NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

1. Corporate information:

Banco de Chile is authorized to operate like a commercial bank since June 17, 1996, in conformity with the Article 25 of Law No, 19,396. Banco de Chile, resulting from the merger of Banco Nacional de Chile, Banco Agrícola and Banco de Valparaíso, was formed on October 28, 1893 in the city of Santiago, in the presence of the Notary Eduardo Reyes Lavalle.

Banco de Chile (Banco de Chile or the Bank) is a Corporation organized under the laws of the Republic of Chile, regulated by the Superintendency of Banks and Financial Institutions (SBIF or Superintendency). Since 2001, - when the bank was first listed on the New York Stock Exchange (NYSE), in the course of its American Depository Receipt (ADR) program Banco de Chile additionally follows the regulations published by the United States Securities and Exchange Commission (SEC).

Banco de Chile offers a broad range of banking services to its customers, ranging from individuals to large corporations. The services are managed in large corporate banking, middle and small corporate banking, personal banking services and retail. Additionally, the Bank offers international as well as treasury banking services. The Bank's subsidiaries provide other services including securities brokerage, mutual fund and investment management, insurance brokerage, financial advisory and securitization.

Banco de Chile's legal address is Paseo Ahumada 251, Santiago, Chile and its website is www.bancochile.cl.

The Interim Condensed Consolidated Financial Statements of Banco de Chile, for the period ended March 31, 2016 were approved for issuance in accordance with the directors on April 28, 2016.

2. Legal provisions, basis of preparation and other information:

(a) Legal provisions:

The General Banking Law in its Article No.15 authorizes the Chilean Superintendency of Banks (SBIF) to issue generally applicable accounting standards for entities it supervises. The Corporations Law, in turn, requires generally accepted accounting principles to be followed.

Edgar Filing: BANK OF CHILE - Form 6-K

Based on the aforementioned laws, banks should use the criteria provided by the Superintendency in accordance with the Compendium of Accounting Standards (Compendium), and any matter not addressed therein, as long as it does not contradict its instructions, should adhere to generally accepted accounting principles in technical standards issued by the Chilean Association of Accountants, that coincide with international accounting standards and international financial reporting standards agreed upon by the International Accounting Standards Board (IASB). Should there be discrepancies between these generally accepted accounting principles and the accounting criteria issued by the SBIF, the latter shall prevail.

3. New Accounting Pronouncements:

The following is a summary of new standards, interpretations and improvements to the International Financial Reporting Standards issued by the International Accounting Standards Board (IASB) that it is not effective as of March 31, 2016:

IFRS 9 Financial Instruments

The July 24, 2014, IASB completed its upgrade project about accounting for financial instruments with the publication of IFRS 9 Financial Instruments.

This standard includes new requirements based on new principles for the classification and measurement; it introduces a prospective model of expected credit losses on impairment accounting and changes in hedge accounting.

The classification determines how financial assets and liabilities are accounted in financial statements and, in particular, how they are measured. IFRS 9 introduces a new approach for the classification of financial assets, based in the business model of the entity for the management of financial assets and the characteristic of its contractual flows.

The IASB has introduced a single impairment model that will apply to all financial instruments, which will require a timely recognition of expected credit losses.

IFRS 9 introduces hedge accounting, and also new alternatives of strategies to use. The amendments change requirements for a substantial overhaul of hedge accounting that aligns the accounting treatment with risk management activities, enabling entities to better reflect these activities in their financial statements. In addition, as a result of these changes, users of the financial statements will be provided with better information about risk management and the effect of hedge accounting on the financial statements.

IFRS 9 established that the fair value of credit risk of the entity shall be recognized in Other Comprehensive Income, allowing decrease any eventual volatility that would be generated in the income of the entity, because its recognition. IFRS 9 permits early application of this improvement, before any other requirement of IFRS 9.

Edgar Filing: BANK OF CHILE - Form 6-K

Mandatory adoption date is January 1, 2018. Early application is permitted.

Banco de Chile and its subsidiaries are assessing the possible impact of adoption of these changes on the consolidated financial statements.

The Superintendency of Banks and Financial Institutions has not approved this rule. This event is required to its application.

IAS 7 Statement of Cash Flows

On January 2016, the IASB has published amendments to IAS 7, which has as objective that entities shall provide additional disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including changes from financing cash flows and other changes that are not cash flows.

The amendments are effective for annual periods beginning on or after 1 January 2017, earlier application is permitted.

Banco de Chile and its subsidiaries will apply these requirements, if at date of financial statements there are modifications of liabilities, according described above.

IAS 12 Income Taxes

On January 2016, the IASB has published amendments to IAS 12, to clarify the recognition of deferred tax assets on debt instruments measured at fair value, assessing if the Bank has probability to generate futures fiscal income for use the deductible temporary difference.

The amendments are effective for annual periods beginning on or after 1 January 2017, earlier application is permitted.

This rule will have not impact in Banco de Chile and its subsidiaries.

IAS 28 Investments in Associates and Joint Venture and IFRS 10 - Consolidated Financial Statements

Edgar Filing: BANK OF CHILE - Form 6-K

In September 2014, the IASB issued this amendment, which clarifies the scope of recognized gains and losses in a transaction involving an associate or joint venture, and this depends on whether the asset sold or contribution is a business. Therefore, IASB concluded that all of the profit or loss should be recognized against loss of control of a business. Likewise, gains or losses resulting from the sale or contribution of a subsidiary that is not a business (definition of IFRS 3) to an associate or joint venture should be recognized only to the extent of unrelated interests in the associate or joint venture.

On December 2015, the IASB agreed that the amendments should apply in the future, and its early application is permitted.

This amendment does not impact the consolidated financial statements of Banco de Chile and its subsidiaries.

6. Segment Reporting:

For management purposes, the Bank has organized its operations and commercial strategies into four business segments, which are defined in accordance with the type of products and services offered to target customers. These business segments are currently defined as follows:

Retail: This segment focuses on individuals and small and medium-sized companies with annual sales up to 70,000UF, where the product offering focuses primarily on consumer loans, commercial loans, checking accounts, credit cards, credit lines and mortgage loans.

Wholesale: This segment focused on corporate clients and large companies, whose annual revenue exceed 70,000UF, where the product offering focuses primarily on commercial loans, checking accounts and liquidity management services, debt instruments, foreign trade, derivative contracts and leases.

Treasury and money market operations:

This segment includes revenue associated with managing the Bank's balance sheet (currencies, maturities and interest rates) and liquidity, including financial instrument and currency trading on behalf of the Bank itself.

Transactions on behalf of customers carried out by the Treasury are reflected in the respective aforementioned segments. These products are highly transaction-focused and include foreign exchange transactions, derivatives and financial instruments in general.

Subsidiaries: Corresponds to companies and corporations controlled by the Bank, where income is obtained individually by the respective subsidiary. The companies that comprise this segment are:

Entity

- Banchile Administradora General de Fondos S.A.
- Banchile Asesoría Financiera S.A.

6. Segment Reporting, continued:

The financial information used to measure the performance of the Bank's business segments is not necessarily comparable with similar information from other financial institutions because it is based on internal reporting policies. The accounting policies used to prepare the Bank's operating segment information are similar as those described in Summary of Significant Accounting Principles. The Bank obtains the majority of its income from: interest, revaluations and fees, discounted the credit cost and expenses. Management is mainly based on these concepts in its evaluation of segment performance and decision-making regarding goals, allocation of resources for each unit individually. Although the results of the segments reconcile with those of the Bank at total level, it is not thus necessarily concerning the different concepts, since the management is measured and controls in individual form and applying the following criteria:

- The net interest margin of loans and deposits is obtained aggregating the net financial margins of each individual operation of credit and uptake made by the bank. For these purposes is considered the volume of each operation and its contribution margin, stemming from the difference between the effective customer rate and the related Bank's fund transfer price in terms of maturity and currency.
- The internal performance profitability system considers capital allocation in each segment in accordance to the Basel guidelines.
- Operating expenses are distributed at each area level. The Bank allocates all of its indirect operating costs to each business segment by utilizing a different cost driver in order to allocate such costs to the specific segment.

The Bank did not enter into transactions with a particular customer or third parties that exceed 10% or more of its total income during the three-month period ended March 31, 2016 and 2015.

Taxes are managed at a corporate level and are not allocated to business segments.

(b) Fair value Hedges:

The Bank uses cross-currency swaps and interest rate swaps to hedge its exposure to changes in the fair value of the hedged elements attributable to interest rates in financial instruments. The aforementioned hedge instruments change the effective cost of long-term issuances from a fixed interest rate to a floating rate, decreasing the duration and modifying the sensitivity to the shortest segments of the curve.

Below is a detail of the hedged elements and hedge instruments under fair value hedges as of March 31, 2016 and December 31, 2015:

	March 2016 MCh\$	December 2015 MCh\$
Hedged element		
Commercial loans	19,359	19,222
Corporate bonds	223,515	174,054
Hedge instrument		
Cross currency swap	19,359	19,222
Interest rate swap	223,515	174,054

(c) Cash flow Hedges:

(c.1) The Bank uses cross currency swaps to hedge the risk from variability of cash flows attributable to changes in the interest rates and foreign exchange of obligations with foreign banks and bonds issued abroad in USA dollars, Hong Kong dollars, Peruvian nuevo sol, Swiss franc, Japanese yens and Euros. The cash flows of the cross currency swaps equal the cash flows of the hedged items, which modify uncertain cash flows to known cash flows derived from a fixed interest rate.

Additionally, these cross currency swap contracts used to hedge the risk from variability of the Unidad de Fomento (CLF) in assets flows denominated in CLF until a nominal amount equal to the portion notional of the hedging instrument CLF, whose readjustment daily impact the item interest revenue of the income financial statements.

- Without unpaid debt in the financial system
- Without new financings
- Must exist capital amortization

If the debtor has had any credit with partial payments is required have at least 2 payments in a lesser period of six months.

(a.ii) Impaired Portfolio

As of March 31, 2016 and December 31, 2015, the Bank presents the following details of normal and impaired portfolio:

	Assets before Allowances				Allowances established								
	Normal Portfolio		Impaired Portfolio		Total		Individual Provisions		Group Provisions		Total		March 2016 MCh\$
	March 2016 MCh\$	December 2015 MCh\$	March 2016 MCh\$	December 2015 MCh\$	March 2016 MCh\$	December 2015 MCh\$	March 2016 MCh\$	December 2015 MCh\$	March 2016 MCh\$	December 2015 MCh\$	March 2016 MCh\$	December 2015 MCh\$

Instruments issued by the Chilean Government and Central Bank include instruments with repurchase agreements sold to clients and financial institutions; totaling MCh\$3,054 as of December 31, 2015, no balance for this concept as of March 31, 2016. The repurchase agreements have an average maturity of 6 days as of December 31, 2015.

In instruments issued abroad are included mainly bank bonds and shares and equity investments instruments.

As of March 31, 2016, the portfolio of financial assets available-for-sale includes a net unrealized gain of MCh\$40,080, net of tax (net unrealized gain of MCh\$39,836 as of December 31, 2015), recorded in other comprehensive income within equity.

During 2016 and 2015, there is no evidence of impairment of financial assets available-for-sale.

Realized gains and losses are calculated as the proceeds from sales less the cost (specific identification method) of the investments identified as available-for-sale. In addition, any unrealized gain or loss previously recognized in equity for these investments is reversed and recorded in the Consolidated Statements of Comprehensive Income.

Gross profits and losses realized on the sale of available-for-sale investments as of March 31, 2016 and 2015 are shown in Note 30 Net Financial Operating Income .

(**) Assets received in lieu of payment are assets received as payment of customers' past-due debts. The assets acquired must at no time exceed, in the aggregate, 20% of the Bank's effective equity. These assets represent 0.0064% (0.0227%

Edgar Filing: BANK OF CHILE - Form 6-K

as of December 31, 2015) of the Bank's effective equity.

The assets awarded at judicial sale are assets that have been acquired as payment of debts previously owed towards the Bank. The assets awarded at judicial sales are not subject to the aforementioned requirement. These properties are non-current assets available-for-sale. For most assets, the sale is expected to be completed within one year from the date on which the asset was received or acquired. If the asset in question is not sold within the year, it must be written off.

The provision for assets received in lieu of payment is recorded as indicated in the Compendium of Accounting Standards, which indicate to recognize a provision for the difference between the initial value plus any additions and its realizable value when the former is greater.

(b) **Lawsuits and legal proceedings:**

(b.1) **Legal contingencies within the ordinary course of business:**

At the date of issuance of these consolidated financial statements, there are actions filed against the Bank and its subsidiaries related with the ordinary course operations. As of March 31, 2016 the Bank has established provisions for this concept in the amount of MCh\$14,973 (MCh\$14,877 as of December 31, 2015), recorded within Provisions in the Interim Condensed Consolidated Statement of Financial Position.

Among these actions, there is the following:

- Collective action filed by the National Consumer Service (Servicio Nacional del Consumidor) in accordance with Law No. 19,496. This action seeks to challenge some clauses of the Person Products Unified Agreement (Contrato Unificado de Productos de Personas) regarding fees on credit lines for overdraft and validity of the tacit consent to changes in fees, charges and other conditions in consumer contracts.
- Collective action filed by the National Corporation of Consumers and Users of Chile (Corporación Nacional de Consumidores y Usuarios de Chile) that challenge some clauses of the Person Products Unified Agreement (Contrato Unificado de Productos de Personas) regarding fees on credit lines for overdraft and validity of the tacit consent to changes in fees, charges and other conditions in consumer contracts, along with the outsourcing of certain services related to our clients' current account data.
- Collective action filed by the National Organization of Consumers and Users of Chile (Organización de Consumidores y Usuarios de Chile) that requests the Court to declare abusive and void certain provisions of the Person Products Unified Agreement regarding the use of self-service channels (internet, ATMs, telephone banking) and Credit Cards. Such provisions refer to the user's duty to act with diligence and care with respect to passwords as well as the responsibility they have in case of disclosure to third parties, and the use by such third parties of them.

The following table presents estimated date of completion of the respective litigation:

ii. **In subsidiary Banchile Corredores de Bolsa S.A., continued:**

In conformity with the provisions of internal stock market regulations, and for the purpose of securing the broker's correct performance, the company established a pledge on its share of the Santiago Stock Exchange in favor of that institution, as recorded in Public Deed on September 13, 1990, signed before Santiago public notary Mr. Raul Perry Pefaur, and on its share in the Electronic Stock Exchange of Chile in favor of that institution, as recorded in a contract entered into by both parties on May 16, 1990.

Banchile Corredores de Bolsa S.A. keeps an insurance policy current with AIG Chile Compañía de Seguros Generales S.A. that expires January 2, 2017, and that covers employee fidelity, physical losses, falsification or adulteration, and currency fraud with a coverage amount equivalent to US\$10,000,000.

According to disposition of Chilean Central Bank, it was constituted a bank guarantee corresponding to UF10,500, with purposes to comply with the contract SOMA (Contract for Service System Open Market Operations) of Chilean Central Bank. This bank guarantee is revaluated in UF to fixed term, not endorsable with maturity of July 18, 2016.

It was constituted a bank guarantee No. 379031-1 corresponds to UF215,000, in benefits of investors with contracts of portfolio management. This bank guarantee is revaluated in UF to fixed term, not endorsable with maturity of January 10, 2017.

It was constituted a cash guarantee for an amount of US\$122,494.32, whose purpose is to comply obligations with Pershing, by operations made through this broker.

iii. **In subsidiary Banchile Corredores de Seguros Ltda,**

Edgar Filing: BANK OF CHILE - Form 6-K

According to established in article No. 58, letter D of D.F.L. 251, as of March 31, 2016 the entity maintains two insurance policies that protect it in the face of possible damages that it could affect it, due to infractions of the law, regulations and complementary rules that regulate insurance brokers, and when the non-compliance is from acts, mistakes or omissions of the brokers, its represents, agent or dependent that participate in the intermediation for Banchile Corredores de Bolsa S.A.

The policies contracted are the following:

Matter insured	Amount Insured (UF)
Responsibility for errors and omissions policy	60,000
Civil responsibility policy	500

(e) In the Eleventh Civil Court of Santiago, Banchile Corredores de Bolsa S.A. filed a reclamation against the Resolución Exenta No. 270 of October 30, 2014 of the Superintendency of Securities and Insurance (SVS), whereby that Superintendency imposed a fine on Banchile Corredores de Bolsa S.A. (Banchile Corredores) for an amount of UF 50,000 for the alleged infringement of Article 53 second paragraph of Law 18,045 (Ley de Mercado de Valores), for certain specific transactions related to Sociedad Química y Minera de Chile S.A.'s shares (SQM-A). Through the claim, Banchile Corredores seeks to void the fine. As a requirement to file the claim, Banchile posted a bond equal to 25% of the amount of the fine. That complaint was accumulated to, Case No. 25,795-2014, the 22nd Civil Court of Santiago, in which the evidence period has already started in compliance with a decision from said court. However, as to this date there are pending remedies and appeals presented by the parties against the aforementioned decision.

According to the current policies, the company has not established provisions because this judicial process has not been ruled yet and also because our legal advisors have estimated that there are grounds to get a favorable judgment for Banchile Corredores.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued

39. Fair Value of Financial Assets and Liabilities:

Banco de Chile and its subsidiaries have defined a corporate framework for the Fair Value measurement and control to accomplish the Fair Value process according to local regulations, market standards and best practices in the industry. This framework is contained in Banco de Chile's Fair Value Policy.

One of the most important definitions in this framework is the Product Control Unit (PCU), hereinafter PCU, function. This area is independent from both the principal management and the business unit, and reports to the CFO of Banco de Chile. This area is responsible for the independent verification of Profit and Losses, and Fair Value measurement and control for all Treasury transactions; Trading, Funding and gapping and Investments deals.

To accomplish the measurements and controls, Banco de Chile and its subsidiaries, take into account at least the following aspects:

(i) Industry standards of fair value measurements

In the fair value calculation process, standard methodologies are used; closing prices, discounted cash flows and option models. In the options case, Black-Scholes model is used. The input parameters are rates, prices and volatility levels for each term and market factor that trade in the local and international markets.

(ii) Quoted prices in active markets

The fair value for instruments with quoted prices in active markets is determined using daily quotes from electronic systems information such as Bloomberg, Bolsa de Comercio de Santiago, LVA and Risk America terminals. This quote represents the price at which instruments are frequently bought and sold in financial markets.

(iii) Valuation techniques

Edgar Filing: BANK OF CHILE - Form 6-K

If there is no market quotes in active markets for the financial instrument, valuation techniques will be used to determine the fair value.

Due to the fact that fair value models require a set of market parameters as inputs, it is part of the fair value process to maximize the utilization based on observable quoted prices or derived from similar instruments in active markets. Nevertheless there are some cases for which neither quoted prices nor derived prices are available; in these cases external data from specialized providers, price for similar transactions and historical information it is used for validate the parameters that will be used as inputs.

39. Fair Value of Financial Assets and Liabilities, continued:

(iv) Fair value adjustments

Part of the fair value process consists of adjustment, to take into account bid/offer spreads. This adjustment is calculated and analyzed by the PCU and Risk Market areas.

The bid/offer spread adjustment reflects the expected impact on fair value due to close long or short positions in a specific market factor and term, valued at midpoint. For example, long positions in an asset will be impacted in order to reflect the fact that when selling the position it will be quoted at bid instead at midpoint. For the bid/offer spread adjustment, market quotes or indicative prices for each position, instrument, currency and term are used, Bid, mid and offer market quotes are considered.

(v) Fair value control

To ensure that the market input parameters that Banco de Chile is using for fair value calculations represent the state of the market and the best estimate of fair value, the PCU unit runs on a daily basis an independent verification of prices and rates. This process aims to set a preventive control on the official market parameters provided by the respective business area. A comparative control based on Mark-to-Market differences, using one set of inputs prepared by the business area and one set prepared by the PCU, is conducted before fair value calculations. The output of this process is a set of differences in fair value by currency, product and portfolio. These differences are compared with specific ranges by grouping level; currency, product and portfolio.

In the event that significant differences are detected, these differences are measured and scaled according to the amount of materiality for each grouping level, ranging from a single report to the trader to a report presented to the Board. These ranges of materiality control are approved by the Assets and Liabilities Committee (ALCO).

Complementary and in parallel, the PCU generates daily reports of P&L and risk market exposure. These two kinds of reports allows for adequate control and consistency in the parameters used in valuations and backwards looking revisions.

(vi) **Judgmental analysis and information to Senior Management**

In particular, in cases where there are no market quotations for the instrument, similar transaction prices, nor indicative parameters, a reasoned analysis and specific controls should be made to estimate the fair value of the operation or transaction. Within the Banco de Chile's framework for fair value, described in the Fair Value Policy approved by the Board of Banco de Chile, the approval level required to operate this kinds of instruments, there is no market information or cannot be inferred from prices or rates, is established.

(a) **Fair value hierarchy**

Banco de Chile and subsidiaries, classify all the financial instruments among the following levels:

Level 1: Observable, quoted price in an active markets for the same instrument or specific type of transaction to be evaluated (return internal rates, quote value, price).

In this level, the following instruments are considered: currency futures, Chilean Central Bank and Treasury securities, mutual fund investments and equity.

For the Chilean Central Bank and Treasury securities, all instruments that belong to one of the following benchmark groups will be considered as Level 1: Pesos-02, Pesos-05, Pesos-07, Pesos-10, UF-02, UF-05, UF-07, UF-10, UF-20, UF-30. A benchmark group is composed by a number of instruments that have similar duration and share the same quoted price within the group. This condition allows for a greater depth of market, assuring daily observable quotes.

For currency futures as well as mutual funds and equity, to determine fair value, the multiplication of closing prices by the number of instruments is used. For Chilean Central Bank and Treasury securities the internal rate of return is used to discount every cash flow and obtain the fair value of each instrument. For mutual funds and equity, the current price multiplied by the quantity of instruments is used to calculate the fair value.

The preceding described methodology corresponds to the one utilized for the Bolsa de Comercio de Santiago (Santiago's main Exchange) and is recognized as the standard in the market.

39. Fair Value of Financial Assets and Liabilities, continued:

(a) Fair value hierarchy, continued

Level 2: Valuation techniques whose inputs are those other than quoted prices included within Level 1 and that are observable for assets or liabilities, either directly or indirectly. For instruments in this level, the valuation is performed based on an inference from observable market parameters; such quoted prices for similar instruments in active markets. In this level the following inputs are included:

- a) Quoted prices for similar assets or liabilities in active markets.
- b) Quoted prices for identical or similar assets or liabilities in markets that are not active.
- c) Inputs other than quoted prices that are observable for the asset or liability.
- d) Inputs that are derived principally from or corroborated by observable market data.

This level is composed mostly of currency and rate derivatives, bank's debt securities, debt of Chilean and foreign companies, mortgage claims, money market instruments and less liquid Chilean Central Bank and Treasury securities.

For derivatives the fair value process depends upon whether this value is impacted by volatility as a relevant market factor; if that is the case, the Black-Scholes-Merton type of formula is used. For the rest of the derivatives, namely swaps and forwards, net present value through discounted cash flows is used. For securities classified as level 2, the obtained internal rate of return is used to discount every cash flow and obtain the fair value of each instrument, for each currency.

In the event that there is no observable price for an instrument in a specific term, the price will be inferred from the interpolation between periods that have observable quoted price in active markets. These models incorporate various market variables, including foreign exchange rates and interest rate curves.

Level 3: These are financial instruments whose fair value is determined using unobservable inputs. An adjustment to an input that is significant to the entire measurement can result in a fair value measurement classified within Level 3 of the fair value hierarchy if the adjustment is using significant unobservable data entry.

Instruments classified as level 3 correspond to Corporate Debt issued mainly by Chilean and foreign companies, issued both in Chile and abroad.

(d) Sensitivity of level 3 instruments to changes in key assumptions of the input parameters for the valuation model.

The following table shows the impact on the fair value of Level 3 financial instruments using alternative assumptions that are reasonably possible. It is believed that the positive and negative impacts are similar:

Total	92,564	(1,844)	114,153	(2,414)

With the purpose to determine the sensitivity of the financial investments to changes in significant market factors, the Bank has made alternative calculations at fair value, changing those key parameters for the valuation and which are not directly observable in screens. In the case of financial assets presented table above, which corresponds to bank bonds and corporate bonds, input prices, prices based on broker quotes or runs were used, considering that these instruments do not have current prices or observable. Prices are generally calculated as a base rate plus a spread. For local bonds, this was determined by applying only a 10% impact on the price, while for offshore bonds this was determined by applying only a 10% impact on the spread because the base rate is hedged with instruments on interest rate swaps so-called hedge accounting. The impact of 10% is considered a reasonable move considering the market performance of these instruments and comparing it against the adjustment bid/offer that is provided for by these instruments.

39. Fair Value of Financial Assets and Liabilities, continued:

(e) Other assets and liabilities, continued:

Other financial instruments not measured at fair value in our statement of financial position, but for which the fair value is disclosed, are not managed on a fair value basis. These instruments include assets and liabilities such as loans and deposits to customers, bank borrowings, debt issued, and other financial assets and obligations with diverse maturities and features. Fair values of these assets/liabilities are estimated by applying the traditional Discounted Cash Flows model and using diverse valuation inputs such as yield curves, credit risk spreads, etc. Also, since some of these assets/liabilities are not traded in the market, judgmental analysis is required in determining the adequacy of the inputs and fair values.

The following table shows the fair value of financial assets and liabilities not measured at fair value, as of March 31, 2016 and December 31, 2015:

39. **Fair Value of Financial Assets and Liabilities, continued:**

(f) Levels of other assets and liabilities, continued:

The Bank determines the fair value of these assets and liabilities according to the following:

- **Short-Term Financial Assets/Liabilities:** For assets and liabilities with no specific maturity (on demand) or terms of less than three months we use the carrying or book values as proxies of their fair value, since their tenors are not believed to significantly affect their valuation. As a result, these assets/liabilities are categorized in Level 1. This assumption is applied to the following assets/liabilities:

- Cash and due from banks
- Transactions in the course of collection
- Cash collateral on securities borrowed and reverse repurchase agreements
- Loans and advance to banks
- Current accounts and other demand deposits
- Transactions in the course of payments
- Cash collateral on securities lent and repurchase agreements
- Other financial obligations

- **Loans to Customers:** Fair value is determined by using the DCF model and internally generated discount rates, based on internal transfer rates derived from our internal transfer price policy. After we calculate the present value, we deduct the related loan loss allowances in order to incorporate the credit risk associated with each contract or loan. As we use internally generated parameters for valuation purposes, we categorize these instruments in Level 3.

- **Letters of Credit and Bonds:** In order to determine the present value of contractual cash flows, we apply the DCF model by using market interest rates that are available in the market, either for the instruments under valuation or instruments with similar features that fit valuation needs in terms of currency, maturities and liquidity. Market interest rates are obtained from third party price providers widely used by the market. As a result of the valuation technique and the quality of inputs (observable) used for valuation, we categorize these financial liabilities in Level 2.

- Saving Accounts, Time Deposits, Borrowings from Financial Institutions and Subordinated Bonds: The DCF model is used to obtain the present value of committed cash flows by applying a bucket approach and average adjusted discount rates that are derived from both market rates for instruments with similar features and our internal transfer price policy. As we use internally generated parameters and/or apply significant judgmental analysis for valuation purposes, we categorize these financial assets/liabilities in Level 3.

39. Fair Value of Financial Assets and Liabilities, continued:

(g) Offsetting of financial assets and liabilities:

The Bank trades financial derivatives with foreign counterparties using ISDA Master Agreement (International Swaps and Derivatives Association, Inc.), under legal jurisdiction of the City of New York USA or London United Kingdom. Legal framework in these jurisdictions, along with documentation mentioned, it allows to Banco de Chile the right to anticipate the maturity of the transaction and then, offset the net value of those transactions in case of default of counterparty. The Bank has negotiated with these counterparties an additional annex (CSA Credit Support Annex), including other credit mitigating, such as margins about a certain threshold, early termination (optional or mandatory), coupon adjustment transaction over a certain threshold amount, etc.

Below are detail contracts susceptible to offset:
