equity capital or debt financings in the future, which may not be available, or may only be available on unfavorable terms.

Our future capital requirements depend on many factors, including the prospectivity of our exploration property and our profitability. To the extent that available funds are insufficient to fund operating and capital requirements, we will need to fund our exploration commitments by farmout or sale of interests or by raising additional funds through debt financing or curtail our growth and reduce our exploration activities. Any farmout or sale activity or any equity or debt financing, if available at all, may be on terms that are not favorable to us. In the case of farmout, sale or equity financings, dilution to our stockholders could result, and in any case such securities may

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

have rights, preferences and privileges that are senior to existing shares. If we cannot obtain adequate capital on favorable terms or at all, our business, operating results and financial condition could be adversely affected.

Estimates of future cash flows may prove to be inaccurate, resulting in a reduction of our working capital.

Estimates of future net cash flows from oil and gas interests we may wish to develop, prepared by independent consultants, will be based upon estimates by independent engineers of oil and natural gas reserves and the percentage of those reserves which can be recovered and produced with current technology. These estimates will include assumptions as to the prices received for the sale of oil and natural gas. Any one or all of those estimates may be inaccurate, which could materially affect resulting future net cash flows and working capital.

We depend on our executive officers for critical management decisions and industry contacts but have no key person insurance with these individuals.

We are dependent upon the continued services of our executive officers, in particular, our President, Mr.E. Geoffrey Albers. While we do have an employment contract with Mr.E. Geoffrey Albers, we do not carry key person insurance on his life. The loss of the services of any of our executive officers, through incapacity or otherwise, could have a material adverse effect on our business and would require us to seek and retain other qualified personnel.

Exploring for and producing oil and natural gas are high risk activities with many uncertainties that could adversely affect our business, financial condition or results of operations.

17

Oil and natural gas exploration activities are subject to numerous risks beyond our control, including the risk that drilling will not result in commercially viable oil or natural gas reserves. Our decisions to explore, assess, appraise or develop or otherwise exploit prospects or properties will depend in part on the evaluation of data obtained through geophysical and geological analyses, seismic and other data and engineering studies, the results of which are often inconclusive or subject to varying interpretations. Assessment of prospectivity and reserve estimates depend on many assumptions that may turn out to be inaccurate. Our cost of drilling, completing and operating wells will be uncertain until drilling concludes. Overruns in budgeted expenditures are common risks that can make a particular project uneconomical. Further, many factors may curtail, delay or cancel drilling, including the following:

- o delays imposed by or resulting from compliance with regulatory requirements;
- o pressure or irregularities in geological formations;
- o equipment failures or accidents;
- o adverse weather conditions;
- o reductions in oil and natural gas prices;
- o title problems; and
- o limitations in the market for oil and natural gas.

We may incur substantial losses and be subject to substantial liability claims as a result of oil and natural gas exploration activities.

We are not insured against risks. Losses and liabilities arising from uninsured and underinsured events could materially and adversely affect our business, financial condition or results of operations. Our oil and natural gas

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

exploration activities are subject to all of the operating risks associated with exploring for oil and natural gas, including the possibility of:

- o environmental hazards, such as uncontrollable spills or flows of oil, natural gas, brine, well fluids, toxic gas or other pollution into the environment, including groundwater and shoreline contamination;
- o abnormally pressured formations;
- o mechanical difficulties, such as stuck oilfield drilling and service tools and casing collapse;
- o fires and explosions;
- o personal injuries and death; and o natural disasters.

Any of these risks could adversely affect our ability to operate or result in substantial losses to our company. We may elect not to obtain insurance if we believe that the cost of available insurance is excessive relative to the risks presented. In addition, pollution and environmental risks generally are not fully insurable. If a significant accident or other event occurs and is not fully covered by insurance, then it could adversely affect us.

Market conditions or operational impediments may hinder our access to oil and natural gas markets or delay any production.

Market conditions or the unavailability of satisfactory oil and natural gas transportation arrangements may hinder our access to oil and natural gas markets or delay any production. The availability of a ready market for any future oil and natural gas production will depend on a number of factors, including the demand for and supply of oil and natural gas and the proximity of reserves to pipelines and terminal facilities. Our ability to market production (when and if we have production) will depend in substantial part on the availability and capacity of gathering systems, pipelines and processing facilities owned and operated by third parties. Our failure to obtain such services on acceptable terms could materially harm our business. We may be required to shut-in wells for a lack of a market or because of inadequacy or unavailability of natural gas pipeline or gathering system capacity. If that were to occur, then we would be unable to realize revenue from those wells until production arrangements were made to deliver our production to market.

18

We are subject to complex laws that can affect the cost, manner or feasibility of doing business.

Exploration, production and sale of oil and natural gas are subject to extensive Australian laws and regulations, including the Petroleum (Submerged Lands) Act 1967 (Commonwealth of Australia) and all regulations, directions and guidelines made thereunder. We may be required to make large expenditures to comply with our permit obligations and governmental regulations. Matters subject to such obligations and regulation include:

- o permit work program requirements;
- o environmental approvals;
- o seismic work program approvals
- o permits for drilling operations;
- o drilling bonds;
- o development and production approvals;
- o unitization and pooling of properties; and
- o taxation.

Under these laws, we could be liable for personal injuries, property damage and other damages. Failure to comply with these laws may also result in the

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

suspension or termination of our operations and subject us to administrative, civil and criminal penalties. Moreover, these laws could change in ways that substantially increase our costs of doing business. Any such liabilities, penalties, suspensions, terminations or regulatory changes could materially and adversely affect our financial condition and results of operations.

Our operations may incur substantial liabilities to comply with applicable environmental laws and regulations.

Our oil and natural gas operations are subject to stringent Australian laws and regulations relating to the release or disposal of materials into the environment or otherwise relating to environmental protection, both of the environment and of the living things within that environment. These laws and regulations require the acquisition of approvals before seismic acquisition or drilling commences, restrict the types, quantities, and concentration of substances that can be released into the environment in connection with drilling and production activities, limit or prohibit seismic or drilling activities in protected areas, and impose substantial liabilities for pollution resulting from our operations. Failure to comply with these laws and regulations may result in the assessment of administrative, civil, and criminal penalties, incurrence of investigatory or remedial obligations, or the imposition of injunctive relief. Changes in environmental laws and regulations occur frequently, and any changes that result in more stringent or costly waste handling, storage, transport, disposal or cleanup requirements could require us to make significant expenditures to maintain compliance, and may otherwise have a material adverse effect on our results of operations, competitive position, or financial condition as well. Under these environmental laws and regulations, we could be held strictly liable for the removal or remediation of previously released materials or property contamination regardless of whether we were responsible for the release of such materials or if our operations were standard in the industry at the time they were performed.

19

Competition in the oil and natural gas industry is intense, which may adversely affect our ability to compete.

We operate in a highly competitive environment for the acquisition and exploration of properties, marketing of oil and natural gas and securing qualified and experienced personnel. Many of our competitors possess and employ financial, technical and personnel resources substantially greater than ours, which can be particularly important in the areas in which we operate. Those companies often are able to pay more for oil and natural gas properties and prospects and to evaluate, bid for and purchase a greater number of properties and prospects than our financial or personnel resources permit. Our ability to acquire additional prospects and to find and develop reserves in the future will depend on our ability to evaluate and select suitable properties, to fund exploration and to consummate transactions in a highly competitive environment. There is substantial competition for capital available for investment in the oil and natural gas industry. We may not be able to compete successfully in the future in acquiring prospective resources, carrying out seismic and drilling activities, developing reserves, marketing hydrocarbons, attracting and retaining personnel and raising capital.

We may depend on industry partners and could be seriously harmed if they do not perform satisfactorily, which is usually not within our control.

Because we have few employees, limited resources and revenues, we will continue to be largely dependent on industry partners, including farmin participants and joint venturers, for the success of our oil and gas exploration

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

projects. We could be seriously harmed if our industry partners do not perform satisfactorily on projects that affect us. It is likely that we will have no control over factors that would influence the performance of our partners.

We are controlled by a small number of principal stockholders who may exercise a proportionately larger influence on the company than its stockholders with smaller holdings.

We are controlled by a small number of principal stockholders who may cause events to occur that are not in the interests of the Company's stockholders with smaller holdings. Our President, Mr.E.Geoffrey Albers, and entities controlled by him, own approximately 58.70% of the outstanding common stock (see Item 11). Accordingly, Mr. Albers has effective control over the election of the Company's directors and significant influence over our management, operations and affairs, including the ability to prevent or cause a change in control of the Company.

Anti-takeover provisions of the certificate of incorporation, bylaws and Delaware law could adversely impact a potential acquisition by third parties that may ultimately be in the financial interests of the company's stockholders.

Our certificate of incorporation, bylaws and the Delaware General Corporation Law contain provisions that may discourage unsolicited takeover proposals. These provisions could have the effect of inhibiting fluctuations in the market price of the Company's shares that could result from actual or potential takeover attempts, preventing changes in its management or limiting the price that investors may be willing to pay for shares of common stock. These provisions, among other things, authorize the board of directors to designate the terms of and to issue new series of preferred stock, to limit the personal liability of directors, and to require the Company to indemnify directors and officers to the fullest extent permitted by applicable law and to impose restrictions on business combinations with some interested parties.

20

The market price of our common stock is highly volatile.

The market price of our common stock has been and is expected to continue to be highly volatile. Prices for our common stock will be influenced by many factors and may fluctuate widely as a result of factors beyond our control. General factors which will bear on the price of our common stock include the depth and liquidity of the market for the common stock, investor perception of us and our financial and technical ability and general economic and market conditions.

Our common stock is traded over the counter, which may deprive shareholders of the full value of their shares.

Our common stock is quoted via the Over Counter Bulletin Board (OTCBB). As such, our common stock may have fewer market makers, lower trading volumes and larger spreads between bid and asked prices than securities listed on an exchange such as the New York Stock Exchange or the NASDAQ Stock Market, LLC. These factors may result in higher price volatility and less market liquidity for the Common Stock.

A low market price may severely limit the potential market for our common stock.

Our common stock is currently trading at a price substantially below \$5.00 per share, subjecting trading in the stock to certain SEC rules requiring additional disclosures by broker-dealers. These rules generally apply to any non-NASDAQ equity security that has a market price of less than \$5.00 per share, subject to certain exceptions (a "penny stock"). Such rules require the

delivery, prior to any penny stock transaction, of a disclosure schedule explaining the penny stock market and the risks associated therewith and impose various sales practice requirements on broker-dealers who sell penny stocks to persons other than established customers and institutional or wealthy investors. For these types of transactions, the broker-dealer must make a special suitability determination for the purchaser and have received the purchaser's written consent to the transaction prior to the sale. The broker-dealer also must disclose the commissions payable to the broker-dealer, current bid and offer quotations for the penny stock and, if the broker-dealer is the sole market maker, the broker-dealer must disclose this fact and the broker-dealer's presumed control over the market. Such information must be provided to the customer orally or in writing before or with the written confirmation of trade sent to the customer. Monthly statements must be sent disclosing recent price information for the penny stock held in the account and information on the limited market in penny stocks. The additional burdens imposed upon broker-dealers by such requirements could discourage broker-dealers from effecting transactions in our common stock.

21

Management's Discussion and Analysis or Plan of Operation

General

Australian Oil & Gas Corporation is an independent energy company focused on exploration and development of oil and natural gas reserves. Our core business is directed at the acquisition of interests in oil and gas prospects in the off-shore areas in Australia's territorial waters. Since August 2003, when current management began operating the company, we have not conducted any substantive revenue generating business operations. Management has identified opportunities in oil and gas exploration in Australia, has acquired permits authorising the exploration for petroleum, has carried out geological and geophysical programs, including the acquisition of seismic data. It has not yet made any decision as to the company's future operations other than as disclosed elsewhere herein.

We rely on the considerable experience in the oil and gas industry of our President, Mr. E.G. Albers and our consultants, to identify and conduct initial geological analyses of properties in which we acquire an interest. We have devoted essentially all of our resources to the identification and acquisition of large - tract oil and gas properties and seek to keep our overhead at a minimum level through the retention of carefully selected consultants, contractors and service companies. We use proven modern technologies to evaluate properties and prospects. Generally, we expect to invest in projects at different percentage levels of participation, with our intention being to spread risk and to reduce the Company's financial commitments through either farmout or sale.

To date, together with certain other affiliated joint venturers, the Australian authorities have awarded us interests in 14 Petroleum Exploration Permits. We now hold a 15% interest in permits ACP/33, ACP/35 and AC/P39. We hold an 80% interest in NT/P70 and a 100% interest in NT/P73. Through the acquisition of Alpha, our 100% owned subsidiary, we now hold a 20% interest in the remaining permits of the Browse Joint Venture, being permits WA-332-P, WA-333-P and WA-342-P. As a result of the acquisition of Nations, our 100% owned subsidiary, we now hold a 24% interest in the permits of the National Gas Consortium, being permits NT/P62, NT/P63, NT/P64, NT/P65, NT/P71 and NT/P72.

Liquidity and Capital Resources

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

The following table reflects our working capital position at December 31, 2006:

Current assets	\$737,326
Current liabilities	\$98,160
Working capital	\$639,166
Current ratio	7.5

To date, in order to fund on-going administration and the cost of acquisition of interests, the Company has largely relied on infusions of cash through the advances of Great Missenden Holdings Pty Ltd, an affiliated company associated with our President, Mr.E.Geoffrey Albers. We have also relied upon farmin from National Gas Australia Pty Ltd (also an affiliated company associated with Mr Albers) by way of farmout to fund a significant proportion of our seismic and associated obligations. When we require further funds, it is our intention that the additional funds would be raised in a manner deemed most expedient by the Board of Directors at the time, taking into account budgets, the interest of industry in co-participation in our programs, stock market and oil and gas market conditions. When additional funds for exploration are required, our strategy to meet our obligations by either partial sale of our interests or farm out, the latter course of action being a vital part of managements overall strategy. We would also look to further issues of stock. Should funds be required for appraisal or development purposes we would, in addition, look to project loan finance.

22

Our cash requirements for the next 12 months to support the operations are currently assessed to be approximately \$380,000. This figure includes office administration of \$80,000, and payments of approximately \$300,000 for exploration with respect to the Permits of the Vulcan Joint Venture, the Permits of the Browse Joint Venture and of the National Gas Consortium and NT/P70 and NT/P73. The Company has sufficient liquid capital to support its operations during the next twelve months. However, if the Company requires further funds, the Company can seek the farmout or sale of permit interests, or further advances from Great Missenden Holdings Pty Ltd ("GMH") or through the sale of additional shares of our common stock.

As the Company's capital resources are limited, the board has accepted a proposal and agreed to remunerate Mr.E.Geoffrey Albers by the issue of common stock in lieu of cash payments for his services. On January 31, 2007, the Company issued 2,000,000 shares of common stock to Mr.E. Geoffrey Albers for his services in relation for the period January 1, 2006, to December 31, 2006. We intend to issue a further 1,500,000 shares of common stock to Mr Albers for his services for the period from January 1, 2007 to December 31, 2007.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements as defined in Item 303(c) of Regulation S-B and it is not anticipated that the Company will enter into any off-balance sheet arrangements.

Critical Accounting Policies

Management has identified the accounting policies described below as critical to our business operations and the understanding of the results of operations. The impact and any associated risks related to these policies on our business operations are discussed throughout this section where such policies affect our reported and expected financial results. The preparation of this Annual Report requires us to make estimates and assumptions that affect the

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

reported amount of assets and liabilities, revenues and expenses of the Company during the reporting period and contingent assets and liabilities as of the date of our financial statements. There can be no assurance that the actual results will not differ from those estimates.

Undeveloped oil and gas properties:

We will utilize the "successful efforts" method of accounting for undeveloped mineral interests and oil and gas properties. Costs of carrying and retaining undeveloped properties are to be charged to expense when incurred. Capitalized costs are to be charged to operations at the time the Company determines that no economic reserves exist. Proceeds from the sale of undeveloped properties are to be treated as a recovery of cost. Proceeds in excess of the capitalized cost realized from the sale of any such properties, if any, are to be recognized as gain to the extent of the excess.

23

Impairment of long-lived assets:

We will evaluate the potential impairment of long-lived assets in accordance with Statement of Financial Accounting Standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. We will annually review the amount of recorded long-lived assets for impairment. If the carrying amount of a long-lived asset is not recoverable from our undiscounted cash flows, we will recognize an impairment loss in such period.

ITEM 7. FINANCIAL STATEMENTS

Our financial statements for the fiscal year ending December 31, 2006 are attached hereto beginning on page F-1.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

Not applicable.

ITEM 8A CONTROLS AND PROCEDURES

As required by Rule 13a-15 under the Securities Exchange Act of 1934 (the "Exchange Act"), we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2006. This evaluation was carried out under the supervision and with the participation of our President and Chief Financial Officer. Based upon that evaluation, our President and Chief Financial Officer concluded that our disclosure controls and procedures are effective in timely alerting management to material information relating to us required to be included in our periodic SEC filings. There have been no significant changes in our internal controls or in other factors that could significantly affect internal controls subsequent to the date that we carried out our evaluation.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to management, including our President and Chief Financial Officer, to allow timely decisions regarding required disclosure.

Internal Controls

Since the date of the evaluation described above, there were no significant changes in our internal control or in other factors that could significantly affect these controls, and there were no corrective actions with regard to significant deficiencies and material weaknesses.

24

We have not yet become subject to the requirement to include an annual report of management on our internal control over financial reporting in our annual reports under Section 13 or 15(d) of the Securities Exchange Act.

ITEM 8B OTHER INFORMATION

Not applicable

PART III

ITEM 9. DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS; COMPLIANCE WITH SECTION 16(a) OF THE EXCHANGE ACT

Set forth below are the names of each of the executive officers of the Registrant and the position held:

Name	Age	Position
----	---	-----
Ernest Geoffrey Albers	62	President, Treasurer and Director
William Ray Hill	56	Director, Vice President
Mark Anthony Muzzin	44	Director, Vice President

Ernest Geoffrey Albers has been our President and Treasurer and a director since August 2003. Mr. Albers is a company director with over 30 years experience as a lawyer and administrator in Australian corporate law, petroleum exploration and resource sector investment. During this period Mr Albers has sponsored the formation of companies that have made the original Maari (Moki) oilfield discovery and development in New Zealand, the Yolla Gas/Condensate discovery in Bass Strait, the Evans Shoal gasfield discovery/ appraisal in the Timor Sea, the Oyong and Wortel gas/oil discoveries in Indonesia and the SE Gobe oilfield development in Papua New Guinea. He is a director of Australian publicly listed companies; Bass Strait Oil Company Ltd, Cue Energy Resources Limited, Moby Oil & Gas Limited and Octanex N.L. He is a member of the Petroleum Exploration Society of Australia and a Fellow of the Institute of Directors in Australia.

W. Ray Hill has been a director of the Company since August 2003. Mr. Hill founded Rocky Mountain Minerals, Inc. in 1978 and is currently a director. Mr. Hill is President and Director of The Zonia Company, an Arizona real estate development company. Mr. Hill is the founder and President of Geowest

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

Corporation, which is involved in the development of a solid waste construction and demolition landfill. In 1988 Mr. Hill founded Citizens Recycle & Collection, a solid waste hauling and Transfer Company, which was acquired by Waste Management, Inc. in 1996.

25

Mark A Muzzin was appointed a director of the Company on November 16, 2005. Mr Muzzin has had over 20 years of commercial experience and holds a B.A. degree from Latrobe University, Melbourne, Australia. His career commenced in the mid eighties for a London stock broking firm and has consulted for two of the major banks in Australia in the share custodian area. He has been involved in capital raising activities for resource companies in Australia and is a consultant for various oil and gas companies. He is President of Rocky Mountain Minerals, Inc and is a director of Goldsborough Limited, and is a director in a number of Australian private companies. Mr Muzzin is a member of the Petroleum Exploration Society of Australia.

Board/Committee Matters

The Company does not currently maintain separate standing committees, including an Audit, Nominating or Compensation Committee, of the Board of Directors, because of the small size of the Board and of the Company. As a result, the entire Board of Directors acts as these Committees for the purpose of overseeing these functions, including the Company's accounting and financial reporting processes, and the audits of the financial statements by our independent registered public accounting firm.

Board Attendance

The Board of Directors met six times during the year ended December 31, 2006. During 2006, each of the directors attended at least 100% of the total number of meetings of the Board of Directors. It is the Company's policy that, absent unusual or unforeseen circumstances, all of the directors are expected to attend annual meetings of stockholders. All of the directors attended the Company's 2006 Annual Meeting of Stockholders held on July 28, 2006.

Audit Committee Financial Expert

We do not have an audit committee financial expert serving on our Board of Directors because no current member of the Board has the requisite experience and education to qualify as an audit committee financial expert as defined in Item 401 of Regulation S-B and because we are a start up oil and gas exploration company with limited revenues to date. However, in the future, the current members of the Board intend to consider such qualifications in making future nominations of persons to join our Board of Directors.

Report of the Board, Acting as the Audit Committee

The Board of Directors, acting as the Audit Committee, has prepared the following report for inclusion in this Annual Report. The Board has the responsibility for reviewing the Company's accounting practices, internal accounting controls and financial results and is responsible for the engagement of the Company's independent auditors. The Board met six times in 2006 and has reviewed and discussed the audited financial statements with the Company's management.

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

The Board has discussed with the independent auditors the matters required to be discussed by SAS 61 (Codification of Statements on Auditing Standards, AU Section 380), as may be modified or supplemented.

The Board has received the written disclosures and the letter from the independent auditors required by Independence Standards Board Standard No. 1 (Independence Discussions with Audit Committees), as may be modified or supplemented, and has discussed with the independent auditors the independent auditors' independence.

26

Based on the review and discussions referred to in the foregoing three paragraphs, the Board of Directors determined that the audited financial statements be included in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2006 for filing with the Securities and Exchange Commission.

E. Geoffrey Albers Mark A.
Muzzin W. Ray Hill

Dated: March 29, 2007

THIS REPORT SHALL NOT BE DEEMED INCORPORATED BY REFERENCE INTO ANY FILING UNDER THE SECURITIES ACT OF 1933 OR THE SECURITIES EXCHANGE ACT OF 1934, EXCEPT TO THE EXTENT THAT THE COMPANY SPECIFICALLY INCORPORATES IT BY REFERENCE, AND SHALL NOT OTHERWISE BE DEEMED TO BE FILED UNDER SUCH ACTS.

Code of Ethics

The Board of Directors on March 29, 2007, adopted a code of ethics for the Company's principal executive, financial and accounting officers. (See Exhibit 21).

The Code has created written standards that require accountability for adherence to the code and have been designed to deter wrongdoing and to promote honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships. The code requires full, fair, accurate, timely, and understandable disclosure in reports and documents that the Company files with, or submits to, the Commission and in other public communications. The code includes requirements for compliance with applicable governmental laws, rules and regulations and the prompt internal reporting of violations of the code to an appropriate person or persons identified in the code.

The Company has posted the text of such code of ethics on its Internet website, which is www.usoil.com.

The Company will provide to any person without charge, upon request, a copy of such code of ethics. The Code is available by written request to the Company at its address 2480 North Tolemac Way, Prescott, Arizona 86305, United States of America or by email to admin@usoil.com.

Section 16(A) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Act of 1934 requires our officers and directors, and greater than 10% stockholders, to file reports of ownership and

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

changes in ownership of our securities with the Securities and Exchange Commission. Copies of the reports are required by SEC regulation to be furnished to us.

27

Based solely upon a review of Forms 3 and 4 furnished to the Company, the Company is not aware of any director, officer, or beneficial owner of more than ten percent of the Common Stock of the Company, who failed to file, on a timely basis, reports required by Section 16(a) of the Securities Exchange Act of 1934, except that Mr E.G. Albers on March 5, 2007 reported the acquisition of 2,000,000 shares of common stock issued by the Company on January 31, 2007.

ITEM 10. EXECUTIVE COMPENSATION

Compensation awarded to, earned by, or paid to our sole executive officer whose compensation exceeded \$100,000.

Summary Compensation Table for 2006

Name and Principal Position	Year	Salary (\$)	Stock Awards (\$) *	Total (\$)
E.G. Albers (PEO) President and Treasurer	2006	NIL	\$200,000	\$200,000
	2005	NIL	\$250,000	\$250,000

* This amount is the SFAS 123(R) grant date fair value of the shares issued.

All other tables regarding executive officer compensation have been omitted as inapplicable.

Our directors are not compensated for their service on the Board.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The following table sets forth, as of December 31, 2006, certain information with respect to the beneficial ownership of shares of common stock by (i) any officer of our company, (ii) each director of our company, (iii) each person known to us to be the beneficial owner of more than 5 percent of our outstanding shares of common stock, and (iv) our directors and executive officers as a group.

Beneficial Owner	Number of Shares (1)	Percent of Class (2)
Ernest Geoffrey Albers (3)	19,900,003	58.70
William Ray Hill	100,000	0.29
Mark Anthony Muzzin	0	0
All executive officers and directors as a group (3 persons)	20,000,003	58.99%

- (1) The number of shares and the percentage of the class beneficially owned by the entities above is determined under rules promulgated by the SEC and the information is not necessarily indicative of beneficial ownership for any other purpose. Under such rules, beneficial ownership includes any shares as to which the individual has sole or shared voting power or investment power and also any shares which the individual has the right to acquire within 60 days through the exercise of any stock option or other right. The inclusion herein of such shares, however, does not constitute an admission that the named stockholder is a direct or indirect beneficial owner of such shares. Unless otherwise indicated, each person or entity named in the table has sole voting power and investment power (or shares such power with his or her spouse) with respect to all shares of capital stock listed as beneficially owned by such person or entity.
- (2) Percentages are based upon the total 33,900,531 outstanding shares of Common Stock combined with the number of shares of Common Stock beneficially owned by each person or entity.
- (3) Includes shares of common stock registered in the names of Mr. Albers' family members and affiliates.

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

Set forth below is information regarding transactions involving the Company and executive officers, directors and significant shareholders of the Company during the most recent fiscal year and for the prior fiscal year.

Some of our directors and officers are engaged in various aspects of oil and gas exploration and development for their own account and through other entities in which they are directors and or shareholders. Furthermore, as described in this Item 12, certain of our directors and officers are involved in transactions with the Company. We have no policy prohibiting, nor does our Certificate of Incorporation prohibit, transactions between the Company and our officers and directors. We may enter into cost-sharing arrangements with respect to geological investigations, seismic acquisition and drilling of our properties. Directors and officers may participate, from time to time, in these arrangements and such transactions may be on a non-promoted basis (actual costs), or on a promoted basis, but must be approved by a majority of the disinterested directors of the Board of Directors.

With respect to Mr E.G. Albers, President, Treasurer and a director of AOGC and each of its subsidiaries including Gascorp, Alpha and Nations, transactions were entered into, in relation to:

* Great Missenden Holdings Pty Ltd: Mr. Albers is a director and shareholder of Great Missenden Holdings Pty Ltd. Effective from April 4, 2005, in return for the previous advances of \$212,000, the Company issued to Great Missenden Holdings Pty Ltd 212 Series I Convertible Notes of \$1,000 each, with an interest coupon of 10% per annum, convertible into shares of Common Stock at any time on or before December 31, 2007 on the basis of 12,500 shares of Common Stock for every \$1,000 Convertible Note or part thereof. Effective from April 26, 2005, Great Missenden Holdings Pty Ltd approved a further \$100,000 Line of Credit to the Company in return for the issue to Great Missenden Holdings of 100 Series II Convertible Notes of \$1,000 each with an interest rate of 10% per annum, convertible into shares of Common Stock at any time on or before 31 December, 2008 on the basis of 10,000 shares of Common Stock for every \$1,000 Series II Convertible Notes or part thereof. As at December 31, 2006, an amount of \$64,000 had been drawn down pursuant to the \$100,000 Line of Credit, which

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

were converted into these Series II Notes. A total charge of \$26,010 by way of interest on all advances from Great Missenden Holdings Pty Ltd was incurred during the year 2006.

29

* Setright Oil & Gas Pty Ltd: Mr Albers is a director and shareholder of Setright Oil & Gas Pty Ltd. For the year ended December 31, 2006, Setright Oil & Gas Pty Ltd charged the Company \$47,485 for the provision of accounting and administrative services rendered by third parties for the benefit of the Company, but not including services rendered by Mr. E Geoffrey Albers, who is remunerated separately by way of the issue of shares of common stock. AOGC's subsidiaries have the use of premises in Australia at Level 25, 500 Collins Street, Melbourne, Victoria. The office space is taken on a nonexclusive basis, with no rent payable, but the usage of the premises is included in the charges Setright Oil & Gas Pty Ltd makes in respect to the administration of the Company.

* Vulcan Joint Venture: With regard to exploration permits ACP/33, ACP/35 and AC/P39 (Vulcan Joint Venture), Mr. Albers is a director and shareholder in each the joint venture participants; namely National Gas Australia Pty Ltd, National Gas Australia Pty Ltd, Natural Gas Corporation Pty Ltd and Auralandia N.L. Expenditure incurred during this period by National Gas Australia Pty Ltd (in which Mr Albers is the sole shareholder and sole director) in relation to the acquisition and processing of the 124 km² Oliver 3D Seismic Surveys in AC/P33 was in the order of \$2,950,000. Further expenditure in the order of \$1,750,000 was incurred during this period by National Gas Australia Pty Ltd in relation to the reprocessing of the Onnia Seismic Surveys in AC/P35 and AC/P39. As a result of incurring these expenditures, National Gas Australia Pty Ltd has earned a 25% interest in each of AC/P33, AC/P35 and AC/P39 (Vulcan Joint Venture), 5% of which was earned from AOGC subsidiary, Alpha.

* Browse Joint Venture: With regard to the remaining permits of the Browse Joint Venture (WA-332-P, WA-333-P and WA-342-P), Mr. Albers is a director and shareholder in each of Batavia Oil & Gas Pty Ltd and Hawkestone Oil Pty Ltd. He is a major shareholder in the parent company of Goldsborough Energy Pty Ltd. All of these companies are the holders of the Browse Joint Venture.

* National Gas Consortium. With regard to the National Gas Consortium (NT/P62, NT/P63, NT/P64, NT/P65, NT/P71 and NT/P72), Mr. Albers is a director and shareholder in each of National Gas Australia Pty Ltd, National Oil & Gas Pty Ltd, and Australian Natural Gas Pty Ltd. Expenditure incurred during this period by National Gas Australia Pty Ltd (in which Mr Albers is the sole shareholder and sole director) in relation to the acquisition of the 887 line km Sunshine Seismic Survey is in the order of \$850,000. Further expenditure incurred during this period by National Gas Australia Pty Ltd in relation to the acquisition of the 3,291 line km Kurradjong 2D Seismic Survey is in the order of \$3,000,000. As a result of incurring this expenditure, National Gas Australia Pty Ltd has earned a 20% interest in each of NT/P62, NT/P63, NT/P64, NT/P65, NT/P71 and NT/P72, (National Gas Consortium), of which 6% was earned from Nations.

30

* NT/P70 Joint Venture. With regard to the NT/P70 Joint Venture, Mr Albers is a director and shareholder in National Gas Australia Pty Ltd. Expenditure incurred during this period by National Gas Australia Pty Ltd (in which Mr E.G. Albers is the sole shareholder and sole director) in relation to the acquisition

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

of the 795 line km Crocodile 2D Seismic Survey is in the order of \$950,000. As a result of this expenditure, National Gas Australia Pty Ltd earned a 20% interest in NT/P70 from AOGC.

With respect to Mr M.A. Muzzin, Vice President and Director of AOGC and a Director of its subsidiaries, Nations Natural Gas Pty Ltd and Alpha Oil & Natural Gas Pty Ltd. Mr. Muzzin is a director of Goldsborough Energy Pty Ltd, a subsidiary of Goldsborough Limited. Goldsborough Energy Pty Ltd holds a 10% interest in the Browse Joint Venture.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

(a) Audit Fees

Our principal accountant, Demetrius & Company L.L.C., billed us aggregate fees in the amounts of approximately \$28,244 and \$12,400 respectively for the fiscal years ended 2006 and 2005. These amounts were billed for professional services that Demetrius & Company, L.L.C. provided for the audit of our annual financial statements, review of the financial statements included in our report on 10-QSB and other services typically provided by an accountant in connection with statutory and regulatory filings or engagements for those fiscal years. An additional \$13,000 was accrued at December 31, 2006 for services relating to the audit of the Form 10-KSB annual report.

(b) Audit - Related Fees

There were no fees billed to us for the fiscal year ended December 31, 2006 for assurance and other services related to the performance of the audit or review of our financial statements.

(c) Tax Fees

We paid approximately \$3,405 in tax fees for the fiscal year ended December 31, 2006 for tax compliance, tax advice, and tax planning. For the year ended December 31, 2005, \$1,500 was accrued for tax fees.

(d) All Other Fees

There were no other fees billed to us for the fiscal year ended December 31, 2006.

(e) Audit Committee's Pre-Approval Practice

Inasmuch as the Company does not have an audit committee, its Board of Directors performs the functions of its audit committee. Section 10A(i) of the Securities Exchange act of 1934 prohibits our auditors from performing audit services for us as well as any services not considered to be "audit services" unless such services are pre-approved by the board of directors (in lieu of the audit committee) or unless the services meet certain de minimis standards.

The board of directors has adopted resolutions that provide that the board must:

Preapprove all audit services that the auditor may provide to us or any

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

subsidiary (including, without limitation, providing comfort letters in connection with securities underwritings or statutory audits) as required by Section 10A(i) (1) (A) of the Securities Exchange Act of 1934 (as amended by the Sarbanes-Oxley Act of 2002).

Preapprove all non-audit services (other than certain be minimis services described in Section 10A(i) (1) (B) of the Securities Exchange act of 1934 (as amended by the Sarbanes-Oxley Act of 2002) that the auditors propose to provide to us or any of its subsidiaries.

The board of directors considers at each of its meetings whether to approve any audit services or non-audit services. In some cases, management may present the request; in other cases, the auditors may present the request. The board of directors has approved Demetrius & Company LLC performing our audit for the 2005 and 2006 fiscal years.

33

The percentage of the fees for audit, audit-related, tax and other services were as set forth in the following table:

Percentage of total fees paid to Demetrius & Company LLC
Fiscal Year 2006

Audit fees	89%
Audit-related fees	Nil
Tax fees	11%
All other fees	Nil

34

SIGNATURES

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
of Australian Oil & Gas Corporation (A Development Stage Enterprise)

We have audited the accompanying consolidated balance sheet of Australian Oil & Gas Corporation and subsidiaries (A Development Stage Enterprise) as of December 31, 2006, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the two years then ended and the period from inception (August 6, 2003) to December 31, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Australian Oil & Gas Corporation and subsidiaries (A Development Stage Enterprise) as of December 31, 2006, and the results of their operations and their cash flows for each of the two years then ended and for the period from inception (August 6, 2003) to December 31, 2006 in conformity with accounting principles generally accepted in the United States of America.

Australian Oil & Gas Corporation
(a development stage enterprise)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
December 31, 2006

NOTE 1: ORGANIZATION

Australian Oil & Gas Corporation (the Company or AOGC) was incorporated on August 6, 2003, and began operations on August 11, 2003 pursuant to the terms of a Plan of Reorganization ('Plan') of Synergy Technologies Corporation ("Synergy") and is considered to be a crude petroleum and natural gas company in the exploratory stage and a development stage company as defined by SFAS No. 7, and since inception, has been engaged in the assessment of oil and gas exploration properties.

The authorized capital stock of the AOGC consists of 75,000,000 shares of common stock (AOG Common Stock), \$0.001 par value.

The Company has two wholly owned, Delaware-incorporated US subsidiaries; Gascorp, Inc. and Nations LNG, inc. and two wholly owned Australian subsidiaries; Alpha Oil & Natural Gas Pty Ltd and Nations Natural Gas Pty Ltd (Note 9).

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company has adopted Fresh Start Accounting. All dollar amounts used herein refer to U.S. dollars unless otherwise indicated. These statements are prepared using Generally Accepted Accounting Principles of the United States of

Edgar Filing: AUSTRALIAN OIL & GAS CORP - Form 10KSB

America. All significant transactions between the parent and consolidated affiliates have been eliminated.

Basis of consolidation

The consolidated financial statements include all majority-owned subsidiaries over which we exercise control. Investments where we exercise significant influence but do not control (generally a 20% to 50% ownership interest), are accounted for under the equity method of accounting. All material intercompany transactions and balances have been eliminated.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and footnotes thereto. Actual results could differ from those estimates.

Undeveloped mineral interests and oil and gas properties

The Company will utilize the "successful efforts" method of accounting for undeveloped oil and gas properties. Capitalized costs will be charged to operations at the time the Company determines that no economic reserves exist.

Costs of carrying and retaining undeveloped properties are to be charged to expense when incurred.

Proceeds from the sale of undeveloped properties are treated as a recovery of cost. Proceeds in excess of the capitalized cost realized in the sale of any such properties, if any, are to be recognized as gain to the extent of the excess.

Income taxes

The Company will provide for income taxes utilizing the liability approach under which deferred income taxes are provided based upon enacted tax laws and rates applicable to the periods in which the taxes became payable.

Cash equivalents

For purposes of the statements of cash flows, the Company will consider all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

F-7

Impairment of long-lived assets

The Company will evaluate the potential impairment of long-lived assets in accordance with Statement of Financial Accounting standards No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. The Company will annually review the amount of recorded long-lived ass
