#### Item 8.01. Other Events.

The following is an update to the disclosures on the decoupling proceeding in "Management's Discussion and Analysis of Financial Condition and Results of Operations - Electric utility" under "Decoupling", which are incorporated herein by reference to pages 61-62 of HEI's and Hawaiian Electric's Quarterly Report on Form 10-Q for the quarter ended March 31, 2015.

On May 28, 2015, the State of Hawaii Public Utilities Commission (PUC) issued an Order related to the Utilities' revised annual decoupling filing for tariffed rates submitted on April 15, 2015. The Order ruled on the specific matters identified by the PUC and by the Consumer Advocate in its Statement of Position. As a result of the Order, on June 3, 2015, the Utilities filed revised tariff rates reflecting a reduction to the rate adjustment mechanism (RAM) portion of the tariff filing. The revision is made primarily to adjust the RAM to reflect reduced operations and maintenance expenses associated with the Utilities' change in estimate related to the allocation of indirect costs implemented in

2014, and to exclude the Gross Domestic Product Price Index factor on the depreciation expense portion for the calculation of the 2015 RAM Cap. The Order also requires a one-time refund to customers for the impact of bonus tax depreciation enacted in December 2014 on the RAM revenues used for the 2014 tariff filing.

The revised 2015 annual incremental RAM revenues for the Utilities amounts to \$11.1 million compared to the \$26.2 million filed on April 15, 2015. The tariffed rates to be effective from June 8, 2015 through May 31, 2016 (unless suspended by the PUC) also include the collection or refund of the accrued revenue balancing account (RBA) balance and associated revenue taxes as of December 31, 2014 and any accrued earnings sharing mechanism credits. The net refund to be provided by the three Utilities under the revised tariffs amounts to \$0.4 million, compared to a collection of \$14.7 million under the tariffs filed on April 15, 2015. Below is a summary of the 2015 incremental impact by company.

| (\$ in millions)   | Hawaiian<br>Electric | Hawaii Electric<br>Light | Maui<br>Electric |
|--|----------------------|--------------------------|------------------|
| Annual incremental RAM adjusted revenues   | \$8.1                | \$1.5                    | \$1.5            |
| Annual change in accrued earnings sharing credits to be refunded   | 0                    | 0                        | (0.1)            |
| Annual change in accrued RBA balance as of December 31, 2014<br>(and associated revenue taxes) to be collected | (9.2)                | 0.1                      | (2.2)            |
| Net annual incremental amount to be (refunded)/collected under the<br>tariffs                                  | (1.1)                | 1.5                      | (0.8)            |
| (Decrease)/Increase in typical residential customer monthly bill<br>based on a 500 kwh bill                    | (9 cents)            | 88 cents                 | (13 cents)       |

Note: Columns may not foot due to rounding

The Order indicates the PUC will review the change in estimate related to the allocation of indirect costs in a separate docket, and that the change will remain subject to adjustment pending the outcome of the review. Management cannot predict the outcome of this review or the further outcome of this proceeding or the ultimate impact of the proceeding on the results of operation of the Utilities or the net financial impact on the Utilities and HEI.
