SUTRON CORP  
Form 10KSB  
March 30, 2005

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10 KSB

-----  
Annual Report Pursuant To Section 13 Or 15(D)  
Of The Securities Exchange Act Of 1934  
For the fiscal year ended: December 31, 2004  
Commission file number: 0-12227

Sutron Corporation  
(Exact name of registrant as specified in its charter.)

Virginia 54-1006352  
(State or other jurisdiction of (I.R.S. Employer  
incorporation or organization) Identification No.)

21300 Ridgetop Circle, Sterling Virginia 20166  
(Address of principal executive offices) (Zip Code)

(703) 406-2800  
(registrants telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [X ] No [ ]

Check if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-B contained in this form, and no disclosure will be contained, to the best of registrants knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendments to this Form 10-KSB. [ ]

Issuer's revenues for its most recent fiscal year were \$16,678,889.

The aggregate market value of the voting stock held by non-affiliates as of March 25, 2005 was approximately \$12,142,000 based on the fair market value of such stock.

The number of shares outstanding of the issuer's Common Stock, \$.01 par value, as of March 25, 2005 was 4,289,551.

Documents Incorporated by Reference  
Portions of the registrants definitive proxy statement dated April 15, 2005 are incorporated in Part III as set forth herein.

PART I

### ITEM 1 - BUSINESS

#### General

Sutron Corporation (the Company) was incorporated on December 30, 1975 under the General Laws of the Commonwealth of Virginia. The Company designs, manufactures and markets products and provides services that enable government and commercial entities to monitor and collect hydrological and meteorological data for the management of critical water resources, for early warning of potentially disastrous floods or storms and for the optimization of hydropower plants.

The Company's headquarters is located at 21300 Ridgetop Circle, Sterling, Virginia 20166, and the Company's

## Edgar Filing: SUTRON CORP - Form 10KSB

telephone number at that location is (703) 406-2800. The Company maintains a worldwide web address at [www.sutron.com](http://www.sutron.com). The Company makes available free of charge through the Investors section of the Company's website at [www.sutron.com](http://www.sutron.com) the annual, quarterly and current reports, and amendments thereto, which the Company files with, or furnishes to, the SEC. Such reports and amendments are available on the Company's website as soon as reasonably practical after the Company has filed such reports with, or furnished such reports to, the SEC.

Sutron is focused on providing real-time solutions and services to our customers in three areas of the hydrological and meteorological markets. First, we provide dataloggers, satellite transmitters/loggers and sensors. Second, we provide turnkey integrated systems for hydrological and meteorological monitoring networks and airport weather systems. Third, we provide services consisting of installation, maintenance of hydrological and meteorological systems, and other related engineering services. The Company's customers include a diversified base of federal, state, local and foreign governments, engineering companies, universities, and hydropower companies.

The Company's ongoing, strategic business units consist of the Company's Hydromet Products Division, the Integrated Systems Division, the Hydrological Services Division and the Airport Weather Systems division. Each unit includes a range of products and services designed to meet the specific needs of a particular customer segment.

### Hydromet Products Division

The Hydromet Products Division manufactures dataloggers, satellite transmitters/loggers and sensors. Sutron's data loggers collect sensor data and transmit the data to central facilities primarily by satellite radio but also by telephone, fiber optics and microwave. Sutron's sensors support the collection of hydrological and meteorological data and include a tipping bucket rain gauge, a barometric pressure sensor, a temperature sensor, and several water level sensors. The Company's equipment is compatible with sensors from other companies. Sutron has long-standing relationships with suppliers for wind speed and wind direction, water quality, humidity and solar radiation sensors. The Company received an ISO 9001 certification on March 12, 1999 and an ISO 9001:2000 certification on August 13, 2003. The principal products that are manufactured by the Hydromet Products Division are described below.

2

---

### 8210 Data Logger

The 8210 Data Logger/Transmitter is a simple-to-operate, low-cost data collection platform which supports a wide variety of telemetry applications. The 8210 is environmentally hardened, capable of operating from -40 C to 60 C, making it ideal for remote locations. As a data recorder, the 8210 will store over 65,000 readings in battery backed

## Edgar Filing: SUTRON CORP - Form 10KSB

memory. The 8210 supports a wide variety of communications, including radio, satellite, and telephone. The Telephone/Voice Synthesis option allows communications over standard telephone circuits using either a synthesized voice message or a modem connected to a computer terminal.

### Xpert and XLite Dataloggers

The Xpert Datalogger is the Companys next generation datalogger. It has a Microsoft CE operating system, a 486 processor, C++ programming and standard 2 MB memory that is expandable to over 1 gigabyte. The Xpert has enabled the Company to enter closely related environmental markets such as tides and weather monitoring. The XLite, a derived product based on the Xpert, does not have a display but is similarly capable. The XLite was released at the end of 2001.

### SatLink2

In January 2004, the SatLink2 was certified by the National Environmental Satellite, Data and Information Service (NESDIS). The SatLink2 is a redesign of the original SatLink transmitter in order to improve margins and to provide the latest features. The SatLink2 is a high data rate satellite transmitter that transmits at 100, 300 and 1200 baud, incorporates GPS and functions as a logger. The original SatLink was certified by NESDIS in July 2001 for operation on the Geostationary Operational Environment Satellite (GOES) system. NESDIS operates two U.S. Government environmental satellites on this system. All GOES customers are mandated by NESDIS to purchase high data rate satellite transmitters and to replace all old 100 baud transmitters within a ten-year period beginning in July 2001. NESDIS made this a requirement in order to increase the amount of data that the two GOES satellites can handle. SatLink is also certified on satellite systems in Europe and Asia and relays data from even the most remote sensors and loggers to everywhere around the globe and works with virtually all dataloggers. SatLink is programmable from any PC using software provided with the unit.

### Accubar Gauge Pressure Sensor

The Accubar Gauge Pressure sensor is a highly accurate solid state pressure transducer capable of measuring air/dry gas pressures from 0 to 22 psi with a maximum pressure of 35 psi. It is housed in an aluminum case and with its low power consumption and low maintenance requirements, it is ideal for remote monitoring applications.

### AccuBubble Self-Contained Bubbler System

The AccuBubble Self-Contained Bubbler is a mercury-free and nitrogen-free bubbler apparatus designed for low maintenance water level measuring. Using the Sutron Accubar Pressure Sensor as the control and sensing element makes the AccuBubble a very stable and highly accurate water level measuring device. The AccuBubble uses power conservation techniques to minimize current consumption. The bubbler purges the orifice line prior to each measurement. This eliminates the need for a constant bubble rate, which has been known to consume excessive power. In addition, the purging sequence prevents debris build up in the orifice line. The AccuBubble uses an oil-less, non-lubricated piston and cylinder compressor. This type of compressor is designed to give consistent air delivery without the use of a diaphragm which can rupture over time.

## Edgar Filing: SUTRON CORP - Form 10KSB

The AccuBubble uses the SDI-12 communications protocol as the control interface. This allows the unit to be configured by any data loggers supporting the SDI-12 standard.

### Tides and Ports Systems

The National Ocean Survey (NOS), part of the National Oceanic and Atmospheric Administration (NOAA), has the responsibility to accurately measure tide levels around the perimeter of the United States. NOS ensures that measurements have the highest accuracy by using the best water level instruments available. In 2004 and 2003 our Hydromet Products Division provided state-of-the-art tide stations to the National Ocean Survey valued at \$900,000 and \$676,000. Tide stations are based on our Xpert data logger and SatLink2. Xperts run the powerful Windows CE multi-tasking operating system and the Company has taken advantage of Windows CE to equip each tide station with software that meets and exceeds all of the NOS requirements. In 2004, the Company enhanced the capabilities of tides systems by adding Storm Surge/Tsunami software. This software provides added capability to provide tsunami warnings.

3

---

### Integrated Systems Division

The Integrated Systems Division provides system integration services consisting of the design and development of customer-specific hardware configurations and software applications for hydrological and meteorological monitoring and control systems, the sale of Sutrons real-time database software (XConnect), and long-term software support for XConnect users. This capability allows the Company to provide turnkey hydrological and meteorological systems to a variety of users. Projects range in size from one station to hundreds of stations. Projects usually require design, equipment integration, software application development and installation and training on both hardware and software. Projects can range in duration from a few days to twelve months depending on the scope and complexity of the system.

### Hydrological Services Division

The Company provides hydrological services including equipment installation and maintenance, data interpretation and analysis, flow modeling (low flow, rainfall runoff, unsteady flow routing, water surface profiles), field studies (time of travel, diffusion, dispersion, calibration of flow control structures, site location), hydrologic studies (water budget, regression analysis, basin inventory studies) and environmental permitting.

### Airport Weather Systems

The Airport Weather Systems Division was started in July 2003 with the hiring of a division manager with over 20 years experience in the Automatic Weather Observation System (AWOS) market. AWOS stations are installed at airports and provide monitoring of real-time weather data that is crucial to flight safety. An AWOS station typically includes a sensor suite to measure wind direction and speed, temperature, relative humidity, precipitation, and barometric pressure as well as cloud height and horizontal visibility/RVR. Sensors are connected to a Sutron datalogger which processes the data, stores it in a relational database and transmits real-time weather parameters to all

## Edgar Filing: SUTRON CORP - Form 10KSB

designated users, regardless of location. The system produces weather reports for aviation and meteorological use, virtually automatically and without need of human intervention. Sutron is leveraging its experience with sensors and data collection to enter this market.

### Distribution Methods of Products and Services

The Companys products and services are currently sold in the United States by the Companys direct sales force. As of December 31, 2004, the Company employed seven salaried sales and marketing personnel, including four engaged directly in field sales activities, and three in various other marketing and sales support functions. Internationally, the Company utilizes agents to sell its products and services.

4

---

### Customers

During 2004, approximately 44% of the Companys products and services were sold to the Federal Government. Revenues in 2004 among the various agencies were as follows: Department of Defense, 16%; Department of the Interior, 20%; Department of Commerce, 6% and various other agencies of the federal government, 2%. The revenues from the Corps of Engineers were spread among some ten (10) separate Districts, and the revenues from the Department of the Interior among two (2) agencies, the U.S. Geological Survey and the Bureau of Reclamation.

The Company also performed on various contracts of foreign origin. Total revenues from foreign customers amounted to approximately 32% of total revenues in 2004, 28% of total revenues in 2003 and 29% in 2002. Sutron actively markets its products and services internationally.

Contracts for products or services with federal, state and local government agencies typically allow for termination at the convenience of the government and for audit and annual negotiation of overhead rates. Upon termination, the Company would be entitled to reimbursement for allowable costs incurred and to a proportionate share of profits or fees earned to the date of termination. Such contracts are also typically dependent upon compliance by the contractor with applicable civil rights, equal employment opportunity, and contract procurement requirements.

The Company at this time has no reason to believe that any material changes will occur in the foreseeable future with respect to federal, state, or local government programs or services with respect to which the Company has been granted its contracts or provides its services. However, due to changes in administration, national goals and budgetary restrictions, funding of such programs or services could be altered or abolished. If a substantial cut-back in the level of funding by the applicable government agency were to occur, it would have a material adverse effect on the Company.

### Competition

## Edgar Filing: SUTRON CORP - Form 10KSB

The Company is aware of both domestic and foreign competitors offering complete real-time networks of their own and companies which fabricate real-time networks from components manufactured by themselves and others. The Company is also aware of numerous additional firms, ranging in size from large to small, from general to highly specialized, and from new to well established, offering competitive dataloggers, high data rate satellite transmitters, sensors and other instruments and software.

Several of these companies have financial, research and development, marketing, management and technical resources substantially greater than those of the Company. The Company may also be at a competitive disadvantage because it purchases certain sensors and other equipment components, as well as computer hardware and peripheral equipment, from manufacturers who are or may become competitors with respect to one or more of the Companys products.

The Company, with respect to its professional engineering and technical services, is in competition with numerous diverse engineering and consulting firms, many of which have larger staffs and facilities, and are better known, have greater financial resources, and have more experience than the Company. As to its hydrological services, the Company is aware that many firms offer equipment installation and maintenance services; some of these companies have larger staffs, are better equipped, and have greater financial, marketing and management resources than the Company.

Price, performance and experience are believed by the Company to be the primary competitive factors with respect to all of its products and services.

5

---

### Research and Development

During the three years ended December 31, 2004, 2003, and 2002, Sutron's internally funded research and development costs were \$1,018,874, \$1,065,558 and \$1,480,706 respectively.

In 2004, the Companys product development focus was on continual improvement of the SatLink2 and other core products. The Company certified the SatLink2 to operate on the European/African geostationary satellite system, METEOSAT, and on the Chinese environmental satellite, FY-2C. The Company expects China to be a significant market. The Company also worked towards certification of a 40 Watt SatLink2 that can be installed on existing and new ocean system buoys to send ocean and weather parameters including tsunami warnings through the global geostationary satellite systems in near real time. Certification of the 40 Watt SatLink2 was received from NESDIS in March 2005.

The Company invested heavily in the redesign of the SatLink transmitter beginning in 2002 and continuing in 2003. In January 2004, the SL2-G312-1 Satellite Transmitter (SatLink2) was certified by the NESDIS. The SatLink2 is a redesign of the original SatLink transmitter

## Edgar Filing: SUTRON CORP - Form 10KSB

in order to improve our margins and to provide the latest features. It is not only a satellite transmitter but also has logging capability which is attractive to customers who have limited logging requirements and therefore avoids the purchase of a separate datalogger.

In 2002, the company released the logger version of the SatLink and developed tidal monitoring applications based on the Xpert and XLite products that were instrumental in winning orders from the National Ocean Survey for tides systems. The Company released the Xpert and XLite dataloggers in 2001.

In 2002, the Company also released XConnect, a base station software application that is compatible with leading database software including Oracle and Microsoft SQL Server. The Company added enhancements to XConnect's reporting features in 2003 incorporating Crystal reports.

### Patents, Trademarks, Copyrights and Agreements

Although the Company does not deem patent protection to be of significant importance to its industry, it has and may in the future seek patents for certain of its products, real-time networks, and technology as well as Company software products, real-time networks, and technology. Company software products and innovations may not be patentable but may be subject to automatic but limited copyright protection. The Company has treated its products, real-time networks, technology and software as proprietary and relies on trade secret laws and internal non-disclosure safeguards rather than making their designs and processes generally available to the public by applying for patents. Further, the Company believes that, because of the rapid pace of technological change in the computer, electronics and telecommunications industries, patent and copyright protection is of less significance than factors such as the knowledge and experience of Company personnel and their ability to design and develop enhanced and new products, real-time networks and their components.

### Raw Materials

The raw materials used by the Company, such as electronic components and fabricated parts, are generally available from a wide variety of sources at competitive prices. The Company does not anticipate that its present or proposed business activities would be substantially adversely affected by the scarcity of any raw materials.

### Backlog

The Company's backlog at December 31, 2004 was \$5,620,968 as compared with \$4,350,688 at December 31, 2003. The Company anticipates that 76% of its 2004 year-end backlog will be shipped in 2005.

### Employees

The Company had a total of 72 employees as of December 31, 2004 of which 71 were full time.

## Edgar Filing: SUTRON CORP - Form 10KSB

### ITEM 2 - PROPERTIES

On July 30, 1992, the Company entered into a five and one-half year lease, for approximately 17,000 square feet of manufacturing and office space in Sterling, Virginia. The lease commenced on October 23, 1992. This facility allowed the Company to consolidate it's manufacturing, systems integration, research and development, and sales and administration departments into one building. An option for an additional five years was exercised in 1997. An option for an additional three years was exercised in November 2002. The lease will expire in March 2006.

In July, 1999, the Company leased additional space of approximately 7,000 square feet in Sterling, Virginia. Two departments, integrated systems and research and development were relocated to the new space during fiscal year 2000 in order to provide increased production and warehouse space at the corporate headquarters. The lease expires in March 2003 and has been renewed for three more years and will expire in March 2006.

The Company entered into a lease agreement in October 2002 for approximately 3800 square feet of office and warehouse space in West Palm Beach, Florida. The four year lease expires in October 2006. The Hydrological Services division will use this space which consists of both office and warehouse space.

The Company entered into a lease agreement for approximately 1500 square feet of office space in Brandon, Florida. The five-year lease, expires in December 2008. The Hydrological Services division will use this space for offices.

The Company entered into a lease agreement for approximately 1800 square feet of office space in New Delhi, India in November 2004. The lease term is month to month. The India branch office will use this space for offices.

The Company believes that its facilities are adequate for its present needs and that its properties are in good condition, well maintained and adequately insured.

### ITEM 3 - LEGAL PROCEEDINGS

From time to time, the Company is involved in litigation with customers, vendors, suppliers and others in the ordinary course of business, and a number of such claims may exist at any given time. All such existing proceedings are not expected to have a material adverse impact on the Company's results of operations or financial condition. The Company is a party to the proceedings discussed below.

In 2003, the Company filed a claim with the Advance Tax Court of India seeking a ruling on a decision by the Government of Andhra Pradesh (GoAP) of India to assess a 48% income tax on the Company's contract of approximately \$1,606,000. The GoAP believed that the Company had established a branch office in India and was therefore subject to Indian income tax. Although the Company did file an application for branch office status and received approval to open a branch office, the Company did not complete the registration and approval process with the Government of India and had not opened a branch office in India. The income tax

## Edgar Filing: SUTRON CORP - Form 10KSB

amount that is at issue was approximately \$770,000.

The Advance Tax Court of India heard the case in September 2004 and ruled that Sutron Corporation has a Permanent Establishment in India by virtue of its Country Manager who maintains an office in New Delhi. The Country Manager has the authority to sign contracts and perform other duties on behalf of the Company that fulfills the requirements of Indian tax law and as defined in Double Taxation Avoidance Agreement with the United States of America.

As a result of this ruling, Sutron Corporation entered into an agreement with Ernst & Young, New Delhi, India to file tax returns for the tax periods April 1, 2002 to March 31, 2003 and April 1, 2003 to March 31, 2004. The returns for both tax periods were filed in October 2004. A refund in the amount of approximately \$137,000 will be issued to Sutron for the tax period ending March 31, 2003 resulting from excess withholdings by the Government of Andhra Pradesh in excess of the tax amount of approximately \$5,250. A tax payment of approximately \$5,600 was made for the tax period ending March 31, 2004. All taxes paid in India will be applied as income tax credits on the Company's U.S. tax returns in accordance with the Double Taxation Avoidance Agreement with the United States of America and will therefore offset federal taxes.

7

-----

The Company is currently awaiting acceptance on two systems that were provided to the Government of Andhra Pradesh in 2002. All contractual items on the systems have been accepted with the exception of four water level monitoring sites that are located at reservoirs. The Government of Andhra Pradesh believes that the sites should go down approximately 100 meters at the sites. The Company does not believe that it is required to provide monitoring at 100 meters due to lack of specification in the Request for Proposal (RFP) and the Company's proposal that specified 10 meters at each site. This matter will most likely be referred to an arbitrator as per provisions of the contract. In the event that the Company loses the arbitration hearing, additional costs of approximately \$120,000 will be incurred to install the sites down to 100 meters.

#### ITEM 4 - SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matter was submitted during the fourth quarter of 2004 to a vote of the Company's security holders, either through the solicitation of proxies or otherwise.

#### PART II

#### ITEM 5 - MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

(a) Market Information

## Edgar Filing: SUTRON CORP - Form 10KSB

The common stock of Sutron Corporation is quoted over the counter through the NASD Bulletin Board supplied by the National Association of Securities Dealers, Inc. under the symbol STRN, and through the Pink Sheet Service of the National Quotation Bureau, Inc. The table below sets forth the high and low sales prices for the past two years.

### MARKET INFORMATION

		2004		2003	
		HIGH	LOW	HIGH	LOW
		-----	----	-----	----
First Quarter	\$1.70		\$.65	\$1.28	\$.67
Second Quarter	3.75		1.25	1.40	.61
Third Quarter	4.50		2.80	1.35	.60
Fourth Quarter	12.00		3.90	1.45	.70

(b) Approximate Number of Equity Shareholders:  
 Title of Class: Common Stock, \$.01 par value  
 Approximate Number of Record Holders At March 25, 2005: 185

(c) Dividends:  
 The Company has never paid a dividend on its common stock and the Board of Directors intends for the foreseeable future to retain all earnings for use in the Companys business.

8

### ITEM 6 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion contains forward-looking statements, which reflect the current views of the Company with respect to future events that could have an effect on its future financial performance. These statements may include such words as "expects," "believes," "estimates," and similar expressions. These forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from historical results or those currently anticipated. Readers are cautioned not to place undue reliance on these forward-looking statements.

The following table sets forth, for the periods presented, certain income statement data of the Company expressed as a percentage of revenues:

The following table sets forth, for the periods presented, certain income statement data of the Company expressed as a percentage of revenues:

	Percentage of Revenues		
	2004	2003	2002

Fiscal 2004 Compared to Fiscal 2003

### Results of Operations

The Companys revenues for 2004 increased 51% to \$16.7 million from \$11 million in 2003. The Company derives its revenues from the sale of products consisting primarily of dataloggers, satellite transmitters/loggers and sensors, integrated systems, hydrological services consisting primarily of equipment installation and maintenance and engineering services and airport weather systems.

Revenues from sales to domestic customers increased in 2004 to \$11.3 million from \$7.9 million in 2003, an increase of 42%. Standard products sales increased to \$6.96 million in 2004 from \$5.65 million in 2003. Revenues from integrated systems, which includes special projects and the Companys branch office in India, increased significantly to \$1.95 million compared to \$1.3 million in 2003 primarily due to increased software services projects and engineering services provided to Hanscom Air Force Base to develop the AN-FMQ-13(V)2 wind sensor system. Revenues for hydrological services increased to \$2.36 million from \$1 million in 2003 due to the expansion of operations in Florida.

Revenues from international sales increased 74% to \$5.4 million in 2004 from \$3.1 million in 2003. Sales of products increased to \$3.73 million from \$944 thousand in 2003 due to the Company providing dataloggers, sensors and other equipment totaling \$2.4 million to a Canadian consortium for a flow monitoring and flood warning system in Poland. Revenues from integrated systems, which includes special projects and the Companys branch office in India, decreased to \$1.7 million from \$2.0 million due to fewer international systems projects. Revenue from airport weather systems, a division started in 2003, declined to \$8 thousand in 2004 from \$70 thousand in 2003.

The Companys largest customer in each of years 2004 and 2003 was the Department of the Interior, the principal agencies being the US Geological Survey and the Bureau of Reclamation, which accounted for 20% and 28% of revenues, respectively. Non-federal government, commercial and international revenues represented 56% of revenues in 2003 versus 55% in 2002.

9

-----

### Gross Profit

Gross profit for 2004 increased 90% to \$6.43 million from \$3.36 million in

## Edgar Filing: SUTRON CORP - Form 10KSB

2003. Gross profit as a percentage of revenues for 2003 increased to 38.5% as compared to 30.5% in 2003.

Gross profit improved in 2004 due to the increase in revenues and due to improvements in the design and manufacturability of the SatLink 2 Satellite Transmitter/Logger. The Company certified the Satlink2 in January 2004 and began shipping units in May 2004. The SatLink2 was designed to have fewer parts, improved manufacturability and improved features compared to the SatLink . The Company also benefited from large project awards with Hanscom Air Force Base and a Canadian consortium for a flow monitoring and flood warning system in Poland. Both contracts required significant quantities that allowed the Company to obtain supplier pricing discounts that greatly improved margins. The Companys gross margin is dependent on product volumes, product mix, overhead expenses and projects that vary in terms of size, complexity and pricing competitiveness. All of these factors fluctuate from year to year.

### Selling, General and Administrative Expenses

Selling, general and administrative expenses were \$2.4 million in 2004 as compared with \$2.2 million in 2003. Selling, general and administrative expenses as a percentage of revenues decreased to 14.4 in 2004 from 20.1% in 2003 due to the increase in revenues.

### Research and Development Expenses

Research and development expenses decreased 4% to \$1.02 million in 2004 from \$1.06 million in 2003. Research and development expenses as a percentage of revenues decreased to 6.1% in 2004 from 9.7% in 2003. In 2004, engineers worked directly on certain contracts including the Hanscom Air Force Base AN-FMQ-13(V)2 Wind Sensor System resulting in engineering costs being included in cost of sales.

In 2004, the Companys product development focus was on continual improvement of the SatLink2 and other core products. The Company certified the SatLink2 to operate on Chinas environmental satellite, FY-2C. The Company expects China to be a significant market. The Company also worked towards certification of a 40 Watt SatLink2 Satellite Transmitter/Logger that can be installed on existing and new ocean system buoys to send ocean and weather parameters including tsunami warnings through the global geostationary satellite systems in near real-time. Certification of the 40 Watt SatLink2 Satellite Transmitter/Logger was received from NESDIS in March 2005.

The Company continued its development efforts in 2004 relating to tides monitoring systems by adding Storm Surge/Tsunami software. Tides systems are based on the Xpert datalogger and the SatLink2 transmitter. The Company received orders for tides systems totaling \$900 thousand in 2004 and \$676 thousand in 2003. The Company expects a significant increase in revenue from tides systems in 2005 due to increased funding by the federal government for tide monitoring and tsunami warning systems.

### Other Income (Expense)

Other income and expenses consisted of interest expenses of \$30 thousand in 2004 and 2003.

### Fiscal 2003 Compared to Fiscal 2002

#### Results of Operations

The Companys revenues in 2003 increased 8% to \$11 million from \$10.2 million

## Edgar Filing: SUTRON CORP - Form 10KSB

in 2002. The Company derives its revenues from the sale of standard products consisting primarily of dataloggers, SatLink transmitters and sensors, systems and software that are done on a project specific basis, hydrological and engineering services and airport weather systems.

Revenues from sales to domestic customers increased in 2003 to \$7.9 million from \$7.25 million in 2002, an increase of 8.7%. Standard products sales increased slightly to \$5.65 million in 2003 from \$5.6 million in 2002. Revenues from integrated systems and software were down \$256 thousand to \$1.3 million from \$1.56 million. Revenues for hydrological services increased to \$992 thousand from \$110 thousand in 2002 due to the expansion of operations in Florida and winning five major multi-year contracts in 2002 and 2003 with the South Florida Water Management District.

Revenues from international sales increased slightly to \$3.1 million in 2003 from \$2.95 million in 2002. Standard products decreased to \$944 thousand in 2003 from \$1.3 million in 2002 due to decreased sales from China. Revenues from integrated systems and software were up \$400 thousand to \$2.0 million from \$1.6 million due to several large projects including a \$499 thousand project to provide a rainfall measuring system to the government of Morocco, a \$730 thousand World Meteorological project to provide airport meteorological systems to 13 small island states in the Caribbean and a \$446 thousand standard product order from a hydropower company in Venezuela. The Company sold its first airport weather system in 2003 and realized revenue of \$71,000.

The Companys largest customer in 2003 and 2002 was the Department of the Interior, the principal agencies being the US Geological Survey and the Bureau of Reclamation, which accounted for 28% and 26% of revenues. Commercial and international revenues represented 55% of revenues in 2003 versus 48% in 2002.

10

---

### Gross Profit

Gross profit for 2003 decreased 2.7% to \$3.36 million from \$3.45 million in 2002. Gross margin as a percentage of revenues for 2002 decreased to 30.5% as compared to 33.8% in 2002. Increased sales of SatLink transmitters caused a decrease in the Companys margins. The Companys new SatLink transmitter, the SL2-G312-1, was certified in January 2004 and will significantly improve future margins due to fewer parts and improved manufacturability. The Companys margins were also impacted by three projects that were awarded in 2002. Two projects were with the Government of Andhra Pradesh of India and one project was with the Meteorological Service of Mexico. All three projects were bid very competitively. The company completed the Mexico project in 2003. The Government of Andhra Pradesh projects are near completion. The Company anticipates that these projects will be completed in mid 2004. The Companys gross margin is dependent on product and system costs, product mix and overhead expenses, all of which fluctuate from year to year.

### Selling, General and Administrative Expenses

Selling, general and administrative expenses were level at \$2.2 million in 2003 and 2002. Selling, general and administrative expenses as a percentage of revenues decreased to 20.8% in 2003 from 21.8% in 2002 due primarily to the increase in sales.

## Edgar Filing: SUTRON CORP - Form 10KSB

### Research and Development Expenses

Research and development expenses decreased 28% to \$1.06 million in 2003 from \$1.48 million in 2002. Research and development expenses as a percentage of revenues decreased to 9.7% in 2003 from 14.5% in 2002. The primary reason for the decrease was the completion of Xconnect systems software. Upon its completion in late 2002, the Company transferred several software engineers into direct departments in order to provide customers with systems and application development services.

In 2003, the Companys product development focus was on the design and certification of the SatLink2 in order to enhance the product and improve margins. The SatLink2 is a high data rate satellite transmitter that transmits at 100, 300 and 1200 baud, incorporates GPS and functions as a logger as well. All GOES satellite customers are mandated by NESDIS to purchase high data rate satellite transmitters and to replace all old 100 baud transmitters within a ten-year period effective July 2001. The Company believes that the SatLink2 will allow it to dominate the replacement market.

In 2003, the Company continued its development efforts relating to tidal monitoring applications by introducing enhancements to its tides monitoring systems. The tides systems are based on the Xpert and XLite dataloggers and use the SatLink transmitter. The Company won orders totaling \$663 thousand in 2003 and \$450 thousand in 2002 for tides systems. The Company also completed the development of an analog expansion module in 2003.

### Other Income (Expense)

Other income and expenses consisted of interest expenses of \$30 thousand in 2003 compared with \$47 thousand in 2002.

### Liquidity and Capital Resources

The Companys working capital was \$5.35 million at December 31, 2004 compared with \$3.4 million at December 31, 2003. Cash on hand was \$1,419,171 at December 31, 2004 compared to \$388,612 at December 31, 2003. Of the cash balance on hand at December 31, 2004, \$277,454 was restricted and served as collateral for international standby letters of credit and \$108,568 was restricted and served as bid bonds on international tenders.

Net cash provided by operating activities was \$2,133,859 for the year ended December 31, 2004 as compared to cash used by operating activities of \$526,355 for the year ended December 31, 2003 and cash provided by operations of \$853,560 for the year ended December 31, 2002.

Net cash used in investing activities was \$213,709 for the year ended December 31, 2004, compared to \$156,983 and \$61,698 for the years ended December 31, 2003 and 2002, and was primarily due to purchases of property and equipment.

Net cash used by financing activities was \$893,740 for the year ended December 31, 2004 due to payments on the line of credit and on shareholder and term notes. Net cash provided by financing activities was \$670,210 for the year ended December 31, 2003 due to proceeds from the line of credit and shareholder notes. Cash used by financing activities was 493,098 for the year ended December 31, 2002 due to payments on the line of credit and term notes.

The Company has a revolving credit facility of \$1,625,000 with BB&T Bank.

## Edgar Filing: SUTRON CORP - Form 10KSB

The credit facility expires on August 5, 2005. Management believes that its existing cash resources, cash flow from operations and short-term borrowings on the existing credit line will provide adequate resources for supporting operations during fiscal 2005.

### ITEM 7 - FINANCIAL STATEMENTS

The financial statements required by this Item 7 are listed in Item 13(a) (1) and begin at page F-1 of this Report.

### ITEM 8 - CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There were no changes in accountants or disagreements with accountants on accounting and financial disclosure.

### ITEM 8A - CONTROLS AND PROCEDURES

(a) Evaluation of disclosure controls and procedures. Based on their evaluation of the Companys disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934) as of a date within 90 days of the filing date of this Annual Report on Form 10-K, the Companys chief executive officer and chief financial officer have concluded that the Companys disclosure controls and procedures are designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and are operating in an effective manner.

(b) Changes in internal controls. There were no significant changes in the Companys internal controls or in other factors that could significantly affect these controls subsequent to the date of their most recent evaluation.

## PART III

Certain information required by Part III is omitted from this report because we intend to file a definitive Proxy Statement pursuant to Regulation 14A no later than 120 days after the end of the fiscal year covered by this report, and certain information to be included therein is incorporated herein by reference.

### ITEM 9 - DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS

The information required by this Item is incorporated by reference to the Proxy Statement under the sections captioned "Election of Directors," "Executive Officers," "Executive Compensation", "Compliance with Section 16(a) of the Securities Exchange Act of 1934", "Code of Ethics", and "Audit Committee and Audit Committee Financial Expert".

## Edgar Filing: SUTRON CORP - Form 10KSB

### ITEM 10 - EXECUTIVE COMPENSATION

The information required by this Item is incorporated by reference to the Proxy Statement under the sections captioned "Election of Directors," "Executive Officers," "Executive Compensation" and "Compliance with Section 16(a) of the Securities Exchange Act of 1934."

### ITEM 11 - SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information under the caption "Principal Shareholders," and "Management Ownership of Common Stock" appearing in the Proxy Statement, is incorporated herein by reference.

### ITEM 12 - CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information under the heading "Certain Transactions," appearing in the Proxy Statement, is incorporated herein by reference.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders  
Sutron Corporation  
Sterling, Virginia

We have audited the accompanying balance sheets of Sutron Corporation as of December 31, 2004 and 2003, and the related statements of operations, stockholders' equity, and cash flows for each of the three years ended December 31, 2004. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Sutron Corporation as of December 31, 2004 and 2003, and the results of its operations and its cash flows for each of the three years ended December 31, 2004, in conformity with generally accepted accounting principles.

Thompson, Greenspon & Co.
